Independent Auditor's Report

To the Plan Administrator
Ball Corporation Consolidated Hourly Pension Plan
Broomfield, Colorado

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Ball Corporation Consolidated Hourly Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the statements of accumulated plan benefits and changes in accumulated plan benefits as of and for the year ended December 31, 2023, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA (ERISA Section 103(a)(3)(C) audit). As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency (qualified institution), provided that the investment information is prepared and certified to by the qualified institution in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Management has obtained certifications from a qualified institution as of December 31, 2024 and 2023, and for the years then ended, stating that the certified investment information, as described in Note 7 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and the procedures performed as described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (GAAP); and
- the certified investment information in the accompanying financial statements agrees to, or is derived from, in all material respects, the information prepared and certified by a qualified institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Management is responsible for maintaining a current plan instrument, including all plan amendments. Management is also responsible for administering the Plan and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the *Scope and Nature of the ERISA Section 103(a)(3)(C) Audit* section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certifications, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter – Supplemental Schedule Required by ERISA

The supplemental schedule of non-exempt transactions for the year ended December 31, 2024 is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedule, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedule that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedule, we evaluated whether the supplemental schedule, other than the information agreed to or derived from the certified investment information, including its form and content, is presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- the form and content of the supplemental schedule, other than the information in the supplemental schedule that agreed to or is derived from the certified investment information, is presented, in all material respects, in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.
- the certified investment information in the supplemental schedule agrees to, or is derived from, in all material respects, the information prepared and certified by a qualified institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

BALL CORPORATION
CONSOLIDATED HOURLY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
December 31, 2024 and 2023

NOTE 1 – DESCRIPTION OF THE PLAN

The Ball Corporation Consolidated Hourly Pension Plan (the “Plan”) is a noncontributory defined benefit plan administered by Ball Corporation (the “Company” or “Plan Administrator”) for qualified employees, as defined in the Plan Document. The Global Pension Benefits Committee (“GPBC”) is the administrator of the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”).

Participation begins on the first day of employment and participants become fully vested after five years of service. Any individual who became an employee on or after January 1, 2022 is not eligible to participate in this Plan.

The Plan was amended and restated effective January 1, 2016. There were no significant changes to the provisions of the Plan due to this restatement.

On December 29, 2022, the Setting Every Community Up for Retirement Enhancement (“SECURE”) 2.0 Act was signed into law. The SECURE 2.0 Act increased the age for required minimum distributions to either 73 (if participant reaches age 72 between January 1, 2023 and January 1, 2033) or 75 (if participant reaches age 74 after December 31, 2032). Effective January 1, 2023, the excise tax on missed Required Minimum Distributions (“RMDs”) was reduced from 50% to 25% and can be further reduced to 10% if the correction of the failure is done timely. Also effective for the 2023 Plan year, it ended inflation indexing for Pension Benefit Guaranty Corporation (“PBGC”) variable rate premiums, updated rules surrounding recovery of benefit overpayments made by the Plan to allow the Plan to not recover all or part of the overpayments, with certain exceptions, and imposed limitations on the ability of the Plan to recover the overpayment from a participant or beneficiary. Effective January 1, 2024, it required enhanced participant disclosures for lump sum windows, updated certain disclosures required to be included in the annual funding notice, and updated rules related to cash out provisions for the maximum amount that can be distributed without a participant’s consent from \$5,000 to \$7,000.

The Plan was amended, effective January 1, 2023, to revise provisions related to suspension of benefits and Qualified Pre-retirement Survivor Annuity coverage under a mandatory cash-out calculation for the Ball Metal Beverage Container Corp. location.

The Plan was amended, effective August 31, 2023, to provide shutdown benefits for certain employees in Wallkill, New York.

Effective February 15, 2024, pursuant to an agreement to sell Ball Aerospace & Technologies Corp. (“Aerospace business segment”), the Company transferred sponsorship of the Pension Plan As It Applies To Certain Salaried Employees of Ball Aerospace & Technologies Corp. (“Aerospace Plan”) to BAE Systems, Inc. Accordingly, the transaction resulted in Ball ceasing to be the Aerospace Plan sponsor, and the Aerospace business segment ceased to be a member of the Ball controlled group for purposes of Section 4043(c)(9) of ERISA and the corresponding regulations of the PBGC promulgated, effective as of the closing date of the transaction. The Plan was amended to provide full vesting of accrued benefits for all active employee participants of the Aerospace business segment effective on the closing date. There were no other amendments or changes to the Plan or to participants’ benefits related to this transaction.

