Schedule SB, Part V – Statement of Actuarial Assumptions/Methods  
 As of December 31, 2024

Actuarial Cost Method	Under the provisions of the Pension Protection Act of 2006 (PPA), a single Actuarial Cost Method is prescribed for the annual determination of the range of acceptable Employer contributions for all tax-qualified defined benefit retirement plans subject to the funding requirements of IRC §430 as added by PPA. Under this method, the actuarially determined present value of benefits accrued as of the beginning of the plan year, referred to as the 'Funding Target', is determined on the valuation date. The value of additional benefits accrued or expected to be accrued during the plan year, known as the 'Target Normal Cost' is also determined. Simply stated, and unless the plan is considered fully funded, the Employer's minimum funding requirement for the year consists of the Target Normal Cost along with a payment toward amortizing any shortfall between the Funding target and the adjusted actuarial value of the Plan's assets.
