The weighted average retirement age is equal to the normal retirement age of 62 .

List the rate of retirement at each age and describe the methodology used to compute the weighted average retirement age, including a description of the weight applied at each potential retirement age.

The weighted average retirement age is equal to the normal retirement age of 62.

Average weighted retirement age was determined by assuming 100% of participants retire at the later of age 62 or age on the valuation date.
