Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Report of Independent Auditors

To the Plan Administrator of Nestlé Puerto Rico Pension Plan:

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Nestlé Puerto Rico Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits and statements of accumulated plan benefits as of December 31, 2023 and 2022, and the related statement of changes in net assets available for benefits and statement of changes in accumulated plan benefits for the year ended December 31, 2023, and the related notes (collectively referred to as the “financial statements”).

Management, having determined it is permissible in the circumstances, has elected to have the audits of the financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2023 and 2022, and for the year ended December 31, 2023, stating that the certified investment information, as described in Note 5 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor’s Responsibilities for the Audit of the Financial Statements section

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

(1) Description of the Plan

The following description of the Nestlé Puerto Rico Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the Plan's provisions. For purposes of the Plan, SWIRL Corp., (the Company) is the Plan Sponsor and Plan Administrator, and has designated Nestlé USA, Inc. to act as delegate of the Plan Administrator. The Plan is intended to be a qualified Plan in accordance with Puerto Rican law. The Plan trustee is UBS Trust Company of Puerto Rico (UBS), for the purpose of administering benefit payments to participants. The Plan's assets are invested in the Nestlé in the USA Pension Trust (Pension Trust) of which The Northern Trust Company is the trustee and custodian.

The following applies to the participants from other plans sponsored by Nestlé who were transferred to the Plan as of October 1, 2011, as well as any qualified new employee after October 1, 2011.

Effective December 31, 2013, the Plan was amended so that no additional benefit accruals would be earned by the participants and no additional employees would become participants in the Plan after January 1, 2013.

Effective December 31, 2023, the plan was terminated, and all participant benefits were fully vested. All deferred vested participants were offered a lump sum payment opportunity and for those who opted in, plan benefits were paid directly to the participants as lump sum payments in May 2024. Both in pay retirees and deferred vested participants who did not receive their benefit paid as a lump sum were transferred to an insurance provider, American National Insurance Company (ANICO). ANICO took over all remaining plan liabilities, effective May 2024 and began issuing direct payments to participants on August 1, 2024. The remaining net assets of the Plan was allocated for payment of plan benefits to the participants in an order of priority determined in accordance with ERISA, Puerto Rico Internal Revenue Code of 2011, applicable regulations thereunder, and the Plan Document.

(a) Pension Benefits

Participating employees are eligible to receive benefits under the Plan document as follows:

(i) Traditional Benefit

Participants hired prior to May 1, 2003, who chose to remain on the Traditional formula during the pension choice period, with three or more years of vesting service are entitled to pension benefits beginning at normal retirement age of 65. The normal retirement benefit is determined based upon years of credited service, as defined, and the average of the participant's highest three consecutive years of pensionable earnings during the ten-year period prior to retirement (average annual compensation). The Plan permits retirement as early as age 55, but with a reduced benefit. The normal form of benefit payment is the Life Annuity Form for participants who are not married on the benefit commencement date and the Spouse's Annuity Form for participants who are married on the benefit commencement date. Subject to certain restrictions of the Plan, participants may elect to receive the value of their benefits as a life annuity, a lump-sum distribution, a ten-year certain annuity, or a joint-and-survivor annuity. Additionally, certain Nestlé Purina employees may be covered under

NESTLÉ PUERTO RICO PENSION PLAN

an alternative final average pay formula or a career average pay formula subject to different normal and optional forms of payment.

(ii) Account Benefit

All participants hired after May 1, 2003 and prior to January 1, 2013, and participants hired prior to May 1, 2003, who chose the Account formula during the pension choice period, with three or more years of vesting service are entitled to pension benefits upon termination of employment. Participants earn an annual percentage based on the sum of the participant's age and years of vesting service (or points) for each year of credited service in the Plan. Upon termination, the annual percentages are added together to determine the final pension percentage. The final pension percentage is multiplied by the average of the participant's highest five consecutive years of pensionable earnings during the most recent ten-year period. The formula is expressed as a lump sum; however, the normal form of payment is the Life Annuity Form for participants who are not married on the benefit commencement date and the Spouse's Annuity Form for participants who are married on the benefit commencement date. Subject to certain restrictions of the Plan, participants may elect to receive the value of their benefit as a lump-sum distribution, a life annuity, or a joint-and-survivor annuity. Additionally, certain Nestlé Purina employees may be covered under an alternative account benefit formula subject to different normal and optional forms of payment.

