Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

INDEPENDENT AUDITORS' REPORT

To the Plan Administrator
Quincy Mutual Fire Insurance Company Retirement Plan

Opinion

We have audited the accompanying financial statements of Quincy Mutual Fire Insurance Company Retirement Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits and of accumulated plan benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 2024, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits and accumulated plan benefits of Quincy Mutual Fire Insurance Company Retirement Plan as of December 31, 2024 and 2023, and the changes in its net assets available for benefits and changes in its accumulated plan benefits for the year ended December 31, 2024, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Quincy Mutual Fire Insurance Company Retirement Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Quincy Mutual Fire Insurance Company Retirement Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

100 Ledgewood Place, Suite 304, Rockland, MA 02370

INDEPENDENT AUDITORS' REPORT (Continued)

Management is also responsible for maintaining a current plan instrument, including all plan amendments; administering the plan; and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgement made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Quincy Mutual Fire Insurance Company Retirement Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Quincy Mutual Fire Insurance Company Retirement Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

INDEPENDENT AUDITORS' REPORT (Continued)

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of assets (held at end of year) and reportable transactions are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with generally accepted auditing standards.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Notes to Financial Statements

A. Description of Plan:

The following description of the Quincy Mutual Fire Insurance Company Retirement Plan (the "Plan") provides only general information. Participants should refer to the Summary Plan Description for a more complete description of the Plan's provisions.

1. General

The Plan is a defined benefit plan covering substantially all employees of the Quincy Mutual Group, Inc. ("the Company") and certain vested employees of its affiliate Adams Insurance Agencies, LLC.

New employees of the Company who meet the requirements of one year of service and a minimum age of 21 are eligible to participate in the Plan. Entry dates into the Plan are January 1 and July 1 of each plan year. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). The Company pays all of the expenses of administering the Plan with the exception of expenses relating to the Plan's investment in a limited partnership. These expenses reduce the investment value.

Effective March 30, 2024, the Plan was restated with the following significant changes: (1) benefits accrue at 2% of average compensation multiplied by years of service up to a maximum of 25 years, and (2) vested lump sum distributions are available for termination before normal retirement age. Effective January 1, 2025, Patron Oxford Insurance Company adopted the plan as a participating employer with service performed prior to admission not credited for benefit accrual purposes.

2. Pension Benefits

Employees with five or more years of service are entitled to annual pension benefits beginning at normal retirement age (65). The benefits are based on years of service and the employee's compensation during the five consecutive years that produce the highest average out of the most recent 10 plan years. The Plan permits early retirement at age 55 after completion of 5 years of service. If employees terminate before completing 5 years of service, they forfeit the right to receive their accumulated plan benefits. Employees may elect to receive the value of their accumulated plan benefits as a life annuity, a ten-year certain annuity, a joint and survivor annuity, or a single lump sum distribution. The Plan's custodian distributes payments, payable monthly.

For terminated employees with accrued benefits up to \$7,000, the Plan may roll the amount into an individual retirement account for the participant. Amounts below \$1,000 can be distributed directly to the participant.

3. Death Benefits

A death benefit is payable monthly or in a lump sum to the participant's beneficiary under the Plan, equal to the actuarial present value of the accrued plan benefit.

4. Vesting

The vesting percentage for the accrued retirement benefit of the Plan is 0% for less than 5 years of service and 100% after 5 years of service.

B. Summary of Accounting Policies:

1. Basis of Presentation

The accompanying financial statements are prepared on an accrual basis in conformity with accounting principles generally accepted in the United States of America ("GAAP").

2. Investment Transactions and Income Recognition

Purchases and sales of securities are recorded based on the security value on the trade date of the transaction. Interest income is recognized when earned and dividends are accrued based on the dividend rate per share declared on the ex-dividend date.

The Plan holds investments in cash, equities, mutual funds, fixed income securities and funds, preferred stock, and limited partnerships. Investment securities are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in risks in the near term would materially affect asset values and the amounts reported in the Statements of Net Assets Available for Benefits and the Statement of Changes in Net Assets Available for Benefits.

