## **Report of Independent Auditors**

To the Administrator of Sundstrand de Puerto Rico Pension Plan

### ***Opinion***

We have audited the accompanying financial statements of Sundstrand de Puerto Rico Pension Plan (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, including the related notes (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2024 and 2023, and the changes in its net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

### ***Basis for Opinion***

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### ***Responsibilities of Management for the Financial Statements***

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

### ***Auditors' Responsibilities for the Audit of the Financial Statements***

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

# **Sundstrand de Puerto Rico Pension Plan**

## **Notes to Financial Statements**

### **As of December 31, 2024 and 2023**

#### **Note 1 - Plan Description**

The following description of the Sundstrand de Puerto Rico Pension Plan (the "Plan"), is for general information purposes only. Participants should refer to the Plan Document for a complete description of the Plan's provisions.

#### **General**

The Plan is a noncontributory defined benefit pension plan and covers Sundstrand de Puerto Rico, Inc. non exempt employees. Prior to January 1, 2024, employees were eligible to participate on their first day of service. On December 19, 2023, the RTX Corporation's Benefit Design and Administration Committee ("BDAC") approved the closure of new entrants to the Plan, effective January 1, 2024.

Investments of the Plan are held in the RTX Master Retirement Trust ("Master Trust").

The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). The Plan Administrator of the Plan (for purposes of Section 3(16) of ERISA) is RTX Corporation ("RTX" or "the Company"), and the Plan is administered by the RTX Corporation's Pension Administration and Investment Committee ("PAIC"), which operates pursuant to a vote of the RTX Board of Directors.

#### **Benefits, Eligibility and Vesting**

Under the terms of the Plan, participants do not become vested until completing five years of service. At that time, a participant becomes 100% vested. There is no partial vesting of benefits. Participants are eligible for pension benefits upon retirement. Generally, participants are eligible for retirement at age 65. Employees may elect to receive their pension benefits in the form of a joint and survivor annuity or other actuarially equivalent form of payment. Eligible employees are entitled to monthly pension benefits based on a percentage of compensation (as defined in the Plan) for each plan year but not less than \$96 multiplied by the years of credited service.

At retirement, eligible participants may elect to receive early retirement benefits, reduced in a manner set forth in the plan document, based upon age and service at termination.

If a vested participant dies before receiving a retirement benefit and has completed 10 years of service, a 55% contingent annuity benefit is payable immediately, reduced in a manner set forth in the plan document based upon age at death. If a vested participant dies before receiving a retirement benefit and is married but has not completed 10 years of service, a 55% spouse's benefit is payable and payment commences when the participant would have attained age 60, reduced in a manner set forth in the plan document based upon age at death.

If, upon termination, the present value of the pension benefit as of the participant's normal retirement age is equal to or less than \$5,000, the vested portion of the benefit will be transferred to an IRA account if the participant does not elect otherwise.

#### **Contributions**

The Company makes contributions to the Plan to ensure assets are sufficient to pay the benefits of the Plan. The Plan does not permit contributions by participants.

## **Notes to Financial Statements**

### **As of December 31, 2024 and 2023**

#### **Note 2 - Summary of Significant Accounting Policies**

##### **Basis of Presentation**

The accompanying financial statements are prepared on the accrual basis of accounting.

##### **Investment Valuation and Income Recognition**

The Plan's interest in the Master Trust is stated at fair value. Net investment income (loss) from the Master Trust is allocated proportionately on a monthly basis based on the Plan's interest in the Master Trust. See Note 5 for additional information.

##### **Contributions**

Employer contributions are funded and recorded as determined by actuarial computation. See Note 4 for additional information.

##### **Benefit Payments**

Benefit payments to participants are recorded when paid.

##### **Administrative Expenses**

All expenses of the Plan, which primarily consist of professional and administrative fees, are paid by the Plan. Expenses specifically related to the Plan are included in the Statements of Changes in Net Assets Available for Benefits under "Administrative expenses." Additionally, expenses paid directly by the Master Trust, which primarily consist of investment management and performance fees, are allocated proportionally on a monthly basis based on the Plan's interest in the Master Trust and are included in the Statements of Changes in Net Assets Available for Benefits under "Master Trust investment income or loss."