The following description of the Plan provides only general information. A complete description of the Plan may be obtained by reference to the Plan Document and summary plan description, which are available from the Company.

BALL CORPORATION
CONSOLIDATED HOURLY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
December 31, 2024 and 2023

NOTE 1 – DESCRIPTION OF THE PLAN (CONTINUED)

Contributions

Employer contributions are made based upon the allowable or minimum required ERISA contribution. For 2024 and 2023, the ERISA minimum contributions were \$5,605,506 and \$0, respectively, after consideration of any funding credit applications. The Company contributed \$17,750,000 and \$3,200,000 to the Plan for the years ended December 31, 2024 and 2023, respectively.

Benefits

Benefit payments are payments made to participants for benefits accrued under the Plan and per the participant's election as to form of payment and timing of payments. The benefit amount is determined based on the years of service and the participant's benefit rate, as defined in the Plan Document.

Termination Priorities

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder and the Plan Document.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The Plan financial statements are reported on the accrual basis of accounting.

Valuation of Master Trust Investments and Investment Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for a discussion of fair value measurements.

BALL CORPORATION
CONSOLIDATED HOURLY PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
December 31, 2024 and 2023

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Purchases and sales of securities in the Ball Corporation Master Pension Trust (the “Master Trust”) are recorded on the trade-date basis. Realized gains and losses on investments sold and unrealized appreciation or depreciation for investments of the Master Trust are combined and presented as investment income or (loss) from the Master Trust.

In addition, investment income or (loss) from the Master Trust includes interest, dividends, and other income. Interest income of the Master Trust investments is recorded as earned. Dividends on the Master Trust investments are recorded on the ex-dividend date.

Risks and Uncertainties

The Plan, through its investment in the Master Trust, provides for investment in various investment securities. Investment securities, in general, are exposed to various risks such as significant world events, interest rate, credit and market volatility. Included in the Master Trust investments are securities with contractual cash flows, such as asset backed securities, collateralized mortgage obligations and commercial mortgage backed securities, including securities backed by subprime mortgage loans. The value, liquidity and related income of those securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market’s perception of the issuers and changes in interest rates. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and may impact the funded status of the Plan.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

Expenses

The Master Trust pays plan expenses on behalf of the Plan. Generally, trustee fees, actuarial fees to the extent allowable by law, audit fees, investment management fees and PBGC premiums are paid from Master Trust assets, and are charged to the plans participating in the Master Trust. Expenses related to the direct management of the Master Trust are shared on an equitable basis by the participating plans. Expenses specifically related to an individual plan are charged to the assets of the plan that incurred the charges.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (“GAAP”) requires the Plan’s management to use estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates and could be material to the Plan’s financial statements.

NOTE 3 – ANNUITY CONTRACTS EXCLUDED FROM PLAN ASSETS

On August 22, 2017, the Company completed the purchase of nonparticipating group annuity contracts from an insurance company. This annuity buyout shifted the Company's obligations irrevocably to an insurance company, who provides annuities for the participants affected (retirees who received amounts not greater than \$300 per month in pension payments). Assets of approximately \$30.6 million were transferred to the Prudential Insurance Company of America. The accumulated benefit obligation associated with the group annuity purchase was approximately \$30.3 million and impacted approximately 1,500 participants of the Plan. Funds under these contracts have been allocated and applied to purchase these annuities and are excluded from the Plan's assets.

On September 24, 2020, the Company completed the purchase of nonparticipating group annuity contracts with an insurance company. This annuity buyout shifted the Company's obligations irrevocably to an insurance company, who provides annuities for the participants affected. Assets of approximately \$153.5 million were transferred to Athene Annuity and Life Company. The accumulated benefit obligation associated with the group annuity purchase was approximately \$162.8 million and impacted approximately 1,500 participants. After the purchase was finalized, the Plan received a refund of approximately \$2.2 million. Funds under these contracts have been allocated and applied to purchase these annuities and are excluded from the Plan's assets.

On August 31, 2021, the Company completed the purchase of nonparticipating group annuity contracts from an insurance company. This annuity buyout shifted the Company's obligations irrevocably to an insurance company, who provides annuities for the participants affected (all retirees). Cash of approximately \$141.5 million was transferred to New York Life Insurance Company. The accumulated benefit obligation associated with the group annuity purchase was approximately \$101.6 million and impacted approximately 700 participants of the Plan. Funds under these contracts have been allocated and applied to purchase these annuities and are excluded from the Plan's assets.

