PLAN YEAR ENDING: September 30, 2024

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Funding Method

Funding method as required by the Pension Protection Act of 2006. Under this method, the plan's funding target is determined as the sum of the actuarial present values (as of valuation date) of the individual accrued benefits taken into account for valuation purposes as of the beginning of the plan year.

The target normal cost is the sum of actuarial present values (on the valuation date) of the benefits deemed to accrue in the plan year.

An individual's accrued benefit for valuation purposes as of any determination date with respect to any assumed separation date(s) is the accrued benefit described under the plan, based on credited service as of the determination date, with plan compensation, benefits, and offset (if any), projected to the separation date.

The benefit deemed to accrue for an individual during a plan year is the excess of the accrued benefit for valuation purposes at the end of the plan year over the accrued benefit for valuation purposes at the beginning of the plan year.

If multiple separation dates are used, the actuarial present values take into account the probability of each separation event.

Changes Since the Prior Valuation

- There were no assumption or method changes since the prior valuation.
