Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets for determining minimum required contributions	<p>Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable.</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.</p>
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued

Sources of Data and Other Information

WTW used asset data supplied by the trustee. Emerson furnished participant data as of October 1, 2022. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Plan-related expenses	Assumed plan related expenses are set based on a combination of recent plan experiences and expectations for the current year.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	<p>Assumptions used for funding purposes are as prescribed by IRC §430(h).</p> <p>We believe the assumptions do not significantly conflict with what would be reasonable because they reflect recent experience, and are adjusted to reflect the plan sponsor's expectations regarding future mortality improvement.</p>
Termination	<p>Termination rates were based on actual plan experience through Fiscal 2021, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.</p> <p>Assumed termination rates differ by age and service because of observed differences in termination rates by service.</p> <p>For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.</p>
Retirement	<p>Retirement rates were based on actual plan experience through Fiscal 2021, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.</p> <p>Retirement rates differ by age because of observed differences in retirement rates by age.</p> <p>For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.</p>

Commencement Dates

Commencement dates were based on an annual high-level review of experience, including considerations of whether any conditions have changed that would be expected to produce different results in the future.

For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Prescribed Methods

Funding methods

The methods used for funding purposes as described in Part V –Statement of Actuarial Assumptions/Methods, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice. These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and normal cost were updated from an applicable month of June 2021 to June 2022.

The required mortality improvement scale used to calculate the funding target and target normal cost was updated to reflect the MP-2020 mortality improvement scale.

A new experience study was performed, and as a result assumed rates of retirement, rates of termination, and forms of payment were changed to better reflect anticipated future experience.

The assumed plan-related expenses added to the target normal cost were updated to reflect the amount expected to be paid during the plan year beginning October 1, 2022.
