INDEPENDENT AUDITORS' REPORT

Board of Trustees
Northwest Ironworkers Retirement Plan
Mercer Island, Washington

Opinion

We have audited the accompanying financial statements of the Northwest Ironworkers Retirement Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of June 30, 2024, 2023, and 2022, the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of Northwest Ironworkers Retirement Plan (the Plan), as of June 30, 2024, 2023, and 2022, and the changes in its net assets available for benefits for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments; administering the Plan; and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we—

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of assets held for investment, reportable transactions, and administrative expenses are presented for purposes of additional analysis. The supplemental schedules of assets held for investment and reportable transactions are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements.

The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with generally accepted auditing standards.

In forming our opinion on the supplemental schedules of assets held for investment and reportable transactions, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole. The form and content of the schedules of assets held for investment and reportable transactions are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Northwest Ironworkers Retirement Plan

Notes to Financial Statements

Note 1 – Description of the Plan

The Northwest Ironworkers Retirement Plan (the Plan) became effective July 1, 1963, as a result of collective bargaining between the Seattle Chapter, Tacoma Chapter, Inland Empire Chapter, and the Oregon-Columbia Chapter of the Associated General Contractors of America, Inc., and the Steel and Wire Fabricators Association, Inc., and Ironworkers Locals 14, 29, 86, 114, 505, and 598 of the International Association of Bridge, Structural, Ornamental and Reinforcing Ironworkers, represented by the Ironworkers District Council of the Pacific Northwest.

The following description of the Plan is provided for general information purposes only:

- a. **General** – The Plan is a defined benefit pension plan covering those bargaining unit employees of employers under the collective bargaining agreement. The Plan has been most recently amended effective July 1, 2017, and most recently restated effective July 1, 2014. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.
- b. **Contributions and benefits** – The plan agreement provides that participating employers make monthly contributions to the Plan, in the amount of \$11.00 for each hour worked, to provide benefits to participants for the years ended June 30, 2024, 2023, and 2022.
- c. **Pension benefits** – Participants with five years vested service for those working after June 30, 1989 (ten years for those working between December 1, 1969, and June 30, 1989, and 15 years for those working between July 1, 1963, and December 1, 1969), with at least one year future service, are entitled to pension benefits beginning at normal retirement age (65). The Plan permits early retirement at age 55 with five years of service, as long as the participant withdraws and completely refrains from any work with a contributing employer. Participants may elect to receive their pension benefits in the form of joint and survivor annuity. A nonvested participant incurs a permanent break in service if the number of consecutive one-year breaks in service is at least five and equals or exceeds the number of full years of credited service which was previously accumulated. At this time, all of the accumulated credited service and accrued benefits are cancelled.
- d. **Death and disability benefits** – If an active, vested participant dies prior to retirement, 50% (or 100% survivor option) of the monthly benefit that the participant would have received had he/she retired the day before he/she died, would be paid to the spouse. If death occurs before age 55, payments are deferred until the participant would have attained that age. Disability benefits are paid to participants who become occupationally disabled, as a result of actual employment, for 18 months (minimum six) and are eligible for Social Security Disability Award or Workers' Compensation thereafter. They must have five years of service and earned at least one-half year of service in the three plan years preceding the plan year of disability.
- e. **Administration** – The Plan is administered by a Board of Trustees that is assisted by a contract administration organization. Administrative expenses are borne by the Plan.

Note 2 – Summary of Significant Accounting Policies

- a. **Basis of accounting** – The Plan's financial statements are prepared on the accrual basis.
- b. **Investment valuation and income recognition** – Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned on an accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

- c. **Actuarial present value of accumulated plan benefits** – Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions, to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. Benefits under the Plan are based on vesting service, as defined in the plan agreement, ending on the date which the benefit information is presented (July 1, 2023).

Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included to the extent they are deemed attributable to employee service rendered to the valuation date. The actuarial present value of accumulated plan benefits is determined by the consulting actuary, Milliman, Inc., and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. See Note 7 for other detailed significant actuarial assumptions. The assumptions utilized in the actuarial valuation are based on the presumption that the Plan will continue. If the Plan was to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

- d. **Use of estimates** – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires plan management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could vary from the estimates that were used.
- e. **Payment of benefits** – Benefits are recorded upon distribution.
- f. **Subsequent events** – In preparing these financial statements, the Plan has evaluated events and transactions for potential recognition or disclosure through March 24, 2025, the date the financial statements were available to be issued.

