Independent Auditors' Report

To the Plan Participants and Plan Administrator
PepsiCo Employees Retirement Plan H:

Opinion

We have audited the financial statements of PepsiCo Employees Retirement Plan H (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, the related statements of changes in net assets available for benefits for the years then ended, the statement of accumulated plan benefits as of December 31, 2023, and the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2024 and 2023, the changes in its net assets available for benefits for the years then ended, the accumulated plan benefits of the Plan as of December 31, 2023, and the changes in its accumulated plan benefits for the year then ended, in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Notes to Financial Statements

December 31, 2024 and 2023

Note 1 - Description of the Plan

The following description of the PepsiCo Employees Retirement Plan H (the Plan or Plan H) provides only general information. Participants should refer to the Plan document for a complete description of the Plan's provisions.

Effective December 31, 2024, a portion of Plan I was transferred to Plan H. The accrued benefits offered to these participants were unchanged. Assets of \$20 million were transferred from Plan I to the Plan in 2025.

General

The Plan is a defined benefit plan primarily covering certain active hourly, commission, and collective bargaining unit employees of PepsiCo, Inc. and certain of its subsidiaries (the Company). Eligible employees within a group or class so designated in the Plan document are eligible to participate in one of the benefit structures under the Plan. In general, benefits for members of collective bargaining units are based on the terms of the applicable collective bargaining agreement. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA), the Internal Revenue Code of 1986, as amended (Code) and the Puerto Rico Internal Revenue Code of 2011, as amended (PR Code). The Plan is generally open to newly hired or rehired eligible hourly employees. Effective January 1, 2023, certain newly hired hourly employees will not be eligible to participate in the Plan and instead participate in a defined contribution plan.

Administration

The Company maintains sponsorship of the Plan and the overall responsibility for administering the Plan rests with the PepsiCo Administration Committee (Plan Administrator). The Plan Administrator has appointed Fidelity Workplace Services, LLC as the recordkeeper for the Plan. The PepsiCo Investment Committee (PIC) is responsible for the investment strategy and asset allocation, oversees investment managers, monitors investment performance and ensures minimum funding requirements are met. The PIC has appointed The Northern Trust Company as the trustee of the PepsiCo, Inc. Master Trust (U.S. Master Trust) and Banco Popular de Puerto Rico as trustee of the Puerto Rican PepsiCo, Inc. Retirement Plans Trust (PR Master Trust).

Contributions

The Plan is solely funded by Company contributions. The Company contributes to the Plan based on actuarially determined funding requirements and applicable tax regulations that provide for current tax deductions for the Company and taxation to the participant upon receipt of benefits. No Company contributions were required in 2024 and 2023 to meet the minimum funding requirements of ERISA. The Company made no discretionary contributions for the 2024 plan year and \$275 million to the Plan for the 2023 plan year (\$150 million paid in 2024).

Vesting

In general, participants vest in their benefits after five years of service (after three years of service if benefit includes the cash balance formula). A participant becomes immediately vested in the event of a disability or death.

PEPSICO EMPLOYEES RETIREMENT PLAN H

Notes to Financial Statements

December 31, 2024 and 2023

Retirement Age

In general, vested participants are entitled to an unreduced benefit if they elect to begin benefit payments at the normal retirement age of 65. Participants may be eligible for early retirement, but the benefit payment amount may be reduced to reflect an earlier payment date.

Disability and Death Benefits

Certain disabled participants are eligible for retirement benefits, as defined by the Plan. In certain circumstances, designated beneficiaries are eligible for survivor benefits.

Changes in Plan Provisions

In 2024 and 2023, maximum compensation amounts and maximum benefit amounts under the Puerto Rico Treasury Department and the Internal Revenue Service (IRS) rules were updated.

In addition, in 2024 and 2023, the Plan adopted multiplier increases for certain employees as part of an annual review and as collective bargaining agreements were re-negotiated.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation

The financial statements are prepared under the accrual basis of accounting. The preparation of the financial statements in conformity with U.S. generally accepted accounting principles (U.S. GAAP) requires the Plan's management to make estimates and assumptions that affect the reported amounts of assets, liabilities, additions to net assets, deductions from net assets, the disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates and assumptions.

Investments Valuation and Loss/Income Recognition

The Plan retains an interest in the U.S. Master Trust and the PR Master Trust (collectively, the Master Trusts), which hold all the investments. These investments are recorded at fair value. The Master Trusts' real estate investments are held in investment funds, which are recorded at their net asset value.

