|-----------|---|

Assumptions selected by actuary

| | |
|-------------------------------|---|
| Inflation | <p>2.40% increase per year.</p> <p>Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.</p> |
| Asset return | <p>6.25% for the current plan year.</p> <p>The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.</p> |
| Expected expense | <p>The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.</p> |
| Retirement | <p>Active participants are assumed to retire at 65.</p> <p>Inactive participants are assumed to retire at Normal Retirement Age as defined in Plan provisions.</p> <p>This assumption is based on the results of recent experience analysis and anticipated future experience.</p> |
| Upcoming year salary increase | <p>The preceding year's salary is increased by 3.00% at each age. Note: not used for Plan accounting calculations.</p> <p>Expected salary increase is composed of salary inflation, a real wage growth and a merit increase. This reflects company salary increase philosophies along with more recent experience of the plan participants.</p> |
| Disability | <p>None.</p> |
| Marriage | <p>75% married; husbands are 3 years older than wives.</p> <p>This assumption is based on the results of recent experience analysis and anticipated future experience.</p> |
| Withdrawal | <p>None.</p> |

Compensation limit increase 2.40% increase per year used in the calculation of the IRC 404 maximum deduction cushion. See [Calculated deduction](#) in Rules and regulations.
Compensation limit increase is consistent with the inflation assumption.

Form of benefit Participants are assumed to receive their benefits on the normal form at the assumed retirement age.
This assumption is based on the results of recent experience analysis and anticipated future experience.

Methods prescribed by law

Liability measure Funding target is the present value of the benefits accrued on the valuation date.
Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Benefit accrual All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target.

The portion based on the plan's definition of accrued benefit.

The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement.

The benefits included in target normal cost are calculated similarly, by splitting the benefits. The target normal cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.

Methods selected by plan sponsor

Asset method Market value

Segment rates 24-month average with no weighting to prior law basis. Use rates where October is the last month included in the average.

PBGC premium basis Your plan is a small plan as defined by PBGC. Variable rate premiums are calculated using census, market value of assets and interest rates in effect on the prior valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv).

Methods elected by actuary

| | |
|-----------------|---|
| Retirees | Assets and liabilities for current and future retirees are included. |
| Vested benefits | <p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant’s vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p> |

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan’s regular funding target and target normal cost.

| Mortality base rates | <p>Before benefit payment period Employee amount-weighted, male and female</p> <p>During benefit payment period Retiree amount-weighted, male and female</p> |
|----------------------|--|

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Blue collar base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe “Approach 1” is reasonable for this plan.

Mortality improvement

Principal 2023 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

| Parameter | Principal 2023 |
|---|----------------------|
| Historical dataset | SSA |
| Whittaker-Henderson Graduation | Order 3 |
| Interpolation Structure | Basic |
| Graduated MI data last year ("jumping off" point) | 2017 |
| H/D transition ultimate year by age/cohort | 2029/2029 |
| Weight placed on interpolation by cohort | 50% |
| Initial Slope periods (constraint) | 2016-2017 (0.000) |
| LTR | SSA LTR 2023 |
| COVID-19 or Excess load | None ¹ |

¹Based on the sponsor’s input, plan experience does not show a need for long-term excess death or Covid death load adjustments.

See [Mortality Documentation](#) for rationale and additional information.

Interest rate used to value liabilities

6.00%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes’ arithmetic returns of the plan’s target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Eligibility Either a qualified married participant fully vested in an accrued benefit or if a participant dies while working at York Haven and has ten years of service at the time of death.

Form Monthly annuity payable to survivors, deferred to participant's earliest retirement date if later than the date of death.

Amount If death occurs, the amount paid to the survivor is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.

Definitions

Average compensation

Pre-2006 participants:

The monthly average of "415" pay plus elective deferral contributions received from the highest five-year average prior to normal retirement date that does not have to be consecutive.

Post-2006 participants:

The monthly average of "415" pay plus elective deferral contributions received from the highest 48 consecutive months in last 120 months prior to normal retirement date.

Optional forms of benefit payments

Pre-2006 participants:

The optional forms of benefit payments are:

- Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50 or 100.
- Modified monthly annuity payable as a survivorship life annuity with survivorship (jumps if survivor dies first).
- 20% increasing monthly annuity.
- Level income (social security equalization)

Post-2006 participants:

- Monthly annuity payable for life, or 5, 10, or 15 years certain and life.
- Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 75, or 100.
- Modified monthly annuity payable as a survivorship life annuity with survivorship (jumps if survivor dies first).

The optional form conversion basis is 7.5% interest and the mortality table in Revenue Ruling 95-6 for payments other than lump sums.

Lump sum provisions

Small amount force out (SAFO) – allowed up to \$5,000.

Lump sums in excess of SAFO - aren't allowed.

Conversion - The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is the plan year.