##### **Use of Estimates**

The Plan's financial statements have been prepared in conformity with U.S. Generally Accepted Accounting Principles ("GAAP"). This requires the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for benefits at the date of the financial statements, the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for benefits during the reporting period, and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from the estimates included in the financial statements.

#### **Note 3 - Actuarial Present Value of Accumulated Plan Benefits**

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable, under the Plan's provisions, to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, and (b) beneficiaries of deceased employees, and (c) present employees or their beneficiaries. Benefits under the Plan are accumulated based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances (such as retirement, death, disability, and termination of employment) are included to the extent that they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Company's consulting actuary and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for retirement, death, disability, or withdrawal) between the valuation and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2023 and 2022, are as follows:

Discount rate	As of December 31, 2023: 5.40%
	As of December 31, 2022: 5.70%

# Sundstrand de Puerto Rico Pension Plan

## Notes to Financial Statements

### As of December 31, 2024 and 2023

Mortality basis	As of December 31, 2023 and 2022: Pri-2012, mixed collar adjustments with 5% decrease in rates; MP-2021 generational projection applied from 2012. Separate contingent mortality election following death of retiree.
Retirement	Various rates, varying by age from 60 to 70

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

#### Assumption Changes

The changes in actuarial assumptions since the prior valuation of the Plan are as follows:

- The discount rate was changed from 5.70% to 5.40% to reflect updated market conditions.

As of December 31, 2023, the most recent valuation date, the actuarial present value of accumulated plan benefits is as follows:

<b>Vested Benefits</b>	
Active participants	\$ 22,215,341
Participants with deferred benefits	5,432,945
Participants receiving benefits	11,655,283
Total vested benefits	39,303,569
Nonvested benefits	1,237,054
Total actuarial present value of accumulated plan benefits	\$ 40,540,623

The following is an analysis of changes in the present value of accumulated benefits:

Actuarial present value of accumulated plan benefits as of December 31, 2022	\$ 35,656,584
Benefits accumulated	1,776,816
Actuarial (gains)/losses	358,633
Decrease in discount period	2,100,599
Benefits paid	(1,177,908)
Change in actuarial assumptions	1,825,899
Actuarial present value of accumulated plan benefits as of December 31, 2023	\$ 40,540,623

#### Note 4 - Funding Policy

The employer's contributions are actuarially determined and generally fund any existing unfunded liability on account of qualified service prior to the valuation date in accordance with the amortization schedules prescribed by ERISA minimum funding requirements (as amended by the Pension Protection Act of 2006). At the Company's discretion, and to the extent allowable under maximum tax deductibility regulations, contributions above the ERISA minimum funding requirements may be made to the Plan. Contributions for the years ended December 31, 2024 and 2023, met the minimum funding requirements of ERISA.

#### Note 5 - Master Trust

##### Summary Financial Information

The Plan's assets are held in the Master Trust, which was established for the investment of assets of the Plan and certain other retirement plans sponsored by the Company or its affiliates. The PAIC regularly reviews the asset allocation and performance of the investments held in the Master Trust. The assets of the Master Trust are held by BNY as trustee ("Trustee").

**Sundstrand de Puerto Rico Pension Plan**  
**Notes to Financial Statements**  
**As of December 31, 2024 and 2023**

The investment policy applicable to the Plan, as approved by the PAIC, permits asset diversification to include a combination of cash and cash equivalents, fixed-income securities, publicly traded U.S. and international equity securities, private equity and private real estate funds, and other investments such as commingled funds, real estate, insurance contracts and derivatives. Participating plans receive units of participation in the Master Trust based on their contributions to the Master Trust.

Investment securities are exposed to various risks, such as interest rate, market, currency, and credit risks. These risks can be adversely impacted by shifts in the market's perception of the issuers, changes in interest rates, and global economic conditions. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur and such changes could materially affect the amounts reported in the Plan's Statements of Net Assets Available for Benefits.

The following table includes the Statements of Net Assets for the Master Trust, along with the Plan's interest in the Master Trust, as of December 31, 2024.