Purchases and sales of securities are recognized on the trade date. Interest income is recorded as earned and dividend income is recorded as of the ex-dividend date.

Payment of Benefits

Benefits are recorded when paid. Depending on a participant's election, pension benefits are generally distributed in the form of various annuities or, in certain cases, a lump sum. The PR Master Trust holds the assets used to pay benefits for participants in Puerto Rico and the U.S. Master Trust holds the assets used to pay benefits for all other participants.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are attributable to employee service rendered and expected to be paid to current employees, terminated vested participants, retired participants, beneficiaries of deceased participants and former employees from divested groups. Benefits under the Plan depend on the benefit structure that the participant is eligible for and are generally based on either the employee's highest five consecutive calendar years of average monthly compensation (subject to maximum limitations), accrual of pay and interest credits, or a flat dollar multiplier for each year of service, as well as age at benefit

PEPSICO EMPLOYEES RETIREMENT PLAN H

Notes to Financial Statements

December 31, 2024 and 2023

initiation. Benefits for members of collective bargaining units are based on the terms of each collective bargaining agreement. Benefits are limited under federal tax law.

The actuarial present value of accumulated plan benefits is determined by the Plan's actuaries, Mercer LLC, by applying actuarial assumptions to reflect the probability of payment and the time value of money between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of December 31, 2023 for the Plan are described below. The actuarial assumptions are based on the presumption that the Plan will be ongoing. If the Plan were to be terminated, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 3 - Plan Termination

Although it has not expressed its intent to do so, the Company may terminate the Plan in accordance with ERISA, the Code and the PR Code. If the Plan is terminated, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- Future annuity payments to former employees or their beneficiaries who have been receiving or were eligible to receive annuity payments for at least three years. The amount is limited to the

PEPSICO EMPLOYEES RETIREMENT PLAN H

Notes to Financial Statements

December 31, 2024 and 2023

lowest benefit that was payable or would have been payable during the last five years before termination. These amounts are insured by the Pension Benefit Guaranty Corporation (PBGC);

- Other vested benefits insured by the PBGC;
- All other vested benefits not insured by the PBGC; and
- All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. There is a statutory ceiling on the PBGC's guarantee of a participant's monthly benefit that is adjusted yearly. In 2025, the statutory ceiling is \$7,432 (\$7,108 for 2024) per month for a single-life annuity for a participant who is age 65 at the time of retirement or plan termination. For early or late retirees and those who elect other payment options, the statutory ceiling is decreased or increased accordingly.

Note 4 - Master Trusts

The Plan's assets are combined with the assets of other Company-sponsored pension plans in the Master Trusts to maximize administrative efficiencies. Investment income, investment management fees and other direct expenses relating to the Master Trusts are allocated to the individual pension plans based upon their proportion of month-end balances. Separate recordkeeping is maintained for each plan's share of each investment within the Master Trusts. Contributions, benefit payments and expenses are specifically identified for each plan.

Investment income/(loss):

Total investment income/(loss)	\$ 45	\$ 1	\$ 1,177	\$ 5

(a) Includes securities lending income of \$0.5 million for the year ended December 31, 2024.

The Master Trusts hold investments in cash and cash equivalents, common and preferred stocks, commingled funds, fixed income securities (including government securities, corporate bonds and mortgage-backed securities), securities lent, contracts with insurance companies, real estate commingled funds and futures and forward contracts. Cash and cash equivalents are highly liquid investments with original maturities of less than 90 days. Common and preferred stocks and commingled funds hold domestic and international equities. Government securities consist of U.S. treasuries, state and local government bonds, debt secured by foreign governments and government-backed mortgages. Corporate bonds are debt securities issued by U.S. and foreign corporations. Mortgage-backed securities are debt instruments issued by large financial institutions. Real estate commingled funds hold income-producing retail, office and other commercial property. We also participate in securities lending programs to generate additional income by loaning plan assets to borrowers on a fully collateralized basis, including both cash and non-cash collateral (see Note 6 for further information).

