Independent Auditor's Report

To the Board of Trustees of
I.B.E.W. Local Union No. 540
Pension Fund

Opinion

We have audited the financial statements of I.B.E.W. Local Union No. 540 Pension Fund, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of October 31, 2023 and 2022, the related statements of changes in net assets available for benefits for the years then ended, the statement of accumulated plan benefits as of October 31, 2022, the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of I.B.E.W. Local Union No. 540 Pension Fund as of October 31, 2023 and 2022, and the changes in its net assets available for benefits for the years then ended, and the accumulated plan benefits as of October 31, 2022, and the changes in its accumulated plan benefits for the year then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of I.B.E.W. Local Union No. 540 Pension Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about I.B.E.W. Local Union No. 540 Pension Fund's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments; administering the Plan; and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when

it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of I.B.E.W. Local Union No. 540 Pension Fund's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about I.B.E.W. Local Union No. 540 Pension Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter—Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of assets held for investment and reportable transactions as of October 31, 2023 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

NOTE A - DESCRIPTION OF PLAN

The following brief description of the I.B.E.W. Local No. 540 Pension Fund (the “Plan”) is provided for general information only. Participants should refer to the Plan Document for more complete information.

- (1) **General** - The I.B.E.W. Local No. 540 Pension Fund is a multi-employer plan with a joint union-management Board of Trustees. It is subject to the provision of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan was established in 1972, under an agreement between the Canton Division, North Central Ohio Chapter of the National Electrical Contractors Association (Employers) and Local No. 540, I.B.E.W. (the Union).
- (2) **Contributions** - Pursuant to collective bargaining agreements, employers contribute to the Plan at specified rates by participants in the Plan. The contribution rate in effect for residential wiremen and foremen was 6% of gross wages from November 1, 2021 to October 31, 2023. The hourly rates for teledata journeymen and cable pullers were \$4.79 from November 1, 2021 to October 31, 2023. The hourly rates for inside wiremen were \$9.70 from November 1, 2021 to December 26, 2021, \$10.00 from December 27, 2021 to December 25, 2022, and \$10.50 from December 26, 2022 to October 31, 2023. Rates for the trainees are a percentage of journeymen rates which are based on years of service, vary based on the program in which the trainee is a participant (residential, teledata, and inside wiremen). For the inside wiremen only \$5.50 per hour is credited to the participant for the period January 1, 2023 to October 31, 2023, \$5.40 per hour is credited to the participant for the period January 1, 2022 to December 31, 2022, and \$5.30 per hour is credited to the participant for the period November 1, 2021 to December 31, 2021. For the teledata participants only \$3.95 per hour is credited to the participants for the years ended October 31, 2023 and 2022.
- (3) **Pension Benefits** – Under the Plan, employees with 5 or more years of service, are entitled to monthly pension benefits beginning at normal retirement age (65) equal to \$3.00 for each year of service up to 10 years plus 1.5% of the contributions made on their behalf (3.15% prior to November 1, 2004). This benefit is also available to participants who have attained the age of 62 and have completed 10 years of service. Participants may elect to receive their pension benefits in the form of a joint and survivor annuity. If employees terminate before 5 years of service, they forfeit the right to receive the benefits they have accumulated.
- (4) **Death and Disability Benefits** – When a participant dies prior to retirement, the surviving spouse would receive a monthly death benefit equal to one-half (1/2) of the amount which would have been payable to the participant if the participant had begun to receive benefits in the form of Qualified Joint and 50% Survivor Benefit. Active employees who become totally disabled after completing 10 years of service and at least 1 year of service in one of the two preceding plan years and are also eligible to receive social security benefits, are entitled to full benefits commencing on the first day of disability and continuing for the duration of the disability until the age of 62. After age 62, participant becomes eligible for normal pension benefits.
- (5) **Early Retirement Benefits** – Participants who have 10 years of service and who have reached the age of 55 may elect to retire and receive benefits computed as previously described, reduced at a rate of ½ of 1% for each month that the participant retires prior to reaching age 62. Participants who have 30 years of service and who have reached the age of 55 may elect to retire and receive benefits computed as previously described, without reduction for early commencement.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

