Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Actuarial Assumptions and Methods

The valuation of a defined benefit pension plan involves estimates and assumptions about the probability of events occurring far into the future. Examples include assumptions about future employment, mortality, and retirement. Below is a description of the actuarial assumptions and methods used in the valuation.

Funding Target Liability

Valuation Date: November 1, 2023

Demographic Information: The demographic information was provided as of November 1, 2023 by Millbury National Bank. Although we did not audit the data, we did review the data for reasonableness.

Actuarial Cost Method: As required by PPA, the Traditional Unit Credit Cost Method was used.

Asset Valuation Method: Market Value of Assets, as provided by the Trustee.

Actuarial Valuation Software: For purposes of developing the projected future benefit payments as well as determining attributed liabilities and normal costs as of the valuation date, we utilized the ProVal software platform developed by Winklevoss Technologies. We believe this externally developed valuation system is appropriate, was used for its intended purpose, and did not produce unreasonable results.

Interest Rates for Minimum Required Contribution: The October 2023 funding segment rates were utilized as prescribed by IRC Section 430(h) and elected by Millbury National Bank. Below, please find the segment rates after reflection of the segment rate stabilization provisions of IRC Section 430(h)(2)(C)(iv).

Segment	Interest Rate
Segment 1	4.75%
Segment 2	5.00%
Segment 3	5.74%

Effective Interest Rate
5.33%

Segment 1 is applied to benefit payments expected to be made in the first 5 years, segment 2 is applied to benefit payments expected to be made in the next 15 years and segment 3 is applied thereafter.

Interest Rates used to determine Maximum Recommended Contribution: Below, please find the segment rates without reflection of the segment rate stabilization provisions of IRC Section 430(h)(2)(C)(iv). These rates were utilized to determine the low-default risk obligation measurement (“LDROM”) of the accrued benefits as of the Valuation Date.

Segment	Interest Rate
Segment 1	3.82%
Segment 2	4.59%
Segment 3	4.63%

Effective Interest Rate
4.58%

Segment 1 is applied to benefit payments expected to be made in the first 5 years, segment 2 is applied to benefit payments expected to be made in the next 15 years and segment 3 is applied thereafter.

Rate of Compensation Increase: Salaries are assumed to increase at 4.00% per year, based on discussions with the Bank regarding historical experience, future expectations, and current market conditions.

Mortality for Healthy Lives:

Base mortality table: The sex distinct RP-2014 mortality tables for employees and healthy annuitants, adjusted backward to 2006 with Scale MP-2014.

Mortality improvements: The base mortality table is adjusted by projecting mortality improvements using Scale MP-2021 from the year 2006 through 2023, with an additional projection period of 8 years for males and 9 years for females. For ages below 80, the additional projection period is increased by 1 year for each year below age 80. For ages above 80, the additional projection period is reduced (but not below zero) by 1/3 year for each year above 80.

Retirement Incidence: Rates of retirement are based on a review of SBERA pension plan experience for the November 1, 2017 through November 1, 2022 plan years. Future experience is not expected to deviate significantly from these results. Active participants were assumed to retire in accordance with the following rates:

Age	Percentage
55	5.00%
56	5.00%
57	5.00%
58	5.00%
59	5.00%
60	5.00%
61	10.00%
62	10.00%
63	10.00%
64	15.00%
65	30.00%
66	30.00%
67	30.00%
68	30.00%
69	30.00%
70	100.00%

Current and future vested terminated participants are assumed to retire at age 65 based on the Plan's normal retirement age.

Turnover: Rates of turnover are based on 130% of the SOA Basic Service Table after a review of SBERA pension plan experience for the November 1, 2017 through November 1, 2022 plan years. Future experience is not expected to deviate significantly from these results. Illustrative rates are shown below:

Service	Percentage
0	22.27%
1	20.83%
2	20.32%
3	15.57%
4	12.83%
5	10.84%
10	6.38%
15	4.76%
20	3.65%
25	2.76%
30	1.98%
35	0.52%

Disability: Rates of decrement due to disability are assumed to be 0%.

Interest Crediting Rate for Determining Projected Cash Balance Accounts: 4.47% per year. This assumption was selected based on the interest crediting rate in effect for the plan year beginning on the valuation date.

Assumptions used to Convert Annuities to Actuarially Equivalent Lump Sum Amounts: In accordance with IRS Regulation 1.430(d)-1(f)(5)(ii)(B), annuities are converted to actuarially equivalent lump sum amounts using the current applicable mortality table under IRC Section 417(e)(3) that would apply to a distribution with an annuity starting date occurring on the valuation date and the underlying valuation interest rates under IRC Section 430(h)(2).

Assumptions used to Annuitize Cash Balance Accounts: The current applicable mortality table under IRC Section 417(e)(3) that would apply to a distribution with an annuity starting date occurring on the valuation date and 5.00%, based on the Plan provisions.

Administrative Expenses: Actual plan expenses, not including investment advisory fees, paid out of the trust during the previous plan year rounded to the nearest thousand.

Spouse Assumptions: 100% of participants not currently collecting benefits are assumed to be married, with spouses assumed to be the same age as participants.

Compensation and Benefit Limitation: The IRC Section 401(a)(17) compensation limit and the IRC Section 415 benefit limitation were assumed to increase 2.50% per year.

Form of Benefit: This assumption is based on a review of SBERA pension plan experience for the November 1, 2017 through November 1, 2022 plan years and the Plan provisions.

