Report of Independent Auditors

To the Trustee of Emerging Markets Leaders Trust

Opinion

We have audited the financial statements of Emerging Markets Leaders Trust (the “Trust”), which comprise the statement of assets and liabilities, including the portfolio of investments, as of December 31, 2024, and the related statements of operations and changes in net assets and the financial highlights for the year then ended, and the related notes (collectively referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Trust at December 31, 2024, and the results of its operations and changes in its net assets and its financial highlights for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Trust and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Trust’s ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor’s Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

**Shape the future
with confidence**

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Trust's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Emerging Markets Leaders Trust
NOTES TO FINANCIAL STATEMENTS
December 31, 2024

Note 1 – Trust Organization and Investment Objective

Emerging Markets Leaders Trust (the "Trust"), which was formed in the Commonwealth of Massachusetts on February 28, 2017 for the primary purpose of investing in equity securities of issuers in emerging markets for capital appreciation, commenced operations on April 3, 2017. The Trust was established for the benefit of pension, certain profit-sharing and government plans. Morgan Stanley Investment Management Inc., the Trust's sponsor and investment manager (the "Investment Manager"), appointed State Street Bank and Trust Company to serve as Trustee and custodian for the Trust ("Trustee"). The Trust applies investment company accounting and reporting guidance.

Note 2 – Summary of Significant Accounting Policies

The following significant accounting policies are in conformity with U.S. generally accepted accounting principles ("GAAP"). Such policies are consistently followed by the Trust in the preparation of the financial statements. GAAP may require management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results may differ from those estimates.

Cash and Cash Equivalents

Cash, including cash denominated in foreign currencies, represents cash on hand and demand deposits held at financial institutions. Cash equivalents include short-term, highly liquid investments of sufficient credit quality that are readily convertible to known amounts of cash and have original maturities of three months or less. Cash equivalents are carried at cost, plus accrued interest, which approximates fair value. Cash and cash equivalents are held at major financial institutions and are subject to credit risk. In the event of the financial institution's insolvency, recovery of the Fund's cash may be limited to the insurance afforded by Federal Deposit Insurance Corporation (FDIC) or Securities Investor Protection Corporation (SIPC).

Participants' unit value

The value of each participating unit is determined at the end of each business day (the "Valuation Date") and is equal to the aggregate value of Trust assets less liabilities, divided by the number of units outstanding.

Security transactions and income recognition

Security transactions are accounted for on the date the securities are purchased or sold. Realized gains and losses on the sale of investment securities are determined on the specific identified cost basis. Dividend income is recorded on the ex-dividend date (except for certain foreign dividends which may be recorded as soon as the Trust is informed of such dividends) net of applicable withholding taxes. Interest income is recognized on the accrual basis. Discounts and premiums on securities purchased are accreted/amortized according to the effective yield method over their respective lives.

Valuation of investments

Securities listed on a foreign exchange are valued at their closing price, except as noted below. Unlisted securities and listed securities not traded on the Valuation Date for which market quotations are readily available are valued at the mean between the last reported bid and ask prices. Equity securities listed on a U.S. exchange are valued at the latest quoted sales price on the Valuation Date. Equity securities listed or traded on NASDAQ, for which market quotations are available, are valued at the NASDAQ Official Closing Price.

The Trust's Investment Manager has formed a valuation committee (the "Valuation Committee"). The Valuation Committee provides administration and oversight of the Trust's valuation policies and procedures. Among other things, these procedures allow the Trust to utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

The Trust has procedures to determine the fair value of securities and other financial instruments for which market prices are not readily available. Under these procedures, the Valuation Committee convenes on a regular and ad hoc basis to review such securities and considers a number of factors, including valuation methodologies and significant unobservable valuation inputs, when arriving at fair value. The Valuation Committee may employ a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the investment to determine the fair value of the investment. An income-based valuation approach may also be used in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed. The Valuation Committee employs various methods for calibrating these valuation approaches including a regular review of valuation methodologies, key inputs and assumptions, transactional backtesting or disposition analysis, and reviews of any related market activity.

