To the Audit Committee, North American Retirement Plans Committee,
Plan Administrator and Participants of
Greif Pension Plan
Delaware, Ohio

Independent Auditor's Report

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of the Greif Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C). The financial statements comprise the statements of net assets available for benefits as of December 31, 2023 and 2022, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA (ERISA Section 103(a)(3)(C) audit). As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency (qualified institution), provided that the investment information is prepared and certified to by the qualified institution in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Management has obtained certifications from a qualified institution as of December 31, 2023 and 2022, and for the years then ended, stating that the certified investment information, as described in the notes to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and the procedures performed as described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (GAAP); and
- the certified investment information in the accompanying financial statements agrees to, or is derived from, in all material respects, the information prepared and certified by a qualified institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern within one year after the date that the financial statements are issued or available to be issued.

Management is responsible for maintaining a current plan instrument, including all plan amendments. Management is also responsible for administering the Plan and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the *Scope and Nature of the ERISA Section 103(a)(3)(C) Audit* section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedule Required by ERISA

The supplemental Schedule H, Line 4i - Schedule of Assets (Held at End of Year) as of December 31, 2023 and Schedule H, Part IV Line 4j - Schedule of Reportable Transactions for the year ended December 31, 2023 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedule, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedule that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, is presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, is presented, in all material respects, in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.
- the certified investment information in the supplemental schedules agrees to, or is derived from, in all material respects, the information prepared and certified by a qualified institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Greif Pension Plan

Notes to Financial Statements

Note 1 - Description of the Plan

The following description of the Greif Pension Plan (the "Plan") provides general information about the Plan's provisions. Greif Packaging LLC (the "Company" or "Sponsor" or "Administrator") is the plan sponsor. Participants should refer to the Plan Document or Summary Plan Description for a more complete description of the Plan's provisions, copies of which may be obtained from the Sponsor. The Northern Trust Company (the "Trustee") maintains the Plan assets, while Empower and Willis Towers Watson (the "Recordkeepers") , tracks who is in the plan, what investments individuals own, and when financial movement occurs. Empower served as Recordkeeper until September 2022 when the process transitioned to Willis Towers Watson. As of the plan year end, December 31, 2023, Willis Towers Watson was Recordkeeper of the plan.

General

Benefits under the Plan are based on an employee's years of service and compensation. The Plan provides for 100% vesting of such benefits after an employee completes five years of service and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

Effective November 3, 2020, the Sponsor amended the Greif Pension Plan to authorize the purchase of annuities for Participants who were in pay status on or before June 1, 2020, whose benefit was still in pay status on the annuity purchase date and whose monthly benefit did not exceed \$500 per month and who satisfied other eligibility requirements.

Subsequent to the Company's acquisition of Caraustar Industries, Inc. and subsidiaries ("Caraustar") on February 11th, 2019, eligible Caraustar employees remained participants in the Caraustar Industries, Inc. Retirement Plan (the "Caraustar Plan") through December 31, 2019. During 2019, the Company determined that it was in the best interest of the participants of the Caraustar Plan and the Plan to merge them together effective December 31, 2019 at close of business.

The Caraustar Plan was a defined benefit pension plan covering substantially all employees of Caraustar that were hired before the partial Caraustar Plan freeze effective December 31, 2004.

Employees under the Caraustar Plan whose age plus credited service is 75 points or more as of December 31, 2004 will continue to earn pension benefits until they terminate employment. Employees whose age plus credited service is less than 75 points as of the effective date will have their accrued benefits frozen.

Payment of Benefits

Upon retirement, death or permanent disability, a participant's benefit will commence in the form of one of the various annuity options, as selected by the participant. In certain instances, it may be paid in lump-sum. For termination other than by retirement, death, or disability, the benefit shall commence at the participant's normal retirement age.

Funding Policy

The Sponsor contributes such amounts deemed necessary on an actuarial basis to provide the Plan with assets sufficient to meet the benefits to be paid by the Plan. Contributions from the Sponsor have met the ERISA minimum funding requirements for 2023 and 2022.