Northwest Ironworkers Retirement Plan

Notes to Financial Statements

Note 3 – Funding Policy

The collective bargaining agreement requires contributions by participating employers of a specified dollar amount for each hour worked by covered employees. Contributions received by the Plan are deposited in a trust account where they are invested on behalf of the Plan. Any benefits provided by the Plan are paid directly from net assets available for benefits. The contributions for the years ended June 30, 2024, 2023, and 2022, exceeded the minimum funding requirements of ERISA, as amended.

Note 4 – Pension Protection Act Certification

For the plan years beginning July 1, 2023 and 2022, the Plan's actuary certified that the Plan was in neither the critical nor endangered status ("green zone"), within the meaning of the Pension Protection Act of 2006. The Plan was considered to be in the green zone because its funding percentage is greater than 80%, at 104% and 98% for the years beginning July 1, 2023 and 2022, respectively.

Note 5 – Plan Termination

The Plan shall continue in existence until such time as it is terminated by one of the following means:

- a. An instrument in writing executed by mutual consent of the employers and the union;
- b. The provisions of the agreement shall continue in effect during the term of the collective bargaining agreements existing between the parties at the time of execution and renewals or extensions with respect to such collective bargaining agreements that provide for the continuation of payments into the fund and retirement plan; or
- c. In no event shall the trust established by the agreement continue for a period longer than is permitted by law.

In the event of a termination of the Plan, the rights of all affected participants to benefits then accrued, to the extent then funded, shall thereupon become 100% vested and nonforfeitable. Upon termination of the trust agreement, the Board of Trustees shall conclude the affairs of the Plan. All monies and assets remaining after the payment of expenses shall be used for and allocated among the participants and beneficiaries as prescribed by ERISA and its related regulations. A more complete discussion of the priority order of participants' claims to the assets of the Plan upon plan termination and benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) is located in the plan booklet. Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

Note 6 – Fair Value Measurements

The Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability; and
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the valuation methodologies used for the years ended June 30, 2024, 2023, and 2022.

Level 1 – Short-term Funds, Common and Foreign Stocks, and Mutual Funds: Valued at the closing price reported on the active market on which the individual securities are traded.

Level 2 – U.S. Securities and Corporate and Foreign Bonds: Valued using the latest bid price or using valuations based on a matrix system which considers such factors as security prices, yields, maturities, and ratings.

Level 3 – The Plan had no investments that are classified as Level 3 for the years ended June 30, 2024, 2023, and 2022.

Common Collective Trusts: Valued at the net asset value of units, which is based on the observable prices of the underlying investments held by the Plan at year end.

Notes to Financial Statements

Note 6 – Fair Value Measurements (Continued)

Investments measured at net asset value (NAV):

103-12 *Investment Entities*: Values provided by the investment manager:

- Panagora Risk Parity Multi Asset Group Trust is valued on the basis of market valuations provided by independent pricing services.
- Quest Group Trusts IV, V, and VII are valued by using the annual MAI Investment Property appraisals, the working checking account for the trusts, and any accrued receivables or liabilities.
- Washington Capital Joint Master Trust Real Estate Equity Fund is valued on the basis of a discounted cash flow approach, which includes the future rental receipts, expenses, and residual values as the highest and best use of the real estate from a market participant view as rental property.
- Washington Capital Joint Master Trust Mortgage Income Fund is valued on the basis of future principal and interest payments discounted at prevailing interest rates for similar investments.

Limited Partnerships: Valued based on the Plan's share of the unallocated underlying investments, which is based on observable prices of the underlying assets.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's investment assets at fair value:

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. We evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the years ended June 30, 2024, 2023, and 2022, there were no significant transfers in or out of Levels 1, 2, or 3.

Note 6 – Fair Value Measurements (Continued)

Investments measured at net asset value (NAV) (continued):

The following provides a brief description of the investment strategies employed by the Plan's investment funds valued at net asset value per share (or its equivalent):

Limited Partnerships:

AQR GRP EL Fund LP – seeks to provide diversified exposure by investing in various equities, government bonds, and commodities.

