INDEPENDENT AUDITORS' REPORT

Plan Administrator
Freeport Minerals Corporation Retirement Plan
Phoenix, Arizona

Report on the Audit of the Financial Statements

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the accompanying financial statements of Freeport Minerals Corporation Retirement Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits and of accumulated plan benefits as of November 30, 2024 and 2023, and the related statement of changes in net assets available for benefits and changes in accumulated plan benefits for the year ended November 30, 2024 and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of Freeport Minerals Corporation Retirement Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from the Northern Trust Company, the trustee of the plan, as of November 30, 2024 and 2023, and for the years then ended stating that the certified investment information, as described in Note 3 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section:

- the amounts and disclosures in the financial statements referred to above, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

- the information in the financial statements referred to above related to assets held by and certified to by the Northern Trust Company agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of Freeport Minerals Corporation Retirement Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Freeport Minerals Corporation Retirement Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Freeport Minerals Corporation Retirement Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Freeport Minerals Corporation Retirement Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Freeport Minerals Corporation Retirement Plan

Notes to Financial Statements

Note 1. Description of Plan

The following description of the Freeport Minerals Corporation Retirement Plan (the "Plan") provides only general information. Participants should refer to the Plan document for more complete details of the Plan's provisions.

General

The Plan is a defined benefit plan in which eligible salaried and certain non-bargained hourly employees (the "Participants") of Freeport Minerals Corporation (the "Corporation") and its participating subsidiaries participate upon meeting certain service requirements. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

Established in 1941, the Plan provides pension, death and disability benefits for the Participants. The Plan is amended or amended and restated from time to time to incorporate plan changes. The Plan was amended and restated in its entirety effective December 1, 2020.

The Plan is sponsored by the Corporation and administered by a committee (the "Committee") appointed by Freeport-McMoRan Inc.'s ("FCX") Board of Directors or its designee. The Committee also administers another plan participating in the master trust (see the "Trust" section included in this note). The Committee may take such actions with respect to the employee benefit plans (as defined in section 3(3) of ERISA, as amended) of the Corporation as the Committee shall deem necessary or advisable with respect to the design, amendment, operation and administration of such plans, provided that such amendments or actions do not result in a substantial increase in the estimated annual cost to the Corporation. If the estimated annual cost to the Corporation is substantial, approval by FCX's Board of Directors is required.

Benefits

The Plan provides for the payment of benefits in the event of normal, early or disability retirement or death in service subject to the Participant's satisfaction of age and/or service requirements applicable to such events. Participants may elect to receive their pension benefits in the form of either a life annuity or a joint and survivor annuity, which is payable monthly subsequent to retirement. Most employees who participate in the Plan are covered by the same benefit formula. However, as other plans covering different groups of employees were merged into the Plan over the years, the Plan was amended by adding supplements to grandfather a number of provisions of these other plans. Currently, the Plan has 28 supplements. Certain grandfathered benefits allow other payment forms, including lump sums and certain period annuities. Deferred pension benefits are payable in the event of termination of employment after achieving vested status. The Plan generally requires a lump sum distribution to separated employees with a vested accrued benefit of \$5,000 or less (\$7,000 or less effective December 1, 2024).

Employees hired prior to January 1, 2007, entered the Plan after one year of service and vested in plan benefits upon completion of five years of service. Employees hired on or after January 1, 2007, are excluded from participation in the Plan. Effective September 1, 2020, the plan was frozen, such that no

participants accrue any additional benefits under the Plan. Each participant's final average monthly compensation was calculated as of August 31, 2020, and as of September 1, 2020, participants only remain eligible to accrue service for determining the participant's eligibility to receive benefits, but not for the purpose of determining the amount of benefits.

A qualified pre-retirement survivor annuity is provided to the surviving spouse of any vested Participant who dies before retirement. For spouses of active or disabled employees, the survivor benefit is payable the first day of the month following the date of death. For terminated vested Participants, the survivor benefit cannot commence prior to the first day of the month coinciding with or following the date the Participant would have attained age 45.