Plan Termination

Although it has not expressed an intention to do so, the Company reserves the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. Upon termination, the net assets of the Plan will be allocated for payment to the participants in an order of priority as prescribed by ERISA and its related regulations and the Plan Document.

Whether all participants receive their benefits should the Plan terminate at some future time will be dependent on the sufficiency, at that time, of the Plan's net assets to provide for accumulated plan benefits and may also depend of the financial condition of the Company and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") as well as the priority of those benefits. Some benefits may be fully or partially provided for by the then-existing net assets of the Plan and the PBGC guarantee, while other benefits may not be provided for at all.

SECURE Act 2.0

On December 23, 2022, Congress passed the Consolidated Appropriations Act of 2023 which included SECURE Act 2.0. SECURE Act 2.0 contains over 90 new retirement provisions, with varying effective dates through 2027. Since SECURE Act 2.0 provisions include both required and optional elements, the plan administrator will determine the optional provisions to elect and amend the Plan document accordingly. Most of the significant provisions will become effective in 2024 and thereafter. Accordingly, there is no material impact to the Plan's 2023 or 2022 financial statements.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("GAAP").

Payment of Benefits

Benefit payments are recorded upon distribution to participants.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes and supplemental schedules. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are stated at fair value as determined by quoted market prices in active markets or observable inputs other than quoted prices in active markets. The fair value represents the market value of listed debt and equity securities. Securities traded on a national securities exchange are valued at the last reported sales price on the last business day of the plan year; securities traded in the over-the-counter market and listed securities for which no sales were reported on that date are valued at the average of the last reported bid and ask price. The investments in the common collective trusts of the Trustee are stated at net asset value as a practical expedient to estimate fair value, see Note 4 for further discussion of fair value measurements.

All investment information disclosed in the accompanying financial statements and supplemental schedules including investments held at December 31, 2023 and 2022, and net appreciation and depreciation in fair value of investments, interest and dividends for the years then ended were obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the Plan's Trustee.

Purchases and sales of securities are recorded on a trade date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date. Net appreciation and depreciation include the Plan's gains and losses on the investments bought and sold as well as held during the year.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (Note 3) represent the actuarial present value of estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, and (b) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee services rendered to the valuation date.

Administrative Expense

Administrative expenses are paid by the Plan. Accounting and other administrative services are provided by the Sponsor.

Note 3 - Accumulated Plan benefits

The Plan's independent actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The accumulated plan benefit information as of the beginning of the plan year is as follows:

<i>(in millions)</i>	January 1, 2023
Actuarial present value of accumulated plan benefits:	
Vested benefits:	
Active employees	\$ 113.5
Participants with deferred benefits	96.6

Assumption changes	(35.4)
Net decrease	(57.6)
Actuarial present value of accumulated plan benefits at ending balance, January 1, 2023	<u>\$ 458.8</u>

Significant assumptions underlying the actuarial valuation are as follows:

Interest rate	5.00% discount rate
Retirement rate	Various rates ranging from 2% at age 55 to 100% at age 67
Mortality basis	The Pri-2012 mortality table for annuitants, non-annuitants, & contingent annuitants projected forward generationally using the MP-2021.
Annual rate of compensation increases	3.0%

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that certain changes in these estimates and assumptions could be material to the financial statements.

Note 4 - Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The three levels of the fair value hierarchy under Topic 820 are described as follows:

Level 1 - Inputs to the valuation methodology are quoted prices (unadjusted in active markets for identical assets or liabilities) that the Plan can access at the measurement date.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- Quoted prices for similar assets or liabilities in active markets

- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

Level 3 - Inputs that are unobservable inputs for the asset or liability.

