Assumptions prescribed by law

Mortality

Before benefit payment period
 IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.

During benefit payment period
 IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.

Assumptions selected by actuary

Inflation 2.40% increase per year.
 Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.

Asset return 6.25% for the current plan year.
 The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.

Expected expense The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.

Retirement Active participants

Age	Probability of retirement
65	50%
66	0%
67	0%
68	0%
69	0%
70	100%

Inactive participants are assumed to retire at age 65.

This assumption is based on the results of recent experience analysis and anticipated future experience.

Upcoming year salary increase The preceding year's salary is increased by 3.50% at each age. Note: not used for Plan accounting calculations.
 This reflects company salary increase philosophies along with more recent experience of the plan participants.

Disability	None. Due to the size of the plan and limited experience, we are not recognizing a disability assumption prior to retirement. This plan does not offer a subsidized disability benefit.
Marriage	75% married; husbands are 3 years older than wives. This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.
Withdrawal	None. Due to the size of the plan and limited experience, we're not recognizing a withdrawal assumption prior to retirement.
Wage base increase	3.50% per year. Our Wage Base increase assumption are based on inflation and the real wage differential forecast from Social Security Trustee Report. Based on average annual real wage growth forecast from the Social Security Trustee report and historical averages, our best estimate places this assumption at 3.50%.
Form of benefit	Participants are assumed to receive their benefits on the normal form at the assumed retirement age. This assumption is based on the results of recent experience analysis and anticipated future experience.

Methods prescribed by law

Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Included in Funding Target is the value of any missed required minimum distributions (defined in IRC §401(a)(9) and Treasury Regulation §1.401(a)(9)), equal to back payments. Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
-------------------	--

Methods selected by plan sponsor

Asset method	Market value
Segment rates	24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.
PBGC premium basis	Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2010 plan year and this method must be used for five years before a change can be made.

Methods elected by actuary

Retirees	Assets and liabilities for current and future retirees are included.
Vested benefits	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p>

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality	Based on Pri-2012 Total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2023).
Mortality base rates	<p>Before benefit payment period Employee amount-weighted, male and female</p> <p>During benefit payment period Retiree amount-weighted, male and female</p>

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Mortality improvement

Principal 2023 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

Parameter	Principal 2023
Historical dataset	SSA
Whittaker-Henderson Graduation	Order 3
Interpolation Structure	Basic
Graduated MI data last year ("jumping off" point)	2017
H/D transition ultimate year by age/cohort	2029/2029
Weight placed on interpolation by cohort	50%
Initial Slope periods (constraint)	2016-2017 (0.000)
LTR	SSA LTR 2023
COVID-19 or Excess load	None ¹

¹Based on the sponsor’s input, plan experience does not show a need for long-term excess death or Covid death load adjustments. See [Mortality documentation](#) for rationale and additional information.

Interest rate used to value liabilities

5.75%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes’ arithmetic returns of the plan’s target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 2a - Explanation of Assets
Motor Vehicle Accident Indemnification Corporation Retirement Income Plan
EIN 13-5672354 Plan No. 001

The market value of assets on line 2a does not equal assets shown on Schedule H. Schedule H includes the book value of guaranteed investments held by Prudential. Schedule SB, Line 2a includes the market value resulting in a difference of \$57,061.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age
 Motor Vehicle Accident Indemnification Corporation Retirement Income Plan
 EIN 13-5672354 Plan No. 001

The weighted average retirement age is weighted by the expected percentage of active participants retiring at each age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

(1) Age	(2) Expected Active Headcount	(3) Retirement Rate	(4) Expected Retirements (2)*(3)	(5) Weighted Age (1)*(4)
65	4.9051	0.5000	2.4525	159.4146

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. This report reflects the provisions of the 01/01/2024 plan restatement signed 04/01/2024.

Plan eligibility

Frozen participation Participation in the plan was frozen 03/31/2005. No person who is reemployed after 03/31/2005 shall become or again become an active participant after that date.

Normal retirement benefit

Age Prior to 01/01/1988, age 65. On or after 01/01/1988, the later of age 65 or the 4th anniversary of his participation start date.

Form Monthly annuity payable for life

Amount (accrued benefit) 1.90% of the participant's average compensation multiplied by number of years of credited service, minus 0.65% of the participant's final average compensation up to covered compensation multiplied by number of years of credited service. Credited service is limited to 30 years maximum.
Effective 04/30/2012, all benefit accruals under the plan attributable to Fred Fossett, Frank Marzullo and Jeff Rubinton ceased and no benefit accruals will be credited with respect to compensation or service earned thereafter.

Early retirement benefit

Age and service Attained age 55 and 15 years of service (vesting).

Age only Attained age 60.

Form Same as normal retirement benefit.

Amount Vested accrued benefit on early retirement date reduced by 7.2% for each year up to five plus 3.6% for each year between five and ten that the early retirement date precedes normal retirement date.

Late retirement benefit

Amount The greater of the accrued benefit on the late retirement date or the benefit on the normal retirement benefit with an actuarial increase to benefit commencement.

Termination benefit

Vesting percentage	100% after five years of service (vesting). Also 100% vested if employed on his normal retirement date or the date he reaches age 60.
Form	Same as normal retirement benefit with income deferred until normal retirement date.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage. If the participant is eligible to elect to begin retirement payments prior to his normal retirement date, the benefit will be reduced for early commencement.

Death benefit

Eligibility	Qualified married participant fully or partially vested in an accrued benefit and has not waived the qualified preretirement survivor annuity.
Form	Monthly annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death.
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to the earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.

Definitions

Average compensation	High five consecutive compensation years of last ten compensation years ending before the participant's termination of employment.
Final average compensation	High three consecutive compensation years ending within the plan year that includes the date of determination. Final average compensation is limited to the participant's average compensation.
Credited service	Credited service prior to 01/01/2011 is credited according to plan provisions prior to such date. Credited service on and after 01/01/2011 shall be computed in completed full years and fractions of years with each 30 days equal to 1/12th year of credited service.
Service (vesting)	Service (vesting) is credited one year for working at least 1,000 hours for each service computation period.
Covered compensation	The average, without indexing, of the taxable wage bases under Section 230 of the Social Security Act in effect for each calendar year during the 35-year period ending on the last day of the calendar year in which the employee attains social security retirement age.

Optional forms of benefit payments

The optional forms of benefit payments are:

Monthly annuity payable for life, or 10 years certain and life.

Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75, or 100.

Single sum payment equal to the full present value of his vested accrued benefit determined as of 05/31/1999. The balance of the participant's vested accrued benefit attributable to employment after 05/31/1999 shall be payable to the participant in accordance with the optional form of payment elected by the participant.

The optional form conversion basis is 6.0% interest and the 1971 Group Annuity Mortality Table for male lives with a 4-year setback for participants and a 2-year setback for beneficiaries for payments other than lump sums.

Lump sum provisions

Small amount force out (SAFO) – allowed up to \$7,000.

Lump sums in excess of SAFO - are limited to the full present value of the participant's vested accrued benefit determined as of 05/31/1999. Lump sums are allowed at termination of employment and retirement.

Conversion – greater of the deferred or immediate rate with early retirement factor based on the applicable interest rate and applicable mortality table as set forth in Code Section 417. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is the plan year.

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.