#### Fair Value Measurements

The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required:

- Level 1:** Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2:** Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs which are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities.
- Level 3:** Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. See valuation policy section for further information.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

## Notes to Financial Statements

### As of December 31, 2024 and 2023

#### Level 3 Investments

For the years ended December 31, 2024 and December 31, 2023, there were no material transfers in or out of Level 3 or material purchases of Level 3 investments in the Master Trust.

The following tables represents the Master Trust's Level 3 financial instruments as of December 31, 2024 and December 31, 2023, the valuation techniques used to measure the fair value of those financial instruments, and the significant unobservable inputs and the ranges of the values for those inputs.

#### As of December 31, 2024:

Level 3 Investment	Fair Value	Principal Valuation Technique	Significant Unobservable Inputs	Range of Significant Input Values
Real estate	\$1,480,636,991	Discounted Cash Flow Analysis	Discount Rate Exit Cap Rate	6.5% - 10.3% 5.3% - 7.0%

#### As of December 31, 2023:

Level 3 Investment	Fair Value	Principal Valuation Technique	Significant Unobservable Inputs	Range of Significant Input Values
Real estate	\$1,465,955,795	Discounted Cash Flow Analysis	Discount Rate Exit Cap Rate	6.5% - 10.5% 5.0% - 8.5%

In estimating fair value of the investments in Level 3, the Plan Administrator may use third-party pricing sources. In substantiating the reasonableness of the pricing data provided by third-parties, the Plan Administrator evaluates a variety of factors including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

#### Valuation Policy

The Plan's interest in the Master Trust is stated at fair value. The Trustee values the Master Trust investments as follows:

Cash and cash equivalents, which includes a short-term investment fund, are valued at amortized cost, which approximates fair value. The short-term investment fund is not valued using a quoted price in an active market and is therefore classified as a Level 2 investment in the fair value hierarchy.

Investments in fixed income securities (U.S. Government, domestic and foreign bonds, asset backed securities, and term loans) are valued by a pricing service which determines valuations for normal institutional-size trading units of such securities using methods based upon market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, or at fair value as determined in good faith by the Trustee of the Master Trust and management.

Investments in equity securities (common and preferred) and equity securities sold short, if any, are valued at the exchange traded closing price if available.

Investments in registered investment companies are valued at their last reported net asset value.

Investments in commingled funds, private equity funds, and private real estate funds are stated at fair market value, which primarily utilizes net asset values reported by the investment manager or fund administrator. Management reviews additional valuation and pricing information from fund managers, including audited financial statements, to evaluate the net asset values.

## Notes to Financial Statements

### As of December 31, 2024 and 2023

Real estate assets are valued quarterly and consistently with the Real Estate Information Standards. The income approach (discounted cash flow model), sales comparison approach, or cost approach are utilized depending on the approach that most accurately portrays the anticipated behavior of the property and buyers in the market.

Unallocated insurance contracts are valued at their contract price which approximates fair value.

Valuation policies for derivative investments are disclosed in the Derivatives Policy section.

Investments denominated in foreign currencies are translated into U.S. Dollars using the last reported exchange rate.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value.

#### **Investment Income (Loss)**

The Trustee maintains separate records of each plan's proportionate share in the Master Trust's investment accounts. The Plan's share of investment income (loss) and net appreciation (depreciation) in the fair value of investments of the Master Trust is included in the Statements of Changes in Net Assets Available for Benefits as Master Trust investment income (loss). The net appreciation (depreciation) in the fair value of investments consists of the realized gains (losses) and the change in unrealized appreciation (depreciation) on those investments.

Under the Master Trust Agreement, each plan's assets are jointly invested. The Plan uses the unit participation method to calculate the Plan's interest in the Master Trust. Under this method, contributions made to and benefits paid from the Master Trust result in increases or decreases in units of participation. All Master Trust income or loss results in a change in unit value.

Dividends are recorded on the ex-dividend date and interest income is accrued as earned. All security transactions are recorded on the trade date. Premiums and discounts on debt securities are amortized to maturity. Gains or losses on sales of securities are based on average cost.

