**Retirement Plan for the Employees of
Beckley Water Company**

Actuarial Valuation as of January 1, 2024

EIN/PN: 55-0121880/001

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Assumed Cost of Living Adjustments for Participants In Pay Status

Funding: 3.00%

ASC 715-30: 3.00%

ASC 960-20: 3.00%

Employees Valued

Only participants as of the valuation date as reported by the plan sponsor were valued.

Salary Scale

Not applicable.

Interest Crediting Rate on Employee Contribution Balances

Each individual employee contribution balance is assumed to earn 3.00% interest per each future year until retirement.

Assumptions Regarding Future Service Accruals

For active participants, hours worked in each future year are assumed to be at least 1,000 such that Vesting Service continues to accrue.

Mortality Rates

Funding: Pri-2012 Mortality Table projected by modified Scale MP-2021, as described under Regulation §1.430(h)(3)-1 (generational, not static), sex-distinct, with separate rates pre- and post-commencement.

ASC 715-30: Pri-2012 Amount-Weighted Mortality Table (generational, not static) projected by Scale MP-2021, sex-distinct, with separate rates pre- and post-commencement.

ASC 960-20: Pri-2012 Amount-Weighted Mortality Table (generational, not static) projected by Scale MP-2021, sex-distinct, with separate rates pre- and post-commencement.

Retirement Rates

Retirement is assumed to occur on the first of the month coincident with or following the later of attainment of age 65 and the age on the valuation date, if greater.

Termination Rates

Sample rates from V Table from August 1992 Pension Forum published by the Society of Actuaries multiplied by 0.40 are shown below:

<u>Age</u>	<u>Probability of Termination</u>
20	7.44%
25	5.44%
30	4.04%
35	3.16%
40	2.60%
45	2.20%
50	1.80%
55+	0.00%

Disability Rates

Sample rates from the 1987 Commissioner’s Group Disability Table, six month elimination period, with separate rate for males and females are shown below:

<u>Age</u>	<u>Male</u>	<u>Female</u>
20	0.078%	0.098%
25	0.085%	0.107%
30	0.097%	0.136%
35	0.121%	0.200%
40	0.169%	0.270%
45	0.280%	0.387%
50	0.515%	0.610%
55	0.969%	0.940%

Assumptions Made in Valuing Spousal Benefits

Seventy-five percent of employees included in the valuation are assumed to be married. The female spouse is assumed to be three years younger than the male spouse.

Assumptions Made Regarding Death Benefits

In the case of the death of an active married Participant prior to becoming eligible for early retirement benefits, commencement of the 50% joint and survivor annuity has been assumed to be deferred to the Participant’s early retirement date (as opposed to assuming any beneficiaries elect an earlier distribution of the Employee Mandatory Contribution Account).

Assumptions Made Regarding Payment Form

Active participants are assumed to elect a Modified Cash Refund payment form upon retirement.

Assumptions Made Regarding Disability Benefits

For participants who become disabled prior to having attained early retirement eligibility, we assume they defer commencement of their disability benefit until their early retirement date. For participants who become disabled after early retirement eligibility, we assume they start their disability benefit immediately.

Provisions Not Valued

The death benefit for non-vested active participants and participants who waive the 50% joint and survivor pre-retirement death benefit have not been valued. Also, post-severance pre-retirement spousal death benefits are not valued. Due to the small liability added by these benefits, these are believed immaterial for valuation purposes.

Provision for Expenses

The administrative expenses expected to be paid from plan assets have been included in the Target Normal Cost for minimum contribution purposes. Expected expenses for the current plan year are assumed to be equal to the actual expenses for the previous plan year.

Actuarial Cost Method

Funding: The actuarial cost method prescribed by applicable regulations is the Unit Credit cost method. Under this cost method, a liability is calculated for each participant as of the valuation date equal to the present value of the accrued benefit as of the valuation date. The liabilities are referred to as the Funding Target. The present value of benefits earned during the plan year following the valuation date is calculated for each active participant who has not reached normal retirement age and is expected to earn a benefit during the year. This present value is the individual participant’s Target Normal Cost. The plan’s total annual Funding Target and Target Normal Cost are the sums of the amounts for individual participants. Estimated plan administrative expenses expected to be paid from plan assets in the upcoming year are also included as part of the Target Normal Cost.