Hatteras Core Alternatives TEI Institutional Fund LP – The primary investment objective is to provide capital appreciation consistent with the return characteristics of the alternative investment portfolios of larger endowments. The secondary objective is to provide capital appreciation with less volatility than that of the equity market. The fund lost over 98% of its fair value during the year ended June 30, 2024, and is subject to pending investor litigation related to the investment losses.

Sentinel Real Estate Fund – seeks to acquire properties and enhance asset value by investing in properties with reliable and stable sources of income, mitigating risk through geographic and economic diversification, and utilizing prudent capital structures.

WCM Focused International Growth Fund LP – seeks long-term capital appreciation by investing approximately 75% of its net assets in equity securities of companies outside of the United States. The fund uses a bottom-up approach to identify companies with attractive investment qualities.

103-12 Investment Entities and Common Collective Trusts: These entities are direct filing entities that are reported in Schedule D of the Plan's Form 5500 and investment objectives are no longer required to be disclosed on the Plan's financial statements under FASB ASU 2015-07.

Note 7 – Actuarial Present Value of Accumulated Plan Benefits

Milliman, Inc., consulting actuaries, used the following significant actuarial assumptions in the Plan's valuation as of July 1, 2023 and 2022:

Investment earnings	6.75% per annum
IRS current liability rate	2.85% (2.27% 2022)
Mortality	Pri-2012 Sex Distinct Blue Collar Benefit Weighted Mortality Tables
Normal retirement age	Age 65
Level of contribution	\$53,839,500 and \$55,522,500 annually for 2023 and 2022, respectively
Contribution rate	\$11.00 per hour
Estimated expenses	\$1,500,000 and \$1,350,000 annually for 2023 and 2022, respectively

Note 7 – Actuarial Present Value of Accumulated Plan Benefits (Continued)

The actuarial present value of accumulated plan benefits as calculated by Milliman, Inc., follows:

	July 1,	
	2023	2022
Vested benefits:		
Participants and beneficiaries currently receiving benefits	\$ 460,933,688	\$ 454,405,430
Other participants	171,087,483	171,356,639
	<u>632,021,171</u>	<u>625,762,069</u>
Nonvested benefits	<u>45,220,072</u>	<u>43,255,929</u>
Total actuarial present value of accumulated plan benefits at current valuation date	<u>\$ 677,241,243</u>	<u>\$ 669,017,998</u>

The changes in the actuarial present value of accumulated plan benefits were as follows:

	Years Ended July 1,	
	2023	2022
Actuarial present value of accumulated plan benefits, beginning of year	<u>\$ 669,017,998</u>	<u>\$ 668,926,793</u>
Increase (decrease) attributable to:		
Benefits accumulated and plan experience	8,368,385	8,110,422
Reduction in discount period	43,476,536	43,464,965
Benefits paid	(50,669,695)	(50,832,802)
Actuarial gain	(6,922,907)	(4,765,120)
Plan amendments	<u>13,970,926</u>	<u>4,113,740</u>
	<u>8,223,245</u>	<u>91,205</u>
Actuarial present value of accumulated plan benefits, end of year	<u>\$ 677,241,243</u>	<u>\$ 669,017,998</u>

The following changes to the actuarial assumptions occurred since the prior valuation:

- For current liability purposes, the interest rate was changed from 2.27% to 2.85% in accordance with Internal Revenue Service (IRS) guidance. The statutory mortality tables mandated for current liability purposes have also been updated as required by law.
- Effective July 1, 2023, the administrative expense assumption was updated from \$1,350,000 to \$1,500,000 to better reflect anticipated future experience.

Notes to Financial Statements

Note 7 – Actuarial Present Value of Accumulated Plan Benefits (Continued)

The following plan changes occurred since the prior valuation:

- Benefit accruals for the July 1, 2022 to June 30, 2023, plan year were increased from 1.00% of contributions to 1.50% of contributions.
- All participants and beneficiaries of participants were granted a special benefit increase equal to 0.50% of contributions from July 1, 2004 through June 30, 2025, and from July 1, 2019 through June 30, 2020.

