TE Connectivity Legacy Pension Plan

Report on the Audit of the Financial Statements

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the accompanying financial statements of the TE Connectivity Legacy Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of September 30, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the TE Connectivity Legacy Pension Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from qualified institutions as of and for the years ended September 30, 2024 and 2023, stating that the certified investment information, as described in Note 4 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section

- The amounts and disclosures in the financial statements referred to above, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- The information in the financial statements referred to above related to assets held by and certified to by qualified institutions agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the TE Connectivity Legacy Pension Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current Plan instrument, including all Plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

Retirement Administrative Committee
TE Connectivity Legacy Pension Plan

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the TE Connectivity Legacy Pension Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the TE Connectivity Legacy Pension Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

TE CONNECTIVITY LEGACY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2024 AND 2023

NOTE 1 DESCRIPTION OF THE PLAN

The following brief description of the TE Connectivity Legacy Pension Plan (the Plan) is provided for general information purposes only. Selected Plan provisions are described below. Participants should refer to the Plan document and summary of plan description for more complete information regarding the terms of the Plan.

General

The Plan is a noncontributory, defined benefit pension. The Plan is subject to ERISA and Internal Revenue Code (the IRC) of 1986, as amended. The Companies are a part of a controlled group of entities with TE Connectivity Corporation (the Plan Sponsor).

Assets of the Com-Net Pension Plan (Com-Net), the Tyco Electronics Pension Plan for Represented Employees (TERP), and the Hub Pension Plan (Hub) were transferred together on October 1, 2022, to form the TE Connectivity Legacy Pension Plan.

The Plan covers certain U.S. employees of Com-Net Ericsson Critical Radio Systems, Inc., certain U.S. employees of Raychem Corporation and AMP Incorporated, bargained employees of Tyco Electronics Power Systems, Inc., and substantially all eligible employees of Hub Fabricating Company (collectively, the Companies).

Under Com-Net provisions, participation was closed to new participants effective December 31, 2022, and effective December 31, 2003, all future benefit accruals under Com-Net were frozen. Under TERP provisions, benefit accruals and participation were frozen effective March 29, 2002. Under Hub provisions, benefit accruals and participation were frozen effective March 1, 2001.

Effective September 30, 2024, Tyco Electronics Pension Plan (TEPP) assets totaling \$14,973,131 were transferred into the Plan to account for the spinoff of 834 TEPP participants as of September 30, 2024. TEPP covers U.S. employees of Raychem Corporation and AMP Incorporated. The spinoff participants were immediately merged into the Plan. The amount of assets and liabilities transferred from TEPP were less than 3% of the market value of TEPP assets; therefore, the spinoff is considered de minimis.

Plan Administration

Plan oversight is governed by the TE Connectivity Corporation Retirement Administrative Committee (the Administrative Committee) and the TE Connectivity Corporation Benefits Investment Committee (the Investment Committee) of the Plan Sponsor. The Administrative Committee acts in the capacities of Plan administrator and Plan fiduciary. The Investment Committee acts in the capacity of Plan fiduciary with respect to Plan investments. At least three people from each committee are appointed by the Board of Directors of the Plan Sponsor. The Investment Committee appoints the investment managers to manage the assets of the Tyco Electronics Master Trust (the Master Trust).

NOTE 1 DESCRIPTION OF THE PLAN (CONTINUED)

Pension Benefits

Com-Net Ericsson Critical Radio Systems, Inc. (Com-Net)

Any participant who has completed five or more years of service is entitled to annual pension benefits beginning at normal retirement age of 65 based on the greater of: (a) 0.93% of final average salary plus 0.65% times benefit service up to 35 years, (b) accrued benefit under the prior plan, or (c) for GE transfer employees who met the rule of 70, a minimum career average formula. The Plan permits early retirement at ages 55 - 64, subject to early retirement factors as defined in the Plan document. Participants may postpone retirement after normal retirement date and continue participation in the Plan on the same basis as prior to normal retirement date. Participants may elect one of seven options to receive their retirement benefits.

Raychem Corporation Participants from Spinoffs

In 1997, the Raychem Corporation Pension Plan was redesigned, resulting in a change in the way benefits are calculated for all participants. Under the 1997 formula, the minimum benefit was equal to the accrued benefit under the old formula. The redesigned plan could have decreased future potential retirement benefits for older participants, so a transition benefit plan was formulated to protect these participants. Eligibility for the minimum transition benefit was age 55 and 10 years of service or age 65 as of the redesign date. The transition benefit was the greater of the new formula for all service or the frozen accrued benefit at the time of transition plus the new formula benefit from transition on.