NOTE 4 – MASTER TRUST (UNAUDITED)

Effective February 28, 2002, the Company established the Master Trust for the purpose of investing assets of the Company's defined benefit pension plans as follows:

NOTE 4 – MASTER TRUST (UNAUDITED) (CONTINUED)

As of January 1, 2020, the plans within the Master Trust hold a divided interest in the Master Trust. Sponsorship of the Aerospace Plan was transferred to BAE Systems, Inc. effective February 15, 2024. As of December 31, 2024, the Aerospace Plan ceased participation in the master trust. The Plan has a divided interest of 14.15 and 10.83 percent in the net assets of the Master Trust as of December 31, 2024 and 2023, respectively. The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income (loss) less actual distributions and allocated administrative expenses. Investment income (loss), investment management fees and other direct expenses relating to the Master Trust are allocated to the individual plans based on the average daily balances.

NOTE 5 – FAIR VALUE MEASUREMENTS

GAAP establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under Financial Accounting Standards Board Accounting Standards Codification (“ASC”) 820, *Fair Value Measurements and Disclosures* are described using the following definitions (from highest to lowest priority):

- Level 1—Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2—Observable inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data by correlation or other means.
- Level 3—Prices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable.

NOTE 5 – FAIR VALUE MEASUREMENTS (CONTINUED)

Following is a description of the valuation methodologies used for assets and liabilities measured at fair value:

Cash and cash equivalents: Cash and cash equivalents consist of cash on deposit with brokers and short-term U.S. Treasury money market funds and are net of receivables and payables for securities traded at the period end but not yet settled. All cash and cash equivalents are stated at cost, which approximates fair value.

Corporate equity securities: Valued at the closing price reported on the active market on which the individual security is traded. The Master Trust participated in short selling of certain equity securities. A short sale is the sale of a stock that an investor does not own or a sale which is consummated by the delivery of a stock borrowed by, or for the account of, the investor. Investments in securities and securities sold short that are freely tradable and are listed on major securities exchanges are valued at their last reported sales price as of the valuation date. Many over-the-counter (“OTC”) contracts have bid and ask prices that can be observed in the marketplace. Bid prices reflect the highest price that the marketplace participants are willing to pay for an asset. Ask prices represent the lowest price that the marketplace participants are willing to accept for an asset. For securities whose inputs are based on bid-ask prices, the Master Trust’s valuation policies do not require that fair value always be a predetermined point in the bid-ask range. The Master Trust’s policy for securities traded in the OTC markets and listed securities for which no sale was reported on that date are generally valued at their last reported bid price if held long, and last reported ask price if sold short. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. The objective of the use of a short equity strategy is to achieve consistent, positive absolute returns by hedging the risk of an economic long position in the same security or in a related security.

Mortgage backed securities: Valued on the basis of their principal and interest payments discounted at prevailing interest rates for similar investments.

Bank loans: Valued based on a pricing vendor quote or broker quotes used by Northern Trust Company (“Trustee” of the Plan), or as determined by the investment manager.

Foreign government bonds: Valued based on market quotations, yields, maturities, and the bond’s terms and conditions in accordance with the region’s market convention.

Swaps: Consist of credit default swaps and interest rate swaps, and are valued based on pricing matrices or models from pricing vendors used by the Trustee. Credit default swaps are valued considering the basis point spread and recovery rate assumption. Interest rate swaps are valued considering par coupon (par yield) and the full terms of issue.

U.S. government and agency securities: Valued using the pricing of similar agency issues, live trading feeds from several vendors and benchmark yields.

Corporate bonds and notes: Assets are valued using market inputs including benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data including market research publications. Inputs may be prioritized differently at certain times based on market conditions. Liabilities reflect pending trade purchases for corporate bonds and notes.

NOTE 5 – FAIR VALUE MEASUREMENTS (CONTINUED)

Commingled funds: Valued at the net asset value (“NAV”) as a practical expedient of shares held by the Plan at year-end. Funds can also be valued using market inputs and NAV of shares held by the Plan at year-end.

Limited partnerships: Certain partnership investments receive fair market valuations on a quarterly basis. Certain other partnerships invest in market-traded securities, both on a long and short basis. These investments are valued using NAV as a practical expedient. For the partnership that invests in timber properties, a detailed valuation is performed by an independent appraisal firm every three years. In the interim years, the investment manager updates the independently prepared valuation for property value changes, timber growth, harvesting, real estate, etc.

