Schedule SB, Line 22 – Weighted Average Retirement Age

All participants were assumed to retire at the plan's Normal Retirement Age, which is the later of attainment of age 65 or the 3rd anniversary of the date a participant commenced participation in the plan. Participants who remain employed beyond their Normal Retirement Age are assumed to retire one (1) year after the valuation date.

The Weighted Average Retirement Age was determined by multiplying each participant's assumed retirement age by the sum of his or her Funding Target plus Target Normal Cost. The sum of each of these products was then divided by the total Funding Target plus Target Normal Cost to obtain the average assumed retirement age. The average assumed retirement age was calculated and then rounded to the nearest whole number to determine the Weighted Average Retirement Age.

For purposes of Line 22, the weighted average retirement age of all the participants is 65.