Under the redesigned Plan, participants with five or more years of service or who have attained age 65 are entitled to monthly pension benefits. The pension benefit is based on credited service, average covered earnings, and age. Years of credited service are limited to a total of 35. Participants who retire from active service (age 55 or older) or with 10 or more years of service may elect early retirement at age 55. Subject to certain Plan requirements, participants may select from various optional forms of payment. Participants who retire after age 65 will receive the greater of the aforementioned benefit for all their years of service (including credit for service after age 65) increased by 1/15th per year for each month worked past age 65.

Effective July 31, 2000, all benefit accruals and future participation of the Raychem Corporation participants ceased and the Raychem Corporation Pension Plan's frozen lump sum benefit under the regular Plan formula was indexed to the increase in one-year Treasury rates (constant rates).

NOTE 1 DESCRIPTION OF THE PLAN (CONTINUED)

Pension Benefits (Continued)

AMP Incorporated Participants from Spinoffs

Participants are entitled to their accrued pension benefits beginning at the normal retirement age of 65, which is calculated based on average earnings over three years and years of credited service. Participants with 10 or more years of service may elect to retire at age 55 or at any time between age 55 and 60, subject to a permanent reduction of pension benefits. The benefit reduction is calculated by multiplying the accrued pension benefit by 0.50% by the number of the months that the participant retires prior to age 60. There is no reduction in pension benefits to participants with 10 or more years of service who elect to retire at age 60 or later. Participants may postpone retirement after age 65 and continue participation in the Plan on the same basis as prior to age 65. Participants may elect to have their benefits paid as a life annuity, a joint and survivor annuity option, a period certain option, or a level income option (for retirement prior to age 62), which provides a substantially level income before and after age 62 when combined with estimated Social Security benefits.

Effective December 31, 1999, all benefit accruals and future participation of the AMP Incorporated participants were frozen.

TERP

Participants who were members of the former Lucent Plan and have completed at least five years of vesting service are entitled to annual pension benefits beginning at normal retirement age of 65 equal to the amount of their monthly benefits (based on their retirement date) multiplied by their credited service to their normal retirement date. The Plan permits early retirement at age 55 with at least 20 years of service, at age 50 with at least 25 years of service, and participants with 30 years of service regardless of age. Upon retirement, participants will receive their pension benefits in the form of a single life annuity for single participants or a qualified joint and survivor annuity for married participants. Participants may elect to receive a 10-year annuity.

Hub

Participants who complete five years of service are entitled to annual pension benefits beginning at normal retirement age of 65. The amount of annual retirement benefit is determined by the benefit formula and is payable monthly for life. The Plan permits early retirement at age 60. Unless otherwise elected, participants receive their pension benefits in the form of a joint and survivor annuity. A participant's pension benefit is limited to a maximum amount under the terms of the Plan.

TE CONNECTIVITY LEGACY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2024 AND 2023

NOTE 1 DESCRIPTION OF THE PLAN (CONTINUED)

Disability and Death Benefits

Com-Net, TERP and Hub

If an active employee dies, a death benefit equal to the value of the employee's accumulated pension benefits is paid to the employee's beneficiary. If an active employee becomes totally and permanently disabled and they receive disability benefits from the Plan Sponsor-sponsored insured long-term disability program, they will receive disability benefits from the Plan when the long-term disability benefits from the insurance program ends or age 65, whichever is later. If an active employee becomes totally disabled and they are not eligible to receive disability benefits from a Plan Sponsor-sponsored insured long-term disability program, they may elect to receive a disability benefit from the Plan beginning immediately, which is based on their vested accrued benefit.

