## INDEPENDENT AUDITORS' REPORT

April 11, 2025

TO THE PARTICIPANTS OF AND PENSION PLAN INVESTMENT COMMITTEE  
AB Mauri Food Inc. Retirement Plan  
Saint Louis, Missouri

### ***Scope and Nature of the ERISA Section 103(a)(3)(C) Audit***

We have performed an audit of the financial statements of the **AB Mauri Food Inc. Retirement Plan** ("The Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statement of net assets available for benefits as of June 30, 2024 and 2023, the related statements of changes in net assets available for benefits for the years ended June 30, 2024 and 2023, the statement of accumulated plan benefits as of June 30, 2023, the statement of changes in accumulated plan benefits for the year ended June 30, 2023, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to the periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of and for the year ended June 30, 2024, stating that the certified investment information, as described in Note F to the financial statements, is complete and accurate.

### ***Opinion***

In our opinion, based on our audit and on the procedures performed as described in the Auditors' Responsibilities for the Audit section

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

### ***Basis for Opinion***

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the **AB Mauri Food Inc. Retirement Plan** and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

### ***Responsibilities of Management for the Financial Statements***

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements that are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due to which may become due to such participants.

### ***Auditor's Responsibilities for the Audit of the Financial Statements***

Except as described in the *Scope and Nature of the ERISA Section 103(a)(3)(C) Audit* section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audit did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate to those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

***Other Matters - Supplemental Schedules Required by ERISA***

The supplemental schedules of Schedule H, Line 4i - Schedule of Assets (Held at End of Year) For Investment Purposes and Schedule H, Line 4j – Schedule of Reportable Transactions are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that is agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information derived from the certified investment information, including their form and content, is presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- The form and content of the supplemental schedules, other than the information in the supplemental schedule that agreed to or is derived from the certified investment information, is presented in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- The information in the supplemental schedules related to assets held and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

NOTES TO FINANCIAL STATEMENTS  
YEARS ENDED JUNE 30, 2024 AND 2023**

**NOTE A - DESCRIPTION OF PLAN**

The following description of the *AB Mauri Food Inc. Retirement Plan* (the "Plan") provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

**General** - The Plan is a defined benefit pension plan sponsored by AB Mauri Food Inc. (the "Company"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

The Plan covers all eligible employees of the Company hired prior to February 1, 2005. Effective September 2004, employees of the Nutrition 21, Inc. division and Burns Philp Inc. division were no longer eligible to participate in the Plan. Effective February 1, 2005, no new employees were allowed to enter the Plan. Effective July 1, 2014, the Plan was restated to freeze benefit accruals for highly compensated participants.

**Vesting** - Participants are vested upon completion of five years of service or attainment of age 65 at termination of employment.

**Normal Retirement Benefits** - A participant with five years or more of credited service by the normal retirement age of 65 is entitled to pension benefits. Benefits are based upon a formula which considers social security benefits and years of credited service earnings levels less offsets for benefits, if any, from predecessor plans. If a participant's employment is terminated or credited service is interrupted prior to the normal retirement date and after completion of five years of continuous service, the participant is entitled to a retirement benefit commencing on the normal retirement date. The retirement benefit computation is the same as the normal pension benefit computation.

The actuarial equivalent present value of any benefit payable shall be paid in a lump sum payment if the present value of such benefit does not exceed \$1,000 at the time of distribution.

**Early Retirement Benefits** - A participant with ten years of vested service and who is at least 55 years of age may elect to receive early retirement benefits at any age prior to normal retirement date. Early retirement benefits equal the participant's normal retirement benefits, as described above, reduced by percentages defined in the Plan.

**Deferred Retirement Benefits** - If a participant remains employed after normal retirement age and is otherwise eligible, the individual will continue to receive credited service until retirement. His or her monthly retirement income will not commence until actual retirement date. The pension benefit payable will not be increased because of payments not made while continuing to work, unless the individual continues working after attaining age 70½, at which time monthly pension benefits will be increased actuarially on April 1<sup>st</sup> following the calendar year in which the participant attains age 70½ to the date benefits begin.

**Surviving Spouse Benefits** - If a participant's death occurs while in an eligible status as prescribed in the Plan, and after completion of five years of continuous service, a benefit is paid to the surviving spouse. The amount of the benefit is equal to 50% of the amount payable had the benefit been scheduled to commence following the later of either the month in which the participant dies or the month in which the participant would have attained age 55.

**Administration** - The Plan Administrator is the Company. A portion of the administrative fees for the Plan are paid by the Company. The Plan pays all investment management fees to the trustee.