- (1) **Basis of Accounting** – The accompanying financial statements are prepared on the accrual basis of accounting.
- (2) **Investment Valuation and Income Recognition** – Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's trustees determine the Plan's valuation policies utilizing information provided by the investment advisers and custodians. See Note F for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

- (3) **Actuarial Present Value of Accumulated Plan Benefits** – Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during their last five years of credited service. The accumulated plan benefits for active employees are based on their average compensation during the five years ending on the date as of which the benefit information date. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of October 31, 2022 (date of most recent actuary report) are (a) life expectancy of participants (the sex distinct RP-2014 Employee and Annuitant Mortality Tables with blue collar adjustment, adjusted to base year 2006, projected to 2021 with 100% of Scale MP-2021, and future mortality improvements after 2021 projected on a generational basis using 25% of scale MP-2021), and (b) investment return. The 2022 valuation included an assumed average rate of return of 7.00% net of investment expenses and a current liability calculated using a rate of 2.44% (an increase from 2.26% on the 2021 valuation). The assumed total hours worked during the year were 815,000 (770,000 per the 2021 valuation). The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of November 1, 2022. Had the valuations been performed as of October 31, there would be no material differences.

- (4) **Payment of Benefits** – Benefit payments to participants are recorded upon distribution.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

- (5) **Administrative Expenses** – The Plan's expenses are paid by the Plan as provided by the plan document. Expenses incurred in connection with the general administration of the Plan and investment related expenses that are paid by the Plan are recorded as deductions in the statement of changes in net assets available for benefits.
- (6) **Use of Estimates** - The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.
- (7) **Subsequent Events** – The Plan has evaluated subsequent events through July 3, 2024, the date the financial statements were available to be issued.

NOTE C – PLAN TERMINATION

In the event the Plan terminates, accrued benefits for each participant will become fully vested. No termination distribution shall be made pending notification from the Pension Benefit Guaranty Corporation (who insures the plan) as to whether the trust assets are sufficient to discharge all insured benefit obligations. Notification that assets are not sufficient shall be treated as termination by the Pension Benefit Guaranty Corporation as of the date of notification.

Should the Plan terminate at some future time, whether all participants receive their benefits will depend on the sufficiency of the Plan's net assets at that time to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

NOTE D – RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE E – INVESTMENTS

The Plan's investments are held at various custodial institutions.

NOTE F – FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy are described as follows:

Level 1 – Inputs in to valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has ability to access.

Level 2 – Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in active markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If an asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation of the method used for assets measured at fair value. There have been no changes on the methodologies used at October 31, 2023 and 2022.

Common stock & money market funds – Valued at the closing price reported on the active market on which the individual securities are traded.

Mutual Funds – valued at the daily closing price reported by the Fund. The funds are open-ended and are registered with the SEC. These funds are required to publish their daily net asset value (NAV) and to transact at that price. These funds are deemed to be actively traded.

U.S. government securities, corporate bonds, mortgage obligations, certain common/collective trusts, & certain common/collective trusts – real estate - Valued using pricing models maximizing the use of observable inputs for similar securities

Certain common/collective trusts & certain common/collective trusts – real estate - Valued at net asset value (NAV) of units held. The NAV is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liability. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV.

NOTE G - TAX STATUS

The IRS has determined and informed the Plan by a letter dated July 17, 2015, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the Plan administrator and the Plan's tax counsel believe that the Plan is designed, and is currently being operated, in compliance with the applicable requirements of the IRC and, therefore, believe that the Plan is qualified, and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to October 31, 2020.

NOTE H – RELATED PARTY AND PARTY IN INTEREST TRANSACTIONS

Certain Plan investments are managed by various custodians of the Plan. As described in Note B, the Plan paid expenses related to plan operations and investment activity to various service providers. These transactions are party in interest transactions under ERISA.

