**Statement by Enrolled Actuary**

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

## Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

### Description of Funding Method

Under the Pension Protection Act of 2006, minimum required contributions must be determined based on the methodology prescribed in Internal Revenue Code Section 430 and the regulations thereunder. Specifically, the minimum required contribution for a plan year is the sum of

- (1) the target normal cost of the plan for the plan year
- (2) the shortfall amortization charge (if any)
- (3) the waiver amortization charge (if any).

The **target normal cost** is the present value of all benefits expected to accrue during the plan year. This includes benefits attributable to services performed in a preceding plan year which are increased due to increases in compensation during the current plan year.

The **shortfall amortization charge** is the sum of the **shortfall amortization installments** for the most recent seven plan years (including the current plan year). If plan assets are less than the applicable percentage of the funding target, a **shortfall amortization base** will be established equal to the funding shortfall less the outstanding value of all prior shortfall amortization bases. The shortfall amortization installment is the amount necessary to amortize the shortfall amortization base over seven years.

The **funding target** is the present value of all benefits accrued under the plan as of the beginning of the plan year. Both the funding target and target normal cost are based on three segment interest rates, the first segment rate being for benefit payments to be made in 0 to 5 years, the second segment rate being for benefit payments to be made in 5 to 20 years, and the third segment rate being for benefit payment to be made in 20 years or later.

The **waiver amortization charge** is the aggregate total of **waiver amortization installments** for all **waiver amortization bases** established in the preceding five years. Waiver amortization bases are established when a plan sponsor cannot meet the minimum funding requirements for a plan year and applies for a waiver of minimum funding for that year.

If the actuarial value of plan assets is greater than or equal to the funding target, the minimum required contribution is the target normal cost less any excess of the actuarial value of assets over the funding target. The minimum required contribution is not to be less than \$0.

In determining whether the minimum required contribution as of a valuation date has been met, any contributions made after the valuation date are discounted back to the valuation date at the plan's **effective interest rate**. This is the single rate applied to all future contingent benefit payments which produces the same funding target as the three segment interest rates.

## **Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (continued)**

### **Asset Valuation Method**

The actuarial value of the assets is fair market value with no averaging.

### **Valuation Date**

The plan's actuarial valuation date is the last day of the plan year.

### **Valuation Procedures**

We used financial data submitted by the trustee without further audit and participant data as supplied by the plan sponsor. This information would customarily not be verified by a plan's actuary. We have reviewed the information for internal consistency, and we have no reason to doubt its substantial accuracy.

The limitations of Internal Revenue Code Sections 401(a)(17) and 415(b) have been incorporated into our calculations.

No liability is held for non-vested, inactive employees who have a break-in-service, or for non-vested employees who have quit, been terminated, or died, even if a break-in-service had not occurred as of the valuation date.

All participants are assumed to work at least 1,000 hours in future years, even if they worked less than 1,000 hours in the preceding year.