**AB MAURI FOOD INC. RETIREMENT PLAN  
NOTES TO FINANCIAL STATEMENTS  
YEARS ENDED JUNE 30, 2024 AND 2023**

---

**NOTE A - DESCRIPTION OF PLAN (Continued)**

**SECURE 2.0 Act** - On December 29, 2022, Congress passed the SECURE 2.0 Act of 2022 ("Act") to increase retirement savings, improve retirement rules, and lower employer costs of setting up a retirement plan. Plan Amendments required by the Act generally need not be made until the end of the first plan year beginning on or after January 1, 2026 (by December 31, 2026). However, plans must be operated in accordance with the effective date of each new provision.

**NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Accounting** - The accompanying financial statements have been prepared on the accrual basis of accounting, in conformity with accounting principles generally accepted in the United States of America.

**Investment Valuation and Income Recognition** - Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note G for discussion of investments measured at fair value using a value based on quoted market prices for identical assets available on an active market. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on their ex-dividend date. Net appreciation/depreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Their change in net unrealized appreciation/depreciation of investments held from the beginning of the plan year to the end of the plan year is included with realized gains/losses as net investment income/loss reported in the accompanying statement of changes in net available for benefits.

**Payment of Benefits** - Benefit payments are recorded upon distribution.

**Use of Estimates** - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

**Administrative Expenses** - Expenses of the Plan, such as audit, actuarial management, custodial, and consulting, fees to the extent allowed by law, are paid directly by the Plan. All other costs of administering the Plan are paid by the Company. Expenses that are paid by the Company are excluded from the financial statements. In addition, certain investment-related expenses are included in net appreciation (depreciation) of fair value of investment presented in the accompanying Statements of Changes in Net Assets Available for Benefits.

**Management's Review of Subsequent Events** - For the year ended June 30, 2024, the Plan evaluated subsequent events for potential recognition and disclosure through April 11, 2025, the date the financial statements were available to be issued.

**NOTE C - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS**

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to applicable employees. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employee with vested rights of their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries based upon service rendered up to the valuation date. The actuarial present value of accumulated plan benefits has been determined by an independent actuary and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interests) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of July 1, 2023 and 2022 are as follows.

Rate of Return: 5.50% and 6.25% per annum for 2023 and 2022, respectively.

Inflation Rate: Interest rate used to discount the obligations for 2023 and 2022 was 2.40%.

Mortality: Based on Pri-2012 total dataset base rate mortality table projected generationally using the Principal Mortality Improvement Scale (Principal 2023).

Retirement: 5% of those eligible are assumed to retire from ages 55 to 61, 40% at age 62, 20% at age 63 to 64, and 100% remaining retire at age 65 or current age, if greater.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to be terminated, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

A benefit is included in vested when the participant meets age and service eligibility requirements at the valuation date. Certain ancillary benefits are always treated as nonvested, such as disability benefits payable to retirement age unless in pay status, and pre-retirement death benefits in excess of the survivor annuity death benefit, except as noted in the Plan provisions.

**NOTE D - FUNDING POLICY**

The Company's policy is to contribute an amount (calculated on an actuarial basis) within the minimum and maximum funding requirements prescribed by ERISA and tax regulations. Contributions from the Company are accrued based on amounts determined in accordance with the funding policy. The Company's contributions of \$6,500 for the year ended June 30, 2024, met the minimum funding requirements of ERISA. No employee contributions are required or permitted.

**NOTE E - PLAN TERMINATION**

Although it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan at any time, subject to the provisions set forth in ERISA. Should the Plan terminate at some future time, its net assets generally will be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) at that time. Some benefits may be paid fully or partially provided for by the existing assets and the PBGC guaranty while other benefits may not be provided at all. In the event of the termination of the Plan, participants will become 100% vested in benefits earned as the termination date, to the extent then funded, and the trust will be apportioned and valued as set forth in the Plan document.

**NOTE F - INFORMATION PREPARED AND CERTIFIED BY TRUSTEE**

The Plan Administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan Administrator has obtained a certification from the Principal Trust Company ("Principal") that all of the information provided by Principal and included in the accompanying financial statements and supplemental Schedule of Assets (Held at End of Year) is complete and accurate. Information as to the investments in the pooled separate accounts of Principal, investment income, and all information appearing in the accompanying supplemental schedule is presented in reliance solely upon this certification.