Plan Name	IBEW Local 540 Pension Fund
Plan Sponsor	Board of Trustees of the IBEW Local 540 Pension Fund
EIN / PN	34-6701444 / 001
Interest Rates	7.00% per annum, compounded annually, net of investment expense for determining costs and liabilities. The valuation interest rate was chosen in consideration of the purpose of the measurement (long-term contribution budgeting), current and historical investment data, and the Plan’s asset allocation as set by the Plan Sponsor. As a part of the analysis, we considered the results of the current and prior editions of our Survey of Capital Market Assumptions and the expectations of the Plan’s investment advisor. The ultimate selection of the interest rate is our best estimate and reflects professional judgment. The highest rate within the IRS allowable range for determining Current Liability, which is 2.44% per annum as of the valuation date.
Compensation Increases	Not applicable.
Future Increases in Social Security	Not applicable.
Future Increases in Maximum Benefits and Plan Compensation Limits	Projected benefits are limited to the maximum presently allowed under IRC Section 415. No provision is made for future increases in the maximum annual benefit limit.

65+	100.0%	100.0%	100.0%

Inactive vested participants: The earliest age at which the participant is eligible for an unreduced retirement benefit, or their age at the valuation date if later.

The retirement assumptions were selected based on analysis of actual vs. expected experience and professional judgement.

The weighted average retirement age for active participants is age 58. This average is based on the active population in the November 1, 2022 valuation. All decrements are considered when projecting the current population to retirement. The weighted average retirement age is the average age at which the lives that reach the retirement decrement retire.

Operating Expenses

Expenses are assumed to be \$260,000, payable at the beginning of the year.

The expense assumption was selected based on a review of past experience as well as expectations for the upcoming year.

Hours Worked

The assumption for hours worked is 93% of the average hours for the previous two years. The 98% adjustment accounts for expected industry activity so that the total expected hours is 815,000 for the plan year beginning November 1, 2022.

The hours assumption was selected based on a review of past experience as well as input from the Trustees regarding future work levels.

Schedule MB, Line 6 – Statement of Actuarial Assumptions/Methods

Active Participant

For valuation purposes, an active participant is a participant who has at least one Year of Service, and who worked at least 200 hours in either of the previous two plan years.

The non-disabled mortality tables were chosen upon review of available tables and projection scales, the underlying demographic basis of those tables in relation to the demographics of the Plan, expectations regarding future mortality improvement, and analysis of actual vs. expected experience.

Reemployment

It is assumed that participants will not be reemployed following a break in service.

Form of Payment

All participants are assumed to take the Five Year Certain and Life form of payment.

Schedule MB, Line 6 – Statement of Actuarial Assumptions/Methods

Marriage	100% of non-retired participants are assumed to be married. The marriage assumption was selected based on professional judgment.
Spouse Ages	Male spouses are assumed to be three years older than female spouses.
Cost Method	The Unit Credit Cost Method is used to determine the normal cost and the actuarial accrued liability. The actuarial accrued liability is the present value of the accrued benefits as of the beginning of the year for active participants and is the present value of all benefits for other participants. The normal cost is the present value of the difference between the accrued benefits as of the beginning and end of the year. The normal cost and actuarial accrued liability for the plan are the sums of the individually computed normal costs and actuarial accrued liabilities for all plan participants.
Asset Valuation Method	The actuarial value of assets is determined by adjusting the market value of assets to reflect the investment gains and losses (the difference between the actual investment return and the expected investment return) during each of the last 5 years at the rate of 20% per year. Expected investment return is calculated using the net market value of assets as of the beginning of the plan year and the benefit payments, employer contributions and operating expenses, weighted based on the timing of the transactions during the year. The actuarial value is subject to a restriction that it be not less than 80% nor more than 120% of the market value. The actuarial value of assets was reset to equal the market value of assets as of November 1, 2021. Beginning November 1, 2021, the difference between the actual and expected returns on the market value of assets will be phased in at a rate of 20% per year.
Participant Data	Participant census data as of November 1, 2022 was provided by Benesys, Inc.
Missing or Incomplete Participant Data	If necessary, missing or incomplete data for participants and beneficiaries was assumed to be equal to information exhibited by participants with similar known characteristics.

Schedule MB, Line 6 – Statement of Actuarial Assumptions/Methods

Benefits Not Included in Valuation	The Death Benefit for unmarried participants has not been valued because we have assumed that 100% of active participants are married. For married participants, we have assumed that 100% of spouses will elect the Preretirement Surviving Spouse's benefit. The difference in liability between the two benefits is not material.