#### **Derivatives Policy**

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to: (1) manage a portion of the Master Trusts' portfolio against exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or capturing value disparities between financial instruments. The Master Trust may utilize both exchange traded derivatives such as equity and fixed income futures and option contracts and over-the-counter ("OTC") derivatives such as forward foreign currency exchange contracts ("forward currency contracts") and swaps. Select major financial institutions are used in derivatives transactions. When engaging in OTC derivatives, there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. As needed for material exposures, the Master Trust manages these exposures through credit approvals, limits, monitoring procedures, and, to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. The Master Trust does not anticipate nonperformance by counterparties to these contracts.

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

#### **Futures Contracts**

The Master Trust was invested in futures contracts during the years ended December 31, 2024 and December 31, 2023. A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated futures exchange.

The Master Trust may use equity index, fixed income, interest rate, foreign exchange, and commodities futures contracts to manage exposure to the market. Buying futures contracts increases the Master Trust's exposure to the underlying instrument. Selling futures contracts decreases the Master Trust's exposure to the underlying instrument held or mitigates the risk of changes in fair value of other investments held in the Master Trust.

## Notes to Financial Statements

### As of December 31, 2024 and 2023

Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. The accumulated balance of such receipts or payments is recorded within "Cash held at broker for derivative contracts" on the Statement of Net Assets for the Master Trust. The Master Trust will also record an unrealized gain or loss on futures contracts, which is calculated as the difference between the notional cost and the notional market value of open futures contracts. The unrealized gains or losses on are recorded within "Unrealized appreciation (depreciation) on futures contracts" on the Statement of Net Assets for the Master Trust.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that the change in the value of the futures contract may not correlate exactly with the change in value of the corresponding investments held in the Master Trust.

At December 31, 2024, U.S. Government Bonds with a par value of \$334,269,700 (fair value of \$253,418,258) and Corporate Bonds with a par value of \$7,013,000 (fair value of \$6,055,732) were pledged by the Master Trust as collateral for open futures contracts. At December 31, 2024, a cash balance of \$117,451,113 was pledged by the Master Trust to cover margin requirements for open futures contracts.

At December 31, 2023, U.S. Government Bonds with a par value of \$211,640,000 (fair value of \$179,413,204) and Corporate Bonds with a par value of \$6,360,000 (fair value of \$5,745,287) were pledged by the Master Trust as collateral for open futures contracts. At December 31, 2023, a cash balance of \$4,102,683 was pledged by the Master Trust to cover margin requirements for open futures contracts

The effect of futures contracts on the Statement of Net Assets for the Master Trust as of December 31, 2024 and December 31, 2023 are as follows:

	<b>Master Trust</b>	<b>Master Trust</b>
	<b>December 31, 2024</b>	<b>December 31, 2023</b>

**Forward Currency Contracts**

The Master Trust was invested in forward currency contracts during the years ended December 31, 2024 and December 31, 2023. A forward currency contract is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to manage a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies, and the difference between contract value and market value is recorded within "Other derivatives" on the Statement of Net Assets for the Master Trust. When the forward exchange contract is settled, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was entered into and the value at the time it was settled or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset, and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to manage currency exposure, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

**Option Contracts**

The Master Trust was invested in option contracts during the years ended December 31, 2024 and December 31, 2023. The market value of option contracts held in the Master Trust is recorded within "Other derivatives" on the Statement of Net Assets of the Master Trust. An option contract is a contract in which the writer of the option contract grants the buyer of the option contract the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain option contracts, including option contracts on indices, will require cash settlement by the Master Trust if the option contract is exercised. The Master Trust may enter into put or call option contracts in order to manage potential adverse price

## Notes to Financial Statements

### As of December 31, 2024 and 2023

movements in the value of the portfolio assets, as a temporary substitute for selling selected investments, to lock in the purchase price of a security or currency that it expects to purchase in the near future, as a temporary substitute for the purchase of selected investments, and/or to enhance potential gain.

When the Master Trust purchases or writes an option contract, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option contract purchased or written. Option contracts purchased or written are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and ask prices or at the most recent ask price (bid for purchased option contracts) if no bid and ask price are available. OTC purchased or written option contracts are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is settled.