The following is a description of the valuation methodologies used for investments measured at fair value. The inputs or methodology to value securities are not necessarily an indication of risk associated with investing in those securities, and there have been no changes in the methodologies used at December 31, 2023 and 2022. Valuation technologies maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

- *Mutual funds* are valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-ended mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value and to transact at that price. The level 1 mutual funds held by the Plan are deemed to be actively traded. The level 2 mutual funds are exceptions as they are held privately within a family of funds or consist of corporate/government bonds which are classified as level 2 investments.
- *Common collective funds* are measured at net asset value. The net asset value as provided by the Trustees is used as a practical expedient to estimate fair value. The net asset value is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported net asset value. The use of net asset value is deemed appropriate as these investments do not have a finite life, unfunded commitments or significant restrictions on redemptions.
- *Domestic government securities, foreign government securities, and corporate debt instruments* are valued based on quotes received from independent pricing services. Pricing services utilize matrix pricing, which considers readily available inputs such as the yield or price of fixed income securities of comparable quality, coupon, maturity, and type and are generally categorized as level 2 inputs in the fair value hierarchy.

The preceding methods described may produce fair value calculations that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets carried at fair value as of December 31, 2023 and 2022, respectively. Classification within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

(1) In accordance with Accounting Standard Codification 820-10, certain investments that were measured at net asset value per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts represented in this table are intended to permit reconciliation of the fair value hierarchy to the line items presented in the statement of net assets available for benefits.

Transfers Between Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. We evaluate the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to the total net assets available for benefits. There was one transfer from Level 1 to net asset value during fiscal year 2023 totaling \$13.6 million. No transfers occurred in 2022.

Note 5 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service (IRS) dated August 6, 2021, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax exempt.

GAAP requires plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2023 and 2022, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2020.

Note 6 - Exempt Party-in-Interest Transactions

Certain of the Plan's assets are invested in funds managed by the Sponsor, Trustee, or Recordkeepers of the Plan. These assets qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA. Furthermore, fees associated with these assets are paid directly by the assets of the Plan.

The Plan's investments include investments in funds managed by the Trustee as follows:

<i>(Fair Value in millions)</i>	December 31, 2023		December 31, 2022

Note 7 - Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Note 8 - Information Certified by Trustee

The following is a summary of the unaudited information regarding the Plan as of December 31, 2023 and 2022, and for the years ended December 31, 2023 and 2022, included in the Plan's financial statements and supplemental schedules, that was prepared by or derived from information prepared by the Trustee of the Plan, and furnished to the plan administrator. The plan administrator has obtained certifications from the Trustee that such information is complete and accurate. In addition, the investment information included in Note 4, Note 6, and the information included in the Schedule of Assets (Held at End of Year) and the Schedule of Reportable Transactions are certified as complete and accurate by the Trustee.

SCHEDULE SB ATTACHMENTS

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month.

Deferred Retirement Annuity payments for current post-65 deferred vested participants have been actuarially increased to reflect the payment delay.

Form of payment

- Greif--75% of participants who leave active service are assumed to receive the lump sum option at that time. The remaining 25% are assumed to receive an immediate annuity if they meet the plan's early retirement eligibility, otherwise a deferred annuity beginning at age 65. Note that for funding purposes, annuity substitution is used when valuing lump sum payments.
- Caraustar/Newark--All participants are assumed to choose the normal form.

Percent married

- Greif--For purposes of valuing the pre-retirement surviving spouse's benefit, 70% of eligible participants are assumed to be married.
- Caraustar/Newark--For purposes of valuing the pre-retirement surviving spouse's benefit, 80% of eligible Caraustar participants and 90% of eligible Newark participants are assumed to be married and male spouses are assumed to be three years older than female spouses. For retirees of all plans, actual census data is used.

Spouse age For purposes of valuing the pre-retirement surviving spouse's benefit, male spouses are assumed to be three years older than female spouses.

Covered pay Compensation assumed paid in the current year beginning on the valuation date is the prior year's compensation increased by 3%.

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits as required by regulations under IRC §430.

Plan Name: Greif Pension Plan
EIN / PN: 36-3268123/002
Plan Sponsor: Greif Packaging LLC
Valuation Date: January 1, 2023

SCHEDULE SB ATTACHMENTS

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

Benefits not valued Van Leer union employees have special benefits in the event of a plant shutdown that are not valued on an ongoing basis as a plant shutdown is not expected to occur.

Participants accruing benefits under the 1% Career Pay formula are valued assuming any benefit accrued under a benefit multiplier are subject to the early retirement factors under the 1% Career Pay formula (except for Van Leer union employees). This is not considered significant due to the similar early retirement factors and the light incidence of early retirements assumed.

