Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis:

- Interest rate basis Full Yield Curve from first month preceding valuation date

Interest rates

- 10-year rate 5.14%
- 20-year rate 5.14%
- 30-year rate 4.92%
- Effective interest rate 5.04%

Plan-related expenses Prior year administrative expenses paid, adjusted for expected deviations and PBGC premiums for the year. For 2023, an amount of \$30,000 was included in the target normal cost.

As permitted by law, a yield curve reflecting returns on high quality corporate bonds (A, AA and AAA) is used to determine the funding target, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are prescribed by law and reflect current market conditions (specifically, the average market conditions for the month preceding the valuation date) they may from time to time be inconsistent with other economic assumptions used in the valuation, which may reflect both current economic conditions and assumed future conditions.

Demographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees It was assumed there will be no new or rehired employees.

- Healthy IRS approved Section 430 plan-specific substitute mortality tables based on the experience of Koch plan participants projected using Scale MP-2021. Separate rates for non-annuitants and annuitants.
- Disabled IRS approved Section 430 plan-specific substitute mortality tables based on the experience of Koch plan participants projected using Scale MP-2021. Separate rates for non-annuitants and annuitants.

Benefit commencement date:

- Deferred vested benefit Age 65
- Disability benefit Upon disablement
- Retirement benefit Upon termination of employment

Form of payment 100% annuity assumed

Percent married 80% of males, 80% of females. Used to value preretirement surviving spouse benefits.

Spouse age Wife three years younger than husband.

At-risk assumptions For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 50% Joint and Survivor form of payment.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets	The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.
Benefits not valued	<p>All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions with FHR and, based on that review, is not aware of any significant benefits required to be valued that were not.</p> <p>The plan pays small benefits (with a present value up to \$1,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.</p>

Schedule SB, Line 25 Change in Method

The funding method was changed to use the IRS-prescribed one-month average yield curve based on bond yields in the month preceding the valuation date (December). Prior valuations utilized the IRS-prescribed 3-segment rates with no lookback.

In accordance with 1.430(h)(2)-1(e), automatic approval has been granted for some changes in funding methods permitted by the Pension Protection Act with respect to the interest rate methodology. The method for determining interest rates was changed from segment rates to full yield curve and thus is automatically approved.