Raychem Corporation Participants and AMP Incorporated Participants from Spinoffs

Participants who terminate employment due to total and permanent disability or spouses of vested participants who die may be entitled to receive benefits under this Plan. The surviving spouse of a deceased participant who has vested by virtue of death is entitled to a life annuity equal to 50%, 75%, or 100% of the amount the participant would have received had they terminated with a vested benefit, survived to their eligibility for early retirement, or taken early retirement on the day before their death and had commenced receiving benefits under a joint and survivor annuity depending on which annuity payment option was selected. No pension or other benefit is payable if a participant dies before age 55 without a surviving spouse other than the Raychem Profit Sharing Plan (the RPSP) refund as described in the paragraph below. Active employees whose employment ended due to disability continue to earn credited service while they are receiving benefits under the Company's long-term disability plan. Credited service ends when disability benefits terminate. At that time, participants are entitled to a pension if they are otherwise eligible for early or normal retirement.

Prior to the existence of the Raychem Corporation Pension Plan, the Raychem Corporation made contributions of cash and Company stock to the RPSP. The RPSP was a Raychem Corporation sponsored profit sharing plan.

Vesting

Com-Net

Participants are 100% vested in their accrued benefits.

Raychem Corporation Participants and AMP Incorporated Participants from Spinoffs

Participants were vested in Plan benefits only after completing five years of service. For participants who terminated employment prior to vesting, forfeitures of benefits derived from contributions made by the Company were used to reduce future contributions by the Company.

**TE CONNECTIVITY LEGACY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS

NOTE 1 DESCRIPTION OF THE PLAN (CONTINUED)

Vesting (Continued)

TERP and Hub

Participants who had completed at least five years of continuous service, and whose employment was terminated for any reason other than death or retirement, shall upon proper application, be entitled to a vested pension benefit commencing on their normal retirement date.

Funding Policy

The Plan Sponsor contributes such amounts as are deemed necessary on an actuarial basis to provide the Plan with assets sufficient to meet the benefits to be paid to members of the Plan and to meet minimum funding standards as required by law. Required contribution levels are based upon the payment of the current normal cost for each participant, as well as amortization of the total unfunded actuarial accrued liabilities. Actuarial gains and losses are amortized over five years for minimum funding purposes and over 10 years for maximum deductible purposes. The Plan has met the minimum funding requirement established by ERISA for the years ended September 30, 2024 and 2023.

Although it has not expressed any intention to do so, the Plan Sponsor has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan have been prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Plan considers all highly liquid investments with original maturities of three months or less to be cash equivalents. Cash equivalents consist primarily of money market funds and short-term commercial paper.

Valuation of Investments and Income Recognition

Investments are recorded at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for a discussion of fair value measurements.

**TE CONNECTIVITY LEGACY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2024 AND 2023**

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Valuation of Investments and Income Recognition (Continued)

Purchases and sales of investments are recorded on a trade-date basis. The fair value of the Plan's interest in the Master Trust is based on the beginning of the year (or period) value of the Plan's interest in the Master Trust plus actual contributions and allocated net investment income or loss less actual distributions and allocated administrative expenses.

Payment of Benefits

Benefits are recorded when paid.

Payment of Administrative Expenses

The Plan's expenses are paid by either the Plan or the Plan Sponsor, as provided by the Plan document. Expenses that are paid directly by the Plan Sponsor are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as administrative expenses in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in Plan interest in the Master Trust presented in the accompanying statements of changes in net assets available for benefits.

Subsequent Events

The Plan has evaluated subsequent events through July 10, 2025, the date the financial statements were available to be issued.

NOTE 3 ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those estimated future period benefit payments, including lump sum distributions, that are attributable under the Plan's provisions to the service that employees have rendered to the date the benefits were frozen. Accumulated plan benefits include all benefits that are expected to be paid to present employees or their beneficiaries, or retired or terminated employees or their beneficiaries, and beneficiaries of employees who have died. Benefits payable under all circumstances are included, to the extent they are deemed attributable to employee service rendered to the date the benefits were frozen.

The actuarial present value of accumulated plan benefits is actuarially determined and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by participants to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of September 30, 2023 and October 1, 2022 were: (a) retirement of varying rates from 2% at age 55 to 100% at age 65 and above, (b) life expectancy of participants using the separate sex distinct rates for non-annuitants based on the Pri-2012 "Employee" table with generational projection using Scale MP-2021 and separate sex distinct rates with a single nondisabled retiree table used for retirees and contingent annuitants with generational projection using Scale MP-2021 for 2023 and 2022, and (c) a discount rate of 5.61% and 5.16% for 2023 and 2022, respectively.