Financial Information	Financial information was obtained from the audited financial statements for the Plan Year ended October 31, 2022 supplied by Yurchyk & Davis Certified Public Accountants, Inc.
------------------------------	--

Nature of Actuarial Calculations	The valuation results presented in this report are estimates. The results are based on data that may be imperfect and on assumptions made about future events. Certain plan provisions may be approximated or deemed immaterial for the purposes of the valuation. Assumptions may be made about missing or incomplete participant census data or other factors. Reasonable efforts were made to ensure that significant items and factors are included in the valuation and treated appropriately. A range of results different from those presented in this report could also be considered reasonable.
---	--

The actuarial assumptions selected for this valuation – including the valuation interest rate – generally reflect average expectations over the long term. If overall future demographic or investment experience is less favorable than assumed, the relative level of plan costs determined in this valuation will likely increase in future valuations. Investment returns and demographic factors may fluctuate significantly from year to year. The deterministic actuarial models used in this valuation do not take into consideration the possibility of such volatility.

Changes in Assumptions and Methods	Since the prior valuation, the following assumptions have been changed: <u>Funding:</u> • The assumption for future hours worked was changed to 93% of the average hours for the previous two years from 98% of the average hours. <u>Current Liability:</u> • The Current Liability interest rate was changed from 2.26% to 2.44% in accordance with the change in the IRS prescribed rates.

Actuarial Equivalence

Plan Name	IBEW Local 540 Pension Fund
Plan Sponsor	Board of Trustees of the IBEW Local 540 Pension Fund
EIN / PN	34-6701444 / 001
Interest Rates	7.00% per annum, compounded annually, net of investment expense for determining costs and liabilities. The valuation interest rate was chosen in consideration of the purpose of the measurement (long-term contribution budgeting), current and historical investment data, and the Plan's asset allocation as set by the Plan Sponsor. As a part of the analysis, we considered the results of the current and prior editions of our Survey of Capital Market Assumptions and the expectations of the Plan's investment advisor. The ultimate selection of the interest rate is our best estimate and reflects professional judgment. The highest rate within the IRS allowable range for determining Current Liability, which is 2.44% per annum as of the valuation date.
Compensation Increases	Not applicable.
Future Increases in Social Security	Not applicable.
Future Increases in Maximum Benefits and Plan Compensation Limits	Projected benefits are limited to the maximum presently allowed under IRC Section 415. No provision is made for future increases in the maximum annual benefit limit.

Inactive vested participants: The earliest age at which the participant is eligible for an unreduced retirement benefit, or their age at the valuation date if later.

The retirement assumptions were selected based on analysis of actual vs. expected experience and professional judgement.

The weighted average retirement age for active participants is age 58. This average is based on the active population in the November 1, 2022 valuation. All decrements are considered when projecting the current population to retirement. The weighted average retirement age is the average age at which the lives that reach the retirement decrement retire.

Operating Expenses

Expenses are assumed to be \$260,000, payable at the beginning of the year.

The expense assumption was selected based on a review of past experience as well as expectations for the upcoming year.

Hours Worked

The assumption for hours worked is 93% of the average hours for the previous two years. The 98% adjustment accounts for expected industry activity so that the total expected hours is 815,000 for the plan year beginning November 1, 2022.

The hours assumption was selected based on a review of past experience as well as input from the Trustees regarding future work levels.

Schedule MB, Line 6 – Statement of Actuarial Assumptions/Methods

Active Participant For valuation purposes, an active participant is a participant who has at least one Year of Service, and who worked at least 200 hours in either of the previous two plan years.

Non-Disabled Mortality *Participants and Beneficiaries:*

The sex distinct RP-2014 Employee and Annuitant Mortality Tables with blue collar adjustment, adjusted to base year 2006, projected to 2021 with 100% of Scale MP-2021, and future mortality improvements after 2021 projected on a generational basis using 25% of Scale MP-2021 .

The non-disabled mortality tables were chosen upon review of available tables and projection scales, the underlying demographic basis of those tables in relation to the demographics of the Plan, expectations regarding future mortality improvement, and analysis of actual vs. expected experience.

For determining the RPA '94 current liability, the mortality tables prescribed by the Pension Protection Act of 2006 were used.

Disabled Mortality

The sex distinct RP-2014 Disabled Mortality Tables, adjusted to base year 2006, projected to 2021 with 100% of Scale MP-2021, and future mortality improvements after 2021 projected on a generational basis using 25% of Scale MP-2021.

The disabled mortality table was chosen upon review of available tables and projection scales, the underlying demographic basis of those tables in relation to the demographics of the Plan, the Plan's definition of disabled, expectations regarding future mortality improvement, and analysis of actual vs. expected experience.

For determining the RPA '94 current liability, the mortality tables prescribed by the Pension Protection Act of 2006 were used.

Schedule MB, Line 6 – Statement of Actuarial Assumptions/Methods

Reemployment

It is assumed that participants will not be reemployed following a break in service.

Form of Payment

All participants are assumed to take the Five Year Certain and Life form of payment.

Schedule MB, Line 6 – Statement of Actuarial Assumptions/Methods

Marriage	100% of non-retired participants are assumed to be married. The marriage assumption was selected based on professional judgment.
-----------------	---

Spouse Ages	Male spouses are assumed to be three years older than female spouses.
--------------------	---

Cost Method	The Unit Credit Cost Method is used to determine the normal cost and the actuarial accrued liability. The actuarial accrued liability is the present value of the accrued benefits as of the beginning of the year for active participants and is the present value of all benefits for other participants. The normal cost is the present value of the difference between the accrued benefits as of the beginning and end of the year. The normal cost and actuarial accrued liability for the plan are the sums of the individually computed normal costs and actuarial accrued liabilities for all plan participants.
--------------------	---

Asset Valuation Method	The actuarial value of assets is determined by adjusting the market value of assets to reflect the investment gains and losses (the difference between the actual investment return and the expected investment return) during each of the last 5 years at the rate of 20% per year. Expected investment return is calculated using the net market value of assets as of the beginning of the plan year and the benefit payments, employer contributions and operating expenses, weighted based on the timing of the transactions during the year. The actuarial value is subject to a restriction that it be not less than 80% nor more than 120% of the market value. The actuarial value of assets was reset to equal the market value of assets as of November 1, 2021. Beginning November 1, 2021, the difference between the actual and expected returns on the market value of assets will be phased in at a rate of 20% per year.
-------------------------------	---

Participant Data	Participant census data as of November 1, 2022 was provided by Benesys, Inc.
-------------------------	--

Missing or Incomplete Participant Data	If necessary, missing or incomplete data for participants and beneficiaries was assumed to be equal to information exhibited by participants with similar known characteristics.
---	--

Schedule MB, Line 6 – Statement of Actuarial Assumptions/Methods

Benefits Not Included in Valuation	The Death Benefit for unmarried participants has not been valued because we have assumed that 100% of active participants are married. For married participants, we have assumed that 100% of spouses will elect the Preretirement Surviving Spouse's benefit. The difference in liability between the two benefits is not material.
---	--

Financial Information	Financial information was obtained from the audited financial statements for the Plan Year ended October 31, 2022 supplied by Yurchyk & Davis Certified Public Accountants, Inc.
------------------------------	--

Nature of Actuarial Calculations	The valuation results presented in this report are estimates. The results are based on data that may be imperfect and on assumptions made about future events. Certain plan provisions may be approximated or deemed immaterial for the purposes of the valuation. Assumptions may be made about missing or incomplete participant census data or other factors. Reasonable efforts were made to ensure that significant items and factors are included in the valuation and treated appropriately. A range of results different from those presented in this report could also be considered reasonable.
---	--

The actuarial assumptions selected for this valuation – including the valuation interest rate – generally reflect average expectations over the long term. If overall future demographic or investment experience is less favorable than assumed, the relative level of plan costs determined in this valuation will likely increase in future valuations. Investment returns and demographic factors may fluctuate significantly from year to year. The deterministic actuarial models used in this valuation do not take into consideration the possibility of such volatility.

Changes in Assumptions and Methods	Since the prior valuation, the following assumptions have been changed:
---	---

Funding:

- The assumption for future hours worked was changed to 93% of the average hours for the previous two years from 98% of the average hours.

Current Liability:

- The Current Liability interest rate was changed from 2.26% to 2.44% in accordance with the change in the IRS prescribed rates.
-
