Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Funding Method

Funding method as required by the Pension Protection Act of 2006. Under this method, the plan's funding target is determined as the sum of the actuarial present values (as of valuation date) of the individual accrued benefits taken into account for valuation purposes as of the beginning of the plan year.

The target normal cost is the sum of actuarial present values (on the valuation date) of the benefits deemed to accrue in the plan year.

An individual's accrued benefit for valuation purposes as of any determination date with respect to any assumed separation date(s) is the accrued benefit described under the plan, based on credited service as of the determination date, with plan compensation, benefits, and offset (if any), projected to the separation date.

The benefit deemed to accrue for an individual during a plan year is the excess of the accrued benefit for valuation purposes at the end of the plan year over the accrued benefit for valuation purposes at the beginning of the plan year.

If multiple separation dates are used, the actuarial present values take into account the probability of each separation event.

Changes Since the Prior Valuation

- The Valuation Date changed since the prior valuation due to the termination of the Plan.

Line 15, Reconciliation of differences between valuation results and amounts used to calculate AFTAP

The plan was terminated effective February 29, 2024. Because the plan's valuation date is the end of the plan year, the AFTAP that would be reported on Line 15 would be the AFTAP for the 2024 plan year. Since the plan was not subject to any 436 limitations at the time of termination of the plan or after, no AFTAP is provided.