ASC 715-30: The actuarial cost method prescribed by ASC 715 is the Projected Unit Credit cost method. Under this cost method, a liability is calculated for each active participant as of the valuation date equal to the present value of the accrued benefit as of the valuation date, but reflecting a projection of future increases in compensation until the assumed retirement date. For inactive participants, such as separated participants with deferred vested benefits and retirees, a liability is calculated for each such participant as of the valuation date equal to the present value of the accrued benefit, reflecting no future increases in pay. The liabilities are referred to as the Projected Benefit Obligation, or PBO. The present value of benefits earned during the plan year following the valuation date is calculated for each active participant who has not reached normal retirement age and is expected to earn a benefit during the year. This present value is the individual participant's Service Cost. The plan's total annual PBO and Service Cost are the sums of the amounts for individual participants.

ASC 960-20: The actuarial cost method prescribed by ASC 960 is the Unit Credit cost method. Under this cost method, a liability is calculated for each participant as of the valuation date equal to the present value of the accrued benefit as of the valuation date. The liabilities are referred to as the Present Value of Accumulated Plan Benefits, or PVAB. The plan's total annual PVAB is the sum of the amounts for individual participants.

Low-Default-Risk Assessment: The actuarial cost method prescribed by applicable regulations is the Unit Credit cost method. Under this cost method, a liability is calculated for each participant as of the valuation date equal to the present value of the accrued benefit as of the valuation date. The present value of benefits earned during the plan year following the valuation date is calculated for each active participant who has not reached normal retirement age and is expected to earn a benefit during the year. This present value is the individual participant's Normal Cost. The plan's total liability and Normal Cost are the sums of the amounts for individual participants. Estimated plan administrative expenses expected to be paid from plan assets in the upcoming year are also included as part of the Normal Cost.

Attribution of Accrued Benefits: The accrual of benefits outlined in the plan document has been reflected in the attribution of benefits under the funding methods for funding and accounting purposes above.

Asset Method

Funding: Market value of all trust investments plus any discounted receivable contributions as of the valuation date with recognition of gains and losses smoothed over three years. The final smoothed value of assets will be no less than 90% and no more than 110% of the market value of assets plus discounted receivable contributions.

ASC 715-30: Market value of all trust investments is used.

ASC 960-20: Market value of all trust investments plus any receivable contributions for the prior plan year.

At-Risk Assumptions

Since there are not more than 500 participants participating in defined benefit pension plans of the employer's controlled group, at-risk liabilities have not been valued.

ASC 715-30 Measurement Date

The last day of the fiscal year, December 31.

Fiscal Year

The 12-month period ending each December 31.

Rationale for the Selection of Assumptions

Assumptions that in our judgement have a significant effect on the measurements contained in this report are categorized below, along with information and analyses that support the determination that the assumption is reasonable.

Assumptions Selected by the Actuary

Decrement rates other than mortality and retirement: These assumptions are chosen to be reasonably reflective of expected future rates of termination and disability for the group. While a formal study has not been undertaken, we monitor gains and losses annually to ensure that the assumptions are reasonable.

Retirement decrement rates: This assumption has been based on observed data for this plan, and we monitor gains and losses annually to ensure the assumption is reasonable.

Expected return on plan assets: This rate is selected based on the outlook for returns within the main classes of investments (those being debt, equity, and cash), considering past experience as well as current market expectations over an appropriate timeframe. We confer with the plan's asset advisors, when possible, to gather input for the assumption and their opinion as to its reasonableness.

Discount rate: For purposes of measuring the low-default-risk obligation, this assumption is set to reflect the return on low-default-risk securities and to reflect the incidence of future cash flows from the plan, appropriately.

Assumptions Selected by Other Parties (other than prescribed assumptions or methods set by law)

Discount rate, assumed return on assets, and mortality: With respect to the ASC-715 valuation within this report, these primary assumptions are selected by the employer. However, we make recommendations to the employer using the methods and parameters required by the accounting standard and common practices within the audit profession. As a result of the employer following our recommendations, these assumptions do not conflict with our judgement and are reasonable for the purposes of the measurement.

Assumptions Selected by Other Parties (which are prescribed or set by law)

For assumptions prescribed or set by law, we offer no opinion or analysis on the reasonableness of the assumptions.