If the Master Trust writes a covered call option contract, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option contract period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option contract, it accepts the risk of a decline in the value of the underlying security below the exercise price. OTC option contracts have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased option contracts is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts and a change in value of the option contract may not correlate exactly with changes in the value of the underlying security.

#### Swaps

The Master Trust was invested in swap contracts during the years ended December 31, 2024 and December 31, 2023. The Master Trust may invest in interest rate swap contracts, credit default swap contracts, and currency swap contracts. The market value of swap contracts held in the Master Trust is recorded within "Other derivatives" on the Statement of Net Assets of the Master Trust.

The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash, at which time both the value of the index or security and the specified variable interest rate are reset for the next settlement period. During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Master Trust in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through the valuation date. Changes in the value of the swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

The Master Trust may invest in credit default swap contracts. Credit default swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to provide a level of credit protection for a commitment to receive interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. Providing credit protection to a counterparty tends to increase a Master Trust's exposure to the underlying instrument. Receiving credit protection from a counterparty tends to decrease a Master Trust's exposure to the underlying instrument held by the Master Trust or hedge the fair value of other Master Trust investments. Credit default swap contracts may have a term of one to ten years, but typically require periodic interim settlement in cash. During the period that the credit default swap contract is open, the contract is marked-to-market in accordance with the terms of the contract based on the current interest rate spreads and credit risk of the referenced obligation of the underlying issuer and interest accrual through valuation date. Changes in the value of the credit default swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

Entering into a swap contract involves, to varying degrees, elements of credit, market and interest rate risk in excess of the amounts reported in the statement of net assets available for benefits. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contract. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Trustee of the Trust. The Master Trust bears the market risk arising from any change in index or security values or interest rates.

## **Notes to Financial Statements**

### **As of December 31, 2024 and 2023**

#### **Note 6 – Termination Policies**

The Company has not expressed any intent to terminate the Plan or discontinue its contributions. However, in the event the Plan is discontinued:

- (a) The assets comprising the Plan, including the net income (loss) of the Plan shall be revalued at market by the Trustee.
- (b) The Plan provides that the net assets of the Plan shall be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.
- (c) To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (the "PBGC") to participants, up to specified limitations, as described in ERISA.

Whether all participants receive their full or partial benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

The Company may terminate the Plan in whole or in part at any time. This summary of termination priorities is provided for general information purposes only. Participants should refer to the Plan Document for more information.

#### **Note 7 - Certain Transactions Involving Related Parties and Parties-in-Interest**

BNY, as the Trustee and Custodian of the Plan, incurs expenses in connection with these services to the Plan and Master Trust, and is therefore a party-in-interest with respect to the Plan. Certain investments within the Master Trust were advised by or affiliated with BNY. The Plan Sponsor, RTX, is a party-in-interest with respect to the Plan and incurs expenses in connection with the administration of the Plan and the Master Trust.

The Plan also incurs certain administrative expenses paid to parties-in-interest.

All of these transactions either fall outside the scope of or are exempt from ERISA's prohibited transaction rules.

#### **Note 8 - Tax Status**

The Commonwealth of Puerto Rico Treasury Department ruled on November 12, 2015 that the Plan, as then in effect, qualified under Section 1081.01 of the Puerto Rico Internal Revenue Code of 2011, as amended (the Code), and that the trust established thereunder is not subject to tax under Puerto Rico income tax law. The Plan is currently designed and operated in compliance with the requirements of Section 1165(a) of the Puerto Rico Internal Revenue Code of 1994, as amended. The assets of the Plan are held in a Master Trust. Section 1022(i)(1) of ERISA provides that a pension trust is exempt from income tax under Section 501(a) of the Internal Revenue Code if all of the plan's participants are residents of Puerto Rico. Management believes that the Plan and Master Trust are designed and are currently being operated in compliance with applicable tax regulations. Therefore, no provision for income taxes has been included in the Plan's financial statements.

