Inflation	<p>2.40% increase per year.</p> <p>Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.</p>										
Asset return	<p>6.25% for the current plan year.</p> <p>The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.</p>										
Expected expense	<p>The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.</p>										
Retirement	<p>All active and inactive participants are assumed to retire at the following rates:</p> <table border="1" data-bbox="597 1171 889 1430"> <thead> <tr> <th>Age</th> <th>Probability of retirement</th> </tr> </thead> <tbody> <tr> <td>55-61</td> <td>3%</td> </tr> <tr> <td>62-63</td> <td>20%</td> </tr> <tr> <td>64</td> <td>30%</td> </tr> <tr> <td>65</td> <td>100%</td> </tr> </tbody> </table> <p>Due to our short tenure as actuarial provider for this plan, we do not have the plan experience necessary to set this assumption, and we are relying on the assumption set by the prior actuary. Disability

None.

Due to our short tenure as actuarial provider for this plan, we do not have the plan experience necessary to set this assumption, and we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design.

Marriage

75% married; husbands are 3 years older than wives.

Due to our short tenure as actuarial provider for this plan, we do not have the plan experience necessary to set this assumption, and we are relying on the assumption set by the prior actuary. This assumption does not have material impact on the results of this report.

Withdrawal

Table T-7 from the Actuary's Pension Handbook. Selected rates of withdrawal are shown below:

Age	Rate of withdrawal
20	10.00%
25	9.75%
30	9.40%
35	8.84%
40	7.95%
45	6.71%
50	4.87%
55	2.59%

Due to our short tenure as actuarial provider for this plan, we do not have the plan experience necessary to set this assumption, and we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design.

Wage base increase

3.50% per year.

Our Wage Base increase assumption are based on inflation and the real wage differential forecast from Social Security Trustee Report. Based on average annual real wage growth forecast from the Social Security Trustee report and historical averages, our best estimate places this assumption at 3.50%.

Compensation limit increase

2.40% increase per year used in the calculation of the IRC 404 maximum deduction cushion. See [Calculated deduction](#) in Rules and regulations.

Compensation limit increase is consistent with the inflation assumption.

Form of benefit and basis 95% of active participants are assumed to receive their accrued benefit as of 01/01/2015 as a single lump sum payable immediately for retirement benefits and as a single lump sum payable at retirement for death and withdrawal benefits. The remaining portion of each active participant's accrued benefit is assumed to be received as a stream of payments.

The remaining active participants and all participants who are already terminated on the valuation date are assumed to receive their benefit as a stream of payments at retirement on the plan's normal form.

Due to our short tenure as actuarial provider for this plan, we do not have the plan experience necessary to set this assumption, and we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design.

The single sum benefit is based on the Applicable Mortality and the plan's funding target interest rates, as prescribed.

Methods prescribed by law

Liability measure Funding target is the present value of the benefits accrued on the valuation date.

Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Lump sum payments Lump sum payments are valued using the plan's funding target interest rates as required, per IRS guidance. These rates are currently higher than the actual rates used to determine lump sum distributions. Therefore, plan liabilities do not currently recognize this additional cost and this may result in the plan not accumulating adequate assets. You may wish to consider additional contributions.

Methods selected by plan sponsor

Asset method Market value

Segment rates 24-month average with no weighting to prior law basis. Use rates where December is the last month included in the average.

PBGC premium basis Your plan is a small plan as defined by PBGC. Variable rate premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2013 plan year and this method must be used for five years before a change can be made.

Methods elected by actuary

Retirees	Assets and liabilities for current and future retirees are included.
Vested benefits	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant’s vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p>

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan’s regular funding target and target normal cost.

Mortality	Based on Pri-2012 Total dataset base rate mortality table projected generationally using MP-2021.
Mortality base rates	<p>Before benefit payment period Employee amount-weighted, male and female</p> <p>During benefit payment period Retiree amount-weighted, male and female</p>

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe “Approach 1” is reasonable for this plan.

Mortality improvement	<p>MP-2021 is the most recent improvement scale published by the SOA in October 2021.</p> <p>In selecting this assumption, we considered the other parameters available in the MIM-2021-v4 application tool issued by the SOA in October 2023 and consider the selections in MP-2021 reasonable. Based on the sponsor’s input, plan experience does not show a need for long-term excess death or Covid death load adjustments.</p>
-----------------------	---

Interest rate used to value liabilities

6.00%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Basis for lump sums

Interest rate

Based on the three segment yield curve: 3.55%/3.95%/4.95%

The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high quality corporate bond yields. According to our most recent study, the long-term expected yields for short/intermediate/long corporate bonds are 3.55%/3.95%/4.95%. For details, see Corporate AA yield in Table 3 of Long-Term Capital Market Assumptions link.