Changes in Assumptions since the Last Actuarial Valuation

Funding: The three-tiered segment interest rates used to determine the Funding Target Liability last year were 4.75%, 5.00%, and 5.74%. These rates were updated to the rates required for the current plan year and also reflect all applicable funding relief legislation. The mortality tables for the Funding Target Liability were updated as required under Regulation §1.430(h)(3)-1.

ASC 715-30: The discount rate was decreased from 5.24% to 5.01%, and the mortality table was updated to the most-recent available table (Pri-2012, as detailed above). All other methods and assumptions are the same as those used in the preparation of the 2023 fiscal year expense information.

ASC 960-20: The mortality table was updated to the most-recent available table (Pri-2012, as detailed above).

Justification for Changes in Funding Actuarial Assumptions

For funding calculation purposes, assumption changes, other than those prescribed by law, did not result in a decrease in the plan's funding shortfall (if any) by more than \$5,000,000 or more than 5% of the pre-change funding target, therefore, the plan did not need IRS approval to change assumptions.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Summary of Plan Provisions

Plan Sponsor

Beckley Water Company

EIN/PN

55-0121880 / 001

Effective Date

March 1, 1962. Last restated effective January 1, 2021.

Plan Year

The 12-consecutive month period beginning each January 1.

Participation

An employee becomes a participant in the plan on the first day of the month coincident with or next following the attainment of age 21, the completion of one Qualifying Year of Service and having met the Employee Contributions requirement listed below. The plan was closed to new entrants effective May 31, 2014.

Employee Mandatory Contribution Account

A Participant is required to make after-tax contributions to the Plan each month while participating in the Plan. With the annual amount of the contributions equal to four percent of the Participant's salary. The accumulated total of contributions and interest constitutes the Employee Mandatory Contribution Account, in which the participant is 100% vested in at all times. Each year, the balance of the account is credited with interest according to the following schedule:

Interest is compounded annually at 5.00% for each year prior to December 31, 1987. For all subsequent years, interest is compounded annually at 120.00% of the Federal mid-term rate for January of the prior year.

Effective December 31, 2017, employee contributions are no longer made to the Plan. Interest continues to accrue annually until the date of determination of the account value.

Compensation

Compensation is defined as the total annual compensation earned by an employee for federal income tax withholding purposes, as defined under Section 3401(a) of Internal Revenue Code. Bonuses and overtime pay are excluded from this amount: contributions to a 401(k) plan, qualified transportation fringe plan, cafeteria plan, simplified employee pension plan, tax-sheltered annuity plan, and eligible deferred compensation plan. Compensation after December 31, 2017 is not recognized.

Average Compensation

Prior to March 1, 1982, average compensation was the final 3 months of compensation in a Participant's compensation history. For periods beginning on and after March 1, 1982, the average compensation is the career average of the annual compensation earned by the Participant for each year in which a Year of Service is earned.

Qualifying Year of Service

A Qualifying year of service is an eligibility computation period during which an employee completes at least 1,000 hours of Service, starting with the date of hire, with subsequent computation periods shifting to the first day of the Plan Year.

Service

A full year of Service is credited for each Plan Year during which an employee works at least 1,000 hours.

Vesting Service

An employee earns Vesting Service credit for all years of Service as defined above.

Benefit Service

A participant earns Benefit Service credit for all years of Service as defined above. Effective December 31, 2017, Benefit Service was frozen for all Participants in the Plan.

Vesting in the Accrued Benefit

A participant is 0% vested in the plan's accrued benefit until he has earned five years of vesting service, at which time he becomes 100% vested. However, all Participants shall be 100% vested upon attainment of their Normal Retirement Age, their Early Retirement Date, or upon eligibility for a Disability Benefit.

Accrued Benefit

The accrued benefit is a monthly benefit payable for life with a modified cash refund of required employee contributions, commencing at normal retirement. The benefit is equal to one-twelfth of the sum of (1), (2), and (3) as defined below, based upon Benefit Service at the date of determination:

(1) 1.75% of a Participant's Average Compensation prior to March 1, 1982 times years of Benefit Service prior to March 1, 1982.

(2) for each 1-year period ending on the last day of the Plan Year on and after March 1, 1982, but prior to March 1, 1990, an amount equal to 1.75% of a Participant's compensation, multiplied by Benefit Service for the period between March 1, 1982 and March 1, 1990.

