Independent Auditors' Report

To the Retirement Oversight Committee of
Case Western Reserve University
Employees' Retirement Plan B
Cleveland, Ohio

Opinion

We have audited the financial statements of Case Western Reserve University Employees' Retirement Plan B (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 ("ERISA"), which comprise the statements of net assets available for benefits as of June 30, 2023 and 2022, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of June 30, 2023 and 2022, and the changes in its net assets available for benefits for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America ("GAAS"). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audits of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audits of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but it is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits, significant audit findings, and certain internal control-related matters that we identified during the audits.

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of assets (held at end of year) as of June 30, 2023 and reportable transactions for the year ended June 30, 2023 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

NOTES TO FINANCIAL STATEMENTS

Note 1. Description of Plan

Information about the Case Western Reserve University Employees' Retirement Plan B (the "Plan") including present and future benefits, vesting, and the Pension Benefit Guaranty Corporation's ("PBGC") benefit guarantee provisions is contained in the Plan Document. Copies of the Summary Plan Description are available from the Retirement Oversight Committee.

General – The Plan is a defined benefit plan covering substantially all hourly and certain salaried employees of Case Western Reserve University (the "University"), which provides pension and disability benefits for such employees and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Effective July 1, 1992, the Plan was amended and redesigned as a cash balance defined benefit plan whereby the University credits 7% of a participant's annual compensation to the participant's account. The balance maintained in that account also earns an annual interest credit. The interest credit earned was 6% for the years ended June 30, 2023 and 2022. Participants active prior to July 1, 1992 are entitled to their plan benefit earned prior to 1992 plus the greater of (i) the cash balance benefit earned since 1992 and (ii) a benefit calculated based upon the prior benefit formula applied to eligible compensation and years of active plan participation since 1992, subject to certain limitations and minimums. The Plan was amended to close the Plan to new entrants effective July 1, 2015. Employees hired prior to July 1, 2015 will continue to accrue benefits in accordance with the Plan.

Participants are generally eligible for normal retirement benefit payments upon reaching age 65. The amount of individual pension benefits is based upon one or more factors including compensation, years of service, and age, as defined by the Plan. The Plan also provides for the payment of disability, early retirement, and deferred vested retirement benefits as well as the optional payment of benefits to the surviving spouse or beneficiary of a participant.

Participants will generally receive benefits under an annuity arrangement or a lump-sum option. Participants who are entitled to a cash balance benefit may also elect to receive such benefit in a lump-sum.

Funding – The University contributes to the Plan amounts required by law. At the University's discretion, funds that exceed the required amounts may be contributed to ensure the Plan is funded at certain minimum thresholds. The Plan has met the ERISA minimum funding requirements.

Plan Termination – The University has the right under the Plan to discontinue contributions at any time and to terminate the Plan. Should the Plan terminate at some future time, its net assets may not be available on a pro-rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of these benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC's benefit guarantee; other benefits may not be provided for at all.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Note 2. Significant Accounting Policies

Basis of Accounting – The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("GAAP").

Use of Estimates – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts of assets, liabilities, and changes therein; disclosures of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition – Plan investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's management determines the Plan's valuation policies utilizing information provided by TIAA-CREF (the "Custodian"). See Note 5 for a discussion of fair value measurements.

Purchases and sales of investments are recorded on a trade-date basis. Interest is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Risks and Uncertainties – The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Contributions to the Plan and the actuarial present value of accumulated plan benefits are determined based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions could occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

Payment of Benefits – Benefit payments to participants are recorded upon distribution.

Administrative Expenses – Actuarial and other fees are charged directly to the Plan as administrative expenses. Other administrative expenses are paid by the University or the Plan at the discretion of the University.

Evaluation of Subsequent Events – The Plan has evaluated subsequent events and transactions for potential recognition and presentation through the date the financial statements were available to be issued, April 9, 2024.

CASE WESTERN RESERVE UNIVERSITY EMPLOYEES' RETIREMENT PLAN B

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Note 3. Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provision to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are accumulated based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of annual benefit accruals as of the benefit information date. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits was estimated by the Plan's independent actuaries. This amount results from applying certain actuarial assumptions to plan participant data to determine the accumulated plan benefits earned to date by the participants. The present value reflects the time value of money, through discounts for interest, and the probability of payment recognizing decrements such as for death, disability, withdrawal, or retirement between the valuation date and the expected dates of payment.