**NOTE G - FAIR VALUE MEASUREMENTS**

The fair value measurement and accounting literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority and Level 3 inputs have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. Level 2 inputs consist of quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets, or inputs other than quoted prices that are observable. Level 3 inputs are unobservable and are only used when Level 1 or Level 2 inputs are not available. There are no plan assets requiring the use of Level 2 or Level 3 inputs for the periods presented. The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Fair Value Measurements - Inputs to the valuation methodology are unadjusted quoted market prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Fair Value Measurements - Inputs to the valuation methodology include:

- Quoted market prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

NOTES TO FINANCIAL STATEMENTS  
YEARS ENDED JUNE 30, 2024 AND 2023**

**NOTE G - FAIR VALUE MEASUREMENTS (Continued)**

The assets of the Plan are invested in an investment group contract with Principal (Group Contract No. GA 8-1813). Under the investment contract, the Plan assets are invested in pooled separate accounts of Principal, and it has discretionary authority concerning purchases and sales of investments under its control. The balances of the pooled separate accounts are debited or credited with earnings or losses on the underlying investments.

Following is a description of the valuation methodologies used the assets measured at fair value. There have been no changes in the methodologies used at June 30, 2024 and 2023.

- *Pooled Separate Accounts:* Valued based quoted market prices for identical assets available on an active market (Level 1)

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair value. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's investments in fair value.

	Total	Fair Value Measurements at Reporting Date	
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Quoted Prices in Active Markets for Similar Assets (Level 2)
<u>June 30, 2024</u>			
Pooled separate accounts	\$ 24,952,720	\$ 24,952,720	\$ -

**NOTE G - FAIR VALUE MEASUREMENTS (Continued)**

	Total	Fair Value Measurements at Reporting Date Using:	
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Quoted Prices in Active Markets for Similar Assets (Level 2)
<u>June 30, 2023</u>			
Pooled separate accounts	\$ 25,617,484	\$ 25,617,484	\$ -
Pooled separate accounts - U.S. Property	2,102,072	2,102,072	-
Total investments at fair value	<u>\$ 27,719,556</u>	<u>\$ 27,719,556</u>	<u>\$ -</u>

**NOTE H - PARTY-IN-INTEREST TRANSACTIONS**

Certain Plan investments are pooled into separate accounts managed by Principal or its related entities. Principal is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions. Fees paid to the trustee were \$26,501 for the year ended June 30, 2024.

**NOTE I - INCOME TAX STATUS**

The Plan obtained a favorable determination letter on September 14, 2016, in which the Internal Revenue Service stated that the Plan, as designed, is in compliance with the applicable requirements of the Internal Revenue Code. Therefore, it is believed that the Plan is qualified, and the related trust is tax-exempt as of the financial statement date.

**NOTE J RISKS AND UNCERTAINTIES**

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect investment balances and the amounts reported in the statement of net assets available for benefits. Plan contributions made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term may be material to the financial statements.

**NOTE K - CONCENTRATIONS**

As of June 30, 2024 and 2023, the Plan had more than 10% of its net assets available for benefits in each of the following investments accounts at the Principal Trust Company:

- Principal Life Insurance Company LDI Intermediate Duration
- Principal Life Insurance Company LDI Long Duration

Assumptions prescribed by law

**Mortality**

**Before benefit payment period**  
 IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.

**During benefit payment period**  
 IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.

Assumptions selected by actuary

**Inflation** 2.40% increase per year.  
 Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.

**Asset return** 5.50% for the current plan year.  
 The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.

**Expected expense** The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.

**Retirement** Active participants

Age	Probability of retirement
55-61	5%
62	40%
63-64	20%
65	remaining participants

Inactive participants are assumed to retire at age 65.

This assumption is based on the results of recent experience analysis and anticipated future experience. Some participants retire early since the plan provides an early retirement subsidy beginning at age 62.

Upcoming year salary increase

The preceding year's salary is increased using the S-5 Table from The Actuary's Pension Handbook, increased by 0.00% at each age. This table provides a rate of increase that declines as participants age.

Note: not used for Plan accounting calculations.

Age	Upcoming increase
25	4.18%
40	2.72%
55	1.88%

Expected salary increase is composed of salary inflation, a real wage growth and a merit increase. This reflects company salary increase philosophies along with more recent experience of the plan participants.

Disability

1987 Commissioner's Group Disability Table, six month elimination period, male and female.

We rely on a publicly published table due to the limited size of the plan. The 1987 CGDT was recommended by the Society of Actuaries for pension valuation purposes.

Marriage

80% married; husbands are 3 years older than wives.

This assumption is based on the results of recent experience analysis and anticipated future experience.

Withdrawal

2003 Society of Actuaries Small Plan Age Table, multiplied by 1.00.

We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 1.00 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience.

Wage base increase

3.50% per year.

Our Wage Base increase assumption are based on inflation and the real wage differential forecast from Social Security Trustee Report. Based on average annual real wage growth forecast from the Social Security Trustee report and historical averages, our best estimate places this assumption to 1.10% above inflation of 2.40%.

