## **Summary of Actuarial Methods**

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. A plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that a plan will be adequately and systematically funded. Annual contributions are also affected by a plan's "asset valuation method" (as well as plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

### **Actuarial Cost Method**

The actuarial cost method used for determining the Plan's ERISA funding requirements is the Unit Credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's Normal Cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's benefits. This method is prescribed for ERISA funding requirements by the Pension Protection Act of 2006.

### **Asset Valuation Method**

The Actuarial Value of Assets used for determining the Plan's ERISA funding requirements is equal to the Market Value of Assets. The Market Value of Assets is equal to the Fair Value of Assets as of the valuation date plus the discounted value of employer contributions made after the valuation date. These contributions are discounted to the valuation date using the Effective Interest Rate for the prior plan year.

### **PBGC Variable-Rate Premium Method**

The standard method is used for the PBGC variable-rate premium calculation (adopted January 1, 2023).

### **Amortization Method**

For the Plan's ERISA funding requirements, incremental Funding Shortfall amounts are amortized over a fifteen-year period, and the related shortfall amortization payment is determined on the first valuation date following the plan year in which it arises based on the segment rates used for ERISA minimum funding purposes on that date, as prescribed under IRC Section 430.

## Summary of Actuarial Assumptions

### ECONOMIC ASSUMPTIONS

#### Interest Rates

The current funding and PBGC interest rates are as follows. The funding interest rates are prescribed under IRS regulations based on the Plan Sponsor's interest rate election. The PBGC interest rates are based on the Plan Sponsor's elected method for determining the premium funding target.

	Minimum Funding	Maximum Deductible	PBGC Premium
Segment 1 (0–5 years)	4.75%	4.37%	5.01%
Segment 2 (5–20 years)	4.96%	4.96%	5.13%
Segment 3 (20+ years)	5.59%	4.95%	5.15%
Effective Interest Rate	5.03%	4.87%	5.11%

**ERISA minimum funding:** 24-month average segment rates, using no lookback period, adjusted to reflect the applicable segment rate stabilization corridor.

**Maximum Deductible Contribution:** 24-month average segment rates, using no lookback period, but not adjusted to reflect segment rate stabilization.

**PBGC premium:** Spot segment rates for the month preceding the valuation date, but not adjusted to reflect segment rate stabilization. The standard method (adopted January 1, 2023) is used for the PBGC variable-rate premium calculation.

#### Administrative Expenses

Expected administrative expenses payable from the trust are explicitly added to the normal cost. The loading for expenses (assumed to be payable beginning-of-year) is equal to the actual administrative expenses in the prior year.

### DEMOGRAPHIC ASSUMPTIONS

Except where noted, demographic assumptions are based on the actuary's judgment and continued review of experience.

#### Mortality

Statutory small plan static mortality tables for 2024 based on Pri-2012 Mortality Table, with combined rates for non-annuitants and annuitants, adjusted from base year 2012 with projections to anticipate greater future longevity using the 2024 Adjusted Scale MP-2021.

#### Retirement

The greater of normal retirement age or attained age.

#### Decrement Timing

Decrements are assumed to occur at the middle of the year, except that 100% retirement (see above) is assumed to occur at the beginning of the year.

**Form of Payment**

Lump sum distribution payable at retirement based on the 2024 IRS blended Notice 2023-73 Mortality Table and mandated segment rates. 100% of participants are assumed to elect the lump sum option at retirement.

**Marital Characteristics**

**For participants not in pay status:** 90% of male and 80% of female participants are assumed to be married. Males spouses are assumed to be three years older than female spouses.

**For participants in pay status:** Actual birth dates of beneficiaries are included in the census data, where relevant.

**For beneficiaries:** Actual birth dates are included in the census data, where relevant.

**CHANGES IN ACTUARIAL ASSUMPTIONS SINCE PRIOR VALUATION**

**Interest rates for ERISA minimum funding:** From 4.75%, 5.00%, and 5.74% per year to 4.75%, 4.96%, and 5.59% per year, respectively, as required by statute.

