**Actuarial Methods**

Actuarial Cost Method

The actuarial cost method used to determine the Plan's funding requirements is the Unit Credit method. Under this method, the funding target is the actuarial present value of accrued benefits as of the valuation date for all participants. The target normal cost is the actuarial present value of benefits expected to accrue in the current Plan year for each active participant under the assumed retirement age.

Asset Valuation Method

Plan assets used to determine the Plan's funding requirements are equal to the market value of assets.