Mortality

IRS Prescribed lump sum mortality for 2024. Future years are projected to decrement date with SOA mortality improvement scale MP-2021 as adjusted by the IRS Document Number 2023-23267.

This assumption reflects current law as provided by the IRS.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 2a - Explanation of Assets
Madison County Federal Credit Union Defined Benefit Plan And Trust
EIN 35-0868126 Plan No. 001

The market value of assets on line 2a does not equal assets shown on Schedule H, Schedule I or Form 5500-SF. Schedule H, Schedule I and Form 5500-SF use the full value of contributions received after plan year end. Line 2a includes the value of \$74,139 contributions received after the plan year end with a discounted value of \$71,837.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age
 Madison County Federal Credit Union Defined Benefit Plan And Trust
 EIN 35-0868126 Plan No. 001

The weighted average retirement age is weighted by the expected percentage of active participants retiring at each age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

(1) Age	(2) Expected Active Headcount	(3) Retirement Rate	(4) Expected Retirements (2)*(3)	(5) Weighted Age (1)*(4)

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. This report reflects the provisions of the plan adoption agreement signed 12/18/2018, including the amendment signed 07/22/2024.

Plan eligibility

Age	Attained age 20.
Service	Six months of service.
Class	Employees not covered by a collective bargaining agreement are ineligible to enter the plan. No employee shall become a participant after October 1, 2006.

Normal retirement benefit

Age	Attained age 65.
Form	Monthly annuity payable for life with 10 years certain (optional forms may be elected in advance of retirement).
Amount (accrued benefit)	40% of Average Annual Compensation reduced by 1/15th for each year of service less than 15 years projected at normal retirement.

Early retirement benefit

Age and service	Later of attainment of age 50 or five years of vesting service.
Form	Same as normal retirement benefit.
Amount	Accrued benefit on early retirement date reduced by 5/9 of 1% for each of the first 60 months and 5/18 of 1% for each additional month the early retirement date precedes normal retirement date.

Late retirement benefit

Age	No maximum age.
Form	Same as normal retirement benefit.
Amount	Greater of accrued benefit on late retirement date or accrued benefit on normal retirement date actuarially increased to late retirement date.

Termination benefit

Vesting percentage	100% after five years of vesting service.
Form	Same as normal retirement benefit with income deferred until normal retirement date.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage.

Survivor annuity death benefit (a vested benefit)

Eligibility	Qualified married participant fully or partially vested in an accrued benefit.
Form	Monthly annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death.
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.

Definitions

Average annual compensation	The average of a participant's annual IRC Section 415 Safe Harbor Compensation over the consecutive five compensation years prior to normal retirement date which results in the highest average.
Compensation	Total wages as reported on Form W-2 during a calendar year.
Vesting service	A year of vesting service is credited for each year during which 1,000 hours is worked.
Optional forms of benefit payments	<p>The optional forms of benefit payments are:</p> <ul style="list-style-type: none"> • Monthly annuity payable for life, or 5, 10, 15, or 20 years certain and life. • Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75, or 100. • Single sum payment equal to the present value of retirement benefits accrued prior to January 1, 2015. A participant may choose a partial lump sum in addition to an annuity provided the minimum partial lump sum amount is \$1,000. <p>The optional form conversion basis is 7.5% interest and the UP-1984 Mortality table set forward one year for participants and beneficiaries.</p> <p>Lump sum provisions</p> <p>Small amount force out (SAFO) – allowed up to \$7,000.</p> <p>Lump sums in excess of SAFO - aren't allowed, except as noted above.</p> <p>Conversion – greater of the deferred or immediate rate with early retirement factor based on the applicable interest rate and applicable mortality table as set forth in Code Section 417. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is the plan year.</p>

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.

Schedule SB, Line 24 – Change in Actuarial Assumptions
Madison County Federal Credit Union Defined Benefit Plan And Trust
EIN 35-0868126 Plan No. 001

Certain non-prescribed assumptions have been changed since last year. These assumptions were changed to better reflect the anticipated experience of your plan. See the attachment, Part V – Statement of Actuarial Assumptions/Methods, for the rationale for each assumption.

The assumed asset return for the current year has increased from 6.00% to 6.25%.