The Plan presents, in the Statement of Changes in Net Assets Available for Benefits, the net appreciation (depreciation) in fair value of investments, which consists of realized gains or losses and the unrealized appreciation (depreciation) on those investments.

See Note H for a discussion regarding fair value measurements. The Plan's management determines the Plan's valuation policies and procedures utilizing information provided by investment advisors, managers, or partners.

3. Management Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements and additions and deductions during the reporting period. Actual results could differ from those estimates.

4. Payment of Benefits

Benefit payments to participants are recorded upon distribution.

C. Actuarial Present Value of Accumulated Plan Benefits:

Accumulated plan benefits are those future periodic payments, including lump sum payments that are attributable under the Plan's provisions for the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees and (c) present employees or their beneficiaries. Benefits under the plan are based on the average of the five highest consecutive years of base salary. Benefits payable under all circumstances - retirement, death, and termination of employment are

Quincy Mutual Fire Insurance Company Retirement Plan

Notes to Financial Statements

included to the extent they are deemed attributable to employee service rendered to the valuation date of January 1, 2025.

The actuarial present value of accumulated plan benefits is determined by independent actuaries and represents the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Plan contributions and the actuarial present value of accumulated plan benefits are prepared based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Assumptions are as follows:

Life expectancy	PRI-2012 White Collar Mortality Tables for Males and Females With Scale MP-2021
Discount rate	7.00%
Salary scale	4.50%
Turnover	Select an ultimate table tied to years of services and age; reducing to zero percent by age 55.
Retirement age	Age 65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors may be applicable in determining the actuarial present value of accumulated plan benefits.

D. Funding Policy:

The Trustees of the Plan, in consultation with management of the Company, review the funding status of the Plan at least annually and recommend funding for the calendar year. The target funding goal is for the Plan's assets to be maintained at a level between 100% and 120% of the Plan's liabilities as measured by the projected benefit obligation ("PBO") developed by the consulting actuary appointed by the Trustees. The annual contribution should not exceed the maximum amount deductible under current IRS regulations. The Company has met the minimum funding requirements of ERISA for the year ended December 31, 2024. Board approved Company contributions are recorded in the financial statements in the year the contribution is allocated. There was no contribution made for the 2024 plan year.

E. Plan Termination:

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue additional benefit accruals at any time or to terminate the Plan subject to the provisions of ERISA. In the event the Plan terminates, the net assets of the Plan will be allocated as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Benefits attributable to employee contributions, taking into account those paid out before termination.

Quincy Mutual Fire Insurance Company Retirement Plan

Notes to Financial Statements

- b. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
- c. Other vested benefits insured by the Pension Benefit Guaranty Corporation (“PBGC”), a U.S. government agency, up to the applicable limitations.
- d. All other vested benefits (that is, vested benefits not insured by the PBGC).
- e. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC. Generally, the PBGC guarantees most vested normal retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan’s net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan’s sponsor and the level of benefits guaranteed by the PBGC.

F. Related Party and Party-In-Interest Transactions:

The Plan’s investments under the management of Middleton & Company include holdings in State Street Global Advisors (“SSgA”) money market fund. FNZ Trust Company, a venture with State Street Bank, is the custodian of plan assets and administers monthly benefit payments, and therefore, these transactions qualify as party-in-interest transactions.

G. Tax Status:

The Internal Revenue Service informed the Company by letter dated October 25, 2012 that the Plan continues to be a qualified plan in accordance with the applicable sections of the Internal Revenue Code (“IRC”) and the regulations issued, thereunder. Although the Plan has been amended since receiving the determination letter, the Plan Administrator and the Plan’s tax counsel believe that the Plan is designed and continues to operate in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

H. Investments and Fair Value Measurements:

Accounting principles generally accepted in the United States of America establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted

Quincy Mutual Fire Insurance Company Retirement Plan

Notes to Financial Statements

quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy are described below:

Level 1

Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2

Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3

Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. Assets valued using the net asset value practical expedient are not required to be reported within the hierarchy.

The following is a description of the valuation methodologies used for assets measured at fair value:

Common stocks, money market funds and mutual funds: Valued at the closing price reported in the active market in which the individual security is traded.