(iii) Other Benefits

Other plan provisions with limited applicability may also apply to former employees and acquired businesses such as Carnation and Gerber.

(b) Death and Disability Benefits

(i) Traditional Benefit

If an active participant dies after completing three years of vesting service, a death benefit may be paid to the participant's qualified surviving spouse. The amount of the benefit paid to the surviving spouse is computed with reference to the early retirement factors of the Plan for payments beginning after age 55.

(ii) Account Benefit

If an active participant dies, the participant's designated beneficiary will receive the value of the benefit. If the beneficiary is a spouse, the spouse may elect to receive the account benefit as either a lump sum or a life annuity. If the beneficiary is not a spouse, the account benefit is paid as a lump sum.

(2) Summary of Significant Accounting Policies

The following are the significant accounting policies followed by the Plan:

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

NESTLÉ PUERTO RICO PENSION PLAN

Notes to Financial Statements

December 31, 2023 and 2022

(b) Investment Valuation

Plan assets are held in the Nestlé in the USA Pension Trust (Pension Trust), which was established by Nestlé USA, Inc. for the pooled investment of assets for various qualified pension plans sponsored by Nestlé USA, Inc. and this Plan. The Pension Trust is maintained by The Northern Trust Company, as trustee.

The Pension Trust investments are stated at fair value, in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurement*.

Purchases and sales of securities are recorded on a trade-date basis. Interest and other income are recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Pension Trust's gains and losses on investments bought and sold as well as held during the year.

(c) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

The accumulated plan benefits for active employees are based on credited service and the average of either the highest three or five years of pensionable earnings, as defined (i.e., total compensation, including bonuses and overtime), during the last ten calendar years ending on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary, Willis Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements due to death, disability, termination, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations were as follows:

	2023	2022
Life expectancy of participants	Pri-2012, including separate assumptions for contingent survivors with unmodified MP-2021 projection	Pri-2012, including separate assumptions for contingent survivors with unmodified MP-2021 projection
Retirement age	Varying by age	Varying by age
ASC 960 discount rate and expected return on plan assets	6.10 %	6.40 %

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(d) Administrative Expenses

Expenses of administering the Plan are paid by the Company or from Plan assets, subject to limitations under ERISA. The Plan allows for administrative expenses such as trustee fees, investment management fees, actuarial valuation fees, and accounting fees.

(e) Payment of Benefits

Benefit payments to participants are recorded upon distribution. Assets are transferred from The Northern Trust Company to UBS to process benefit payments.

A portion of Plan benefits is payable by Metropolitan Life Insurance Company (MetLife) as a result of Nestlé USA, Inc.'s purchase of annuity contracts for certain former participants in the contributory Carnation Employees Retirement Plan Number Two, which was part of the Nestlé Pension Plan (and subsequently the Nestlé Puerto Rico Pension Plan). Certain Plan benefits have commenced, and continue to be paid, by the trustee, with MetLife reimbursing the Plan for any portion of said benefits that were previously purchased by the employee contributions.

(f) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

(g) Risks and Uncertainties

The Pension Trust invests in various investment securities. Investment securities are exposed to various risks, such as interest rate risk, market risk, and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

(h) Derivative Financial Instruments

The Pension Trust accounts for derivatives and hedging activities in accordance with ASC 815, *Derivatives and Hedging*, which requires that all derivative instruments not qualifying for hedge accounting be recorded on the statements of net assets available for benefits at their respective fair values.