Trust

The Corporation has a master trust agreement with The Northern Trust Company (the "Trustee"), a party-in-interest to the Plan. The name of this master trust is the Freeport Minerals Corporation Defined Benefit Master Trust (the "Trust"). At November 30, 2024, the Trust holds the assets of the Plan and another plan for former union employees sponsored by the Corporation and certain retirees and deferred, vested participants of the Corporation. The assets for each of the individual participating plans are held in separate investment accounts. The Plan's divided interest in the net assets of the Trust was approximately 97% at November 30, 2024 and 2023, which represents the Plan's sole investment. Investment income (loss) is allocated to the individual participating plans based upon the divided interest invested by each plan, and administrative expenses for each participating plan are paid from the Trust.

Benefits paid under the Plan are disbursed by the Trustee.

Plan Termination

The Corporation has no plans to terminate the Plan, but reserves the right to do so at any time. Upon termination of the Plan, the net assets of the Plan would be distributed in accordance with the provisions of ERISA. Also, to the extent unfunded vested benefits exist, ERISA provides that such benefits are generally payable by the Pension Benefit Guaranty Corporation ("PBGC") to Participants, up to specified limitations. Whether all Participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Corporation and the level of benefits guaranteed by the PBGC.

Administrative Expenses

Certain administrative expenses, which include trustee fees, investment management fees, actuarial fees, audit fees, legal fees and fees to the PBGC, are paid by the Plan's trust fund. Other administrative expenses are paid by the Corporation.

Note 2. Summary of Significant Accounting Policies

Method of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). Accordingly, income is recognized when earned and expenses are recorded when incurred.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make a number of estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results may differ from those estimates under different assumptions or conditions.

Funding Policy

Employer contributions are determined by the Plan's actuary using the unit credit cost method as prescribed by ERISA. The Corporation's funding policy provides that payments to the Trust shall be equal to at least the minimum funding requirements of ERISA plus additional amounts that may be approved by the Corporation. The total contributions for the year ended November 30, 2024, were \$60 million, which included \$15 million, which was funded by the Corporation in December 2024 and is included in the Statements of Net Assets Available for Benefits as contributions receivable. The total contributions for the year ended November 30, 2023, were \$60 million, which was funded by the Corporation in December 2023 and is included in the Statements of Net Assets Available for Benefits as contributions receivable. Contributions for both years meet ERISA minimum funding requirements.

Benefit Payments

Benefit payments are recorded when paid.

Valuation of Investments and Investment Income

The Plan's interest in the Trust is based on the Plan's portion of the fair value of the Trust's underlying assets. This portion is based on the beginning of year value of the Plan's interest in the Trust plus actual contributions, if any, and allocated investment income (loss) less actual distributions and allocated administrative expenses. Purchases and sales of investments are recorded on the trade date. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date. The net appreciation in the fair value of the assets held in the Trust for the year ended November 30, 2024, was comprised of realized gains (losses) from the sales of securities during the respective period and unrealized gains (losses) from the change in fair market value for those investments held at the end of the period. See Note 4 for further discussion of fair value measurement.

As part of the Trust's investment strategy, certain investment managers may use derivative financial instruments, such as forward exchange contracts, swaps and fixed income futures as substitutes for certain types of fixed income securities. Leveraging of the Trust's assets and the use of derivative instruments for speculative purposes are prohibited. The Trust did not hold any derivatives as of November 30, 2024 and 2023.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service that employees have rendered. Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died and present employees or their beneficiaries. Benefits for salaried employees under the Plan are based on an employee's highest consecutive 36-month average compensation (as defined by the Plan) during their last 120 months of continuous service. Accumulated plan benefits for active salaried employees are based on their highest consecutive 36-month average

compensation during the 120 months ended on August 31, 2020. Benefits for hourly employees under the Plan are based on employees' periods of continuous service and a monthly benefit multiplier.

Accumulated plan benefits for active hourly employees are based on the continuous service rendered through, and the monthly benefit multiplier in effect on, the valuation date. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered, to the valuation date. Benefits for salaried employees to be provided from annuity contracts excluded from Plan assets are excluded from accumulated plan benefits. As of September 1, 2020, participants only remain eligible to accrue service for the purpose of determining the participant's eligibility to receive benefits, but not for the purpose of determining the amount of benefits.

