FOR THE PLAN YEAR BEGINNING DECEMBER 1, 2023**

**IV. ACTUARIAL BASIS AND METHODOLOGY**

In valuing the liabilities and determining the contribution requirements for a defined benefit pension plan, it is desirable to take into consideration every reasonably predictable future contingency which will have an effect on the ultimate cost of the Plan. The actuary does this by making assumptions regarding the incidence and occurrence of those future events and trends upon which the payment and amount of benefits is contingent.

Federal law requires that assumptions upon which Plan funding is based must represent the actuary's best estimate of anticipated future experience in light of all the pertinent circumstances surrounding the particular Plan situation. The law also requires that each assumption must be "reasonable".

In order to establish appropriate assumptions with respect to your plan, we will analyze the experience of your population for prior and future years, and as a result of this information and our own predictive data and resources, we have selected the underlying assumptions upon which your pension valuations and funding are based. These are discussed in detail under Item B in this section.

In addition to assumptions, the second element of the valuation, which forms the basis of current contributions, is the "actuarial cost method." The cost method is simply a payment schedule designed to insure that sufficient funds are accumulated over time to meet the benefit obligations of the Plan.

## A. ACTUARIAL COST METHOD

### Unit Credit Actuarial Cost Method

The actuarial cost method used to determine funding requirements is the Unit Credit Cost Method, which is also known as the Accrued Benefit Cost Method. Under this method, an unfunded actuarial accrued liability is determined as of the initial valuation date. In each subsequent year, the unfunded actuarial accrued liability is adjusted for actuarial gains and losses, as well as any plan amendments and changes in actuarial assumptions. The normal cost for any year is determined as the present value of benefits accrued during the year.

**Statement by Enrolled Actuary**

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