Real estate fund: Valued at the NAV as a practical expedient of shares held by the Plan at year-end. The fund can be valued using market inputs and NAV of shares held by the Plan at year-end. For real estate investments, for each calendar year, the fund follows a valuation policy whereby investment fair values are determined quarterly by one self-contained appraisal report and three limited restricted appraisals, in accordance with the Uniform Standards of Professional Appraisal Practice.

Certain of these investments are considered illiquid and are meant to be held for the life of the funds but, if necessary, sales can be arranged through the secondary market. Distributions are received through the liquidation of the underlying assets of the funds.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The Plan’s assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of the fair value of assets and liabilities and their placement within the fair value hierarchy levels.

Private markets (a) Invests in private markets limited partnerships (primary investments). Primary investments are investments in an original issuance of a private markets fund. It is expected that the liquidation of the limited partnership interests will generally coincide with the term of the fund. Primary investments are generally illiquid and cannot be redeemed.

Limited partnerships (b) The purpose of the partnership is to make investments in limited partnerships or other pooled investment vehicles which, in turn, make equity-oriented investments in young, growing or emerging companies, as well as investments in management buy-in, management buy-out and leveraged buy-out transactions, or other partnerships either directly or purchased in the secondary market, diversified by geography, industry, stage and time.

Master fund limited partnership (c) The purpose of the partnership is to make investments in a master fund partnership, parallel vehicles and their subsidiaries, seeking risk-adjusted returns using a multi-sector approach to value investing across the Apollo credit platform.

Developed / emerging market equities (d) The purpose of the fund is to invest in equity securities of foreign (non-U.S.) issuers in developed or emerging markets.

Fixed income debt securities (e) The purpose of the fund is to invest primarily in investment grade debt securities, as well as bonds and other similar instruments, both U.S. and non-U.S. public- or private-sector entities.

Fixed income diversified (f) The purpose of this fund is to invest primarily in fixed income instruments of varying maturities, including bonds, debt securities and other similar instruments, both U.S. and non-U.S. public- or private-sector entities.

NOTE 5 – FAIR VALUE MEASUREMENTS (CONTINUED)

Private investment limited partnership (g) The purpose of this fund is assembling a diversified, institutional-quality, core real estate portfolio across major markets in the United States by making direct investments in high-quality, income-producing office, logistics, retail and residential assets in major metropolitan areas.

Real estate fund (h) The purpose of this fund is to invest primarily in institutional quality real estate assets and real estate-related investments such as industrial, residential, multifamily, life sciences, self-storage, office and retail properties.

NOTE 6 – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump sum distributions, which are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and have elected the joint and survivor option, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' years of credited service. The accumulated plan benefits for active employees are based on their years of service rendered as of the date the benefit information is presented (valuation date). Benefits payable under all circumstances—retirement, death and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits was determined by Willis Towers Watson and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death or retirement) between the valuation date and the expected date of payment. The actuarial valuation was performed as of January 1, 2024. Had the valuation been performed as of December 31, 2023, there would have been no material difference.

Actuarial Assumptions

The significant actuarial assumptions used in the valuation as of December 31, 2023, are as follows:

Expected rate of return	7.093%
Mortality rates - active and retired	Non-annuitants – based on Pri-2012 “Employees” sex-distinct tables without collar adjustments, projected forward generationally with Scale MP-2021 and for Annuitants – based on Pri-2012 “Healthy Retirees” and “Contingent Survivors” sex-distinct tables without collar adjustments, projected forward generationally with Scale MP-2021.
Mortality rates - disabled retired	Watson Wyatt 1985 DP Table
Form of payment	70% lump sum, 30% annuity

NOTE 6 – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

The assumed plan-related expenses added to the target normal cost were changed from \$4,238,000 for 2022 to \$3,304,000 for 2023.

The lump sum conversion rate used was 5.45% for 2024 and 4.25% for 2025 and all future years. The lump sum conversion mortality used was the relevant Internal Revenue Service (“IRS”) prescribed mortality table for each year through 2024.

The plan accounting discount rate changed from 6.792% for 2022 to 7.093% for 2023.

The effect of the above changes resulted in a decrease in accumulated Plan benefits of \$8,047,677 at December 31, 2023.

