There has been a change in the valuation software used for this plan. The new software is generally used by this plan's Enrolled Actuary. No changes in non-prescribed assumptions or other changes in method were made. The Funding Target and Target Normal Cost determined with the new software are each within 2% of those values as determined by the previous software as of the prior year valuation date, using the same actuarial assumptions. The other conditions listed in Revenue Procedure 2017-56 have also been satisfied, so automatic approval for this change is provided by that Revenue Procedure.