Preferred stock: The preferred stock is valued using net asset value (NAV) as determined by the investment manager of the fund. This NAV is based on the fair value of the underlying assets and liabilities of the related fund at the measurement date.

U.S. Government securities and fixed income funds: The U.S. Government securities are valued by a third-party pricing source that incorporates market observable data such as reported sales of similar securities, broker quotes and reference data. The Vanguard fixed income funds are valued at the closing price reported in the active market in which the individual security is traded. The Eaton Vance fixed income fund's investment objective is to realize long-term growth, current income and the preservation of capital through investing in portfolios of high yield bank loans and convertible securities and is valued at the net asset value per share of the Fund at year end as set by the Fund's investment manager based on the underlying investments of the Fund.

**Quincy Mutual Fire Insurance Company
Retirement Plan**

Notes to Financial Statements

Investment in limited liability partnerships (LLPs): The partnerships invest primarily in expansion stage technology, consumer, environmental, and medical companies which are subject to certain restrictions with respect to their sale or transfer. The values estimated for investments in nonpublic companies represent fair values as determined by the general partner in accordance with the limited partnership agreement based on available information. Factors considered by the general partner in determining fair value include, cost, the type of investment, subsequent purchases of the same or similar investments by the partnership, the current financial position and operating results of the company invested in, and such other factors as may be deemed relevant. Factors considered when determining fair value for privately held companies that have not been involved in a qualifying external event include, but are not limited to, industry valuation methods such as price to enterprise value or price to equity ratios, valuation comparisons to comparable public companies or other industry benchmarks in its evaluation of fair value.

There were no changes in the methodologies used at December 31, 2024.

The preceding methods described may produce a fair value calculation that is not indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2024 and 2023:

SECTION XII ACTUARIAL COST METHODS

Traditional Unit Credit (TUC)

The actuarial cost method used in the development of the minimum contribution was the unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. For active participants whose credited service equals or exceeds the plan maximum, if any, and for non-active participants, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit (PUC)

The actuarial cost method used in the development of the maximum contribution was the projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

SECTION XIII
ACTUARIAL METHODS AND ASSUMPTIONS

A summary of the actuarial assumptions used in the valuation is presented below:

Valuation Assets

Average of fair market value of plan assets as of the current valuation date and as of the valuation date for each of the prior two plan years adjusted for contributions and distributions from the prior period to the current valuation date. The resulting amount is restricted to fall within 90% to 110% of the fair market value of assets. [IRC Sec. 430(g)(3)(B)]. This method is restricted in that the expected earnings are limited by Internal Revenue Code Regulations. Therefore, the resulting asset value may tend to be less than the fair market value of assets over a long period of time. The Assumed Earnings Rate for the Plan Year Ending in 2023 was 5.74%. The Assumed Earnings Rate for the Plan Year Ending in 2024 is 5.59%.

ACTUARIAL METHODS AND ASSUMPTIONS (cont'd)

Administrative Expenses None Assumed

Percent Married 100% of males and 100% of females are assumed to be married.

Age of Spouse Spouses of Males are assumed to be 3 years younger than the participant.
 Spouses of Females are assumed to be 3 years older than the participant.