The accumulated plan benefit information as of July 1, 2022 and 2021 is as follows:

	<u>2022</u>	<u>2021</u>
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving payments	\$ 35,442,516	\$ 34,119,854

The significant assumptions underlying the actuarial computations are as follows:

Rate of return on investments	July 1, 2022: 7.50% July 1, 2021: 7.50%
Mortality table	July 1, 2022: Pri-2012 Employee Mortality with MP-2021 generational projection July 1, 2021: Pri-2012 Employee Mortality with MP-2020 generational projection
Retirement	Graded scale - the Plan uses age-graded rates ranging from 1% at ages 55-60 to 100% at age 79
Form of payment	Life annuity for pre-July 1, 1992 accruals and the greater of lump-sum or cash balance with 50% lump sum and 50% life annuity for post-July 1, 1992 accruals

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 4. Investments

Investments classified as alternative investments represent holdings of investment "feeder" funds. These funds themselves invest in offshore investment funds which hold underlying equity interests and various derivative instruments. Alternative investments comprise approximately 16% and 19% of the Plan's total investments at June 30, 2023 and 2022, respectively.

These investment strategies often result in holdings that are not generally liquid, require a notice period for withdrawal, and are valued at fair value from reports provided by investment managers. Because of the inherent uncertainty of the valuations, the fair values may differ significantly from values that would have been used had a ready market for these investments existed, and the differences could be material.

Note 5. Fair Value Measurements

The Plan estimates the fair value of financial instruments using available market information and other generally accepted valuation methodologies. The inputs used to measure fair value are classified into three levels:

Level 1 – Quoted market prices in active markets for identical assets and liabilities

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Note 5. Fair Value Measurements (Continued)

Level 2 – Observable market-based inputs or unobservable inputs that are corroborated by market data

Level 3 – Unobservable inputs in which little or no market data exists

The following is a description of the valuation methodologies used for investments of the Plan measured at fair value at June 30, 2023 and 2022:

- Money market and mutual funds – Money market and mutual funds are valued at the quoted net asset values of shares held by the Plan at the end of the year, which are considered to be Level 1 inputs.
- Guaranteed investment contract – The investment in the guaranteed investment contract is reported at fair value as determined by TIAA-CREF. This value represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses and is determined to be fair value as it is the transfer price that would be used in an orderly transaction between market participants at the measurement date. It is classified as Level 3 as there are no quoted prices or other observable inputs for pricing. Accordingly, the Plan does not use separate quantitative information to value the contract. In determining the reasonableness of the value, the plan administrator evaluates a variety of factors including review of existing contracts, economic conditions, and overall credit ratings.
- Alternative investments – The Plan has interests in investment funds structured as limited partnerships. These accounts are valued at fair value using the net asset value ("NAV") per share (or its equivalent) as a practical expedient, therefore, they have not been classified in the fair value hierarchy.
- Insurance company pooled separate account – The TIAA Real Estate Account's value is principally derived from the market value appraisals of the underlying real estate holdings or other real estate-related investments. This account is valued at fair value using the NAV per share (or its equivalent) as a practical expedient, therefore, it has not been classified in the fair value hierarchy.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. There have been no changes in the methodologies used from 2022 to 2023. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

(a) These funds invest in a variety of asset classes including currencies, fixed income securities, equities, pooled investment vehicles, and derivative instruments. Certain investments are valued based upon pricing in active markets. Other asset valuations, which are developed by the general partners that manage the partnerships, are based on proprietary appraisals, the application of public market multiples to private company cash flows, and the utilization of market transactions that provide valuation information for comparable companies and other methods and are developed by the general partners that manage the partnerships.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Note 5. Fair Value Measurements (Continued)

(b) The TIAA Real Estate Account's value is principally derived from the market value appraisals of the underlying real estate holdings or other real-estate related investments. The TIAA general account provides this real estate fund with a liquidity guarantee to ensure there are funds to meet redemption, transfer, or cash withdrawal requests.