The Plan adopted the provisions of uncertain tax positions that provide criteria for the recognition, measurement, presentation, and disclosure of uncertain tax positions. The Plan may from time to time hold investments that give rise to certain tax liabilities. Based upon management's assessment, the Plan has not recognized any tax liabilities at December 31, 2024 and 2023. The Plan is subject to examinations by taxing jurisdictions; however, there are currently no audits for any tax period in progress. The Plan Administrator believes the Plan is no longer subject to tax examination for years prior to 2020.

#### **Note 9 - Risks and Uncertainties**

The Plan financial statements are based on the application of GAAP, which requires the Plan to make estimates and assumptions about future events that affect the amounts reported in financial statements and the accompanying notes.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics.

**Sundstrand de Puerto Rico Pension Plan**  
**Notes to Financial Statements**  
**As of December 31, 2024 and 2023**

Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. The investments of the Plan, which are held in the Master Trust, are exposed to various risks, such as interest rate, currency, market, and credit risks. See Note 5 for additional information with respect to investment risk.

**Note 10 - Subsequent Events**

The Plan has evaluated subsequent events and transactions subsequent to December 31, 2024 through the date the Plan's financial statements were available to be issued, September 24, 2025.

## Schedule SB, Part V Statement of Actuarial Assumptions/Methods

### Economic Assumptions

#### Interest rate basis

- Applicable month September 2023
- Interest rate basis Segment Rates from 4th Month Preceding Valuation Date

Interest rates	Reflecting Stabilization	Not Reflecting Stabilization
First segment rate	4.75%	3.62%
Second segment rate	4.87%	4.46%
Third segment rate	5.59%	4.52%
Effective interest rate	5.28%	4.48%

#### Annual rates of increase

- Compensation 4.50%
- Future Social Security wage bases N/A
- Statutory limits on compensation N/A

Crediting rate on cash balance accounts N/A

**Plan-related expenses** \$250,000

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP and the PBGC 4010 FS.

## Methods

<b>Valuation date</b>	First day of plan year
<b>Funding target</b>	Present value of accrued benefits as required by regulations under IRC §430
<b>Target normal cost</b>	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year as required by regulations under IRC §430
<b>Decrement Timing</b>	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
<b>Actuarial value of assets</b>	<p>Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2023 plan year.)</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.</p>
<b>Benefits not valued</b>	<p>All benefits described in the supplemental Summary of Plan Provisions were valued. WTW has reviewed the plan provisions with RTX and, based on that review, is not aware of any significant benefits required to be valued that were not.</p> <p>The plan pays small benefits (with a present value up to \$1,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the form of payment described above.</p>

## Sources of Data and Other Information

RTX, through its third party administrator, furnished participant data as of 1/1/2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with RTX and its third party administrator, missing or inconsistent data were reviewed, and certain data assumptions were reflected as documented in a data action plan. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

## Assumptions Rationale - Significant Economic Assumptions

<b>Funding discount rate</b>	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
<b>Rates of increase in compensation, future Social Security Wage bases, and statutory limits on compensation</b>	Assumed increases were chosen by the plan sponsor and, as required by U.S. GAAP they represent an estimate of future experience. We believe that the selected assumption does not significantly conflict with what would be reasonable.
<b>Plan-related expenses</b>	Administrative expenses are estimated based on historical experience and future expectation.

## Assumptions Rationale - Significant Demographic Assumptions

<b>Healthy/Disabled Mortality</b>	Assumptions used for funding purposes are as prescribed by IRC §430(h).
<b>Termination / Retirement / Disability</b>	The disability assumptions were selected by RTX based on prior reviews of participant experience data. An experience study prepared in 2015 was the basis for the updated termination and retirement assumptions.
<b>Benefit commencement date for deferred benefits</b>	The assumptions were selected by RTX based on an experience study prepared in 2015.
<b>Form of payment</b>	The form of payment was set by RTX based on a review of actual participant elections.
<b>Marital Assumptions</b>	
<ul style="list-style-type: none"><li>• Percent married</li></ul>	The assumed percentage married was set based on RTX's observations regarding its employee population.