SELECTION OF ACTUARIAL ASSUMPTIONS

Assumption		Entity Who Selects Assumption	Basis for Assumption Selection	Change in Assumption
Segment Interest Rates for Minimum Contribution	Segment 1: 4.75% Segment 2: 4.96% Segment 3: 5.59%	Prescribed by Internal Revenue Service (IRC Sec. 430(h)(2)(C))	The Funding Target Liability for Minimum Contribution is determined using three 24-month average interest rates ("segment rates"), each of which applies to cash flows during specified periods. The Plan Sponsor has elected a 0 month look back for determining these rates each Plan Year. These segment rates are adjusted by the applicable percentage of the 25-year average segment rates, subject to a 5% floor per the American Rescue Plan Act ("ARPA") and then further adjusted via a corridor.	The segment 1, segment 2 and segment 3 interest rates changed from 4.75%, 5.00%, and 5.74%, respectively as of the prior measurement date, January 1, 2023, to reflect the current prescribed rates. This change increased the Funding Target Liability for Minimum Contribution as of the current measurement date, January 1, 2024, by 0.89%.
Segment Interest Rates for Maximum Contribution	Segment 1: 4.37% Segment 2: 4.96% Segment 3: 4.95%	Prescribed by Internal Revenue Service (IRC Sec. 404(o)(6))	The Funding Target Liability for Maximum Contribution is determined using three 24-month average interest rates ("segment rates"), each of which applies to cash flows during specified periods. The Plan Sponsor has elected a 0 month look back for determining these rates each Plan Year.	The segment 1, segment 2 and segment 3 interest rates changed from 2.13%, 3.62%, and 3.93%, respectively as of the prior measurement date, January 1, 2023, to reflect the current prescribed rates. This change decreased the Funding Target Liability for Maximum Contribution as of the current measurement date, January 1, 2024, by 14.01%.
ASC 960 Interest Rate	7.00%	Quincy Mutual Fire Insurance Company	The ASC 960 interest rate is developed based on the allocation of the Plan's assets by investment class and the capital market outlook for each investment class. This information is provided by the Plan's investment advisor.	None
Salary Scale	4.50%	The Angell Pension Group, Inc.	This assumption was set based on a review of expected salary increases of current employees covered by the Plan. This assumption will be monitored based on future Plan experience.	None
IRC 415 and 401(a)(17) Limit Projection	N/A	N/A	Projected increases to benefit and pay limits are not applicable under the Actuarial Funding Method used for the Funding Target Liability and the ASC 960 Actuarial Present Value of Accrued Benefits.	None
Pre-Retirement Mortality	Pri-2012 Employee (M/F) Projected generationally via an adjusted Projection Scale MP-2021	Prescribed by Internal Revenue Service (IRC Sec. 430(h)(3) for Minimum and IRC Sec. 404(o)(6) for Maximum)	The IRS prescribes by regulation mortality tables to be used in determining minimum and maximum contributions. Those tables are based on the actual experience of pension plans and projected trends in that experience. Current prescribed tables are based on the Pri-2012 Mortality Tables Report, with mortality improvement via an adjusted Projection Scale MP-2021.	The mortality tables changed from the 2023 IRS Non-Annuitant (M/F) tables as of the prior measurement date, January 1, 2023, to reflect the current prescribed tables. This change, together with the change in post-retirement mortality, decreased the Funding Target Liability for Minimum Contribution and Maximum Contribution as of the current measurement date, January 1, 2024, by 1.12% and 1.00%, respectively.

SELECTION OF ACTUARIAL ASSUMPTIONS

Assumption		Entity Who Selects Assumption	Basis for Assumption Selection	Change in Assumption															
Post-Retirement Mortality	Pri-2012 Non-Disabled Annuitant (M/F) Projected generationally via an adjusted Projection Scale MP-2021	Prescribed by Internal Revenue Service (IRC Sec. 430(h)(3) for Minimum and IRC Sec. 404(o)(6) for Maximum)	The IRS prescribes by regulation mortality tables to be used in determining minimum and maximum contributions. Those tables are based on the actual experience of pension plans and projected trends in that experience. Current prescribed tables are based on the Pri-2012 Mortality Tables Report, with mortality improvement via an adjusted Projection Scale MP-2021.	The mortality tables changed from the 2023 IRS Annuitant (M/F) tables as of the prior measurement date, January 1, 2023, to reflect the current prescribed tables. This change, together with the change in pre-retirement mortality, decreased the Funding Target Liability for Minimum Contribution and Maximum Contribution as of the current measurement date, January 1, 2024, by 1.12% and 1.00%, respectively.															
Pre-Retirement Mortality for ASC 960	Pri-2012 White Collar Employee (M/F) tables projected generationally via Scale MP-2021	Quincy Mutual Fire Insurance Company	The Society of Actuaries published a study of retirement experience in October, 2019. The Pri-2012 tables presented in the study represent the most current and complete benchmarks of U.S. private pension plan mortality experience. These tables include projections of mortality improvement via Scale MP-2021.	The mortality tables changed from the Pri-2012 Total Dataset Employee (M/F) tables projected generationally via Scale MP-2021 tables as of the prior measurement date, January 1, 2023, to reflect the current prescribed tables. This change, together with the change in post-retirement mortality, increased the Actuarial Present Value of Accrued Benefits as of the current measurement date, January 1, 2024, by 2.49%															
Post-Retirement Mortality for ASC 960	Pri-2012 White Collar Healthy Retiree and Contingent Survivor (M/F) tables projected generationally via Scale MP-2021	Quincy Mutual Fire Insurance Company	The Society of Actuaries published a study of retirement experience in October, 2019. The Pri-2012 tables presented in the study represent the most current and complete benchmarks of U.S. private pension plan mortality experience. These tables include projections of mortality improvement via Scale MP-2021.	The mortality tables changed from the Pri-2012 Total Dataset Retiree and Contingent Survivor (M/F) tables projected generationally via Scale MP-2021 tables as of the prior measurement date, January 1, 2023, to reflect the current prescribed tables. This change, together with the change in pre-retirement mortality, increased the Actuarial Present Value of Accrued Benefits as of the current measurement date, January 1, 2024, by 2.49%