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary, Mercer LLC, and is that amount that results from applying actuarial assumptions to adjust accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. Following are the significant assumptions used in the actuarial valuations as of November 30, 2024.

Life expectancy of Participants

Society of Actuaries' (SOA) Pri-2012 mortality tables (using the blue collar rates) adjusted to provide an alternative projection of mortality improvements and to reflect the Corporation's mortality experience are used as a base table. Mortality improvement is projected based on a version of the SOA's mortality improvement scale MP-2021 adjusted to reflect the Corporation's outlook on future mortality improvement.

Withdrawal

<u>Years of Service</u>	<u>Probability of Withdrawal</u>
Less than 19	3.3%
19 or more	1.5%

Retirement

<u>Age</u>	<u>Probability of Retiring</u>
55 through 59	5.0%
60 through 61	8.0%
62	15.0%
63 through 64	12.0%
65	30.0%
66	40.0%
67 through 69	25.0%
70 or above	100.0%

Rate of Interest

5.20%

For the life expectancy of Participants as of November 30, 2024, a mortality table was developed by removing the projected mortality improvement after 2006 from SOA's Pri-2012 blue-collar mortality rates in order to apply an alternative projection of mortality improvements after that date. These rates were reduced by 5% for males and increased by 6% for females to reflect an analysis completed by the Corporation in 2023 using its actual mortality experience, yielding the best estimate for the mortality experience of the Plan population. Mortality was projected to improve with a mortality improvement projection scale developed based on the SOA's MP-2021 scale, but with an alternate convergence method and different ultimate rates of improvement, which represents a reasonable estimate.

The Statements of Accumulated Plan Benefits at November 30, 2024 and 2023, and the Statement of Changes in Accumulated Plan Benefits for the year ended November 30, 2024, reflect the results of actuarial valuations prepared as of such year ends. Such amounts are estimated by the Plan's actuary in accordance with accepted actuarial principles. The changes in actuarial assumptions for the year ended November 30, 2024 (included in the Statement of Changes in Accumulated Plan Benefits), included updated rate of interest (previously 5.75%) and mortality rates.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Termination of the Plan may result in the use of different actuarial assumptions in determining the actuarial present value of accumulated plan benefits.

Note 3. The Freeport Minerals Corporation Defined Benefit Master Trust

FCX's primary investment objectives for its Trust are to maintain funds sufficient to pay all benefit and expense obligations when due, minimize the volatility of the Plan's funded status to the extent practical, and to maintain prudent levels of risk consistent with the Plan's investment policy. Historically, the Plan's assets have been invested in a balanced portfolio of return-seeking assets and risk-mitigating assets, with the allocation between these portfolios dependent on the funded status of the plan. The risk-mitigating assets are allocated among multiple fixed income managers. FCX's present target asset allocation is long-duration credit (50%); core fixed income (22%); long-duration U.S. government/credit (20%); long-term U.S. Treasury Separate Trading of Registered Interest and Principal Securities (STRIPS) (7%); and cash equivalents (1%).

The Committee has an ERISA section 3(38) investment advisor relationship with Meketa Fiduciary Management, LLC (Meketa) that gives Meketa full discretionary authority and control over investment decisions for the Trust's assets.

Information Certified by the Trustee

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan administrator has elected that information certified by the Trustee not be subject to any auditing procedures except for comparing such information to the related information contained in the accompanying financial statements. The following information has been certified by the Trustee of the Plan as complete and accurate:

- a. Information included in the accompanying Statements of Net Assets Available for Benefits at November 30, 2024 and 2023:
 - Plan's interest in the Trust

b. Information included in the accompanying Statement of Changes in Net Assets Available for Benefits for the year ended November 30, 2024:

Note 4. Fair Value Measurement

Fair value accounting guidance includes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs). The three levels of inputs within the fair value hierarchy are described as follows:

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2 Quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data by correlation or other means;
- Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Investments measured using net asset value ("NAV") per share as a practical expedient are presented in the following tables to permit a reconciliation of the fair value hierarchy to total investments in the Trust (see Note 3).

