## ACTUARIAL COST METHODS AND ASSUMPTIONS

Geerpres, Inc. Defined Benefit Pension Plan  
EIN/PN: 46-3589952/001  
Schedule SB, Part V – Actuarial Assumption Methods

**Traditional Unit Credit Cost Method** – The actuarial cost method used to calculate the minimum required contribution is the traditional unit credit cost method. The normal cost is the sum of all the individual normal costs for each participant. The individual normal cost is the present value of the benefit expected to be earned during the year being valued. For non-active participants, the normal cost is zero. The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability is the present value of the accrued benefit as of the valuation date. The unfunded liability is equal to the actuarial accrued liability less the valuation assets and is referred to as the “shortfall”.

**Actuarial Valuation Asset Method** – The asset method is based on Internal Revenue Notice 2009-22 using an average of three values: the fair market value on the valuation date and the adjusted market value on the previous two valuation dates. Adjustments are made for contributions, benefits, non-investment related expenses and assumed earnings based on the lesser of 7.00% and the PPA third segment interest rate per applicable year. The result is subject to a minimum of 90% and maximum of 110% of the current market value.

### Mandated Discount Rates – Adjusted Under ARPA/HATFA

	Current Year	Prior Year