APPENDIX A SUMMARY OF PLAN PROVISIONS

A summary of the major plan provisions used in the valuation is presented below:

<i>Plan effective date:</i>	August 27, 1954.
<i>Latest plan amendment:</i>	The plan was last amended effective March 30, 2024. Provisions effective March 30, 2024 and following are not valued in the development of plan liabilities as of January 1, 2024.
<i>Eligibility requirements:</i>	Eligible Employees enter on the January 1 or July 1 coincident or next following attainment of age 21 and 1 year of service.
<i>Average compensation:</i>	Effective March 30, 2024, the highest 5 full consecutive years of compensation out of the most recent 10 years of employment. If an Employee has fewer than 5 full years of Compensation, the average of all Compensation is to be used. In no event shall compensation exceed the limitation specified in Section 401(a)(17) of the Internal Revenue Code.
<i>Benefit Service:</i>	A Year of Service is credited for 1,000 hours worked during a Plan Year.
<i>Normal retirement eligibility:</i>	Upon the attainment of age 65 and completion of 5 years of participation.
<i>Normal retirement benefit:</i>	Unreduced accrued benefit payable immediately.
<i>Normal retirement date:</i>	The first of the month coincident with or next following the Member's Normal Retirement Age.
<i>Normal form of benefit:</i>	5-year Certain and Life Annuity. However, members are required by law to receive a reduced 50% qualified joint and survivor benefit unless formally elected otherwise.
<i>Early retirement eligibility:</i>	Upon the attainment of age 55 and completion of 5 years of service.
<i>Early retirement benefit:</i>	The Actuarial Equivalent of the Member's Normal Retirement benefit.
<i>Vesting eligibility:</i>	Accrued benefit is 100% vested upon completion of 5 years of service.
<i>Death benefit eligibility:</i>	Upon death after completion of vesting eligibility criteria.
<i>Death benefit:</i>	A benefit payable to the Member's designated beneficiary that is actuarially equivalent to the Member's accrued benefit. The benefit payable to a designated spouse beneficiary will not be less than the amount determined as if the Member had terminated employment and elected a 50% joint and survivor annuity on the day immediately preceding death.
<i>Accrued benefit:</i>	The accrued benefit is determined as follows: <i>After March 30, 2024:</i> 2% of the Member's average compensation, multiplied by years of service, not to exceed 25. <i>Prior to March 30, 2024:</i> 50% of the Member's average compensation, reduced by 1/25 th for each year of service projected to Normal Retirement Date less than 25. The accrued benefit is multiplied by a fraction, not to exceed 1, the numerator which is years of service, and the denominator is the years of service projected to Normal Retirement. If a participant is projected to complete more than 25 years of service at Normal Retirement, the denominator is equal to the number of years of service projected to age 60.