Compensation limit increase

2.40% increase per year used in the calculation of the IRC 404 maximum deduction cushion. See [Calculated deduction](#) in Rules and regulations.

Compensation limit increase is consistent with the inflation assumption.

**Form of benefit and basis** Upon retirement, 50% of active participants will elect an immediate lump sum and 50% will elect an immediate annuity on the normal form. At termination, 100% of active participants will elect an immediate lump sum. All disabled participants will elect a temporary annuity payable until normal retirement age and a lump sum at normal retirement age.

Participants who are already terminated on the valuation date are assumed to receive their benefit on the normal form at the assumed retirement age.

This assumption is based on the results of recent experience analysis and anticipated future experience.

The single sum benefit is based on the Applicable Mortality and the plan's funding target interest rates, as prescribed.

#### Methods prescribed by law

**Liability measure** Funding target is the present value of the benefits accrued on the valuation date. Included in Funding Target is the value of any missed required minimum distributions (defined in IRC §401(a)(9) and Treasury Regulation §1.401(a)(9)), equal to back payments with interest at 8.00%.

Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

**Benefit accrual** All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target.

- The portion based on the plan's definition of accrued benefit.
- The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement.

The benefits included in target normal cost are calculated similarly, by splitting the benefits. The target normal cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.

**Lump sum payments** Lump sum payments are valued using the plan's funding target interest rates as required, per IRS guidance. These rates are currently higher than the actual rates used to determine lump sum distributions. Therefore, plan liabilities do not currently recognize this additional cost and this may result in the plan not accumulating adequate assets. You may wish to consider additional contributions.

#### Methods selected by plan sponsor

<b>Asset method</b>	<p>The asset valuation method is prescribed by law for plans that elect to use a value other than market value.</p> <p>For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.</p> <p>The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.</p> <p>When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.</p>
<b>Segment rates</b>	<p>24-month average with no weighting to prior law basis. Use rates where February is the last month included in the average.</p>
<b>PBGC premium basis</b>	<p>Variable rate premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 07/01/2020 plan year and this method must be used for five years before a change can be made.</p>

#### Methods elected by actuary

<b>Retirees</b>	<p>Assets and liabilities for current and future retirees are included.</p>
<b>Vested benefits</b>	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p>

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

**Mortality** Based on Pri-2012 Total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2023).

**Mortality base rates**

**Before benefit payment period**

Employee amount-weighted, male and female

**During benefit payment period**

Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

**Mortality improvement**

Principal 2023 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

Parameter	Principal 2023
Historical dataset	SSA
Whittaker-Henderson Graduation	Order 3
Interpolation Structure	Basic
Graduated MI data last year ("jumping off" point)	2017
H/D transition ultimate year by age/cohort	2029/2029
Weight placed on interpolation by cohort	50%
Initial Slope periods (constraint)	2016-2017 (0.000)
LTR	SSA LTR 2023
COVID-19 or Excess load	None <sup>1</sup>

<sup>1</sup>Based on the sponsor's input, plan experience does not show a need for long-term excess death or Covid death load adjustments.

See [Mortality Documentation](#) for rationale and additional information.

Interest rate used to value liabilities	5.25% The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.
Treatment of administrative expenses	No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.  Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.  Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.
Basis for lump sums	<p><b>Interest rate</b></p> <p>Based on the three segment yield curve: 3.55%/3.95%/4.95% The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high quality corporate bond yields. According to our most recent study, the long-term expected yields for short/intermediate/long corporate bonds are 3.55%/3.95%/4.95%. For details, see Corporate AA yield in Table 3 of Long-Term Capital Market Assumptions link.</p> <p><b>Mortality</b></p> <p>We have selected the same <a href="#">mortality</a> assumption for lump sum payments, but with a 50/50 blend of male and female total dataset base rates and mortality improvement scales. This reflects the IRS practice of defining lump sum mortality on a unisex basis.</p>

Schedule SB, Line 2a - Explanation of Assets  
AB Mauri Food Inc. Retirement Plan  
EIN 22-2723920 Plan No. 333

The market value of assets on line 2a does not equal assets shown on Schedule H, Schedule I or Form 5500-SF. Schedule H, Schedule I and Form 5500-SF use the full value of contributions received after plan year end. Line 2a includes the value of \$312,000 contributions received after the plan year end with a discounted value of \$307,257.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age  
 AB Mauri Food Inc. Retirement Plan  
 EIN 22-2723920 Plan No. 333

The weighted average retirement age is weighted by the expected percentage of active participants retiring at each age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.