## Schedule SB, Part V Statement of Actuarial Assumptions/Methods

### Economic Assumptions

#### Interest rate basis

- Applicable month September 2023
- Interest rate basis Segment Rates from 4th Month Preceding Valuation Date

Interest rates	Reflecting Stabilization	Not Reflecting Stabilization
First segment rate	4.75%	3.62%
Second segment rate	4.87%	4.46%
Third segment rate	5.59%	4.52%
Effective interest rate	5.28%	4.48%

#### Annual rates of increase

- Compensation 4.50%
- Future Social Security wage bases N/A
- Statutory limits on compensation N/A

Crediting rate on cash balance accounts N/A

**Plan-related expenses** \$250,000

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP and the PBGC 4010 FS.

## Methods

<b>Valuation date</b>	First day of plan year
<b>Funding target</b>	Present value of accrued benefits as required by regulations under IRC §430
<b>Target normal cost</b>	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year as required by regulations under IRC §430
<b>Decrement Timing</b>	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
<b>Actuarial value of assets</b>	<p>Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2023 plan year.)</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.</p>
<b>Benefits not valued</b>	<p>All benefits described in the supplemental Summary of Plan Provisions were valued. WTW has reviewed the plan provisions with RTX and, based on that review, is not aware of any significant benefits required to be valued that were not.</p> <p>The plan pays small benefits (with a present value up to \$1,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the form of payment described above.</p>

## Sources of Data and Other Information

RTX, through its third party administrator, furnished participant data as of 1/1/2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with RTX and its third party administrator, missing or inconsistent data were reviewed, and certain data assumptions were reflected as documented in a data action plan. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

## Assumptions Rationale - Significant Economic Assumptions

<b>Funding discount rate</b>	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
<b>Rates of increase in compensation, future Social Security Wage bases, and statutory limits on compensation</b>	Assumed increases were chosen by the plan sponsor and, as required by U.S. GAAP they represent an estimate of future experience. We believe that the selected assumption does not significantly conflict with what would be reasonable.
<b>Plan-related expenses</b>	Administrative expenses are estimated based on historical experience and future expectation.

## Assumptions Rationale - Significant Demographic Assumptions

<b>Healthy/Disabled Mortality</b>	Assumptions used for funding purposes are as prescribed by IRC §430(h).
<b>Termination / Retirement / Disability</b>	The disability assumptions were selected by RTX based on prior reviews of participant experience data. An experience study prepared in 2015 was the basis for the updated termination and retirement assumptions.
<b>Benefit commencement date for deferred benefits</b>	The assumptions were selected by RTX based on an experience study prepared in 2015.
<b>Form of payment</b>	The form of payment was set by RTX based on a review of actual participant elections.
<b>Marital Assumptions</b>	
<ul style="list-style-type: none"><li>• Percent married</li></ul>	The assumed percentage married was set based on RTX's observations regarding its employee population.

## 6. Vested Termination

- a. Eligibility: Termination of employment after completing five years of service, but before becoming eligible for early, normal or postponed retirement.
- b. Benefit: The accrued benefit at termination payable monthly commencing on the Normal Retirement Date. A participant can commence payment of the benefit on the first day of any month following the attainment of age 60 and the completion of 10 years of service, with the benefit reduced 6% per year for each year the benefit commencement date precedes the Normal Retirement Date.

## 7. Pre-retirement Death Benefits

- a. Eligibility: If a vested participant (or former participant) dies before receiving a retirement benefit, the following survivor benefits are payable:
- b. Benefit:
  - (i) If the participant dies after completing 10 years of service, a 55% contingent annuity benefit is payable and payment commences immediately, reduced as described in 4.b. above, or if the contingent annuitant is the spouse, as late as when the participant would have attained age 65.
  - (ii) If the participant dies after becoming vested and is married, but does not meet the requirements of (i) above, a 55% spouse's benefit is payable, and payment commences when the participant would have attained age 60, reduced as described in 6.b. above, or age 65.

## 8. Form of Payment

- a. Normal Form:
  - (i) Life annuity with 60 monthly payments guaranteed for unmarried participants
  - (ii) An actuarially reduced 55% joint and survivor annuity for married participants
- b. Optional Forms:
