The first day of the month coincident with or next following the date a plan participant attains age 65 or completes five years of plan participation, if later.

Credited Service

One year of credited service is granted for each calendar year the participant is actively employed for 39 or more weeks. If actively employed for fewer than 39 weeks, credited service is computed to the nearest tenth of a year. Prior to the Effective Date, credited service is computed in years and fractions to the nearest tenth of a year from last hire date.

Vesting

All participants became 100% vested on June 30, 1998.

Benefits

Late Retirement

Eligibility Participation continues after normal retirement date

Actuarial Equivalence

For non-decreasing annuities: Actuarial equivalence is based on 6% interest and the 71 GAM Male Mortality rates, set back 1 year for participants and set back 5 years for beneficiaries.

For accelerated forms of payment: Actuarial Equivalence will be computed using the greater of the actuarial equivalence for non-decreasing annuities or the equivalent annual benefit computed using the "PPA applicable mortality table" and the interest rate determined under Code Section 417(e)(3) for the month of December preceeding the Plan Year that contains the annuity start date

Adjustments Made for Subsequent Events

We are not aware of any event following the measurement date and prior to the date of this report that would materially impact the results of this report

Changes since Prior Valuation and Key Notes

There have been no changes to the plan provisions since the last valuation.

The plan sponsor has informed us of their intent to terminate the plan effective 9/30/2023. This report does not reflect the impact of the plan termination. Reflecting a plan termination will not impact the minimum required contribution or quarterly requirements. If all benefits are paid prior to the end of the year, the PBGC Premium for the year may be prorated.

The interest rates and mortality assumptions have been updated as required under the Pension Protection Act, all subsequent legislation, and associated IRS Regulations, including the changes presented by the American Rescue Plan Act of 2021. These changes resulted in an increase in the Funding Target.

The expense load added to the Target Normal Cost was updated from \$65,000 to \$31,000 to reflect anticipated administrative expenses to be paid out of the trust for the 2023 plan year.

Per the direction of the plan sponsor, for purposes of determining the PBGC premium, the variable-rate premium method was changed from the Alternative method to the Standard method. This change resulted in a decrease in PBGC premiums.