NOTE 7 – CERTIFIED INVESTMENT INFORMATION

Certain information related to investments disclosed in the accompanying financial statements, including investments held at December 31, 2024 and 2023 and net appreciation (depreciation) in fair value of investments, interest and dividends for the years ended December 31, 2024 and 2023 (except for the investments and related investment income in limited partnerships and real estate fund) was certified as complete and accurate by Northern Trust Company (“Trustee” of the Plan), a qualified institution. This financial information was obtained or derived from the certified trust statements in accordance with ERISA Section 103 (a)(3)(C), pursuant to 29 CFR 2520.103-8 of the Department of Labor’s (“DOL”) Rules and Regulations for Reporting and Disclosure under ERISA. Information included in the accompanying financial statements as to investment in the Master Trust, investment income (loss) from the Master Trust, and investment information contained in Note 4 and Note 5 is presented upon the certified investment information.

At the request of the Plan Administrator, the Plan’s independent auditors did not perform auditing procedures with respect to this certified investment information, except for comparing the certified investment information with the related information presented and disclosed in the financial statements, reading the disclosures relating to the investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

NOTE 8 – TAX STATUS OF THE PLAN

The IRS informed the Company by a letter dated March 15, 2017, that the Plan and related trust were designed in accordance with the applicable provisions of the Internal Revenue Code (“IRC”). Thus, contributions to the Plan and earnings thereon are not taxable until distributed to the participant.

The Plan has been amended since receiving this determination letter. However, the Plan Administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

NOTE 8 – TAX STATUS OF THE PLAN (CONTINUED)

U.S. GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken uncertain tax positions that likely would not be sustained upon examination by the IRS or other applicable taxing authorities. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits in progress for any tax periods.

NOTE 9 – RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

The Plan, through its participation in the Master Trust, may invest in investment securities issued and/or managed by the Trustee and asset managers. As described in Note 2, *Summary of Significant Accounting Policies, Expenses*, the Plan paid fees related to Plan operations and investment activity to various service providers. These entities are considered parties-in-interest to the Plan. Certain Master Trust investments are shares of Company common stock and long term debt. Amounts held and transactions in those investments were immaterial to the Master Trust and Plan's financial statements. These transactions are covered by an exemption from the prohibited transaction provisions of ERISA and the IRC.

During the years ended December 31, 2024 and 2023, an investment management fee invoice and an actuarial invoice, respectively, were paid out of the Plan twice, resulting in a non-exempt transaction with a party-in-interest. The Plan was reimbursed for the non-exempt transaction and has calculated and remitted the related lost earnings. See Schedule of Non-Exempt Transactions.

NOTE 10 – SUBSEQUENT EVENTS

Management has evaluated subsequent events through September 30, 2025, the date these financial statements were available to be issued, and determined that there were no events or transactions which would require recognition or disclosure in these financial statements, other than those noted below.

Effective January 1, 2026, the Plan will be required to provide the DOL participant contact information for use in a retirement savings lost and found searchable database and requires that a paper statement be provided at least once every three years, with some exceptions. The Plan will evaluate the impact of each of the provisions prior to the effective dates and will amend the Plan to reflect updated provisions by December 31, 2025, as required by the SECURE 2.0 Act.

Effective January 1, 2025, the Plan will be amended to provide that members who terminate employment with the Company and its affiliated entities as a result of a divestiture will be deemed to have earned the greater of five years of vesting service or the actual vesting service under the Plan, effective as of the date of the divestiture.

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates and may be inconsistent with other economic assumptions used in the valuation.

Average Retirement Age is calculated to be age 61 for the active participants in the plan as of January 1, 2024 expected to reach retirement, based on all current decrements assumed.

Benefit commencement date:

- Preretirement death benefit
Elgin, Hubbard, Steeltin – Later of death of active participant and date participant would have reached age 65.

Bargained – Immediate upon death of active participant.

All other segments – Later of death of active participant and earliest retirement date allowed under the plan.
- Deferred vested benefit
Bargained (except Moultrie), Reidsville – Later of age 62 and termination of employment.

All other segments – Normal retirement age for participants assumed to take an annuity. Upon termination of employment for participants assumed to take a lump sum.

- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment

Bargained segments – single participants are assumed to elect a life only annuity and married participants are assumed to elect a 50% joint and survivor annuity.

Fort Worth, Hawaii, and Reidsville segments – single participants are assumed to elect a single life annuity and married participants are assumed elect a 50% joint and survivor annuity.