The following table sets forth by level, within the fair value hierarchy, a summary of the Trust's net investments measured at fair value on a recurring basis and a reconciliation to total investments at November 30, 2024:

(1) Unfunded commitments of \$884 thousand.

There have been no changes in the valuation methodologies used for investments measured at fair value at November 30, 2024 and 2023.

Fixed income securities primarily include corporate and government bonds held directly by the Trust. Fixed income securities are valued using a bid-evaluation price or a mid-evaluation price and, as such, are classified within Level 2 of the fair value hierarchy. A bid-evaluation price is an estimated price at which a dealer would pay for a security. A mid-evaluation price is the average of the estimated price at which a dealer would sell a security and the estimated price at which a dealer would pay for a security. These evaluations are based on quoted prices, if available, or models that use observable inputs.

Equity securities are valued at the closing price reported on the active market on which the individual securities are traded and, as such, are classified within Level 1 of the fair value hierarchy.

Commingled/collective funds are managed by several fund managers and are valued at the NAV per unit of the fund. For most of these funds, the majority of the underlying assets are actively traded securities. The fixed income securities funds' strategy seeks to achieve long-term growth by investing in securities across multiple income asset classes, including bank debt, senior secured and unsecured bonds (both in

high-yield and investment-grade corporate sectors) and U.S. government obligations. These funds require up to a 90 day notice for redemptions.

Private equity investments are valued at NAV using information from general partners and have inherent restrictions on redemptions that may affect the ability to sell the investments at their NAV in the near term.

Cash equivalents consist of short-term investments (commingled funds) that are valued at the NAV per unit of the fund and have no restrictions on redemption.

The techniques described above may produce a fair value that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Committee believes its valuation techniques are appropriate and consistent with those used by other market participants, the use of different techniques or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 5. Party-in-interest Transactions

Certain Plan investments held by the Trust are managed by the Trustee, which qualify as party-in-interest transactions. In addition, as discussed in Note 1, the Plan paid certain expenses related to Plan operations and investment activity to various service providers. These transactions qualify as party-in-interest transactions, which are exempt from the prohibited transaction rules of ERISA.

Note 6. Tax Status

The Plan received a determination letter from the Internal Revenue Service dated October 15, 2014, which indicates that the Plan fulfills the requirements of the Internal Revenue Code and that the Trust, which forms a part of the Plan, is exempt from income tax. Although the Plan has been amended since receiving the determination letter, the Plan administrator and the Plan's legal counsel are of the opinion that the Plan, as amended and restated and as operated, continues to fulfill the requirements of a qualified plan and that the Trust is not subject to tax. Accordingly, no provision for federal or state income taxes has been included in the Plan's financial statements.

Note 7. Risks and Uncertainties

The Plan, through the Trust, invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Because of the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions, if any, are made and the actuarial present value of accumulated plan benefits are reported based upon certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Because of uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 8. Subsequent Events

The Committee has evaluated subsequent events through September 5, 2025, which is the date these financial statements were issued, and determined any events or transactions occurring after November 30, 2024, that would require recognition or disclosure were appropriately addressed in these financial statements.

In each cell, the top number is the count of active participants for each age/service combination, and the bottom number is the average monthly accrued benefit. The plan is “hard frozen” and the average benefits are in lieu of compensation. Average frozen benefits are not shown for cells with fewer than 20 participants.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial assumptions for December 1, 2023 funding valuation**

Discount rate sponsor elections	
• Segment rates or full yield curve	Full Yield Curve
• Look-back months	Not applicable
Mortality sponsor elections	
• Healthy and disabled participants	Section 430(h)(3) prescribed separate static annuitant and nonannuitant mortality tables. These tables are based on the RP-2006 mortality tables with IRS-developed adjustments and projected with mortality improvement scale MP-2021.
417(e) lump sums	Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates rather than 417(e) rates and current year 417(e) unisex mortality.
Other economic assumptions	
• Salary increases	Not applicable
• Flat-dollar benefit increases	0.00% per year
• Social Security taxable wage base increases	3.25% per year
• Inflation	2.50% per year
• Expenses	\$15,178,305 added to current year normal cost

Rationale for economic assumptions

- Social Security taxable wage base increases – Social Security wage base assumption is based on the inflation assumption, increased by an assumed average real wage increase of 75 basis points.
- Inflation – Inflation assumption is based on the inflation assumption periodically published by Mercer Investment Consulting in their Capital Markets Outlook.
- Expenses – The expense assumption is equal to actual prior year expenses, excluding actual PBGC premiums paid for the prior plan year, and including expected PBGC premiums for the current plan year. This amount is assumed to be paid at mid-year and discounted to the valuation date using the mid-year rate from the full yield curve used for valuation purposes.