The Pension Trust uses derivatives for the benefit of the plans in the Pension Trust as a tool to reduce risk and as an investment strategy. The Pension Trust will enter into the following types of derivative instruments: interest rate swaps, credit default swaps (CDSs), equity swaps, commodity swaps, financial

NESTLÉ PUERTO RICO PENSION PLAN

Notes to Financial Statements

December 31, 2023 and 2022

futures, commodities futures, foreign exchange forward contracts and options, and swaptions and options. The derivative instruments outstanding as of period-end and the amounts of realized and unrealized gains and losses, as well as other income on derivative instruments during the period (as disclosed in the derivatives tables in note 7), serve as indicators of the volume of derivative activity for the Pension Trust. Derivative strategies involve risk and, like other investments, can lose value. The impact on Pension Trust performance can be positive or negative, and will vary depending on market movements.

The Pension Trust manages interest rate risk using interest rate swaps and/or U.S. Treasury futures (interest rate hedge). The objective of the interest rate hedge is to manage the effective duration of the Pension Trust's assets to better match its defined benefit obligations, thereby protecting the funded ratio of the Pension Trust as interest rates fluctuate. Interest rate swaps and futures used in this manner adjust interest rate and yield curve exposures and substitute for physical securities.

The Pension Trust also uses derivatives as a substitute for physical securities in order to gain exposure to certain asset classes. Using derivatives instead of physical securities may be a more efficient means to gain exposure to an index or a market sector due to its characteristics of increased liquidity and reduced transaction costs. Using derivatives may also reduce the need to sell assets when there is a difficult trading environment. These derivatives are used to create credit, equity, and foreign exchange exposures.

The Pension Trust manages credit risk through use of CDSs. These derivatives are used to manage credit exposure without buying or selling securities outright. Written CDSs increase credit exposure (selling protection), obligating the Pension Trust to buy bonds from counterparties in the event of a default. Purchased CDSs decrease exposure (buying protection) providing the right to "put" (sell) bonds to the counterparty in the event of a default.

Counterparty risk for swaps and forwards that are not cleared through a central exchange is mitigated through the use of International Swaps and Derivatives Association (ISDA) standardized agreements that require gains and losses owed to and from the counterparty to be agreed daily, and gains or losses to be collateralized with cash. For futures, the gain (loss) is calculated and funds are transferred to and from the Pension Trust on a daily basis, based on the prior day's market valuation. The types of counterparties are large banks and brokers, and the investment managers each have netting arrangements within their accounts to reduce the exposure to any single counterparty.

Holding derivatives has a significant impact on cash flow. Daily mark to markets and accumulated gains and losses can be large, depending on the volatility of the markets. The Pension Trust has maintained the liquidity necessary to settle any losses under a variety of market conditions, including the most severe.

(i) Foreign Currency

The Pension Trust's investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions.

NESTLÉ PUERTO RICO PENSION PLAN

Notes to Financial Statements

December 31, 2023 and 2022

The Pension Trust does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net appreciation and depreciation from investments.

(3) Funding Policy

The funding policy of the Company is to make contributions for each plan year in an amount not less than the minimum required contribution under the law and not more than the maximum tax-deductible contribution. The Company may vary its contribution level, if appropriate to its tax and cash position and the Plan's funded status. There were no contributions made during 2023, which met the ERISA minimum funding requirements.

(4) Plan Termination

The Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan, subject to the provisions set forth in ERISA. In July 2023, the decision was made to terminate the Plan. Effective December 31, 2023, the plan was terminated and all accrued benefits for participants were deemed vested upon Plan termination. Termination was determined to be imminent in May 2024 upon procuring insurance provider.

(5) Trustee Certifications

The Plan Administrator's delegate has elected the method of compliance permitted by 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, certain information related to investments and the Master Trust disclosed in the accompanying financial statements, including the Plan's interest in the Pension Trust at December 31, 2023 and 2022, and Plan interest in Pension Trust investment income for the year ended December 31, 2023, was obtained or derived from information provided to the plan administrator's delegate and certified as complete and accurate by The Northern Trust Company, the trustee of the Pension Trust.

