<b>Discount rate sponsor elections</b>

• Look-back months	4	
• Use Stabilized rates- Funding	Yes	
• Use Stabilized rates- Section 436 benefit restrictions	Yes

• First 5 Years	4.75%	2.13%
• Next 15 Years	5.00%	3.62%
• Over 20 Years	5.74%	3.93%
• Rationale	These are IRS prescribed rates. The plan sponsor elected this methodology from alternative IRS prescribed options	
<b>Mortality sponsor elections</b>		
• Healthy participants	Section 430(h)(3) prescribed separate static annuitant and nonannuitant mortality tables. These tables are based on the Society of Actuaries (SOA) RP-2014 mortality tables, adjusted back to 2006, and the MP-2021 improvement scale.	
• Rationale for mortality rates	These are IRS prescribed rates. The plan sponsor elected this methodology from the alternative IRS prescribed options.	
<b>Other economic assumptions</b>		
• Expected investment return for actuarial value development	5.16% for the period 5/1/2021-4/30/2022 and for the period 5/1/2022-4/30/2023.	
• Rationale for expected rate of return	The expected rate of return on plan assets is based on Mercer's view of long-term return expectations and the plan's asset mix. This is approximately equal to the 50th percentile range simulated investment return using capital market assumptions published in Mercer Investment Consulting's Capital Market Outlook	
• Expenses	\$130,000 was added to the 5/1/2023 – 4/30/2024 normal cost	
• Rationale for expected expenses	Expenses are assumed to be same as actual expenses paid from plan assets in the prior year adjusted for any anticipated changes (example increases in PBGC premiums) rounded to nearest thousand.	
<b>Demographic assumptions</b>		
• Withdrawal	See table of sample rates.	
• Rationale	Because the employer has a fairly small number of employees, there is not enough credible experience to perform an experience study. The withdrawal assumption historically used has not produced significant actuarial gains or losses.	
• Disability incidence	None	
• Retirement Age	100% are assumed to retire at age 63 or current age if older	
• Benefit commencement age for

– Rationale for retirement age assumption and commencement age for vested deferreds	Because the employer has a fairly small number of employees, there is not enough credible experience to perform a retirement experience study. The assumptions are reflective of the retirement eligibility provisions of the plan and have not produced significant actuarial gains or losses.

## **Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**

### **Actuarial methods for funding**

#### **Asset methods**

The asset valuation method is an average of the adjusted market value for each year during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

#### **Participant methods**

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

#### **Minimum funding methods**

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

## Schedule SB, Part V — Summary of Plan Provisions

---

### Miscellaneous

---

- **Maximum benefits** Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2023, the limit is \$265,000.
- 

### Benefits included or excluded

Unless noted below, all benefits provided by the plan, as restated and amended through January 31, 2012, are included in this valuation.

- **Most recent plan amendments included :** Amendment adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Plan amendments excluded:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

### Plan provisions specific to funding

#### Additional benefits included or excluded

- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
  - *Plan amendments:* See above.
  - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
  - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

### Plan provisions changes since prior valuation