TE CONNECTIVITY LEGACY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2024 AND 2023

NOTE 3 ACCUMULATED PLAN BENEFITS (CONTINUED)

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The computation of the actuarial present value of accumulated plan benefits were made as of October 1, 2023. Had the valuation been performed as of September 30, 2023, there would be no material differences.

The actuarial present value of accumulated benefits as of September 30, 2023 is as follows:

Actuarial Present Value of Accumulated Plan Benefits:

Vested Benefits:

Participants Currently Receiving Payments	\$ 60,421,081
Active Participants	5,495,183
Participants with Deferred Benefits	<u>31,183,164</u>

Nonvested Benefits	<u>371,058</u>
Total Actuarial Present Value of Accumulated Plan Benefits	<u><u>\$ 97,470,486</u></u>

The change in the actuarial present value of accumulated benefits for the year ended September 30, 2023 is as follows:

Actuarial Present Value of Accumulated Plan

Benefits - October 1, 2022 \$ 103,884,402

Increase (Decrease) During the Year Attributable to:

NOTE 5 MASTER TRUST

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan and several plans sponsored by the Plan Sponsor. The assets of the Master Trust are held by its trustee, The Northern Trust Company, as of September 30, 2024 and 2023. Each participating retirement plan has an undivided interest in the assets of the Master Trust.

The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. The Plan's interest in the net assets of the Master Trust is approximately 18% and 15% at September 30, 2024 and 2023, respectively. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon the balance of the Plan's assets compared to the Master Trust assets.

In the past, the Investment Committee of the Plan has authorized certain investment managers to invest in derivative instruments for hedging purposes. As a global institutional investor, the Master Trust is in a position to take advantage of derivative instruments to ensure overall investment performance objectives are achieved as specified. Investment managers may utilize derivatives for risk control and substitution. Speculation is not permitted. Under no circumstances is a manager permitted to leverage the Master Trust's portfolio with derivatives.

The following financial information was obtained from data that has been prepared and certified to as complete and accurate by the trustee of the Master Trust. Such financial information has not been audited by the Plan's independent accountants.

NOTE 6 FAIR VALUE MEASUREMENTS

The framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under this guidance are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liabilities;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

TE CONNECTIVITY LEGACY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2024 AND 2023

NOTE 6 FAIR VALUE MEASUREMENT (CONTINUED)

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at September 30, 2024 and 2023.

Commingled Equity Funds: Are pooled investments in multiple equity-type securities. Fair value is calculated as the closing price of the underlying investments, an observable market condition, divided by the number of shares of the fund outstanding.

Commingled Bonds: Are pooled investments in multiple debt-type securities. Fair value is calculated as the closing price of the underlying investments, an observable market condition, divided by the number of shares of the fund outstanding.

Other Investments: Are primarily comprised of short-term investments commingled funds. The commingled fund's fair value is calculated as the closing price of the underlying investments, an observable market condition, divided by the number of shares of the fund outstanding. Net asset value is a readily determinable fair value and is the basis for current transactions.

Commingled Real Estate Fund and Private Funds: Are classified in the net asset value (NAV) column as their fair value is determined using the calculated NAV. The values for underlying investments are fair value estimates determined by an external fund manager based on quoted market prices, operating results, balance sheet stability, growth, and other business and market sector fundamentals.

The following tables sets forth by level, within the fair value hierarchy, the Master Trust's investments measured at fair value on a recurring basis.

Fair Value of Investments in Entities that use NAV

The following table summarizes investments measured at fair value based on NAV per share by the Plan as of September 30:

Investment Type	Fair Value		Unfunded Commitments	Redemption Frequency	Redemption Notice Period
	2024	2023			
Commingled Real Estate Fund	\$ 92,695,849	\$ 96,196,248	\$ -	Monthly	1 Business Day Prior to Trade Date
Private Funds	52,968,175	34,841,232	\$ -	Quarterly	12 Business Day Prior to Trade Date
Total	<u>\$ 145,664,024</u>	<u>\$ 131,037,480</u>			

The Commingled Real Estate Fund investment objective is to achieve long-term total returns adjusted for the effects of inflation through current income and long-term capital appreciation with low correlation to the broader public equity and debt markets. The assets will be invested in a range of real asset strategies, including but not limited to real estate, infrastructure, timberland, and farmland.

The Private Funds investment objective is to achieve capital preservation and steady growth of assets, targeting steady risk adjusted returns in excess of the return of United States Treasury Bills, with a low correlation to traditional equity and bond markets over a full market cycle.