Note 6. Guaranteed Investment Contract

The Plan has entered into a guaranteed investment contract with TIAA-CREF. Contributions made under this contract are maintained by TIAA-CREF in an unallocated fund to which it adds interest at a guaranteed rate between 1% and 3%. At the direction of the Plan's administrator, a single premium to buy an annuity for a retiring participant is withdrawn by TIAA-CREF from the unallocated fund. Purchased annuities are contracts under which TIAA-CREF is obligated to pay benefits to named participants or their beneficiaries.

Funds under the guaranteed investment contract that have been allocated and applied to purchase annuities, which obligate TIAA-CREF to pay the related pension benefits, are excluded from plan assets.

Note 7. Party-in-Interest Transactions

The Plan has invested in shares of investments managed by TIAA-CREF, the Plan's Custodian, as well as investments managed by Benefit Street Partners, Elliot Management Group, First Eagle Investment Management, and Golub Capital, the Plan's investment managers. The Plan pays fees related to these transactions. These parties are fiduciaries as defined by the Plan and, therefore, these transactions qualify as party-in-interest.

Note 8. Income Tax Status

The Internal Revenue Service ("IRS") has determined and informed the Plan by a letter dated April 5, 2014, that the Plan is designed and in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plan has been amended since the IRS ruling; however, the plan administrator believes the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

Included in the Plan's underlying investments are units of limited partnerships. Investments in certain unit classes of these partnerships carry the possibility of generating unrelated business income ("UBI"). In this situation, the Plan would be liable for income taxes on the UBI after offsetting any related expenses and/or investment loss carryforward amounts. In neither 2023 nor 2022 was the Plan invested in any such partnership unit classes and, therefore, was not liable for any income taxes in those years.

The plan administrator has analyzed tax positions taken by the Plan and has concluded that, as of June 30, 2023, there are no uncertain positions taken or expected to be taken that would require such recognition or disclosure in the financial statements.

Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Actuarial Assumptions and Methods

Economic Assumptions

Interest rate basis:

- Applicable month March
- Yield curve basis 3-Segment rates

Interest rates:	Reflecting Stabilization	Not Reflecting Stabilization
• First segment rate	4.75%	0.87%
• Second segment rate	5.18%	2.64%
• Third segment rate	5.92%	3.28%
• Effective interest rate	5.59%	3.04%

Annual rates of increase:

- Salaries 2.25%
- Future Social Security wage bases 3.00%
- Future annual interest credit to participant accounts 6.00%

Administrative expenses \$3,279,803; assumed expenses are equal to the actual expenses paid from the trust the preceding year.

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums (if the alternative method is used), the PBGC FTAP, the PBGC 4010 FS, and the maximum deductible limit.

Demographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee becomes a participant

New or rehired employees It was assumed there will be no new or rehired employees.

Mortality:

- Healthy participants Separate rates for non-annuitants (based on RP-2014 "Employees" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2020) and annuitants (based on RP-2014 "Healthy Annuitants" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2020)
- Disabled participants Same as mortality for healthy participants
- Lump sum/annuity conversions PPA 2022 Optional Combined unisex mortality tables, with no projection

Termination Sample rates varying by age and service:

Percentage leaving during the year					
Years of service	Age 20	Age 30	Age 40	Age 50	Age 55
Less than 3	0.250	0.250	0.250	0.250	0.250

Retirement

Sample rates varying by age:

Percentage retiring during the year	
Age	Rate
55-60	1%
61-62	5%
63-64	2%
65-78	30%
79	100%

Average retirement age: 66

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55
- Deferred vested benefit Age 65
- Disability benefit Upon disablement
- Retirement benefit Upon termination of employment

Form of payment for:

- Active participant

Pre-July 1, 1992 benefit:
Life annuity

Post-July 1, 1992 benefit:
Prior plan benefit for service after July 1, 1992 is converted to a lump sum and compared to the cash balance account. The greater of the two benefits is then valued with 50% electing lump sum and 50% electing life annuity.
- Deferred participant

Pre-July 1, 1992 benefit:
Life annuity commencing at age 65

Post-July 1, 1992 benefit:
The post July 1, 1992 cash balance account is converted to an annuity by projecting to age 65 and dividing by the current lump sum conversion rates.

SCHEDULE SB ATTACHMENTS

Spouse age Wives are assumed to be three years younger than husband.

