**Schedule SB, Part V – Statement of Actuarial Assumptions/Methods****Attachment to 2024 Form 5500 Schedule SB**

EIN/PN 52-2004847/310

**Durez Kenton Union Pension Plan****Actuarial Methods for Funding and Present Value of Accrued Benefits****Liability Valuation Method****Funding Target and Target Normal Cost as Defined in PPA**

The Funding Target is defined to be the present value of the benefits accrued or earned at the valuation date. The earned benefits include retirement-type benefits and ancillary benefits (1.430(d)-1(c)(1)(i)). If the amount of a benefit that is expected to be paid is neither a function of the accrued benefit at the time the benefit is expected to be paid nor a function of the participant's service at that time, then the portion of the benefit taken into account for purposes of determining the Funding Target for a plan year is based on the proportion of a participant's service as of the first day of the plan year relative to the service the participant will have when the participant decrements. The portion of the benefit that is taken into account in the Target Normal Cost is the increase in the proportional benefit for the plan year (1.430(d)-1(c)(1)(ii)(C)). The determination of the Funding Target and Target Normal Cost of a Plan for a plan year is not permitted to take into account any limitations or anticipated limitations under section 436 (1.430(d)-1(c)(1)(iii)).

The Target Normal Cost is the present value of all the benefits expected to accrue or to be earned during the year (benefits attributable to services performed in a prior year that are increased by reason of a compensation increase in the current year are treated as having accrued during the current year). Plan administrative expenses paid (or expected to be paid) from Actuarial Value of Assets for a plan year are not reflected in the determination of a plan's Funding Target for that plan year (1.430(d)-1(c)(2)), but are reflected in the determination of a plan's Target Normal Cost.

Generally if insurance contracts are held by the Plan, they are included in Actuarial Value of Assets and the related benefits are included in the liability. In the case of benefits that are funded through insurance contracts purchased from an insurance company licensed under the laws of a State, the Plan is permitted to exclude the benefits from the liability and the insurance policy from the assets, but only to the extent that the right to receive benefits is an irrevocable contractual right based on premiums paid prior to the valuation date (1.430(d)-1(c)(3)).

The determination of a Plan's Funding Target and Target Normal Cost for a plan year is based on Plan provisions that are adopted no later than the valuation date for the plan year and that become effective during that plan year. Section 412(d)(2) applies for purposes of determining whether a Plan amendment is treated as having been adopted on the first day of the plan year (including a Plan amendment adopted within two and one half months after the close of the plan year) (1.430(d)-1(d)).

For maximum deductible purposes, the cushion amount is equal to the sum of 50 percent of the Funding Target for the plan year and the amount the Funding Target for the plan year would increase if the Plan were to take into account increases in compensation which are expected to occur in succeeding plan years. If the Plan does not base benefits for service to date on compensation, increases in benefits which are expected to occur in succeeding plan years (determined on the basis of the average annual increase in benefits over the six preceding plan years) are taken into account in lieu of expected increases in compensation. For plans that have less than 100 participants, increases in benefits for highly compensated employees as a result of Plan amendments within the last two years are excluded from the calculation of the cushion amount.

**EIN/PN 52-2004847/310**

**Durez Kenton Union Pension Plan**

**Actuarial Methods for Funding and Present Value of Accrued Benefits**

**Asset Valuation Method**

Actuarial Value of Assets are determined using the two-year averaging method as set forth in Notice 2009-22. Under this method, the Actuarial Value of Assets is the average of the fair market value of the assets on the valuation date and the adjusted fair Market Value of Assets determined as of the two prior determination dates. The adjusted fair Market Value of Assets as of a determination date is the Market Value of Assets on that date, increased by contributions that were not included in the plan's asset balance on the determination date and decreased by benefits and administrative expenses between that determination date and the valuation date plus an adjustment for expected earnings as the sum of the expected earnings separately determined for each period between the determination date and the valuation date. The calculated value is then further constrained to be no more than 110% of the Market Value of Assets plus discounted receivable contributions and no less than 90% of the Market Value of Assets plus discounted contributions.

**Procedures**

Financial and census data: Financial data was submitted by the Trustee and census data was submitted by the employer. Information provided was reviewed for internal consistency and we have no reason to doubt its substantial accuracy.

No benefits of materiality were excluded from the valuation of the liabilities.

The limitations of the Internal Revenue Code 415(b) and 401(a)(17) have been incorporated into our calculations.

No liability is included for participants who terminated without vesting in their benefit prior to the valuation date.

