SCHEDULE SB, LINE 22 - DESCRIPTION OF WEIGHTED AVERAGE RETIREMENT AGE

All participants who have not yet attained Normal Retirement Age were assumed to retire on their Normal Retirement Age. Participants who remain employed beyond their Normal Retirement Age are assumed to retire one (1) year after the valuation date.

The Weighted Average Retirement Age was determined by multiplying each participant's assumed retirement age by the sum of his or her Funding Target plus Target Normal Cost. This sum was then divided by the total Funding Target plus Target Normal Cost to obtain the average assumed retirement age. The average assumed retirement age was then rounded to the nearest whole number to determine the Weighted Average Retirement Age.