**Interest rates for Maximum Deductible Contribution:** From 2.13%, 3.62%, and 3.93% per year to 4.37%, 4.96%, and 4.95% per year, respectively, as required by statute.

**Interest rates for PBGC premium:** From 4.84%, 5.15%, and 4.85% per year to 5.01%, 5.13%, and 5.15% per year, respectively. The interest rates comply with PBGC requirements.

**Mortality:** From statutory tables for 2023 to statutory tables for 2024.

## Summary of Principal Plan Provisions

This summary of plan provisions is intended to only describe the essential features of the Plan. All eligibility requirements and benefit amounts shall be determined in strict accordance with the plan document itself.

### Definitions

**Accrued Benefit:** The monthly accrued benefit for terminations after February 15, 1991 is \$8.50 multiplied by the number of years of credited service. For terminations on or before February 15, 1991, the monthly accrued benefit is based on the benefit rate in effect at the time of termination multiplied by the number of years of credited service. No benefits shall accrue after December 31, 1997.

**Credited Service:** Years, measured from the participant's date of hire to his date of termination of employment, during which the participant completes at least 1,600 hours of service. Service is reduced proportionately for service less than 1,600 hours. Total credited service is rounded down to the next full year. The plan was amended to freeze benefits as of December 31, 1997.

**Plan Effective Date:** September 8, 1970. The plan was amended and restated effective January 1, 2012. The first amendment was adopted in May, 2013.

**Plan Year:** The 12-month period beginning January 1 and ending December 31.

**Vesting Service:** Plan years, measured from the participant's date of hire to his date of termination of employment, during which the participant completes at least 1,000 hours of service.

### Eligibility for Participation

Each employee who is a member of Local 713 of the International Brotherhood of Electrical Workers will be included as a participant in the plan on the first day of the month following his date of hire. No employee who is hired on or after December 31, 1997 shall become a participant in the plan.

### Normal Retirement

**Normal Retirement Date:** The first day of the month coincident with or next following the later of the participant's 65<sup>th</sup> birthday or 5<sup>th</sup> anniversary of participation in the plan.

**Normal Retirement Benefit:** The Accrued Benefit.

### Early Retirement

**Early Retirement Date:** The first day of the month following the attainment of age 62 and completion of 10 years of Vesting Service. Effective September 8, 1981, a participant may retire after attainment of age 55 and completion of 15 years of Vesting Service.

**Early Retirement Benefit:** The Accrued Benefit, reduced by 5% for each year or fraction thereof between Early Retirement Date and Normal Retirement Date.

### Vested Benefit

A participant has a non-forfeitable right to his accrued benefit as of his date of termination of employment, provided that he has completed 5 years of Vesting Service. The benefit will be payable at Normal Retirement Date. Depending on the years of Vesting Service completed, the benefit may be payable at an Early Retirement Date.

### **Preretirement Death**

If a vested participant who has not yet retired dies on or before his earliest retirement age, the participant's spouse will receive a benefit equal to the benefit the spouse would have received had the participant separated from service on the date of death, survived to the earliest retirement age, retired with an immediate 50% joint and survivor annuity at the earliest retirement age and died the day after his earliest retirement age.

If a vested participant who has not yet retired dies after his earliest retirement age, the participant's spouse will receive a benefit equal to the benefit the spouse would have received had the participant retired on his date of death and elected to receive a 50% joint and survivor annuity and died the next day.

### **Disability Retirement**

Benefit payable upon disability which qualifies for Social Security Disability benefits provided that disability occurs after completion of 5 years of Vesting Service. Benefit payable is the Accrued Benefit as of date of disability without reduction for early commencement. If the participant continues to receive disability benefits until eligibility for retirement, his disability benefits will cease and he will be entitled to a retirement benefit.

### **Forms of Payment**

The Accrued Benefit described above assumes payment in the form of a monthly life annuity. The benefits will be actuarially adjusted to reflect any other form of annuity payable.

### **Contributions**

The entire cost of the plan is paid by the employer.
