Plan Year: 01/01/2024 - 12/31/2024

Schedule SB, line 22 - Description of Weighted Average Retirement Age

The age reported is the weighted average of the Normal Retirement Ages for all active employees as of the valuation date, rounded to the nearest whole age. The weighting is based on the total IRC 430 funding liability for the employee compared to the total liability for all active employees. For an active late retiree, the assumed retirement age may be later than the Plan's Normal Retirement Age. Each participant's rate of retirement is assumed to be 100% at his or her assumed retirement age.

Additional Information

The 2023 Valuation and Schedule SB erroneously included one employee, who was ineligible for benefit accruals due to employee classification, in the calculation of Target Normal Cost (and only in the calculation of Target Normal Cost). The amount of excess TNC reported and the Schedule SB line items changed are illustrated below. Because the amount of the change is de minimus with respect to the total correct TNC and FT (less than 1.3% and less than 0.05%, respectively), the 2023 Valuation report and the 2023 Form 5500 are not being amended at this time; rather, the changes in starting point for the 2024 Valuation report have been adopted to reflect this change, and a revised Schedule SB is being filed as an additional attachment to the 2024 Form 5500. This change does NOT affect the amount of tax deduction taken in 2023 by the Plan Sponsor, nor does it create an underfunded status.