Covered pay Base salary exclusive of overtime

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits as required by regulations under IRC §430

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Decrement timing The assumptions used are collectively called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements, the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets for determining minimum required contributions The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.

Benefits not valued Benefits for employees who have terminated without vested rights but may be rehired in time to have benefits restored were not valued.

Sources of Data and Other Information

The plan sponsor furnished participant data as of July 1, 2022. Information on assets, contributions, and plan provisions was supplied by the plan sponsor. We have not independently verified the accuracy or completeness of the data or information provided, but we have performed limited checks for reasonableness. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with the plan sponsor, the following assumptions were made for missing or apparently inconsistent data elements:

- Female (male) participants missing beneficiary birth date and sex information were assumed to have male (female) beneficiaries three years older (younger) than the original participants.
- Deceased participants (with prior year unknown or joint-and-survivor benefit payment forms) received with no beneficiary information were assumed to have beneficiaries due deferred benefits based on prior year information.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
----------------------	--

Cash balance interest crediting rate	The plan credits interest to cash balance accounts at a rate of 6.00%.
---	--

Lump sum conversion rate	As required by IRC §430, lump sum benefits are valued using “annuity substitution,” so that the interest rates assumed are effectively the same as described above for the discount rate.
---------------------------------	---

Rates of increase in:

- | | |
|---|---|
| • Compensation | Assumed increases were chosen by the plan sponsor and represent an estimate of future experience. |
| • National average wages (NAW) (e.g., Social Security wage bases) | The assumed NAW is based on assumed CPI as shown below, plus assumed increases in real wages (the portion of GDP increases that becomes part of wages). Such assumed future increases in real wages are based on a combination of historical averages and an expectation that the future rates will be lower (higher) than historical averages. |

Rates of increase in (continued):

- Increases in statutory limits (CPI) The assumed CPI is based on a combination of historical average CPI and current conditions. The final assumption represents a composite of current rates and long term expected rates.

Administrative expenses

Administrative expenses are estimated by determining the expected actual expenses for the coming year, reflecting items like expected PBGC premiums and the actual expenses paid from the trust the preceding year.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h).

Retirement

Retirement rates were based on an experience study conducted in 2014. Going forward, regular consideration will be given on whether any conditions have changed that would be expected to produce different results in the future.

Form of payment

The percentage of retiring participants assumed to take annuities and lump sums were set at 50%. Going forward, regular consideration will be given on whether any conditions have changed that would be expected to produce different results in the future.

Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law," as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430 or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target and target normal cost was updated to reflect the latest mortality improvement scale, as required by guidance issued by IRS under IRC §430. The mortality table was updated to include one additional year of projected mortality improvement as required by guidance issued by IRS under IRC §430.

The assumed administrative expenses added to service cost were changed from \$3,228,239 for the prior valuation to \$3,279,803 for the current valuation.

The lump sum mortality was changed from the PPA 2021 Optional Combined unisex mortality tables, with no projection, for the prior valuation, to the PPA 2022 Optional Combined unisex mortality tables, with no projection, for the current valuation.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Actuarial Assumptions and Methods

Economic Assumptions

Interest rate basis:

- Applicable month March
- Yield curve basis 3-Segment rates

Interest rates:	Reflecting Stabilization	Not Reflecting Stabilization
• First segment rate	4.75%	0.87%
• Second segment rate	5.18%	2.64%
• Third segment rate	5.92%	3.28%
• Effective interest rate	5.59%	3.04%

Annual rates of increase:

- Salaries 2.25%
- Future Social Security wage bases 3.00%
- Future annual interest credit to participant accounts 6.00%

Administrative expenses \$3,279,803; assumed expenses are equal to the actual expenses paid from the trust the preceding year.

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums (if the alternative method is used), the PBGC FTAP, the PBGC 4010 FS, and the maximum deductible limit.

Demographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee becomes a participant

New or rehired employees It was assumed there will be no new or rehired employees.