Death:	100% of active participants are assumed to elect an immediate lump sum
Termination:	100% of active participants are assumed to elect an immediate lump sum
Retirement:	40% of active participants are assumed to elect an immediate life annuity and 60% of active participants are assumed to elect an immediate lump sum

20% of terminated vested participants are assumed to elect a life annuity and 80% of terminated vested participants are assumed to elect a lump sum at their Normal Retirement Age.

All assumptions used in determining the low-default risk obligation measurement were consistent with those used in determining the Funding Target Liability, except the interest rates which were disclosed above.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Plan Provisions

This summary is intended as an outline of plan provisions and does not alter the intent or meaning of the provisions contained in the plan document.

Plan Sponsor: Millbury National Bank
EIN/PN: 04-1621330/001

EFFECTIVE DATE OF LAST AMENDMENT

The Plan was last amended effective October 31, 2020, to freeze benefits earned through that date under the final average earnings plan design. Effective November 1, 2020, all future benefits will be earned under a cash balance plan design.

ELIGIBILITY

Employees become eligible to participate in the Plan on the first day of the month coinciding with or next following the attainment of age 21 and one year of service.

EMPLOYEE CONTRIBUTIONS

Participants are not required to contribute.

RETIREMENT

- i. Normal Retirement.* Participant's Normal Retirement Date is the first day of the month coincident with or next following the month during which a Participant attains age 65.
- ii. Early Retirement.* Participant's Early Retirement Date is the first day of any month coinciding with or next following the date the Participant attains age 62, age 55 after completing 10 years of plan service, or age 50 after completing 15 years of plan service.
- iii. Late Retirement.* After Normal Retirement Date.

VESTING

Years of service are all years of service with the Employer in which the employee was given credit for 1,000 or more hours of service. The employee will be 100% vested upon completion of 3 Years of Service or age 62, if earlier.

BENEFIT AT RETIREMENT

- i. *Normal Retirement Benefit.* The monthly frozen benefit as of October 31, 2020, plus a monthly pension benefit equal to the actuarial equivalent of a participant's Account Balance.

The monthly frozen benefit shall be equal to 1.00% of the average compensation for the highest consecutive 3 years of service plus 0.60% of the average compensation for the highest consecutive 3 years of service in excess of covered compensation for each of the first 35 years of service, with service and compensation frozen as of October 31, 2020.

The Account Balance is determined as of the sum of the following:

- *Service Credits* – An account balance will receive a Service Credit at the end of each plan year in which a participant has worked at least 1,000 hours. The amount of the Service Credit will be based on the participant's attained age at the end of each plan year and will be computed according to the customized Service Credit schedules as stated in the Plan document as a percentage of the participant's plan compensation for each plan year. In the year of hire, the participant will receive a Service Credit regardless of hours worked. In the year of retirement or termination, the participant will receive a Service Credit regardless of hours worked based on their plan compensation through their last day of employment and their attained age at their date of separation.
- *Interest Credits* – Interest Credits will be added to a participant's Account Balance at the end of each plan year, based on their Account Balance at the beginning of the plan year. Interest Credits will be based on the greater of the 30-year U.S. Treasury rate for September of the prior plan year and 3.50%. The maximum interest credit rate is 7.00%.

A participant's Account Balance will be converted to an actuarially equivalent monthly pension benefit using a 5% interest rate and the current applicable mortality table under IRC Section 417(e)(3), as stated in the Plan document.

- ii. *Early retirement Benefit.* Accrued normal retirement benefit, reduced by 7% for each year by which Early Retirement Date precedes the Participant's Normal Retirement Date.
- iii. *Late Retirement Benefit.* The greater of the benefit determined in the same manner as the Normal Retirement Benefit including years of service and compensation after Normal Retirement or the actuarial equivalent of the Normal Retirement Benefit.
- iv. *Maximum Benefits.* The maximum retirement benefit is determined in accordance with Section 415 of the Internal Revenue Code and Regulations.

DEATH BENEFITS

The Qualified Pre-Retirement Survivor Annuity (QPSA) plus the excess, if any, of the Present Value of the Participant's Vested Accrued Benefit minus the Present Value of the qualified pre-retirement survivor annuity.

NORMAL AND OPTIONAL FORMS OF BENEFIT

Normal Form: Life Annuity

Optional Forms: Ten Year Certain and Life annuity, Joint and Survivor annuity with either 50%, 75% or 100% continuation to the survivor, Joint and Either annuity with 67% continuation to the survivor, Joint and Either annuity with ten years certain and either 67% or 100% continuation to the survivor, and Lump Sum distribution.

The Qualified Joint and Survivor Annuity (QJS) and other available optional forms are “actuarially equivalent” to the normal form, meaning that the amount of benefit is determined so as to have the same value when computed using the following actuarial assumptions:

Interest – 6.00% per annum

Mortality – 1971 Individual Annuity Mortality Table for Males setback 3 years.

SBERA Pension Plan as adopted by Millbury National Bank
EIN/PN: 04-1621330/001
Schedule SB, line 24 – Change in Actuarial Assumptions

The form of benefit, turnover, and retirement incidence assumptions were updated based on a review of SBERA pension plan experience for the November 1, 2017 through November 1, 2022 plan years. Revised assumptions have been utilized as of November 1, 2023. The updated retirement incidence assumption resulted in a decrease in liability and an increase in normal cost. The form of benefit and turnover assumptions resulted in an insignificant change in liability and normal cost.
