Asset return	<p>5.00% for the current plan year.</p> <p>The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.</p>
sExpected expense	<p>The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.</p>
Retirement	<p>Active and inactive participants are assumed to retire at normal retirement age as defined in Plan provisions.</p> <p>This assumption is based on the results of recent experience analysis and anticipated future experience.</p>
Upcoming year salary increase	<p>The preceding year's salary is increased by 3.50% at each age. Note: not used for Plan accounting calculations.</p> <p>Expected salary increase is composed of salary inflation, a real wage growth and a merit increase. This reflects company salary increase philosophies along with more recent experience of the plan participants.</p>
Disability	<p>None. This plan does not offer a subsidized disability benefit therefore the disability assumption is built into the withdrawal assumption.</p>
Marriage	<p>100% married; husbands are 3 years older than wives.</p> <p>This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.</p>
Withdrawal	<p>None. Due to the size of the plan and limited experience, we're not recognizing a withdrawal assumption prior to retirement.</p>

Wage base increase	3.50% per year. Our Wage Base increase assumption are based on inflation and the real wage differential forecast from Social Security Trustee Report. Based on average annual real wage growth forecast from the Social Security Trustee report and historical averages, our best estimate places this assumption at 3.50%.
Compensation limit increase	2.40% increase per year used in the calculation of the IRC 404 maximum deduction cushion. See Calculated deduction in Rules and regulations. Compensation limit increase is consistent with the inflation assumption.
Form of benefit and basis	100% of active participants will elect a benefit paid in a lump sum at the assumed retirement ages. This assumption is based on the results of recent experience analysis and anticipated future experience. The lump sum benefit is based on the Applicable Mortality projected to decrement and the plan's funding target interest rates, as prescribed.

Methods prescribed by law

Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
Lump sum payments	Lump sum payments are valued using the plan's funding target interest rates as required, per IRS guidance. These rates are currently higher than the actual rates used to determine lump sum distributions. Therefore, plan liabilities do not currently recognize this additional cost and this may result in the plan not accumulating adequate assets. You may wish to consider additional contributions.

Methods selected by plan sponsor

Asset method	The asset valuation method is prescribed by law for plans that elect to use a value other than market value. For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years. The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value. When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.
--------------	--

Segment rates	24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.
PBGC premium basis	Your plan is a small plan as defined by PBGC. Variable rate premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2009 plan year and this method must be used for five years before a change can be made.

Methods elected by actuary

Retirees	Assets and liabilities for current and future retirees are included.
Vested benefits	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p>

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality	Based on Pri-2012 Total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2023).
Mortality base rates	<p>Before benefit payment period Employee amount-weighted, male and female</p> <p>During benefit payment period Retiree amount-weighted, male and female</p>

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Mortality improvement

Principal 2023 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

Parameter	Principal 2023
Historical dataset	SSA
Whittaker-Henderson Graduation	Order 3
Interpolation Structure	Basic
Graduated MI data last year ("jumping off" point)	2017
H/D transition ultimate year by age/cohort	2029/2029
Weight placed on interpolation by cohort	50%
Initial Slope periods (constraint)	2016-2017 (0.000)
LTR	SSA LTR 2023
COVID-19 or Excess load	None ¹

¹Based on the sponsor's input, plan experience does not show a need for long-term excess death or Covid death load adjustments.

See [Mortality documentation](#) for rationale and additional information.

Interest rate used to value liabilities

5.00%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

[Basis for lump sums](#)

[Interest rate](#)

Based on the three segment yield curve: 3.55%/3.95%/4.95%

The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high quality corporate bond yields. According to our most recent study, the long-term expected yields for short/intermediate/long corporate bonds are 3.55%/3.95%/4.95%. For details, see Corporate AA yield in Table 3 of Long-Term Capital Market Assumptions link.

[Mortality](#)

We have selected the same [mortality](#) assumption for lump sum payments, but with a 50/50 blend of male and female total dataset base rates and mortality improvement scales. This reflects the IRS practice of defining lump sum mortality on a unisex basis.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age
 Cunningham Wholesale Company, Inc. Employees' Pension Plan
 EIN 56-0194146 Plan No. 001

Active participants are expected to retire at the plan's assumed retirement age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. This report reflects the provisions of the plan signed 05/29/2019 including amendments signed through 07/29/2024.