Decrement Timing Model Rounded Middle of Year – All decrements are assumed to occur at the middle of the year to approximate the pattern of decrements that occur throughout the year. In addition, eligibility for benefits, commencement and cessation of benefits, and other commencement factors will reflect the middle of the year timing.

Assumptions Rationale - Significant Economic Assumptions

Interest rate Assumptions used for funding purposes are as prescribed by IRC §430(h).

Lump sum conversion rate As required by IRC 430, lump sum benefits are valued using “annuity substitution”, so that the interest rates assumed are effectively the same as described above for the discount rate.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430 or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Sources of Data and Other Information

Greif, Inc., through its third-party administrator, WTW, furnished participant data as of the valuation date. Data were reviewed for reasonableness and consistency, but no audit was performed.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

- For funding purposes - The interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430. The plan changed from using segment interest rates to the full yield curve starting 2023.

The assumed plan-related expenses added to the target normal cost were changed from \$2,200,000 for the prior valuation to \$2,000,000 for the current valuation to account for lower expected expenses to be paid from the trust.

Change in methods since prior valuation

The interest rates used to calculate the funding target and target normal cost were updated to the Full Yield Curve as of the current valuation date.

SCHEDULE SB ATTACHMENTS

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month.

Deferred Retirement Annuity payments for current post-65 deferred vested participants have been actuarially increased to reflect the payment delay.

Form of payment

- Greif--75% of participants who leave active service are assumed to receive the lump sum option at that time. The remaining 25% are assumed to receive an immediate annuity if they meet the plan's early retirement eligibility, otherwise a deferred annuity beginning at age 65. Note that for funding purposes, annuity substitution is used when valuing lump sum payments.
- Caraustar/Newark--All participants are assumed to choose the normal form.

Percent married

- Greif--For purposes of valuing the pre-retirement surviving spouse's benefit, 70% of eligible participants are assumed to be married.
- Caraustar/Newark--For purposes of valuing the pre-retirement surviving spouse's benefit, 80% of eligible Caraustar participants and 90% of eligible Newark participants are assumed to be married and male spouses are assumed to be three years older than female spouses. For retirees of all plans, actual census data is used.

Spouse age For purposes of valuing the pre-retirement surviving spouse's benefit, male spouses are assumed to be three years older than female spouses.

Covered pay Compensation assumed paid in the current year beginning on the valuation date is the prior year's compensation increased by 3%.

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits as required by regulations under IRC §430.

Plan Name: Greif Pension Plan
EIN / PN: 36-3268123/002

SCHEDULE SB ATTACHMENTS

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

Benefits not valued Van Leer union employees have special benefits in the event of a plant shutdown that are not valued on an ongoing basis as a plant shutdown is not expected to occur.

Participants accruing benefits under the 1% Career Pay formula are valued assuming any benefit accrued under a benefit multiplier are subject to the early retirement factors under the 1% Career Pay formula (except for Van Leer union employees). This is not considered significant due to the similar early retirement factors and the light incidence of early retirements assumed.

Decrement Timing Model Rounded Middle of Year – All decrements are assumed to occur at the middle of the year to approximate the pattern of decrements that occur throughout the year. In addition, eligibility for benefits, commencement and cessation of benefits, and other commencement factors will reflect the middle of the year timing.

Assumptions Rationale - Significant Economic Assumptions

Interest rate Assumptions used for funding purposes are as prescribed by IRC §430(h).

Lump sum conversion rate As required by IRC 430, lump sum benefits are valued using “annuity substitution”, so that the interest rates assumed are effectively the same as described above for the discount rate.

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430 or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Sources of Data and Other Information

Changes in Assumptions and Methods

Change in assumptions since prior valuation

- For funding purposes - The interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430. The plan changed from using segment interest rates to the full yield curve starting 2023.

The assumed plan-related expenses added to the target normal cost were changed from \$2,200,000 for the prior valuation to \$2,000,000 for the current valuation to account for lower expected expenses to be paid from the trust.
