Asset valuation method

We used financial data submitted by the trustee as of December 31, 2024 without further audit. Customarily, this data would not be verified by a plan’s actuary. We have reviewed the information for internal consistency and reasonableness and have no reason to doubt its substantial accuracy.

The asset valuation method is the market value of assets.

Participants included in the valuation

Participant data was supplied by the plan sponsor. We have reviewed the data and have no reason to doubt its substantial accuracy. Only those employees who have met the eligibility requirements of the plan are included in the valuation of liabilities.

No liability is included for nonvested participants who terminate prior to the valuation date. Participants with a break in service on the valuation date are treated as terminated vested participants.

Benefits included or excluded in the valuation

Unless noted below, all benefits provided by the plan are included in the valuation:

- Plan amendments – Amendments adopted after the valuation date are excluded from the valuation.
- Scheduled benefit increases – Scheduled benefit increases (such as cost-of-living increases) effective after the end of the current plan year are excluded from minimum funding requirements.
- Late retirement increases – Accrued benefits are actuarially increased for retirements beginning after normal retirement age.
- Shutdown benefits – We are not aware of any actions that would create shutdown benefits; therefore, they are excluded.
- IRC Section 415(b) – The limitations of IRC Section 415(b) have been incorporated into our calculations.
- Benefit restrictions – Benefit restrictions (if applicable) are ignored in this valuation.

Actuarial cost method

The actuarial cost method used for minimum funding calculations is known as the traditional unit credit method. The objective under this method is to fund each participant's benefits as they are earned under the plan.

A participant's **accrued liability** is the present value of these benefits based on Credited Service and average pay as of the beginning of the plan year. A participant's **normal cost** is the present value of the benefit earned in the current plan year. The plan's **target normal cost** is the sum of the individual normal costs, and the plan's **funding target liability** is the sum of the accrued liabilities for all participants under the plan.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