All other segments – 70% of participants are assumed to elect a lump sum and 30% are assumed to elect an annuity. For participants assumed to elect an annuity, single participants are assumed to elect a life only annuity (life with one year certain period for Hubbard or Elgin) and married participants are assumed to elect a 50% joint and survivor annuity.

Lump sums were valued using the general rule under Proposed IRC §1.430(d)-1(f)(4).

Percent married

It is assumed that 85% of male employees and 50% of female employees are married with an eligible spouse.

Spouse age

Male participants are assumed to be 3 years older than spouses and female participants are assumed to be 3 years younger than spouses.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date

First day of plan year

Actuarial Value of Assets

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date.

The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 5.74%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 6.792%, and the applicable limitation for the plan year, equal to 5.74%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 5.92%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 6%, and the applicable limitation for the plan year, equal to 5.92%. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets

Plan-related expenses

The expected administrative expenses assumption is calculated as the average of the prior three years' administrative expenses minus PBGC premiums for the prior three years plus expected PBGC premiums for the current year rounded up to the next \$1,000. Investment expenses are not included in the administrative expenses.

Valuation Date: January 1, 2024

SCHEDULE SB ATTACHMENTS

	The amount included this year for plan-related expenses is \$3,304,000.
Tax policy	The actuarial valuation performed for the plan year ending December 31, 2024 is used to determine the maximum deductible contribution for the tax year ending December 31, 2024.
Benefits not valued	WTW has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any other significant benefits required to be valued that were not.
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
PBGC premium funding target	The Alternative Premium Funding Target was determined using the assumptions described above without application of the segment interest rate corridors of HATFA.

Sources of Data and Other Information

The plan sponsor, through WTW as its third party administrator, furnished participant data as of 1/1/2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with Ball Corporation, the data assumptions were documented in the final assumptions log provided on July 15, 2024.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Lump sum conversion rate

As required by IRC §430, lump sum benefits are valued using “annuity substitution”, so that the interest rates assumed are effectively the same as described above for the discount rate, if applicable.

Rates of increase in:

- Assumed return for asset smoothing

The assumed return of 5.74% used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, based on an analysis of the plan sponsor’s investment policy we believe the rate to be above the third segment rate. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client’s best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Same as healthy mortality, per IRC §430.
Termination	Termination rates were based on an experience study conducted in 2021, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed termination rates differ by age and service because of observed differences in termination at different age and service levels. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.
Retirement	Retirement rates were based on an experience study conducted in 2021, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.
Benefit commencement date for deferred benefits:	
• Preretirement death benefit	Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available. We believe the assumptions selected do not significantly conflict with what would be reasonable.

- **Deferred vested benefit**

Bargained (except Moultrie), Reidsville – Deferred vested participants are assumed to begin benefits at age 62 (or current age if later). Deferred vested benefits are unreduced at age 62 for these plans.

All other segments – Deferred vested participants are assumed to take lump sum benefits immediately upon termination and to begin annuity benefits at normal retirement age (or current age if later). Deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.

We believe the assumptions selected do not significantly conflict with what would be reasonable.

Form of payment

The percentage of retiring participants assumed to take lump sums is based on the 2021 experience study which observed experience over the period from 2016-2020, if applicable. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

**Unpredictable Contingent Event
Benefit Percentage**

Shutdown rates are based on plan sponsor expectations for the future. WTW is unable to assess this information due to lack of expertise about the company's business plans.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target and target normal cost was updated based on regulatory changes to the prescribed mortality table and projection scale.

Change in methods since prior valuation

Plan Name	Ball Corporation Consolidated Hourly Pension Plan
Valuation Date	January 1, 2024
Enrolled Actuary	Brad Miller
Enrollment Number	23-07959

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Economic Assumptions

Interest rate basis

- Applicable month September
- Interest rate basis 3-Segment Rates

Interest rates	Reflecting Corridors	Not Reflecting Corridors
• First segment rate	4.75%	3.62%
• Second segment rate	4.87%	4.46%
• Third segment rate	5.59%	4.52%
• Effective interest rate	5.27%	4.48%

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, the PBGC FTAP, the PBGC 4010 FS, and the deductible limit.

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates and may be inconsistent with other economic assumptions used in the valuation.

Assumed Cost of Living Adjustments

None.

If applicable, accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC §415. Plan compensation is limited to the maximum presently allowed under IRC §401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit.

Demographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee is hired.