NOTES TO FINANCIAL STATEMENTS (continued)

December 31, 2024

Note 2 – Summary of Significant Accounting Policies (continued)

Valuation of investments (continued)

Most foreign markets close before the New York Stock Exchange (“NYSE”). Each business day, the Trust uses a third-party pricing service approved by the Trustees to assist with the valuation of foreign equity securities. Events occurring after the close of trading on foreign exchanges may result in adjustments to the valuation of foreign securities to reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or other instruments that have a strong correlation to the fair-valued securities to more accurately reflect their fair value as of the close of regular trading on the NYSE.

Fair value measurement

Financial Accounting Standards Board (“FASB”) Accounting Standards Codification™ (“ASC”) 820, “Fair Value Measurement” (“ASC 820”), defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in valuing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs); and (2) inputs that reflect the reporting entity’s own assumptions about the assumptions market participants would use in valuing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Trust’s investments. The inputs are summarized in the three broad levels listed below.

- Level 1 — unadjusted quoted prices in active markets for identical investments
- Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 — significant unobservable inputs including the Trust’s own assumptions in determining the fair value of investments. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer’s financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities and the determination of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to each security.

The following is a summary of the inputs used to value the Trust's investments as of December 31, 2024.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes.

Foreign currency translation and foreign investments

The books and records of the Trust are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars at the mean of the bid and ask prices of such currencies against U.S. dollars last quoted by a major bank as follows:

- investments, other assets and liabilities at the prevailing rate of exchange on the Valuation Date;
- investment transactions and investment income at the prevailing rates of exchange on the dates of such transactions.

Although the net assets of the Trust are presented at the foreign exchange rates and market values at the close of the period, the Trust does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of securities held at period end. Similarly, the Trust does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of securities sold during the period. Accordingly, realized and unrealized foreign currency gains (losses) on investments in securities are included in the reported net realized and unrealized gains (losses) on investment transactions and balances. However, pursuant to U.S. Federal income tax regulations, gains and losses from certain foreign currency transactions and the foreign currency portion of gains and losses realized on sales and maturities of foreign denominated debt securities are treated as ordinary income for U.S. Federal income tax purposes.

Net realized gains (losses) on foreign currency transactions represent net foreign exchange gains (losses) from foreign currency exchange contracts, disposition of foreign currencies, currency gains (losses) realized between the trade and settlement dates on securities transactions, and the difference between the amount of investment income and foreign withholding taxes recorded on the Trust's books and the U.S. dollar equivalent amounts actually received or paid. The change in unrealized currency gains (losses) on foreign currency translations for the period is reflected in the Statement of Operations.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, fluctuations of exchange rates in relation to the U.S. dollar, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

The net assets of the Trust include foreign denominated securities and currency. Changes in currency exchange rates will affect the U.S. dollar value of and investment income from such securities. Further, at times the Trust's investments are concentrated in a limited number of countries and regions. This concentration may further increase the risk of the Trust.

Governmental approval for foreign investments may be required in advance of making an investment under certain circumstances in some countries, and the extent of foreign investments by U.S. companies may be subject to limitation in other countries. Foreign ownership limitations also may be imposed by the charters of individual companies to prevent, among other concerns, violations of foreign investment limitations. As a result, an additional class of shares (identified as "Foreign" in the Portfolio of Investments) may be created and offered for investment. The "local" and "foreign shares" market values may differ. In the absence of trading of the foreign shares in such markets, the Trust values the foreign shares at the closing exchange price of the local shares. Such securities, if any, are identified as fair valued in the Portfolio of Investments.

Fees and expenses

Securities transaction costs, such as brokerage commissions (which are included in the cost of securities) and custodian transaction costs, participant reporting fees, out-of-pocket expenses and professional fees are charged directly to the Trust.

Note 2 – Summary of Significant Accounting Policies (continued)

Fees and expenses (continued)

The Investment Manager charges directly, on a monthly basis to each participant in the Trust, a management fee calculated based on contractual rates applied to the participant's respective aggregate unit value in the Trust for investment management, trustee and custody services.

Income taxes

The Trust is a qualified trust under Section 401(a) of the United States Internal Revenue Code of 1986, as amended (the "Code"), and, as such, no provision for income taxes is required. Participants of the Trust are exempt from income taxes under Section 501(a) of the Code. The Trust is required to operate in conformity with the Code to maintain the tax-exempt status of the Trust. Management believes the Trust is being operated in compliance with the applicable requirements of the Code and therefore, believes the related Trust is tax-exempt.

