SECTION XII ACTUARIAL COST METHODS

Traditional Unit Credit (TUC)

The actuarial cost method used in the development of the minimum contribution was the unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. For active participants whose credited service equals or exceeds the plan maximum, if any, and for non-active participants, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit (PUC)

The actuarial cost method used in the development of the maximum contribution was the projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

Segment Interest Rates for Minimum Contribution	Segment 1: 4.99% Segment 2: 5.29% Segment 3: 5.59%	Prescribed by Internal Revenue Service (IRC Sec. 430(h)(2)(C))	The Funding Target Liability for Minimum Contribution is determined using three 24-month average interest rates ("segment rates"), each of which applies to cash flows during specified periods. The Plan Sponsor has elected a 0 month look back for determining these rates each Plan Year. These segment rates are adjusted by the applicable percentage of the 25-year average segment rates.	The segment 1, segment 2 and segment 3 interest rates changed from 4.75%, 5.00%, and 5.74%, respectively as of the prior measurement date, July 1, 2023, to reflect the current prescribed rates. Assumption		Entity Who Selects Assumption	Basis for Assumption Selection	Change in Assumption
Withdrawal Rates	Crocker-Sarason-Straight T-1 less 1951 GAM Male Mortality	The Angell Pension Group, Inc.	Because of the relatively small number of Plan participants, the withdrawal experience under the Plan is not credible for establishing Plan-specific withdrawal rates. The Crocker-Sarason-Straight table was developed for such plans, and a review of experience under the Plan indicated that this table is a good estimate of future experience under the Plan.	None
Retirement Rates	Participants are assumed to retire at Normal Retirement Age (later of 65th birthday and the fifth anniversary of initial plan participation)	The Angell Pension Group, Inc.	This assumption was set based on a review of experience under the Plan and general experience from similarly situated plans.	None
Administrative Expenses	Equals the amount of Plan-related expenses paid from Plan assets in the prior Plan year.	The Angell Pension Group, Inc.	Internal Revenue Service regulations require the Target Normal Cost to be increased by the amount of Plan-related expenses expected to be paid from Plan assets during the Plan year. Our best estimate of these expenses is the actual amount of Plan-related expenses paid from Plan assets in the prior Plan year.	None
Percent Married	100% of males and 100% of females are assumed to be married.	The Angell Pension Group, Inc.	This assumption was set based on a review of experience under the Plan and general experience from similarly situated plans.	None
