Asset Valuation Method: No Change

Other: Effective with the 2024 plan year, the Plan's valuation software has changed.

In accordance with IRS Revenue Procedure 2017-56, this change qualifies for automatic approval since:

- a. Both the enrolled actuary and the business organization providing actuarial services for the plan are unchanged.
- b. The new method is substantially the same as the method used for the prior plan year.
- c. The new valuation software generally will be used by the enrolled actuary for the single-employer traditional DB plans to which the enrolled actuary provides actuarial services.
- d. For either the prior plan year or the current plan year, the funding target, target normal cost (without regard to any adjustments for employee contributions and plan-related expenses), and actuarial value of assets determined under the new valuation software are each within 2% of the respective values determined under the valuation software used for the prior plan year (all other factors being held constant).
- e. The modifications to the computations in the valuation software or the use of a different valuation software system are designed to produce results that are no less accurate than the results produced prior to the modifications or change.