New or rehired employees It was assumed there will be no new or rehired employees.

Mortality Separate rates for non-annuitants and annuitants based on Pri-2012 "Employees" and "Healthy Annuitants" (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as specified in the regulations under §1.430(h)(3)-1 using the IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).

Elgin, Hubbard, Steeltin – Later of death of active participant and date participant would have reached age 65.

Bargained – Immediate upon death of active participant.

All other segments – Later of death of active participant and earliest retirement date allowed under the plan.
- Deferred vested benefit
Bargained (except Moultrie), Reidsville – Later of age 62 and termination of employment.

All other segments – Normal retirement age for participants assumed to take an annuity. Upon termination of employment for participants assumed to take a lump sum.

- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment

Bargained segments – single participants are assumed to elect a life only annuity and married participants are assumed to elect a 50% joint and survivor annuity.

Fort Worth, Hawaii, and Reidsville segments – single participants are assumed to elect a single life annuity and married participants are assumed elect a 50% joint and survivor annuity.

All other segments – 70% of participants are assumed to elect a lump sum and 30% are assumed to elect an annuity. For participants assumed to elect an annuity, single participants are assumed to elect a life only annuity (life with one year certain period for Hubbard or Elgin) and married participants are assumed to elect a 50% joint and survivor annuity.

Lump sums were valued using the general rule under Proposed IRC §1.430(d)-1(f)(4).

Percent married

It is assumed that 85% of male employees and 50% of female employees are married with an eligible spouse.

Spouse age

Male participants are assumed to be 3 years older than spouses and female participants are assumed to be 3 years younger than spouses.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date

First day of plan year

Actuarial Value of Assets

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date.

The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 5.74%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 6.792%, and the applicable limitation for the plan year, equal to 5.74%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 5.92%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 6%, and the applicable limitation for the plan year, equal to 5.92%. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets

Plan-related expenses

The expected administrative expenses assumption is calculated as the average of the prior three years' administrative expenses minus PBGC premiums for the prior three years plus expected PBGC premiums for the current year rounded up to the next \$1,000. Investment expenses are not included in the administrative expenses.

	The amount included this year for plan-related expenses is \$3,304,000.
Tax policy	The actuarial valuation performed for the plan year ending December 31, 2024 is used to determine the maximum deductible contribution for the tax year ending December 31, 2024.
Benefits not valued	WTW has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any other significant benefits required to be valued that were not.
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
PBGC premium funding target	The Alternative Premium Funding Target was determined using the assumptions described above without application of the segment interest rate corridors of HATFA.

Sources of Data and Other Information

The plan sponsor, through WTW as its third party administrator, furnished participant data as of 1/1/2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with Ball Corporation, the data assumptions were documented in the final assumptions log provided on July 15, 2024.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Lump sum conversion rate	As required by IRC §430, lump sum benefits are valued using “annuity substitution”, so that the interest rates assumed are effectively the same as described above for the discount rate, if applicable.

| <ul style="list-style-type: none">Assumed return for asset smoothing | The assumed return of 5.74% used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, based on an analysis of the plan sponsor’s investment policy we believe the rate to be above the third segment rate. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client’s best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation. |

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Same as healthy mortality, per IRC §430.
Termination	Termination rates were based on an experience study conducted in 2021, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed termination rates differ by age and service because of observed differences in termination at different age and service levels. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.
Retirement	Retirement rates were based on an experience study conducted in 2021, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.
Benefit commencement date for deferred benefits:	
• Preretirement death benefit	Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available. We believe the assumptions selected do not significantly conflict with what would be reasonable.

- **Deferred vested benefit**

Bargained (except Moultrie), Reidsville – Deferred vested participants are assumed to begin benefits at age 62 (or current age if later). Deferred vested benefits are unreduced at age 62 for these plans.

All other segments – Deferred vested participants are assumed to take lump sum benefits immediately upon termination and to begin annuity benefits at normal retirement age (or current age if later). Deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.

We believe the assumptions selected do not significantly conflict with what would be reasonable.

Form of payment

The percentage of retiring participants assumed to take lump sums is based on the 2021 experience study which observed experience over the period from 2016-2020, if applicable. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

**Unpredictable Contingent Event
Benefit Percentage**

Shutdown rates are based on plan sponsor expectations for the future. WTW is unable to assess this information due to lack of expertise about the company's business plans.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Accrued benefits

Monthly pension is calculated as the sum of the Pension Rate times years of Accrued Benefit Service plus \$20.00 Medical Allowance¹ plus the Additional Pension Rate times Prior Benefit Service. This amount must not be less than the participant's accrued benefit as of December 30, 1985. One year certain and life form of payment.