In the normal course of business, the Master Trusts enter into transactions in various derivative financial instruments with off-balance-sheet risk, such as futures and forward contracts, to manage interest rate and foreign currency exposure, respectively, and enhance the overall return of the Master Trusts' net assets. Futures contracts represent commitments to purchase or sell securities at a future date and at a specified price and consist of exchange-traded U.S. Treasury notes and bonds and U.S. and international equity indices. The Master Trusts settle the change in fair value of the futures contracts with brokers on a daily basis. Forward contracts consist of currency forwards and are used to manage foreign exchange rate risks associated with certain investments. The Plan presents derivative assets and liabilities net in investments at fair value in the statements of net assets available for benefits and in the fair value measurement framework.

Derivatives involve varying degrees and types of risks, including credit and/or market risks, which may be in excess of the fair value of the derivative amounts recognized in the net assets of the Master Trusts. Credit risk represents the potential loss to the Master Trusts due to possible nonperformance by obligors and counterparties of the terms of their contracts. Market risk represents the potential loss to the Master Trusts due to fluctuations in the value of the derivatives caused primarily by changes in interest rates, securities or foreign exchange rates, or a combination thereof. There were no derivative contracts accounted for as hedging instruments during 2024 and 2023.

Note 5 - Fair Value Measurements

The accounting guidance on fair value measurements defines fair value, establishes a framework for measuring fair value and identifies required disclosures about fair value measurements. The fair value framework requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets and liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant judgment.

Notes to Financial Statements

December 31, 2024 and 2023

- (a) Includes securities loaned to borrowers under the securities lending program with fair value of \$603 million as of December 31, 2024.
- (b) Includes short-term investment assets classified as Level 2. Level 1 includes cash of \$22.5 million and \$7.5 million as of December 31, 2024 and 2023, respectively, that is restricted in use.
- (c) Includes common stock and commingled funds. Common stock is based on quoted market prices in active markets. Commingled funds are based on the fair value of the investments owned by these funds that track U.S. large, mid-cap and small company indices or various non-U.S. equity indices.
- (d) Based on quoted bid prices for comparable securities in the marketplace and broker/dealer quotes in active markets.
- (e) Based on the fair value of the contracts as determined by the insurance companies using inputs that are not observable. The purchases in Level 3 were not significant in the years ended December 31, 2024 and 2023.
- (f) Based on the net asset values provided by these underlying funds as a practical expedient. All core funds, except for Townsend RE Alpha Fund I, L.P. (TREA), make quarterly distributions subject to availability of cash and have notice periods ranging from 45 to 90 days. TREA is a closed-end fund with limited available liquidity. The Trust does not receive distributions from the private credit funds.

Note 6 - Securities Lending

During 2024, the Plan entered into a securities lending program with the Trustee, as Agent. Securities lending is an investment management enhancement that utilizes certain existing securities of the Master Trust to earn additional income. The Master Trust maintains full ownership rights to the securities loaned and accordingly, the loaned securities are classified as investments. The Agent manages credit exposure arising from these lending transactions by, in appropriate circumstances, entering into master netting agreements and collateral agreements with third party borrowers that provide the Plan, in the event of default, the right to net a third party borrower's rights and obligations under such agreement and liquidate and set off collateral against the net amount owed by the counterparty. The Trustee requires the borrowers, pursuant to a security loan agreement, to deliver cash or non-cash collateral of at least 102% of the then fair value of the loaned securities at loan initiation in order to secure each loan. For lending agreements collateralized by non-cash collateral, the Plan does not record the collateral as an asset or liability, since the collateral is not eligible to be sold or repledged. For lending agreements collateralized by cash collateral, the Plan does record the collateral as an asset or liability. The fair value of securities on loan was \$603 million as of December 31, 2024. The reported collateral included cash holdings of \$424 million as of December 31, 2024. The amount of income earned for the year ended December 31, 2024 was \$0.5 million.

Note 7 - Tax Status

The Plan Administrator believes the Plan is designed and currently being operated in compliance with the applicable requirements of the Code and the PR Code. The IRS issued a determination letter on October 24, 2023 stating that the Plan was designed in compliance with the Code. The PR Treasury issued a determination letter on January 26, 2024 stating that the Plan was designed in compliance with the PR Code.

The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. U.S. GAAP requires the Plan's management to evaluate uncertain tax positions taken by the Plan. The Plan Administrator has concluded that as of December 31, 2024 and 2023, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements.

Note 8 - Risks and Uncertainties

Contributions to the Plan and the actuarial present value of the accumulated plan benefits are determined on the basis of certain assumptions pertaining to interest, inflation, employee pay rates and demographic data. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and that the effect of such changes could be material to the financial statements.