NOTE 7 PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries that have been receiving for at least three years, or annuity benefits that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (the PBGC) (a U.S. government agency) up to the applicable limitation (discussed below).
3. All other vested benefits (that is, vested benefits not insured by the PBGC).
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at the time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

NOTE 8 RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

Certain Plan investments are shares of investments managed by the Northern Trust Company, who is the trustee and qualified institution as defined by the Plan; therefore, these transactions qualify as party-in-interest transactions. The Plan paid certain expenses related to Plan operations and investment activity to various service providers. These party-in-interest transactions are exempt from the prohibited transaction rules of ERISA.

NOTE 9 TAX STATUS

The Plan has not yet obtained a determination letter, in which the Internal Revenue Service (IRS) states that the Plan, as then designed, was in compliance with the applicable requirements of the IRC. The Plan administrator and the Plan's tax counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. Plan management has analyzed the tax positions taken by the Plan and has concluded that there are no uncertain positions taken or expected to be taken. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

NOTE 10 RISKS AND UNCERTAINTIES

The Plan invests in various types of investment securities, which are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is possible that changes in the values of investment securities may occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimates and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

SCHEDULE SB ATTACHMENTS

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes (same for healthy and disabled lives) are as prescribed by IRC §430(h) and selected by the sponsor.
Termination	Termination rates are based on plan sponsor expectations for future terminations where the assumed rates differ by age and plan, with periodic monitoring of observed gains and losses caused by termination patterns different than assumed.
Retirement	Retirement rates are based on plan sponsor expectations for future retirements where the assumed rates differ by age and plan, with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.
Benefit commencement date for deferred benefits:	
• Preretirement death benefit	Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, the benefit value at a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available.
• Deferred vested benefit	Deferred vested participants' assumed commencement age is intended to capture the expected age at commencement. In general, deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at multiple ages is not expected to be significant.
Percent married	The assumed percentage married is based on general population statistics on the marital status of individuals of retirement age.
Spouse age	The assumed age difference for spouses is based on general population statistics of the age difference for married individuals of retirement age.

Source of Prescribed Methods

Funding methods The methods used for funding purposes, as described under “Methods” in Appendix A, including the method of determining the value of plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Methods

Valuation date First day of plan year.

Funding target Present value of accrued benefits.

Target normal cost Present value of benefits expected to accrue during plan year plus administrative expenses expected to be paid from plan assets during plan year.

Actuarial value of assets Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year). The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.

Data / Asset sources

TE Connectivity Corporation and the plan administrator furnished the participant data, including previously calculated accrued benefits. Data was reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the Company, assumptions or estimates were made where data was not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our valuation.

WTW used asset data supplied by the trustee.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with TE Connectivity Corporation regarding the likelihood that these benefits will be paid. WTW has reviewed the plan provisions with TE Connectivity Corporation and, based on that review, is not aware of any significant benefits required to be valued that were not.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

The segment interest rates used to calculate the funding target were updated from an applicable month of October 2022 to October 2023. ARPA interest rate corridors were applied for applicable minimum funding requirements and benefit restriction purposes.

The mortality projection scale used to calculate the funding target was updated from Scale MP-2020 to Scale MP-2021, as required by IRC §430.

The assumption for administrative expenses to be added to the target normal cost was updated from \$1,394,000 to \$1,402,000.

Percentage married	85% of males; 75% of females. This assumption is only used to value pre-retirement surviving spouse benefits and in determining the optional forms expected to be elected at commencement.
Spouse age	
• TELPP (Com-Net)	Wives 4 years younger than husbands.
• All other groups	Wives 3 years younger than husbands.
Administrative expenses	The administrative expense assumption for the upcoming year is equal to the expenses paid in the prior year, excluding investment management fees paid from the trust, adjusted for expected changes in PBGC premiums, rounded to the nearest \$1,000. For the current valuation, administrative expenses of \$1,402,000 were included in the target normal cost.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month, and lump sum payments are payable on date of decrement.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

SCHEDULE SB ATTACHMENTS

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes (same for healthy and disabled lives) are as prescribed by IRC §430(h) and selected by the sponsor.
Termination	Termination rates are based on plan sponsor expectations for future terminations where the assumed rates differ by age and plan, with periodic monitoring of observed gains and losses caused by termination patterns different than assumed.
Retirement	Retirement rates are based on plan sponsor expectations for future retirements where the assumed rates differ by age and plan, with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.
Benefit commencement date for deferred benefits:	
• Preretirement death benefit	Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, the benefit value at a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available.
• Deferred vested benefit	Deferred vested participants' assumed commencement age is intended to capture the expected age at commencement. In general, deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at multiple ages is not expected to be significant.
Percent married	The assumed percentage married is based on general population statistics on the marital status of individuals of retirement age.
Spouse age	The assumed age difference for spouses is based on general population statistics of the age difference for married individuals of retirement age.

