Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

Non-Prescribed Funding Assumptions and Methods

The following assumptions were selected by the plan's enrolled actuary. Please note, the plan's experience is too small to form the bases of reliable demographic assumptions; however, the demographic assumptions remain appropriate given historic gain and loss experience of the plan, as well as general expectations for clients similar to Public Service Communications, Inc. The asset valuation method was selected by the plan sponsor with the actuary's advice and is an acceptable method under PPA.

Salary increases

Current Year: 2.5% per year
Prior Year: 2.5% per year

The salary increase assumption is based on prior and anticipated compensation practice of the plan sponsor. A subset of participants were paid 'Hazard Pay' from the period March 1, 2020 to April 30, 2021. Future salary projections excluded 'Hazard Pay'.

Social Security

Annual increase in maximum wage base: 1.0% above cost-of-living

Future actuarial measurements

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Use of Models

Actuarial Standard of Practice No. 56 ("ASOP 56") provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. Gallagher uses third-party software in the performance of annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of the plan using data and assumptions as of the measurement date under the funding rules and accounting standards specified in this report. Further, the model applies those funding rules and accounting standards to the liabilities derived and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report. Gallagher has an extensive review process whereby the results of the liability calculations are checked using detailed sample output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding and accounting outputs are similarly reviewed in detail and at a high level for accuracy, reasonability and consistency with prior results. Gallagher also reviews the model when significant changes are made to the software. The review is performed by experts within the company who are familiar with applicable funding and accounting rules as well as the manner in which the model generates its output.

Summary of Changes from the October 1, 2022 Valuation

The interest rates and mortality tables were updated as prescribed by PPA. These changes increased the Funding Target by approximately \$288,000 and decreased the AFTAP by 3.3%.