The Master Trusts invest in various investment securities and derivatives that are exposed to risks and uncertainties, such as interest rate risk, credit risk, economic changes, political unrest, regulatory changes, foreign currency risk and overall market volatility. Such investments include securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage-backed securities, including securities backed by subprime mortgage loans. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates. The Master Trusts' exposure to a concentration of credit risk is partially mitigated by the diversification of investments. These risks and uncertainties could materially impact the amounts reported in the financial statements.

Note 9 - Related Party Transactions

There have been no known prohibited transactions with a party-in-interest.

Note 10 - Subsequent Events

The Plan has evaluated subsequent events through October 1, 2025, the date the financial statements were available to be issued and no additional disclosures were required.

Schedule SB, Part V — Summary of Actuarial Assumptions/Methods**Actuarial assumptions**

Economic assumptions	
Discount rate sponsor elections	
Segment rates or full yield curve	Full Yield Curve
417(e) lump sums	Liabilities are based on the underlying annuity used by the plan to determine the lump sum amount (“annuity substitution”), rather than valuing the lump sum payment. This annuity is valued based on funding interest rates rather than 417(e) rates, and current year 417(e) unisex mortality
Non-417(e) lump sums	Not applicable
Cash balance plans	
– Interest accumulation rate	4.50%
Whipsaw calculations	No
Annuity conversion	Not Applicable
Other economic assumptions	
Salary increases	See Table of Sample Rates
Flat-dollar benefit increase	None assumed
Social Security wage base	3.00% per year
Inflation	2.25% per year
Expected investment return	2022: 5.41% for Plan H (not limited by the 5.92% 2022 plan year third segment rate) 2023: 6.54% for Plan H, limited by the 5.74% 2023 plan year third segment rate
Expenses	\$16,600,000 added to the 2024 plan year normal cost for Plan H

Rationale for significant economic assumptions

- Discount Rates – Based on interest rates published by the IRS
- 417(e) lump sums – As prescribed by regulation
- Cash balance interest accumulation rate – Based on long term expectation for 30-year treasury returns based on the Mercer Capital Market Outlook
- Salary Increase – Based on a study of the most recent 5 years of salary increase experience and PepsiCo, Inc.’s future expectations
- Social Security Wage Base rate – Future Social Security wage base increases are assumed to be equal to the assumed inflation rate plus 75 bps, based on approximate historical spreads between the two rates
- Inflation – Based on long term expectations for the Mercer Capital Market Outlook, taking into account the current economic environment
- Expected Investment return – Based on the median simulated investment return using capital market assumptions published in Mercer Investment Consulting’s Capital Market Outlook for the plans’ current asset mix, net of expected investment expenses to be paid from plan assets
- Expense Assumption – Based on prior year administrative expenses (excluding PBGC premiums) adjusted by Mercer’s approximation of how workflow items may impact the remaining year’s expenses, added to estimated 2024 PBGC premiums

The percentage election of level income option for Legacy Hourly active retirements who are at or over age 62 or who are Legacy PepsiAmericas employees is instead allocated towards the single life annuity option. The level income option is valued using annuity substitution

For Legacy Hourly participants not eligible for the lump sum option, the form of payment election assumptions are redistributed proportionally through the other options

For active retirements, 10% of the assumptions for Legacy PepsiCo Hourly and 5% for Legacy Salaried are proportionally shifted to an age 62 commencement (or immediate if over age 62) single life annuity. For Legacy Hourly participants who are eligible for a free joint and survivor optional form, their annuity optional forms consist only of the 50% joint and survivor and there is no deferred to age 62 single life annuity election assumed

For cash balance participants with terminations on or after 1 year prior to the valuation date, 50% are assumed to commence immediately with the remainder commencing at age 62. For terminations earlier than 1 year prior to the valuation date, all are assumed to commence at age 62

For Legacy Hourly (other than cash balance) and Legacy Salaried current and future deferred vested participants with an age 65 normal retirement age, 20% for Legacy Hourly and 15% for Legacy Salaried of the assumed annuity elections are assumed to commence at age 62, with the remainder assumed to commence at age 65

Rationale for demographic assumptions

- Mortality – As prescribed by regulation
- Withdrawal, Retirement, Disability Incidence, and Form of Payment – Based on a review of experience over the 5 year period prior to the valuation date, and PepsiCo, Inc.'s future expectations

Schedule SB, Part V — Summary of Actuarial Assumptions/Methods

Actuarial Methods

Asset Methods

The asset valuation method is an average of the adjusted market value over the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

The value of assets is as reported by the plans’ trustee at December 31, 2023 and further adjusted for the following:

- The advance cash amounts transferred to the plans’ paying agent for the following January’s benefit payments.
- The discounted value of a 2023 plan year cash contribution of \$150,000,000 on January 19, 2024, made to Plan H.