(3) for each 1-year period ending on the last day of the Plan Year on and after March 1, 1990, an amount equal to 2.00% of a Participant's compensation, multiplied by Benefit Service for such time period.

Accrued benefits were frozen and Benefit Service ceased as of December 31, 2017.

Normal Retirement Benefit

Eligibility

First of the month coincident with or immediately following attainment of age 65 or, if later, the age of the Participant upon entry into the Plan.

Monthly Benefit

The Accrued Benefit calculated at the normal retirement date.

Delayed Retirement Benefit

Eligibility

First of the month coincident with or immediately following termination of employment after normal retirement date.

Monthly Benefit

Upon reaching the Participant's actual Retirement Date, a Participant's Accrued Benefit shall be calculated at each date of iteration as the greater of:

(1) the Participant's Accrued Benefit calculated with continuing accrual, using service and pay as applicable under the terms of the Plan and taking into consideration any cessation of benefit accruals under the Plan by reason of a plan freeze, and

(2) the value which is the greater of the amount in (1) above as of the immediately prior date of iteration and the amount in this paragraph (2) as of the immediately prior date of iteration, actuarially increased to the current date of iteration.

In other words, a Participant's delayed retirement benefit shall be calculated iteratively, such that the actuarial increase factor applies at each iteration on the greater of the two determinations referenced herein from the immediately prior iteration.

For purposes of this determination, dates of iteration begin with the Participant's Normal Retirement Date, and end with the Participant's Retirement Date, and include each intervening Plan Year end. Actuarial increases for this purpose are based on the 1951 Group Annuity Mortality Table for males, with a one-year setback, and 2 ½% annual interest. See the plan document for additional details.

Early Retirement Benefit

Eligibility

For Participants currently employed, the first of the month coincident with or immediately following the point of being within ten years of being eligible for the Normal Retirement Benefit. Participants who leave service prior to that date still meet the eligibility requirement at that time, provided they were vested upon their earlier termination.

Monthly Benefit

The accrued benefit reduced according to the Table A of the Plan Document.

In-Service Distributions

In-service distributions may be made to a Participant who has reached age 62, without requiring that they separate from employment. In-service distributions are permitted from the Participant's entire interest in the Plan, and the distribution options otherwise available at retirement are similarly available for in-service distributions.

Disability Benefit

Eligibility

Participants who meet the requirement for Total and Permanent Disability under the terms of the Plan prior to retirement or separation from service, for whom the condition continues for a period of six (6) consecutive months, and then results in separation from service due to the disability, shall be 100% vested in the accrued benefit.

Monthly Benefit

The Accrued Benefit as of the date of disability, reduced for commencement prior to the participant's normal retirement date. The accrued benefit will be reduced by 1/180th for each of the first 60 months of early commencement, and then by 1/360th for each of the following 60 months by which commencement precedes normal retirement. Further actuarial reductions for each year thereafter shall be made using an interest rate of 5.00% and 1983 Group Annuity Mortality Table. Distribution options otherwise available at retirement are available to those receiving a disability distribution.

Termination Benefit

Eligibility

Termination of employment prior to retirement when vested.

Monthly Benefit

The vested Accrued Benefit commences at normal retirement, or in a reduced amount in accordance with the Early Retirement Benefit provisions above. Whether vested in the Accrued Benefit or not, the Terminated Participant may elect to receive a single distribution comprised of his or her Employee Mandatory Contribution Account, including all accrued interest thereon, at any time following the Participant's termination of employment with the Employer by making an affirmative election. If vested in the Accrued Benefit, the remaining amount of the Participant's Accrued Benefit derived from Employer Contributions, if any, shall be distributed at the Participant's annuity commencement upon attaining early or normal retirement eligibility, in the normal form of benefit or any permitted optional forms of benefit available at that time. Alternatively, if vested in the Accrued Benefit, the Terminated Participant may elect to receive a Single lump sum payment upon termination of employment, provided the Present Value of Accrued Benefit does not exceed \$50,000.

Pre-Retirement Death Benefit

Eligibility

Death of the participant after having become vested.