Source of Prescribed Methods

Funding methods The methods used for funding purposes, as described under “Methods” in Appendix A, including the method of determining the value of plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Methods

Valuation date First day of plan year.

Funding target Present value of accrued benefits.

Target normal cost Present value of benefits expected to accrue during plan year plus administrative expenses expected to be paid from plan assets during plan year.

Actuarial value of assets Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year). The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.

Data / Asset sources

TE Connectivity Corporation and the plan administrator furnished the participant data, including previously calculated accrued benefits. Data was reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the Company, assumptions or estimates were made where data was not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our valuation.

WTW used asset data supplied by the trustee.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with TE Connectivity Corporation regarding the likelihood that these benefits will be paid. WTW has reviewed the plan provisions with TE Connectivity Corporation and, based on that review, is not aware of any significant benefits required to be valued that were not.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

The segment interest rates used to calculate the funding target were updated from an applicable month of October 2022 to October 2023. ARPA interest rate corridors were applied for applicable minimum funding requirements and benefit restriction purposes.

The mortality projection scale used to calculate the funding target was updated from Scale MP-2020 to Scale MP-2021, as required by IRC §430.

The assumption for administrative expenses to be added to the target normal cost was updated from \$1,394,000 to \$1,402,000.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions – TELPP (TEPS)

Effective Date and Most Recent Amendment

The plan was originally effective January 2, 2001 and was frozen as of March 29, 2002. Effective September 30, 2022, the former TEPS plan (as well as the former Com-Net and HUB plans) was merged into the new TE Connectivity Legacy Pension Plan.

Plan Year

The twelve-month period ending the last day of September.

Coverage and Participation

Participation:

- Transferred employees (individuals transferred to this plan following the asset sale between Lucent Technologies Inc. and the Tyco Group S.A.R.L. on November 13, 2000) became participants as of the effective date.
- Any employee of Tyco Electronics Power Systems, Inc. who is in a bargaining unit represented by the Communications Workers of America.

Eligibility: All transferred employees as of January 2, 2001.

After January 2, 2001, upon satisfying:

- 1 year of service, and
- Age 21.

Pre-Retirement Death Benefit

Benefit for deferred vested participant: 50% Joint and Survivor annuity based on accrued benefit at date of death:

- Benefit is actuarially reduced for J&S benefit and for commencement prior to earliest unreduced retirement age.
- If participant terminated employment before death, pre-retirement death coverage is only provided upon participant election. Terminated vested participants pay for pre-retirement death coverage via an actuarial reduction of the deferred benefit, based on age at termination.

Benefit for active participant:

Accidental Death Benefit and Sickness Death Benefit: Payable to spouse or to unmarried child or child under age 23 who was supported by the employee at the time of death or dependent parent of the employee who was living with the employee upon employee death due to accident or sickness:

- Accidental Death Benefit: 3 years of wages (up to \$50,000), plus burial expenses up to \$500.
- Sickness Death Benefit: Greater of 12 months of wages or \$500.

Benefit for retired participant:

- Death benefit payable to the Lawful Spouse or dependent relatives. The amount is equal to the Sickness Death Benefit for active participants as if the retiree had died on his or her last day of active service before retirement.

Other Plan Provisions

Normal Form of Benefit

- Automatic form for unmarried participants is a Single Life Annuity.
- Automatic form for married participants is a 50% Joint & Survivor Annuity.

Optional Forms of Retirement Income in Lieu of Normal Form

- 75%, or 100% Joint & Survivor Annuity.
- 10-Year Certain & Life Annuity.
- If the total value of benefits is under \$1,000, then the benefit will be mandatorily paid as a lump sum. The participant has the option of a lump sum form of payment if the present value of benefits is under \$5,000.