Demographic assumptions

68	25.00%	100.00%
69	25.00%	100.00%
70 and above	100.00%	100.00%

Rationale for demographic assumptions

- Retirement, withdrawal, and disability incidence – Rates were developed based on an experience study undertaken in 2023 using data from 2018 through 2022 and the expectation that the future patterns and circumstances of the employer will not differ significantly from the period studied.

¹ We assume 90% lump sum and 10% single life for the portion of the accrued benefit that is payable as a lump sum for certain Cyprus participants when they retire or withdraw from active status.

² For both current and future deferred vested commencement, the age based table results in a weighted average of 63. For simplification purposes, a single commencement age assumption has been applied using the weighted average age of 63.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- **Benefit commencement age** – Rates were developed based on an experience study undertaken in 2023 using data from 2018 through 2022 and the expectation that the future patterns and circumstances of the employer will not differ significantly from the period studied.
- **Spouse assumptions** – The assumptions regarding percent married at benefit commencement and spouse age difference were developed based on an experience study undertaken in 2023 using data from 2018 through 2022 and the expectation that the future patterns and circumstances of the employer will not differ significantly from the period studied.
- **Form of payment** – The form of payment assumption was developed based on an experience study undertaken in 2023 using data from 2018 through 2022 and the expectation that the future patterns and circumstances of the employer will not differ significantly from the period studied.

Actuarial methods for funding

Asset methods

The asset valuation method is the fair market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum funding methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides disability benefits that are only partially based on a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit multiplied by the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- This plan also provides a special RD&D benefit that is not a function of a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the ratio of the participant's service at the beginning of the plan year to their service at each decrement age and is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

However, the total reduction shall not be more than 5% for each year by which the early retirement date precedes age 65. 2. Following the attainment of age 60 and the completion of 30 years of Service, a participant shall receive an unreduced early retirement benefit. 3. An ASWI Salaried Participant receives the larger of the regular early retirement benefit and the Floor Benefit calculated under the Transition Plan Supplement as of the date of the transition or transfer to salaried status, reduced according to the provisions of the applicable Transition Plan Supplement. 4. An ASWI participant who has completed 30 or more years of Service may elect to receive his floor benefit prior to age 55. At age 55, the ASWI participant will receive the accrued benefit minus the floor benefit, reduced in accordance with paragraph 1 above. A Chino ASWI participant may defer to elect the balance of his benefit until age 60. 5. A Cyprus participant may elect to receive the pre-age 55 portion of his minimum benefit plus the pre-age 55 portion of his Inspiration Copper Benefit prior to age 55. 6. A Columbian participant may elect to receive his minimum benefit after age 55, without completing 10 years of Service. If a Columbian participant commences the minimum benefit prior to completing 10 years of Service, the balance of the accrued benefit is payable at the Normal Retirement Date. 7. Participants affected by the closing of a plant or facility who have attained age 55 at termination and whose age plus Service is at least 70, or whose age plus Service is at least 80, if they have not attained age 55 at termination may receive their accrued benefit as of April 30, 2005 unreduced.