The Trust may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued based on net investment income, net realized gains and net unrealized appreciation as such income and/or gains are earned or repatriated. Taxes are accrued based on net investment income, net realized gains and net unrealized appreciated as such income and/or gains are earned. Taxes may also be based on transactions in foreign currency and are accrued based on the value of investment denominated in such currency.

FASB ASC 740-10 "Income Taxes – Overall" sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. The Investment Manager has analyzed and concluded as of December 31, 2024 that there are no significant uncertain tax positions currently taken or expected to be taken that would require recognition in the financial statements. If applicable, the Trust recognizes interest accrued related to unrecognized tax benefits in "Interest Expense" and penalties in "Other Expenses" on the Statement of Operations. Each of the tax years in the four year period ended December 31, 2024 remains subject to examination by taxing authorities.

Note 3 – Financial Instruments and Risk Profile

Investments

For the year ended December 31, 2024, purchases and sales of investment securities for the Trust, other than long-term U.S. Government securities and short-term investments, were \$97,232,007 and \$109,421,088, respectively. There were no purchases and sales of long-term U.S. Government securities for the year ended December 31, 2024.

Credit risk

The Investment Manager takes an active role in managing and controlling the Trust's market and counterparty risks and has established formal control procedures which are reviewed on an on-going basis. The Investment Manager attempts to minimize risk exposures to counterparties and brokers via formal credit policies and monitoring procedures.

Emerging Markets Risk

Foreign investing involves certain risks, including currency fluctuations and controls, restrictions on foreign investments, less governmental supervision and regulation, less liquidity and the potential for market volatility and political instability. In addition, investing in emerging markets may involve a relatively higher degree of volatility.

Market Risk

The value of an investment in the Trust was based on the values of the Trust's investments, which change due to economic and other events that affect the U.S. and global markets generally, as well as those that affect or were perceived or expected to affect particular regions, countries, industries, companies, issuers, sectors, asset classes or governments. The risks associated with these developments may be magnified if certain social, political, economic and other conditions and events adversely interrupt or otherwise affect the global economy and financial markets. Securities in the Trust's portfolio may underperform or otherwise be adversely affected due to inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates (or changes in interest rates), global demand for particular products or resources, market or financial system instability or uncertainty, embargoes, tariffs, sanctions and other trade barriers, natural disasters and extreme weather events, health emergencies (such as epidemics and pandemics), terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events, such as terrorist attacks, natural disasters, health emergencies, social and political (including geopolitical) discord and tensions or debt crises and downgrades, among others, may result in increased market volatility and may have long term effects on both the U.S. and global financial markets. The occurrence of such events may be sudden and unexpected, and it was difficult to predict when similar events affecting

Market Risk (continued)

the U.S. or global financial markets or economies may occur, the effects that such events may have and the duration of those effects (which may last for extended periods). Any such event(s) could have a significant adverse impact on the value, liquidity and risk profile of the Trust's portfolio, as well as its ability to sell securities and/or meet redemptions. Any such event(s) or similar types of factors and developments, may also adversely affect the financial performance of the Trust's investments (and, in turn, the Trust's investment results) and/or negatively impact broad segments of businesses and populations and have a significant and rapid negative impact on the performance of the Trust's investments, and exacerbate preexisting risks to the Trust. In addition, no active trading market may exist for certain investments held by the Trust, which may impair the ability of the Trust to sell or to realize the current valuation of such investments in the event of the need to liquidate such assets.

Note 4 – Indemnifications

The Trust enters into contracts that contain a variety of indemnification clauses. The Trust's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Trust that have not yet occurred.

Note 5 – Unit Holder Transactions

The Trust offers units for sale at the net asset value as of the close of each business day. Units may also be redeemed at the net asset value at the close of each business day.

Note 6 – Subsequent Events

Management has reviewed events subsequent to the balance sheet date through March 26, 2025, the date the financial statements were available to be issued. Management has determined that there are no material events that would require disclosure in or adjustments to the Trust's financial statements through this date.