Plan eligibility

Age	Attained age 20-1/2.
Service	Completed 6 months of employment. No new participants will enter the plan after 12/31/2007.

Normal retirement benefit

Age	Later of age 65 or 5 years after plan entry.
Form	Monthly annuity payable for 10 years certain and life.
Amount (accrued benefit)	The sum of (a) and (b) multiplied by (c), multiplied by (d): (a) 0.5% average compensation less than integration level (b) 1.0% average compensation greater than integration level (c) Expected accrual service, maximum 35 years. (d) Accrued Benefit Adjustment
Amount (TEFRA minimum benefit – straight life benefit)	2.0% of the average of the highest consecutive five compensations for each top-heavy year of service, with a maximum of ten years. This benefit applies to non-key employees.

Early retirement benefit

Age	Attained age 55.
Service	Ten years of vesting service.
Form	Same as normal retirement benefit.
Amount	Actuarial equivalent of accrued benefit, with maximum benefit of accrued benefit multiplied by early retirement age factor below divided by normal retirement age factor.

Age	Factor
70	.954
69	.856
68	.785
67	.713
66	.650
65	.592
64	.552
63	.512
62	.473
61	.434
60	.394
59	.375
58	.355
57	.335
56	.316
55	.296

Late retirement benefit

Age	No maximum age.
Form	Same as normal retirement benefit.
Amount	Greater of accrued benefit on late retirement date or accrued benefit on normal retirement date actuarially increased to late retirement date.

Termination benefit

Vesting percentage	100% after three years of vesting service.
Form	Same as normal retirement benefit with income deferred until early retirement date, if eligible), or normal retirement date.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage.

Disability benefit (a non-vested benefit)

Eligibility	Totally and permanently disabled, as defined under the Social Security Act.
Service	10 years of vesting service.
Form	Monthly income payable until normal retirement, death or recovery and a deferred annuity payable at normal retirement date.
Amount	Accrued benefit on date of disability reduced for early retirement. If disability continues through normal retirement age, the retirement benefit will be the accrued benefit as of the date of disability.

Survivor annuity death benefit (a vested benefit)

Eligibility	Qualified married participant fully or partially vested in an accrued benefit.
Form	Monthly life annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death.
Amount	<p>If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.</p> <p>If eligible for pre-retirement death benefit, the life annuity benefit cannot be less than that provided by the actuarial equivalent of the pre-retirement death benefit.</p>

Pre-retirement death benefit (a non-vested benefit)

Eligibility	Active participant on the date of death
Age	Attained age plus accrual service equals at least 65.
Form	Monthly annuity payable to spouse or beneficiary for 10 years certain.
Amount	Benefit the participant would have received had he retired on the day before his death and elected normal form.

Definitions

Accrual service	An employee is credited with a year of service if they complete at least 1,000 hours of service. An employee who completes less than 1,000 hours of service in the year of severance or employment shall receive a partial year of service equal to the number of hours of service divided by 1,000.
Vesting service	One year of vesting service is credited for each plan year in which the employee completes 1,000 or more hours of service.
Accrued benefit adjustment	The quotient of (a) participant's accrual service on give date divided by (b) participant's potential accrual service as of normal retirement age, not to exceed 1.00.

**Average
compensation**

The monthly average of total pay received for the five consecutive compensation years out of all years prior to any given date which gives the highest average.

**Covered
compensation**

The monthly average of the Social Security Taxable Wage Bases (in effect under Section 230 of the Social Security Act) for each year in the 35-year period ending with the year the employee attains Social Security Retirement Age.

**Optional forms of
benefit payments**

The optional forms of benefit payments are:

- Monthly annuity payable for life, 10, or 15 years certain and life
- Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75, or 100.
- Social Security Level Income Option
- Single sum payment equal to the present value of the retirement benefit.

Lump sum provisions

Small amount force out (SAFO) – allowed up to \$7,000.

The optional form conversion basis is 5.0% interest and the 1983 GAM for males, set back one year for payments other than lump sums. The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is the plan year.

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.