Deferred vested

• Eligibility	5 years of Service
• Benefit	1. Accrued benefit calculated as of termination date. If the participant completed 10 years of Service, the participant may commence the benefit on or after age 55. The vested termination benefit is reduced by 5% for each year by which the annuity starting date precedes age 65. 2. A Cyprus Participant who commences the vested termination benefit before Normal Retirement Date, receives the larger of the accrued benefit, reduced according to paragraph 1 above or the minimum benefit, reduced according to the provisions of the Cyprus Plan Supplement, plus the Inspiration Copper Benefit, reduced according to the provisions of the Cyprus Plan Supplement. 3. 	provisions of the Columbian Plan Supplement and the balance of the benefit, reduced according to paragraph 1 above.
Disability	
• Benefit	An employee will continue to be credited with years of Service while receiving benefits under the LTD plan. The disability benefit shall be based upon the accrued benefit calculated using Service projected to age 65, payable as of the Normal Retirement Date. The benefit is calculated using Final Average Monthly Salary equal to the average Monthly Salary during the 12-month period ending with the month LTD benefits begin. The Final Average Monthly Incentive Compensation is the highest average Incentive Compensation during any consecutive 5-year period out of the 10 years ending with the calendar year LTD benefits begin, divided by 60.
Pre-retirement death	
• Eligibility	The Participant and Spouse must have been married for at least one year as of the Participant's date of death.
• Benefit prior to early retirement	1. For Participants who were actively employed or receiving long term disability, the surviving spouse receives an annuity equal to 50% of the Participant's accrued benefit payable immediately. 2. For Participants who were terminated vested, the surviving spouse receives an annuity equal to 50% of the Participant's accrued benefit reduced by 5% for each year the Participant was less than age 55 at death. The earliest date of commencement is when the Participant would have attained age 45 at which time the annuity would equal 25% of the Participant's accrued benefit. 3. For Accuride Salaried, Columbian Chemicals Salaried, High Performance Conductors Salaried and Hourly, Cyprus, Climax Henderson and Fort Madison Participants, the surviving spouse receives a benefit as if the Participant had elected a 50% joint and survivor on the later of date of death or early retirement. 4. For Columbian Chemicals Hourly, Marshall Plant and North Bend Plant Participants, the surviving spouse receives a benefit as if the participant elected a 55% joint and survivor annuity at the participant's earliest retirement date.

• Benefit	The Kennecott make-up benefit plus a monthly pension benefit equal to: • \$26.50 (or \$30.00 for each year of Benefit Service performed on or after January 1, 2012) x years of Benefit Service up to 15 years; plus • \$28.00 (or \$32.00 for each year of Benefit Service performed on or after January 1, 2012) x years of Benefit Service in excess of 15 years up to 30 years; plus • \$30.00 (or \$40.00 for each year of Benefit Service performed on or after January 1, 2012) x years of Benefit Service in excess of 30 years.

Schedule SB, Part V — Summary of Plan Provisions**Early retirement**

- **Eligibility** Kennecott service is used to determine the appropriate multiplier but not for future benefit accruals. A Participant can elect to start receiving pension benefits at the earliest of the following:
 - Age 62 and 10 or more years of Eligibility Service
 - Age 60 and 10 or more years of Eligibility Service
 - 30 or more years of Eligibility Service
 - If an employee became a Participant prior to January 1, 1999, age 60 and 30 or more years of Eligibility Service.
- **Benefit**
 - For Participants aged 62 with 10 or more years of Eligibility Service – the benefit is unreduced at early retirement age.
 - For Participants aged 60 with 10 or more years of Eligibility Service – the normal retirement benefit reduced 1/3% for each month preceding 62
 - For Participants with 30 or more years of Eligibility Service – the benefit is unreduced at early retirement age.
 - For Participants aged 60 with 30 or more years of Eligibility Service – the benefit is unreduced at early retirement age

Deferred vested

- **Eligibility** 5 years of Eligibility Service
- **Benefit** A benefit is due to such a Participant on his 65th birthday, or,
 - a) If the Participant has completed 10 or more years of Eligibility Service, as early as his 60th birthday. Benefit is reduced by 1/3% for each month preceding age 65.
 - b) If the Participant has completed 30 or more years of Eligibility Service, benefit is unreduced and payable immediately.

Disability

- **Eligibility** A Participant who becomes permanently and totally disabled who has completed 10 or more years of Eligibility Service at the date of disability and his permanent and total disability has been established in a written opinion of a qualified physician.
- **Benefit**

For a disabled Participant who became a participant prior to January 1, 1999, the disability benefit is the unreduced normal retirement benefit calculated at the Participant's date of disability.