(6) Parties in Interest

During the years ended December 31, 2023 and 2022, Nestlé in the USA Pension Trust had parties in interest that included Nestlé USA, Inc., trustee, investment advisory, legal, actuarial, and administrative service providers. The fees paid by the Pension Trust to these parties in interest were \$5,595,707 for the year ended December 31, 2023. The Plan's share of these expenses was \$30,359 for the Plan year ended December 31, 2023. These transactions qualify as party-in-interest transactions; however, they are exempt from prohibited transaction rules under ERISA.

(7) Interest in Nestlé in the USA Pension Trust

The assets of the Plan are invested in the Pension Trust, in which the assets of the Plan are combined with the assets of other affiliated Nestlé USA, Inc. plans for investment purposes. Pursuant to relief provided under IRS Revenue Ruling 2011-1, a Puerto Rico only qualified plan that is formed as a part of a spin-off from a U.S. qualified plan pursuant to Revenue Ruling 2008-40 (as modified by Revenue Ruling 2011-1) is permitted to continue to participate in a U.S. group trust, and such continued participation will not cause the group trust to violate the requirements of Revenue Ruling 81-100 (which provides tax-exempt status to group trust holding assets of qualified plans). This relief will continue until such time as the IRS may issue further guidance as to whether a Puerto Rico only qualified plan may participate in such trust.

NESTLÉ PUERTO RICO PENSION PLAN

Notes to Financial Statements

December 31, 2023 and 2022

Pursuant to the trustee's method of allocating the investment holdings between the plans, contributions into the Pension Trust are treated as additions in the Pension Trust, withdrawals are treated as deductions in the Pension Trust, and investment income (loss) is allocated proportionately. Accordingly, the value of the Plan's investment in the Pension Trust is equal to the Plan's interest in each applicable investment increased or decreased by the Plan's allocated share in income, gains, and losses attributable to each applicable investment, which share is generally based upon the Plan's respective share of the Pension Trust's combined net assets available for benefits each month before investment income (loss) and net appreciation (depreciation) in the fair value of investments. Those investment expenses of the Pension Trust, which can be specifically identified as being applicable to the Plan, are charged to the Plan. The remaining investment expenses are allocated to the Plan based on the Plan's respective share of the Pension Trust's combined net assets available for benefits on a monthly basis.

The Plan's investments consist of an undivided interest in investments held by the Pension Trust. The Plan's equitable share of the Pension Trust's net assets was approximately .54% and .50% for the years ended December 31, 2023 and 2022, respectively. The net assets of the Pension Trust and the Plan's interest in the Pension Trust balances as of December 31, 2023 and 2022, are as follows:

Notes to Financial Statements

December 31, 2023 and 2022

During the year ended December 31, 2023, investment income for the Pension Trust consisted of the following:

	2023
Net appreciation in fair value of investments	\$ 58,360,216
Interest	58,305,793
Dividends	90,623
Other Income	<u>17,193,453</u>
	<u>\$ 133,950,085</u>
Pension Trust investment income attributable to the Plan	\$ 732,469

As discussed in note 2(h), the Pension Trust uses derivative financial instruments as part of its investment strategy. Refer to note 8 for a description of valuation methodologies. Gains and losses on derivative financial instruments are included in investment income (loss). As of December 31, 2023 and 2022, the Pension Trust held the following derivatives:

	2023		2022	
	Asset derivatives fair value	Liability derivatives fair value	Asset derivatives fair value	Liability derivatives fair value
Derivatives not accounted for as hedging instruments:				
Interest rate	\$ 31,251,436	(6,540,405)	16,780,950	(30,962,449)

Notes to Financial Statements

December 31, 2023 and 2022

For the year ended December 31, 2023 the Pension Trust recognized in investment gain (loss) and other income the following:

	2023
	Amount of
	gain (loss)
Derivatives not accounted for as hedging instruments:	
Interest rate	\$ (9,528,929)
Foreign exchange	(174,952)
Credit	887,063
Equity	—
	\$ (8,816,818)

The loss related to the derivatives is located in the net appreciation in fair value of investments and the other income for the Pension Trust. There is no concentration of derivatives in any of the categories.