The tables that follow summarize these adjustments.

Plan H		Plan Year Ending December 31, 2023
General Investments as reported by the Trustee	\$	4,117,112,413
January 1 benefits not included in reported year end balances		6,270,935
Subtotal (prior to receivables)	\$	4,123,383,348
Discounted receivable employer contributions		149,639,803
Total Adjusted Assets	\$	4,273,023,151

Schedule SB, Part V — Summary of Actuarial Assumptions/Methods

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** Fidelity provides us with data on all employees as of the valuation date, but only those employees who have completed the plans' eligibility requirements are included in the valuation of liabilities. In addition, any vested participant that was valued in a prior valuation is included until the plan sponsor provides a reason for exclusion.
- **Participants excluded:** No actuarial liability is included for non-vested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plans do have insurance contracts that were purchased more than three years ago. An adjustment to plan liabilities has not been reflected for participants on whose behalf insurance contracts were purchased.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- Each plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- Each plan provides disability/death benefits that are only partially based on a participant's accrued benefit or years of benefit service. This benefit is allocated to funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit, where that portion is equal to the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.
- Each plan's **target normal cost** is the sum of the individual target normal costs, and each plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, line 22 – Description of Weighted Average Retirement Age

Each employee is assumed to retire in accordance with one of the tables of retirement rates shown on the following pages. The proportion of employees expected to retire at each potential retirement age is shown in each group’s table, and from that the average retirement age for each group is determined. The average age of each group is applied to the count of the employees in that group to determine the plan’s weighted retirement age, as shown below.

Schedule SB, Part V — Summary of Plan Provisions**Summary of Major Plan Provisions**

The plan provision summaries for the Plans align with the provisions inherited from the former legacy plans. What follows are provisions for groups that can be covered by any of the Plans. Effective January 24, 2022, PepsiCo's juice business was sold to TBG and so affected hourly accruing participants fully transferred to TBG and affected salaried accruing participants were terminated. Following the sale, certain salaried employees age 50-55 on the sale date were still allowed to grow into early retirement subsidies. In addition, Plan A participants were merged into Plan I, and Plan A ceased to exist on December 31, 2022. New entrants are only allowed into Plan H, and rehired participants will accrue as applicable under the plan they participated in immediately prior to their reemployment.

Schedule SB, Part V — Summary of Plan Provisions**Actuarial Equivalence Basis Update**

Effective for annuity starting dates on or after January 1, 2019, PepsiCo updated the definition of actuarial equivalence as used for calculating deferred vested early commencement and for optional form factors. The basis uses a 5% discount rate and collar-adjusted RP-2006 mortality tables, which are adjusted for PepsiCo's population make-up (gender and collar) and increased with mortality improvements in a manner consistent with how projections are done in Reg § 1.430(h)(3)-1(c)(3) for 2019 plan year lump sums. For pre-2019 hires, the factor (legacy basis or this basis) resulting in the higher participant benefit is used.

Future Salaried Formula Freeze

Accruals of participants accruing under a Legacy Salaried formula will be frozen as of December 31, 2025.

Closure for PFNA Employees

The qualified plans are closed to PepsiCo Foods, North America (PFNA) employees hired after December 31, 2022.

There are some exceptions where they are still eligible to enter the DB plan:

1. Quaker Cedar Rapids, IL (production employees only) – RWDSU Local 110
2. Quaker Danville, IL – BCTGM Local 347-G
3. FLUS Vancouver, WA (production employees only) – BCTGM Local 364
4. FLUS Vancouver, WA (warehouse employees only) – Teamsters Local 305
5. Gatorade Supply Chain Dallas, TX - UFCW Local 540
6. Gatorade Supply Chain Mountain Top, PA – IAM Local 2905
7. Gatorade Supply Chain Indianapolis, IN – USW Local 1999

Future PBNA Employees Formula Change

PepsiCo Beverages North America (PBNA) employees hired starting January 1, 2023 who would otherwise have accrued under the \$60,000 FAE cap plan will instead accrue under the cash balance formula. Certain Gatorade unions (Dallas, Indianapolis, and Mountaintop) are excluded from this change.