For a disabled Participant who became a participant on or after January 1, 1999, the monthly disability benefit is \$210, payable until the date he receives a Social Security Disability Benefit or attains age 62. After that, the benefit is the unreduced normal retirement benefit.

Special RD&D

- **Eligibility**

A Participant is eligible for a Special RD & D Payment if a) he retires under Normal or Early retirement eligibility or b) dies after completing 10 or more years of Eligibility Service or c) becomes permanently and totally disabled and is eligible to receive a Disability Benefit or d) would have become eligible to receiving a Disability Benefit except did not yet have ten years of Eligibility Service.

Participants who transferred to the Freeport Minerals Corporation Retirement Plan are also eligible if they meet any of the criteria above and would have been eligible for accruals under the Chino plan if they had been in a Chino Union location.

Schedule SB, Part V — Summary of Plan Provisions

• Benefit	The actuarial equivalent to a lump sum payment of \$7,500.
Pre-retirement death	
• Eligibility	The Participant and Spouse must have been married for at least one year as of the Participant's date of death.
• Benefit	If a Participant with 5 years of Eligibility Service who has been married for at least a year dies, his spouse is entitled to a pre-retirement spouse's annuity. The amount of this annuity will be 50% of the Participant's accrued benefit and is payable immediately. Note this benefit is also payable to married disabled participants who have yet to receive their retirement benefit at age 62. If payment commences prior to the Participant's earliest retirement date, the benefit will be actuarially adjusted to be equivalent. A spouse can also choose to defer the death benefit to the date the participant would have attained Normal Retirement Age. For married terminated vested participants who die during deferral, the amount payable is 50% of the Participant's accrued benefit, reduced by 5% for every year which death precedes age 55. If the Participant dies before age 45, the amount of the benefit is 25% of the accrued benefit and will commence at the date the participant would have attained age 45.
Form of benefits	
• Automatic form for unmarried participants	Life annuity
• Automatic form for married participants	55% joint and survivor annuity

Schedule SB, Part V — Summary of Plan Provisions**Miscellaneous**

- **Maximum benefits** Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2023, the limit is \$265,000.

Benefits included or excluded

Unless noted below, all benefits provided by the plan, as restated and amended through the Ninth Amendment executed December 17, 2020, are included in this valuation:

- **Most recent plan amendments included:** All amendments are included because they were adopted by the valuation date and are effective by the end of the plan year.
- **Plan amendments excluded:** None
- **Late retirement increases:**
 - *Active participants:* The plan does not provide benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases apply to participants who defer retirement beyond age 65. This valuation includes increases for benefits commencing after age 65.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including a retroactive lump sum as of the valuation date. The amount of the lump sum equals missed payments from age sixty-five to the valuation date with interest. The interest applied is equal to the 417(e) first segment rate for the November prior to the valuation year.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Plan provisions specific to funding**Additional benefits included or excluded**

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.

Schedule SB, line 32 — Schedule of Amortization Bases

The total shortfall amortization charge is the sum of the individual shortfall amortization installments for each plan year since the IRC Section 430 changes made by ARPA took effect for the plan. Although an individual shortfall amortization installment can be negative, the combined shortfall amortization charge cannot be less than \$0.

Shortfall bases				
Year established		Outstanding balance	Years remaining	2023 installment
2022	\$	325,644,123	14	\$ 32,407,592
2023		11,373,992	15	1,083,346
Total	\$	337,018,115		\$ 33,490,938

Schedule SB, line 25— Change in Actuarial Method

The plan sponsor has elected to use interest rates under the Full Yield Curve beginning with the December 1, 2023 valuation.

Schedule SB, line 24 — Change in Actuarial Assumptions

Actuarial assumption changes since prior valuation

The following assumption changes have occurred since the December 1, 2022 valuation:

- Interest discounts and mortality rates were updated from 2022 to 2023 in accordance with PPA, and reflecting Freeport Minerals Corporation's change in interest rate election to use the full yield curve.
- The expense component of normal cost increased from \$13,293,550 to \$15,178,305 to reflect our expectations for the current plan year.
- Withdrawal rates, retirement rates, commencement age, married percentage, and disability rates were updated to reflect the results of the 2023 experience study.