Mortality:

- Healthy participants Separate rates for non-annuitants (based on RP-2014 "Employees" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2020) and annuitants (based on RP-2014 "Healthy Annuitants" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2020)
- Disabled participants Same as mortality for healthy participants
- Lump sum/annuity conversions PPA 2022 Optional Combined unisex mortality tables, with no projection

Termination Sample rates varying by age and service:

Percentage leaving during the year					
Years of service	Age 20	Age 30	Age 40	Age 50	Age 55
Less than 3	0.250	0.250	0.250	0.250	0.250

Age	Rate
55-60	1%
61-62	5%
63-64	2%
65-78	30%
79	100%

Average retirement age: 66

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55
- Deferred vested benefit Age 65
- Disability benefit Upon disablement
- Retirement benefit Upon termination of employment

Form of payment for:

- Active participant

Pre-July 1, 1992 benefit:
Life annuity

Post-July 1, 1992 benefit:
Prior plan benefit for service after July 1, 1992 is converted to a lump sum and compared to the cash balance account. The greater of the two benefits is then valued with 50% electing lump sum and 50% electing life annuity.
- Deferred participant

Pre-July 1, 1992 benefit:
Life annuity commencing at age 65

Post-July 1, 1992 benefit:
The post July 1, 1992 cash balance account is converted to an annuity by projecting to age 65 and dividing by the current lump sum conversion rates.

Spouse age Wives are assumed to be three years younger than husband.

Covered pay Base salary exclusive of overtime

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits as required by regulations under IRC §430

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Decrement timing The assumptions used are collectively called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements, the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets for determining minimum required contributions The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.

Benefits not valued Benefits for employees who have terminated without vested rights but may be rehired in time to have benefits restored were not valued.

Sources of Data and Other Information

The plan sponsor furnished participant data as of July 1, 2022. Information on assets, contributions, and plan provisions was supplied by the plan sponsor. We have not independently verified the accuracy or completeness of the data or information provided, but we have performed limited checks for reasonableness. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with the plan sponsor, the following assumptions were made for missing or apparently inconsistent data elements:

- Female (male) participants missing beneficiary birth date and sex information were assumed to have male (female) beneficiaries three years older (younger) than the original participants.
- Deceased participants (with prior year unknown or joint-and-survivor benefit payment forms) received with no beneficiary information were assumed to have beneficiaries due deferred benefits based on prior year information.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
----------------------	--

Cash balance interest crediting rate	The plan credits interest to cash balance accounts at a rate of 6.00%.
---	--

Lump sum conversion rate	As required by IRC §430, lump sum benefits are valued using “annuity substitution,” so that the interest rates assumed are effectively the same as described above for the discount rate.
---------------------------------	---

Rates of increase in:

- | | |
|---|---|
| • Compensation | Assumed increases were chosen by the plan sponsor and represent an estimate of future experience. |
| • National average wages (NAW) (e.g., Social Security wage bases) | The assumed NAW is based on assumed CPI as shown below, plus assumed increases in real wages (the portion of GDP increases that becomes part of wages). Such assumed future increases in real wages are based on a combination of historical averages and an expectation that the future rates will be lower (higher) than historical averages. |

Rates of increase in (continued):

- Increases in statutory limits (CPI) The assumed CPI is based on a combination of historical average CPI and current conditions. The final assumption represents a composite of current rates and long term expected rates.

Administrative expenses

Administrative expenses are estimated by determining the expected actual expenses for the coming year, reflecting items like expected PBGC premiums and the actual expenses paid from the trust the preceding year.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h).

Retirement

Retirement rates were based on an experience study conducted in 2014. Going forward, regular consideration will be given on whether any conditions have changed that would be expected to produce different results in the future.

Form of payment

The percentage of retiring participants assumed to take annuities and lump sums were set at 50%. Going forward, regular consideration will be given on whether any conditions have changed that would be expected to produce different results in the future.

Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law," as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430 or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target and target normal cost was updated to reflect the latest mortality improvement scale, as required by guidance issued by IRS under IRC §430. The mortality table was updated to include one additional year of projected mortality improvement as required by guidance issued by IRS under IRC §430.

The assumed administrative expenses added to service cost were changed from \$3,228,239 for the prior valuation to \$3,279,803 for the current valuation.

The lump sum mortality was changed from the PPA 2021 Optional Combined unisex mortality tables, with no projection, for the prior valuation, to the PPA 2022 Optional Combined unisex mortality tables, with no projection, for the current valuation.