Normal retirement benefit

Normal retirement date: The last of the month in which a participant attains age 65.

Benefit: Monthly accrued benefit payable.

Late retirement

If retirement occurs after the normal retirement date, the late retirement income will be the normal retirement benefit calculated using credited service as of the late retirement date.

¹ The medical allowance will be reduced by the amount payable from Sherwin-Williams, if applicable.

Death benefits for participants in active service

Monthly pension benefit of the participant is reduced by .2% for each full year of coverage between the ages of 35 and 45, .4% for each full year of coverage between the ages of 45 and 55, .6% for each full year of coverage between the ages of 55 and 65, with fractional reduction for each additional full calendar month consisting of less than a full year during the period of coverage.

If a married participant dies after becoming vested, the spouse will receive the benefit they would have received had the employee separated from service on the date of death, survived to their earliest retirement age, retired with a joint and 55% survivor pension on that day and died on the next day. The reduced amount of monthly pension benefit payable to the participant is equal to the monthly pension benefit (reduced to reflect the cost of the protection) multiplied by 90%. Such percentage is increased by .5%, up to a maximum of 100%, for each full year or major fraction thereof that the spouse is older than the participant and decreased by .5% for each full year or major fraction thereof that the spouse is younger than the participant. The spouse may also choose to take their reduced benefit within 120 days of termination as a lump sum or an immediate monthly payment.

Plan Segment: Hawaii Can Plant

Plan effective date

The Ball Corporation Hawaii Can Plant Pension Plan was amended and restated August 10, 1998. The plan was formerly named "Reynolds Metals Company Hawaii Can Plant Pension Plan", but was renamed when Ball Corporation assumed sponsorship on August 10, 1998. Employees under this plan segment were merged into this plan effective December 31, 2015.

Coverage and participation

All hourly union employees at the Hawaii can plant are eligible to participate under the plan on the first date following attainment of age twenty-one and completion of four calendar quarters of vesting service.

Benefit service

A participant will be credited with one quarter year of benefit service for each calendar quarter during which he receives or shall receive any wages or other remuneration for services rendered. Benefit service may also be credited for periods of layoff, sickness, accident, and all quarters while in military service. Service with Reynolds Metals Company and other predecessor employers earned prior to August 10, 1998 is also included.

Vesting service

Vesting service consists of all benefit service credited, plus

1. Service as the employee of an affiliate;
2. Service with the company in a capacity other than an employee; and
3. Service between the date a participant is first absent from employment for any reason and the date he returns to employment as an employee, if he resumes employment within twelve months of the date he is first absent.

- If the participant is eligible for Social Security disability benefits, they will receive the monthly accrued benefit unreduced and immediately.
- If the participant is not eligible for Social Security disability benefits, they will receive the monthly accrued benefit unreduced and immediately subject to a \$400.00 minimum, plus a \$500.00 monthly supplemental payable until Social Security Normal Retirement Age minus three years.

Vested benefits upon termination of service

Vesting: A participant is 100% vested upon completion of five years of vesting service.

Termination benefit: The termination benefit is equal to the vested accrued benefit, payable in the normal form, commencing at age 62. Optionally, if the participant begins payment before 62 but after 60, benefits will be reduced .5 of 1% per month payments are made before age 62.

Death benefits for participants in active service

If a married participant dies while still accruing service and after he is vested, the surviving spouse will receive a lifetime pension equal to one-half the accrued benefit. This pension is payable immediately and without any reductions.

Death benefits for participants in vested service

If a married participant dies after becoming vested, the surviving spouse will receive the benefit she would have received had the employee separated from the service on the date of death, survived age 60, retired with a joint and 50% survivor pension on that day, and died on the next day.

Death benefits for participants in active service

If a married participant dies after becoming vested, the spouse may receive the benefit she would have received had the employee separated from service on the date of death, survived to his earliest retirement age, retired with a joint and 50% survivor pension on that day and died on the next day. The spouse may also choose to take their reduced benefit within 120 days of termination as a lump sum or an immediate monthly payment.

Normal form of payment

Life only, if single. Joint and 50% survivor, if married.

Employee contributions

They are not required or permitted.

Optional form of retirement income in lieu of normal form

Joint and 75% survivor

Lump sum