The following tables summarize the gross notional value of derivative contracts outstanding as of December 31, 2023 and 2022. The gross notional amounts give an indication of the volume of the Pension Trust's derivative activity and significantly exceed the fair value of the derivative investments, which is more representative of the economic exposure associated with derivatives in the Pension Trust.

The Pension Trust has in place legally enforceable master netting arrangements or similar agreements with all counterparties with which it enters into derivative financial instruments. Master netting arrangements or similar agreements permit the closeout and netting of transactions with the same counterparty upon the occurrence of certain events. The Pension Trust has chosen not to offset the fair values of derivative contracts and related cash collateral with the same counterparty under its master netting arrangements or similar agreements. All of the Pension Trust's derivative and cash collateral positions are reflected at the gross values in the statements of net assets available for benefits. The table below shows the impact of netting financial instruments and collateral if the Plan had elected to offset the derivatives.

(8) Fair Value Measurements

The Plan has adopted the guidance in ASC 820, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The fair value framework requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant judgment. The three levels are defined as follows:

- Level 1: Assets or liabilities that are valued based on unadjusted quoted prices in active markets that are accessible at measurement date.
- Level 2: Assets or liabilities that are valued based on observable inputs, other than those included in Level 1, based on quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, or financial instruments for which all significant inputs are observable, either directly or indirectly.
- Level 3: Assets or liabilities that are valued based on unobservable inputs, including the reporting entity's own analysis of the underlying economic data that market participants would factor into the pricing of the asset or liability.

Due to Nestlé USA, Inc.'s policy to diversify the holdings of the Pension Trust portfolio, there is no significant concentration of investments within any particular class of investments included above. The valuation methodologies utilized by the Plan and Pension Trust for the above investments as of December 31, 2023 and 2022, are as follows:

- (a) Based on quoted market prices in active markets.
- (b) Based on investment manager or industry pricing services of investments. Certain fixed income pricing is on a bid-evaluation basis. Institutional bid evaluations are estimated prices. Pricing vendors use models, which are generally proprietary, to arrive at the estimated prices. These prices represent the price a dealer would pay for a security. Model inputs vary depending on the type of security, but typically include trade data, institutional bids, comparable trades, dealer quotes, and news media. Market data is provided by multiple independent sources, including primary and secondary dealers, portfolio managers, and research analysts.
- (c) Collateralized mortgage valuations are based on trade and quote activity of bonds with similar features, including issuer, vintage, prepayment speeds, and purpose of the underlying loan (first or second lien).
- (d) Cash equivalents include short term fixed income instruments whose valuations are determined based upon maturity date, issue date, and credit ratings.

Notes to Financial Statements

December 31, 2023 and 2022

- (e) Commingled funds are valued based on the daily pricing of the underlying assets to estimate the fair value of the fund as determined by the investment manager. The liquidity of these investments is determined by the redemption period and settlement period for each fund. The Pension Trust considered these and other characteristics and concluded these commingled funds have a readily determinable fair value.
- (f) Government and municipal bonds are priced by obtaining feeds from various live data sources, including market makers and interdealer brokers.
- (g) Over-the-counter options are valued using bid, ask/offer quotes that are binding and corroborated. Swaps are valued using the discounted cash flow method. The two legs (fixed and floating) are priced independently as the present value of their expected cash flows.
- (h) Certain fixed income securities (primarily certain collateralized obligations) are valued based upon evaluated prices using unobservable inputs (i.e., extrapolated data, proprietary models, and indicative quotes).
- (i) Investments measured at net asset value include alternative fixed income investments, real estate funds, and hedge funds. The net asset values are reported to Nestlé USA, Inc. and the trustee by the fund managers or the general partners of the fund. These net asset values are based on the fair value of the underlying portfolio investments held by the investment fund.