Closure for Rehired Employees

Effective April 1, 2023, employees who have a break in employment from Legacy Salaried will not resume benefit accruals under that component of the plan upon rehire. They would, however, continue to earn vesting service towards early retirement eligibility for purpose of more favorable factors or benefit formula, if applicable. Similar rehire restrictions apply to those accruing in the Legacy Hourly group that was otherwise closed to employees hired after December 31, 2022.

Schedule SB, Part V — Summary of Plan Provisions

- Employees included

An employee is any salaried person who receives remuneration for personal services rendered to an employer (or would be receiving such remuneration except for an authorized leave of absence). The term includes any person who is not a United States citizen but who resides in the United States and who is receiving payments wholly or partly in the form of salary for the performance of personal services in the employment of an employer which is incorporated under the laws of any state or territory of the United States.

Except for any employee (i) who is covered by a collective bargaining agreement which does not provide for his inclusion in this plan, or (ii) is a leased employee, an employee becomes a participant in this plan as follows:

- i. Any employee as of December 31, 1975 shall continue to participate in the plan as of January 1, 1976.
- ii. Any other employee as of January 1, 1976 who has both attained age 25 and completed a 12-month period ending prior to said date of not less than 1,000 hours of employment becomes a participant on January 1, 1976.
- iii. Prior to January 1, 1985 any employee shall become a participant as of the earliest January 1, or July 1, as of which he had attained age 25 and completed a 12-month period of not less than 1,000 hours of employment.
- iv. The participation of an employee eligible thereafter to become a participant shall commence as of the earliest January 1 or July 1 as of which he had attained age 21 and completed a 12-month period ending prior to said date of not less than 1,000 hours of employment.

As of January 1, 2006, the former participants of the Quaker Retirement Plan, the Tropicana Retirement Plan, and the Gaines Foods, Inc. Salaried Employees' Retirement Plan were merged into the Legacy PepsiCo Salaried Employees' Retirement Plan. The Quaker Retirement Plan was split into two pieces; the salaried active and all inactive participants were merged into the PepsiCo Legacy Salaried Employees Retirement Plan, while the hourly active participants were merged into the Legacy PepsiCo Hourly Employees Retirement Plan. The active participants of these plans will accrue benefits according to their respective legacy plan provisions, as described in this section of the report.

Schedule SB, Part V — Summary of Plan Provisions

-
- **Employees included (continued)**

Effective December 31, 2007, active participants at the City of Industry (Local 848) were transferred to the Legacy PepsiCo Hourly Employees Retirement Plan. Benefits under the Salaried plan were frozen as of such date.

Effective January 1, 2011, eligibility for the Plan is closed to all employees who are not already participants in the Plan, except certain employees: (a) active employees in plan eligible positions, (b) Puerto Rico or Virgin Islands payroll employees hired prior to 2012, and (c) certain international employees.

Participants who are in an eligible classification of employment on January 1, 2011, or who would have been but for a break in eligible employment that lasts less than 12 months continue to participate and accrue benefits under the Plan on and after such date.

A salaried employee who is accruing benefits under the Plan as of January 1, 2011 will continue to be eligible to be covered as a grandfathered participant even if the employee transfers to another salaried position with the Company. However, grandfathered participant status will be lost if the employee transfers to any non-salaried position (such as an hourly position); if the employee later returns to a grandfathered participant position, the employee will again be treated as a grandfathered participant only if the employee's return is within one year.

 - **Service**

A participant's eligibility for benefits under the plan is determined by his period of service in accordance with the following:

 - (i) Service prior to January 1, 1976: For a participant as of January 1, 1976, who had been covered under the prior provisions of the plan, the participant's period of continuous service prior to January 1, 1976 is considered as service.
 - (ii) Service from and after January 1, 1976: Subject to the break in service provisions, a participant receives a year of service for each year of employment. Prior to January 1, 2002, service of fewer than 1,000 hours of employment in a calendar year prior to the date of participation is not considered as service under the plan. Effective January 1, 2002, service is computed in years and days, expressed as a four-place decimal based on a 365-day year.

For plan purposes, “spouse” includes partners in same sex marriages.