Monthly Benefit

The monthly benefit payable to the Participant's surviving spouse will be the minimum spouse's death benefit, which is equal to a 50% Joint and Survivor Annuity, payable commencing when the deceased participant would have otherwise been eligible to retire and begin receiving an annuity payment, or at the time of the participant's death if the deceased participant was eligible to retire at that time. For Participants who have no surviving spouse, or in the case of the Qualified Pre-Retirement Survivor Annuity having been waived, or if the Participant is not fully vested, the Participant's designated Beneficiary shall receive a single sum distribution of the Employee Mandatory Contribution Account.

In addition, the Spousal Beneficiary who is not eligible to receive the 50% Joint and Survivor Annuity immediately (due to the participant not having attained early retirement eligibility at the time of death) shall have the option of receiving the Employee Mandatory Contribution Account upon the death of the Participant, or as soon as practical thereafter, and then receiving a reduced survivor portion of the Qualified Pre-Retirement Survivor Annuity at the time it would have otherwise been payable, based instead on the residual Accrued Benefit derived from Employer Contributions, if any, rather than the full Accrued Benefit.

Cost of Living Adjustment to Participants in Pay Status

Each year, the monthly benefit amount payable to an annuitant is increased by the annual increase in the Consumer Price Index for Urban Consumers, as published by the Department of Labor as of the fourth month prior to the beginning of the Plan Year, rounded to the nearest 0.1%, but limited to not more than 3%.

Normal Form of Benefit

Modified Cash Refund – A level monthly benefit paid over the life of the Participant and ceasing at the Participant's death. If the participant dies prior to having received the entire value of the Employee Mandatory Contribution Account, the Participant's Beneficiary will receive the remaining value upon the Participant's death.

Unless the participant and the spouse elect otherwise, a married participant will receive a 50% joint & survivor annuity, actuarially equivalent to the Normal Form of Benefit.

Optional Forms

Life annuity – This form provides monthly payments during the participant’s lifetime. The payments are actuarially equivalent to the Normal Form of Benefit.

60-month certain and life annuity – This form provides monthly payments during the participant’s lifetime with a guaranteed minimum of 60 payments. If the participant dies prior to receiving 60 payments, the designated beneficiary will receive the remainder of the guaranteed 60 payments. The payments are actuarially equivalent to the Normal Form of Benefit.

120-month certain and life annuity – This form provides monthly payments during the participant’s lifetime with a guaranteed minimum of 120 payments. If the participant dies prior to receiving 120 payments, the designated beneficiary will receive the remainder of the guaranteed 120 payments. The payments are actuarially equivalent to the Normal Form of Benefit.

180-month certain and life annuity – This form provides monthly payments during the participant’s lifetime with a guaranteed minimum of 180 payments. If the participant dies prior to receiving 180 payments, the designated beneficiary will receive the remainder of the guaranteed 180 payments. The payments are actuarially equivalent to the Normal Form of Benefit.

50%, 66 2/3%, 75%, or 100% joint & survivor annuity – These forms provide monthly payments during the participant’s lifetime with monthly payments to the surviving beneficiary after the participant’s death equal to 50%, 66 2/3%, 75%, or 100%, respectively, of the amount paid during the participant’s lifetime. The payments are actuarially equivalent to the Normal Form of Benefit.

Lump sum payment – This form provides a one-time payment equal to the actuarial equivalent of the Normal Form of Benefit. This optional form of payment is only available if the value of the Accrued Benefit is less than or equal to \$50,000.00.

Return of Employee Mandatory Contribution Account – An immediate single payment of the Participant’s Employee Mandatory Contribution Account with the residual retirement benefit, if any, payable at the Participant’s annuity commencement date in the amount of the Participant’s Accrued Benefit derived from Employer Contributions. This residual is payable in any optional form above, except for a monthly pension for life with modified cash refund, and a single sum payment. However, this optional payment form shall not be available to Participants whose Retirement Date is subsequent to their Normal Retirement Date.

Annuity forms of payment are converted from the normal form using the 1983 Group Annuity Mortality table with a 50%/50% blend of male and female mortality rates and 7.50% interest. Lump sum forms of payment are converted from the normal form using the IRS Code Section 417 Mortality Table as adjusted annually and as outlined under IRS Regulation §1.430(h)(3)-1 and IRS Notice 2008-42 and any superseding guidance, and the three-tiered segment interest rates (as outlined under IRS Code Section 417(e)) for the month of November in the calendar year preceding the year of determination.