These fair values are determined by a variety of methods: real estate investments are valued at appraised values plus undistributed rental and interest income; hedge funds are valued by the investment manager using quoted market prices of underlying investments and evaluations supplied by industry pricing vendors.

A summary of the nature and risks of the investments and unfunded commitments that are valued using a net asset value (NAV) for the years ended December 31, 2023 and 2022 is as follows:

	2023		2022		Redemption frequency	Redemption notice period

The Pension Trust's investments measured at net asset value are in real estate, hedge funds, and fixed income partnerships for the years ended December 31, 2023 and 2022. These investments are primarily limited partnership investments and the fair value is determined using an audited net asset value (NAV). The fair value of investments is estimated using techniques that may rely heavily on the investment managers' assumptions and qualitative observations. The Pension Trust uses the fair valuations from the investment managers and reviews and validates their valuation methods and processes throughout the year. The Pension Trust establishes and follows valuation policies and procedures. The Pension Trust employs specialized investment consultants who perform due diligence on the valuation policies and procedures of

the general partners before making the investments and periodically thereafter. Using their own procedures and systems, they evaluate the reasonableness of the partnerships' NAVs on a monthly and quarterly basis using industry comparisons, operating performance metrics and they conduct frequent reviews with the general partners. The Pension Trust periodically evaluates the fair valuation policies and procedures of these specialized investment consultants and requests and reviews the valuation policies of the investment managers and general partners annually. The Pension Trust retains discretion to sell any of these investments at an amount other than the net asset value, should there be an investment case to sell these investments in the secondary market.

A summary of changes in the fair value of Level 3 assets and liabilities for the year ended December 31, 2023 is as follows:

		<u>Purchases</u>	<u>Issuances</u>	<u>Transfers In</u>	<u>Transfers Out</u>
Fixed income	\$	—	—	17,071	(1,871,432)
Common Stock		—	123,936	—	—
	\$	<u>—</u>	<u>123,936</u>	<u>17,071</u>	<u>(1,871,432)</u>

The significance of transfers between levels is evaluated based upon the nature of the financial instrument and size of the transfer relative to the total net assets available for benefits. . There were no significant transfers between levels for the year ended December 31, 2023.

(9) Tax Status

The Plan has received a determination letter from the Commonwealth of Puerto Rico's Department of Treasury (Treasury) dated December 6, 2011, stating that the Plan is qualified under Section 1081.01 of the Internal Revenue Code for a New Puerto Rico (the Puerto Rico Code) and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the Treasury, the Plan was amended. The Plan received a subsequent Private Letter Ruling dated March 24, 2017, from the Government of Puerto Rico's Treasury Department stating that the submitted amendments would not affect the ruling issued on December 6, 2011. Once qualified, the Plan is required to operate in conformity with the Puerto Rico Code to maintain its qualification. The plan administrator's delegate believes the Plan is being operated in compliance with the applicable requirements of the Puerto Rico Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax-exempt.

The Plan Administrator's delegate evaluates tax positions taken by the Plan. The financial statement effects are recognized when the Plan has taken an uncertain position that more likely than not would be sustained upon examination by the government. The Plan Administrator's delegate has analyzed the tax positions taken by the Plan and has concluded that there are no uncertain tax positions taken or expected to be taken.

The application for Plan termination was submitted to the Commonwealth of Puerto Rico's Department of Treasury (Treasury), dated December 21, 2023, in compliance with ERISA, Puerto Rico Internal Revenue Code of 2011, applicable regulations thereunder, and the Plan Document.

The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator's delegate believes the Plan is no longer subject to income tax examinations for years prior to 2019.