Schedule SB, Part V — Summary of Plan Provisions

These factors apply as long as the age difference between the participant and spouse is under 10 years.</p> <p>(b) Monthly payments for life with 10 years certain. The benefit amount is subject to a 5% reduction.</p> <p>2) Lump Sum payment option – in lieu of the applicable percentage of any retirement pension or any post-retirement spouse or other survivor annuity, a participant who terminates employment on or after the date he is eligible for an early retirement pension may elect, prior to the time payments commence, to receive any whole percentage of his benefits in the form of a single lump sum payment which is actuarially equivalent to the pension amounts otherwise payable based on the interest rate and applicable mortality table under IRC Section 417(e), in accordance with the plan document.</p> <p>3) Inflation protection option – Employees who retire may elect to receive a reduced benefit in return for a guaranteed benefit increase if inflation exceeds a threshold amount (5% or 7%).</p> <p>These payment options apply only to participants entitled to receive an early, normal, late or disability retirement pension.</p> <p>For hires on or after January 1, 2019, the actuarial equivalence as defined in the “Actuarial Equivalence Basis Update” section will apply. Alternative Methods of Payment

- 1) A participant may elect to receive a pension payable in accordance with one of the following options in place of the retirement or disability pension payments otherwise payable.
 - a. 100%, 75% or 50% Joint and Survivor Options. Employees who choose this option will be subject to a simplified reduction of 20%, 15% or 10%, respectively for each Joint and Survivor Option, of the pension benefit that was to be paid to the participant. These factors apply as long as the participant is not more than 10 years older than the spouse. Larger reductions apply to participants who are more than 10 years older than their spouse.
 - b. Monthly payments for life with 10 years certain. The benefit amount is subject to a 5% reduction.
- 2) Lump Sum payment option – in lieu of the applicable percentage of any retirement pension or any post-retirement spouse or other survivor annuity, a participant who terminated employment on or after the date he is eligible for an early retirement pension may elect, prior to the time payments commence, to receive any whole percentage of his benefits in the form of a single lump sum payment which is equivalent to his pension amounts payable otherwise. The basis of conversion is based on mandated 417(e) mortality and applicable PPA segmented rates.
- 3) Inflation protection option – Employees who retire may elect to receive a reduced benefit in return for a guaranteed benefit increase if inflation exceeds a threshold amount (5% or 7%).

These payment options apply only to participants entitled to receive an early, normal, late or disability retirement pension.

Former PBG Hourly Pension Plan

Effective date and plan year	Original plan: April 6, 1999 Plan year: January 1 to December 31
Status of the plan	On February 26, 2010, the Plan sponsorship changed to PepsiCo, Inc., through acquisition of The Pepsi Bottling Group, Inc. On June 14, 2010 the Plan was merged into the Legacy PepsiCo Hourly Employees Retirement Plan. The Plan has ongoing multiplier benefit accruals for some union employees and some grandfathered non-union employees. See “Employees Included” below.
Definitions	
• Employers Included	An employer is PepsiCo, Inc. and/or any subsidiary or affiliated corporation which adopts the Plan with the consent of the company.
• Employees Included	Non-union employees hired or rehired with a one year break in service after January 1, 2007 are not eligible to participate in this plan. Participants covered under a multiemployer plan are not eligible to participate in this plan. Benefit accruals ceased for all non-union participants on April 1, 2009 with the following exceptions: <ul style="list-style-type: none"> - Age + service is at least 65 by April 1, 2009, or - Age 50 with 5 years of service by April 1, 2009 All Legacy PBG Unions have negotiated such that employees hired on or after June 1, 2014 (dates vary by unions and many are earlier) are no longer eligible for these benefits. They receive cash balance formula accruals instead.

• Credited service	The amount of benefit payable to or on behalf of a participant is determined on the basis of his credited service. Includes all years and completed months of employment counted from the Credited Service Start Date to the Maximum Years of Credited Service (varies by location). Credited Service accruals ceased for all non-union participants on April 1, 2009 with the following exceptions: <ul style="list-style-type: none"> - Age + service is at least 65 by April 1, 2009, or - Age 50 with 5 years of service by April 1, 2009

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan as of January 1, 2024 are included in this valuation.

- **Most recent plan amendments included:** All amendments through year end 2023 have been reflected.
- **Plan amendments excluded:** None.
- **Late Retirement Increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 72. This valuation does not include this increase.
 - *Deferred vested participants:* We value the benefit amounts provided by the plans' administrator.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
- **IRC Section 436 benefit restrictions:**
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