The employer provided us with the data on its employees as of the valuation date, but only those employees who have completed the Plan's eligibility requirements are included in the valuation of liabilities.

**Actuarial Present Value of Accumulated Plan Benefits (ASC 960)**

For active participants, the accrued pension benefits as of the valuation date and payable from the assumed retirement age were determined based on actual plan compensation history for each participant. For inactive participants, accrued benefits were either supplied by the Company or estimated. The Actuarial Present Value of Accumulated Plan Benefits was determined by multiplying the accrued pension benefits by single premium cost factors based on the applicable actuarial assumptions for accrued benefits.

**Model Use**

Actuarial Standard of Practice No. 56 – Modeling requires disclosure of certain information regarding the actuary's use of models when issuing actuarial reports for work performed on or after October 1, 2020. For this valuation, the liability calculations were determined using industry-leading defined benefit valuation software developed and maintained by a third-party vendor. The model was designed specifically for the measurement of defined benefit pension liabilities and the actuary has updated the applicable parameters for the specific plan provisions and assumptions selected for this valuation.

An Excel-based model that calculates a supportable long-term rate of return on assets with inputs of a target asset allocation and publicly available capital market assumptions by asset class was used to assess the reasonableness of the long-term rate of return assumption.

**Method Changes Since Last Year**

There were no method changes since the prior valuation.

**Mortality**

Funding Target: As defined in §1.430(h)(3)-1(a)(2). This table is based on the annuitant and non-annuitant static mortality rates for 2023 for males and females from IRS §1.430(h)(3)-1(e).

ASC 960: Mortality based upon the Pri-2012 mortality tables issued by the Society of Actuaries in October 2019 with blue collar adjustments. Separate tables were utilized for males and females. Furthermore, tables were separated between class of participant: employee, primary annuitant, and contingent survivor. In valuing Joint & Survivor annuities, contingent survivor rates were applied to the secondary annuitant both before and after the assumed or actual death of the primary annuitant. Mortality improvement utilized the MP-2021 projection scale on a generational basis.

---

Disabled Participants:

Funding Target: GATT disability mortality table after 12/31/1994 for males and females.

ASC 960: Mortality based upon the Pri-2012 disability mortality tables issued by the Society of Actuaries in October 2019. Separate tables were utilized for males and females. Furthermore, tables were separated between class of participant: employee, primary annuitant, and contingent survivor. In valuing Joint & Survivor annuities, contingent survivor rates were applied to the secondary annuitant both before and after the assumed or actual death of the primary annuitant. The rates were not adjusted for collar or amounts. Mortality improvement utilized the MP-2021 projection scale on a generational basis.

## Durez Kenton Union Pension Plan

## Plan Provisions Summary

Early Retirement Benefit	The early retirement benefit is equal to the accrued benefit at retirement reduced by (a) or (b) below (a) 3% for each year that benefit commencement precedes age 65.  (b) If the participant has 15 or more years of Eligibility Service, the reduction is 3% for each year that benefit commencement precedes age 62.
Vesting Schedule	100% after five years of Continuous Service or age 65.
Vested Benefits	The vested retirement benefit is equal to the accrued benefit at the date of termination, reduced for early commencement as under early retirement.
Disability Retirement Date	15 years of Eligibility Service and permanent disability.
Disability Retirement Income Benefit	Equal to the accrued benefit at the date of termination. This benefit commences at the Disability Retirement Date and is unreduced for early commencement.
Preretirement Surviving Spouse's Benefit	The spouse of a married vested member who dies prior to the commencement of benefits will receive a benefit equal to the annual benefit that would have been received had the participant retired just before death and elected a 50% joint and survivor annuity. This is payable on the date the participant would have been eligible for retirement, reduced for early retirement commencements as under early retirement.
Automatic Spouse's Benefit	The spouse of a married active member who dies while in active service after attainment of age 55 and 15 years of Eligibility Service is entitled to 50% of the early retirement income that would have been received had the participant retired just before death with a life annuity option. This benefit is reduced 2% for each year in excess of five years that the spouse is younger than the participant but not less than the actuarial equivalent. In the event that a spouse qualifies for both the preretirement surviving spouse's benefit and the automatic spouse's benefit, the spouse would receive the larger benefit.
Normal Form of Benefit	<u>Married participants</u> : Qualified 50% joint and survivor annuity  <u>Single participants</u> : Life annuity
Actuarial Equivalence	7% interest and the UP84 mortality table