SCHEDULE SB ATTACHMENTS

Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
Actuarial value of assets	Market value of assets, including contributions receivable
Funding policy	Nestlé's general funding policy is to make contributions for each plan year in an amount not less than the minimum required contribution under ERISA and not more than the maximum tax-deductible contribution.. Nestlé may vary its contribution level, if appropriate to its tax and cash position and the funded status.
Benefits not valued	<p>All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions with Nestlé and is not aware of any significant benefits required to be valued that were not.</p> <p>Small benefits with present values up to \$5,000 may be paid in a single lump sum payment. Such lump sums are not explicitly valued as such; rather, such participants' benefits are valued using the benefit choice assumptions described above.</p>

Sources of Data and Other Information

The plan sponsor through its administrator, WTW, furnished participant data as of January 1, 2023. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale – Significant Economic Assumptions

Discount rate (Funding valuation)	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Lump sum interest conversion rate (Funding valuation)	Assumptions based on the annuity substitution method described in IRC Section §430.

Assumptions Rationale – Significant Demographic Assumptions

Mortality (Funding valuation)	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement	Retirement rates are based on an experience study conducted in 2020 for the period 2016-2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Termination	Termination rates are based on an experience study conducted in 2020 for the period 2016-2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed termination rates differ by age, service and plan because of observed differences in termination rates by service and plan.
Disability	Disability rates are reviewed with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed disability rates differ by age, gender and plan because of observed differences in disability rates by gender and plan..
Benefit commencement date for deferred benefits:	
<ul style="list-style-type: none">• Pre-retirement death benefit	Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available..

- **Deferred vested benefit** Commencement ages are based on an experience study conducted in 2020 for the period 2016-2020. Deferred vested early commencement factors are generally not subsidized so that the difference between this approach and using assumed commencement rates at different ages is not expected to be significant.

Form of payment The optional form of payment assumptions are based on an experience study performed in 2020 for the period 2016-2020..

Prescribed Methods

Funding methods The methods used for funding purposes as described above, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC §430..

Change in methods since prior valuation There have been no changes in methods since the prior valuation.

Change in estimation techniques since prior valuation There have been no changes in estimation techniques since the prior valuation.

At-risk assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year. In addition, these participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
Actuarial value of assets	Market value of assets, including contributions receivable
Funding policy	Nestlé's general funding policy is to make contributions for each plan year in an amount not less than the minimum required contribution under ERISA and not more than the maximum tax-deductible contribution.. Nestlé may vary its contribution level, if appropriate to its tax and cash position and the funded status.
Benefits not valued	<p>All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions with Nestlé and is not aware of any significant benefits required to be valued that were not.</p> <p>Small benefits with present values up to \$5,000 may be paid in a single lump sum payment. Such lump sums are not explicitly valued as such; rather, such participants' benefits are valued using the benefit choice assumptions described above.</p>

Sources of Data and Other Information

The plan sponsor through its administrator, WTW, furnished participant data as of January 1, 2023. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale – Significant Economic Assumptions

Discount rate (Funding valuation)	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Lump sum interest conversion rate (Funding valuation)	Assumptions based on the annuity substitution method described in IRC Section §430.

Assumptions Rationale – Significant Demographic Assumptions

Mortality (Funding valuation)	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement	Retirement rates are based on an experience study conducted in 2020 for the period 2016-2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Termination	Termination rates are based on an experience study conducted in 2020 for the period 2016-2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed termination rates differ by age, service and plan because of observed differences in termination rates by service and plan.
Disability	Disability rates are reviewed with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed disability rates differ by age, gender and plan because of observed differences in disability rates by gender and plan..
Benefit commencement date for deferred benefits:	
<ul style="list-style-type: none">• Pre-retirement death benefit	Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available..

- **Deferred vested benefit** Commencement ages are based on an experience study conducted in 2020 for the period 2016-2020. Deferred vested early commencement factors are generally not subsidized so that the difference between this approach and using assumed commencement rates at different ages is not expected to be significant.

Form of payment The optional form of payment assumptions are based on an experience study performed in 2020 for the period 2016-2020..

Prescribed Methods

Funding methods The methods used for funding purposes as described above, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC §430..

Change in methods since prior valuation There have been no changes in methods since the prior valuation.

Change in estimation techniques since prior valuation There have been no changes in estimation techniques since the prior valuation.