Note 8 – Tax Status

The IRS has determined and informed the Plan by a letter dated November 2, 2010, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of June 30, 2024, 2023, and 2022, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Note 9 – Risks and Uncertainties

The Plan's assets consist primarily of financial instruments including short-term funds, common stocks, foreign stocks, mutual funds, U.S. securities, corporate bonds, foreign bonds, 103-12 investment entities, limited partnerships, and common collective trusts. In general, investments are exposed to various risks, such as interest rate, credit, and overall market volatility risk. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the values of the investments will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

The financial instruments may subject the Plan to concentrations of risk as, from time to time, cash balances exceed amounts insured by the Federal Deposit Insurance Corporation, market value of securities are dependent on the ability of the issuer to honor its contractual commitments, and the investments are subject to changes in market values.

Notes to Financial Statements

Note 9 – Risks and Uncertainties (Continued)

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 10 – Party-in-interest Transactions

Certain routine transactions, while considered party-in-interest transactions under ERISA regulations, are permitted under the provisions of the Plan and are specifically exempt from the prohibition of party-in-interest transactions under ERISA.

(1) Benefits may be less for participants who have not recently worked 250 hours in a year.

(2) After July 1, 2005 contributions over \$2.45 per hour are generally not recognized in benefit accruals.

After July 1, 2017 contributions over \$2.95 per hour are generally not recognized in benefit accruals.

After July 1, 2019 contributions over \$3.50 per hour are generally not recognized in benefit accruals.

Eligibility: Normal Retirement Age is the later of age 65 and the age on the fifth anniversary of participation.

Form: Unreduced payment form is a life annuity with a five-year certain period.

Service Pension Benefits Earned before July 1, 2010 (Plan Sections 3.13 – 3.14)

Benefits: Regular pension benefit.

Eligibility:

- 35 years of combined credited service under this Plan and related Plans; or
- 35,000 hours of work in covered employment under this Plan or related Plans over a period of at least 35 years; or
- Has attained age 57 and worked at least 35,000 hours in covered employment under this Plan or related Plans (with at least 20,000 under this Plan), of which at least 1,250 hours were worked in the five-year period preceding retirement and excluding hours in excess of 1,200 in any one plan year.

Service Pension Benefits Earned after June 30, 2010 (Plan Sections 3.13 – 3.14)

Benefits: Regular pension benefit.

Eligibility:

- 35 years of credited service under this Plan; or
- 35,000 hours of work in covered employment under this Plan over a period of at least 35 years; or
- Has attained age 57 and worked at least 35,000 hours in covered employment under this Plan, of which at least 1,250 hours were worked in the five-year period preceding retirement and excluding hours in excess of 1,200 in any one plan year.

Early Retirement Benefits (Plan Sections 3.04 – 3.05)

Benefits: The regular pension benefit is reduced by 0.25% per month (3% per year) between ages 60 and 65 and 0.5% per month (6% per year) between ages 55 and 60.

Eligibility: Age 55 with five service credits.

Vesting (Withdrawal before Retirement) (Plan Section 5.07)

A participant who leaves with five service credits is 100% vested in his or her regular and early pension benefits based on contributions and service to date.

Reciprocal Pensions (Plan Sections 4.01 – 4.03)

An employee may be eligible for a “Pro-Rata Pension” based on combined service under this Plan and related Plans. An employee may also be eligible to have contributions transferred to a cooperating fund, or from a cooperating jurisdiction under the “Money Follows the Man” provision.

Disability Benefits (Plan Sections 3.06 – 3.12)

Benefits: Regular pension benefit.

Eligibility: Five years of service, and earned at least one half year of service in the three Plan Years preceding the Plan Year of disability, and is (a) occupationally disabled for the first 18 months, and (b) eligible for a Social Security Disability Award or Workers Compensation thereafter. Disability must last at least six months.

Death Benefits (Plan Sections 6.01 – 6.10 and 7.03)

Benefits: Married: The spouse may choose to receive the spouse’s share of a 50% or 100% survivor option starting on the date the participant would have been 55. The spouse may also choose to receive benefits in the form of a 60 or 120 month option which is payable immediately and at least equal in value to the 50% survivor option.

Not Married: The beneficiary receives 60 immediate monthly payments equal to the participant’s regular pension or 120 monthly payments of equivalent value.

Not Vested: The beneficiaries of employees who worked at least 250 hours receive a lump sum equal to the contributions to the Plan, which would have been used in the calculation of the employees’ pension benefit.

Forms of Pension Payment (Plan Sections 6.08 and 7.01)

The normal form of payment is a 50% joint and spousal survivor annuity. In addition to this benefit form, the participant may choose from the following options (with spousal consent if married): Life annuity with a five-year certain period, life annuity with a 10-year certain, 75% joint and spousal survivor annuity, 100% joint and spousal survivor annuity, or an optional survivor annuity (50%, 75%, and 100%). A married participant may also elect a joint and spousal survivor annuity with the option for the pension to revert back to a life annuity if the participant’s spouse predeceases the participant.

Participation (Plan Section 2.02)

An employee who works in covered employment shall become a participant in the Plan on the July 1 or January 1 next following a 12-consecutive-month period during which he worked at least 1,000 hours of service commencing with the first hour of service.

Years of Service / Credited Service (Plan 5.03 and 1.14)

The following schedule is used in plan years beginning on or after July 1, 1983. Hours of Service include hours worked as an apprentice for which no contributions are required.

Hours of Service	Credited Future Service
1,000 or more	One Year
750 – 999	$\frac{3}{4}$ Year
500 – 749	$\frac{1}{2}$ Year
250 – 499	$\frac{1}{4}$ Year
Less than 250	None

Break in Service Rules (Plan Section 5.06)

Break in Service: A Break in Service is experienced in a plan year in which a Participant completes less than 250 Hours of Service.

Permanent Break in Service: A Break in Service becomes permanent when the number of consecutive one-year breaks in service is equal to the greater of five or the Participant's total Years of Credited Service.

If a person who has not achieved status as a Vested Participant has a Permanent Break in Service, his previous Years of Credited Service and accrued benefits are cancelled.

Plan Changes Since Prior Valuation

Changes in Actuarial Assumptions Since Prior Valuation

The current liability interest rate and mortality were updated according to statutory requirements.

Effective July 1, 2023, the administrative expense assumption was updated from \$1,350,000 to \$1,500,000 to better reflect anticipated future experience.

Appendix A Summary of Actuarial Assumptions

The following details the principal actuarial assumptions used in our valuation. The rationale for all significant economic assumptions is noted below. All significant demographic assumptions are based on analysis of the Plan's experience, in particular, the study of all demographic assumptions dated July 24, 2020.

ECONOMIC ASSUMPTIONS

Investment Return (Interest)

Funding: 6.75% per year (adopted July 1, 2020), net of investment expenses. The investment return assumption was selected based on the Plan's target asset allocation as of the valuation date and capital market assumptions from several sources, including published studies summarizing the expectations of various investment experts. This information was used to develop forward-looking long-term expected returns, producing a range of reasonable expectations according to industry experts. Based on the resulting range of potential assumptions, in our professional judgment the selected investment return assumption is reasonable and is not expected to have any significant bias.

Current Liability: 2.85% per year (adopted July 1, 2023), based on 105% of the four-year average 30-year Treasury Rates as set forth in Treasury Regulation §1.431(c)(6)-1.

Inflation

No explicit assumption.

Administration Expenses

Expected administrative expenses payable from the trust are explicitly loaded to the normal cost. For the current valuation, the loading for administrative expenses (assumed to be paid evenly throughout) is \$1,500,000 (adopted July 1, 2023).

Pay Increases

Not applicable.

DEMOGRAPHIC ASSUMPTIONS

Except where noted, all demographic assumptions are based on Milliman's Demographic Assumptions Study dated July 24, 2020.

Rates for Active Participants

Death: 95% of the Pri-2012 Sex Distinct Blue Collar Benefit Weighted Mortality Tables with employee rates before commencement and retiree rates after commencement, projected on a generational basis with a unisex table of average mortality improvement over 60 years of data (1957-2017) based on Social Security Administration (SSA) data (adopted July 1, 2020). Sample male life expectancies are shown in the following table:

Marriage: Survivor benefits are provided for spouses of all Plan participants. 85% of active and terminated vested participants are assumed to be married. Spouses of deceased participants are assumed to commence their survivor annuity at the earliest time allowed by the Plan. Males are assumed to be four years older than females.

Lump Sum: A lump-sum distribution option is provided upon retirement for benefits valued under \$5,000. However, there is no explicit assumption for this. These benefits are valued as annuities.

Disability Pensions

75% of new disability pensioners are assumed to become eligible for Social Security disability pensions.

Disability pensioners who are not eligible for Social Security disability are assumed to receive 18 months of disability benefits and a deferred retirement benefit.

Preretirement Death Benefits

Spouses of vested participants who are 53 or over when they die are assumed to elect the survivor's share of the 100% survivor option starting when participants would have reached their earliest retirement date. Spouses of vested participants who are younger than 53 when they die are assumed to elect 60 monthly payments equal to the unreduced Regular Pension amount earned prior to death.

Non-spouse beneficiaries of vested participants are assumed to receive 60 monthly payments equal to the Regular Pension amount earned prior to death.

The beneficiaries of non-vested participants are assumed to receive a return of contributions based on assumed contributions of 1,500 hours per year.

Weighted Average Retirement Age

The weighted average retirement age for participants is 58. This equals the sum, over all retirement ages, of the retirement age multiplied by the probability of retiring at that age, as shown below.

Assumed Form of Payment

The value of the different benefit options elected in the future is assumed to be equal to the value of a single life annuity with a five-year certain period.

Mortality Rates after Leaving Active Participation

Healthy Lives: 95% of the Pri-2012 Sex Distinct Blue Collar Benefit Weighted Mortality Tables with employee rates before commencement and retiree rates after commencement, projected on a generational basis with a unisex table of average mortality improvement over 60 years of data (1957-2017) based on SSA data (adopted July 1, 2020).

Disabled Lives: 95% of the Pri-2012 Sex Distinct Disabled Benefit Weighted Mortality Tables, projected on a generational basis with a unisex table of average mortality improvement over 60 years of data (1957-2017) based on SSA data (adopted July 1, 2020).

Mortality for Current Liability

Mortality Tables for current liability as prescribed by law.

Postretirement Benefit Increases

None. (The Plan does not provide for any future postretirement benefit increases.)

Retirement for Terminated Participants

If eligible for early retirement, we assume terminated participants will retire at the rates shown in the following table. Due to reciprocal service, participants are assumed to be eligible for retirement with 52 years of age and 20 years of service with this Plan or 55 years of age and five years of service with this Plan. We assume that a proportion of those retiring before age 65 are eligible for unreduced benefits. This assumption can be seen in the following table. Otherwise, we assume terminated participants will start their benefits at age 65.

Exclusion of Inactive Vested Terminations

Inactive terminated participants not in pay status over age 70 are excluded from the valuation.

Definition of Active Participants

Active participants are defined as those with at least 250 hours in the most recent year and who have accumulated at least one year of Credited Service, excluding those who have retired as of the valuation date.

Records with No Birth Date

New records with no birth date are assumed to be 31 years old. Records that are not new and have no birth date used the same birth date as the prior year's valuation.

Expected Hours Worked and Contributions for Future Years

Since future benefit accruals are directly linked to hours worked, it is necessary to estimate the expected number of hours worked in future years. We assume each of the active participants will work 1,500 hours at the currently bargained contribution rates. This results in a total contribution assumption of \$53,839,500.

Vested Benefit Liability (Withdrawal Liability)

Only those benefits for which a participant has a vested interest in and has met applicable requirements for are included in the determination of vested benefit liabilities, as of the valuation date.

Special disability benefits are not included for participants not already disabled. Other vested benefits for these participants are included.

Accrued benefits and service are valued as of the valuation date; projected liabilities do not take into account future benefit service increases.

Early reduced and unreduced retirement benefits are included at future ages to the extent the participant will be eligible at that age without projecting future service. We assume only participants with 52 years of age and 30 years of service with the Plan (or age 65) are eligible for unreduced benefits.

The market value of assets is used for determining unfunded vested benefit liability for withdrawal liability.

All remaining assumptions are identical to those used for funding calculations.

Appendix C Summary of Actuarial Cost Methods

Background

Before we explain our cost method, we must first define the term "actuarial present value."

An actuarial present value is the value, on a given date, of a series of future benefit payments, future compensation payments or future contributions, where each amount in the series is:

- Adjusted for the probability of increase (or decrease) due to such events as death, changes in marital status, etc.;
- Multiplied by the probability of the event occurring on which the payment is conditioned, such as the probability of survival, retirement, death, disability, termination of employment, etc.; and
- Discounted at an assumed rate of investment return.

Our actuarial assumptions estimate these probabilities and the investment return.

Actuarial Cost Method

The actuarial cost method used to calculate the funding requirements of the Plan is called the **traditional unit credit** actuarial cost method.

The actuarial cost method is used to calculate the normal cost and unfunded actuarial accrued liability, which in turn determine the funding requirements of the Plan (minimum amount required and maximum amount deductible). The cost method allocates the total cost of the Plan over time: the **normal cost** is that portion of the cost allocated to the current year, and the **actuarial accrued liability** is the actuarial present value of costs allocated to prior years. The **unfunded actuarial accrued liability** is equal to the excess, if any, of the actuarial accrued liability over the actuarial value of assets.

Under the traditional unit credit cost method, the normal cost is the actuarial present value of all benefits expected to be earned during the plan year; for active employees, these earned benefits are generally due to additional covered hours worked. The actuarial accrued liability is the actuarial present value of all benefits accrued to date, generally based on service to date.

Amortization Method

The amortization method for determining the current annual cost is the method used to determine the amount, timing, and pattern of recognizing changes in the unfunded actuarial accrued liability. We apply the amortization schedule defined in Section 431 of the Internal Revenue Code.

- Experience gains and losses. After the enactment of the Pension Protection Act of 2006 (PPA), changes in the unfunded actuarial accrued liability related to changes in plan amendments, actuarial assumptions, and experience gains and losses are amortized over 15 years. Prior to PPA, these changes were amortized over 30 years. Certain exceptions apply as noted below
- Method changes. Changes related to the actuarial cost method or asset valuation method are amortized over 10 years.
- 2008 and 2009 investment losses. The Trustees elected to amortize net investment losses in plan years beginning July 1, 2009 and July 1, 2012 over the 30-year period beginning with the loss year as provided by the Pension Relief Act of 2010.

Funding Requirements

Each year contributions must fund the normal cost and amortize a portion of the unfunded actuarial accrued liability. IRS minimum and maximum funding rules specify amortization schedules for the unfunded actuarial accrued liability, depending on the source of increase or decrease (Plan improvements, assumption changes, gains/losses, etc.).

Another factor can also affect funding requirements. The excess, if any, of past contributions over the accumulated minimum required amount creates a **credit balance**, which may be used to offset the minimum required contribution.

Asset Valuation Method

The **actuarial value of assets** is the asset value used to determine funding requirements. The actuarial asset method is a part of the Plan's cost method and may include smoothing to reduce large year-to-year swings in funding requirements due to asset gains and losses. The total value of the actuarial value of assets is not allowed to vary from market value by more than 20%.

The actuarial value of assets on July 1, 2007 was set equal to market value. In succeeding plan years, the actuarial value is based on a five-year smoothing of gains and losses, where gains and losses are based on actual return on market assets compared with expected return on market assets.

Withdrawal Liability

The market value of assets is used for determining unfunded vested benefit liability for withdrawal liability.

Changes in Actuarial Methods Since Prior Valuation

None.

Schedule of Projection of Employer Contributions and Withdrawal Liability Payments

The following table provides the projected employer contributions and withdrawal liability payments expected to be received for the entire plan year. This projection is consistent with the details underlying the July 1, 2023 actuarial certification. Please refer to the formal certification for a summary of the data, methods and assumptions on which these are based.

Present Value of Accumulated Plan Benefits Expected Benefit Payments

The following table provides the projected benefit payments in each of the next fifty years starting with the current plan year assuming (1) no additional accruals, (2) experience (e.g., termination, mortality, and retirement) is in line with valuation assumptions, (3) no new entrants are covered by the plan, and (4) benefits are paid in the form assumed for valuation purposes. Expected expenses are not included.

Note: Numbers may not sum to total due to rounding.
