Administrative Expenses	Actual expenses from previous or current year
Retirement Rates	Participants are assumed to retire on their Normal Retirement Date

The actuarial cost method used in the valuation is the unit credit cost method as required in the Pension Protection Act of 2006 and Internal Revenue

The target normal cost is the sum of all individual normal costs for each participant. The target normal cost is the present value of the benefit earned

The individual funding target is the present value of the accrued benefit as of the valuation date assuming payment at assumed retirement age.

The funding shortfall is the total funding target less the actuarial value of assets. Depending on the AFTAP of the plan and other factors, an adjustment may also be made for a carryover or pre-funding balance. The total annual cost of the plan is the target normal cost plus an amount to amortize the funding shortfall over seven years.
