Notes to Schedule of Investments:

The classification of a security as "U.S." or "Foreign" has been made based upon the geography of the issuer and not the currency in which the investment security is denominated. All investment securities are denominated in U.S. Dollars.

- a) Interest or dividend rate is determined periodically. Rate shown is the rate in effect on December 31, 2024.
- b) Security exempt from registration 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.
- c) Security is deemed worthless.
- d) Security valued using significant unobservable inputs (Level 3). Please see Note 4.
- e) Zero coupon bond issued at a discount.
- f) Security purchased on a forward commitment basis.
- g) The security and the Fund are advised and/or managed by wholly-owned subsidiaries of Invesco, Ltd. and are therefore considered to be affiliated.

Fair Value Measurements

The following is a summary of the tiered valuation input levels, as of December 31, 2024. The level assigned to the valuations may not be an indication of the risk or liquidity associated with those assets and liabilities. Because of the inherent uncertainty of valuation, the values reflected in the financial statements may materially differ from the values that would be received or paid upon the actual sale of assets or the transfer of liabilities.

Fair Value Measurements

The following is a summary of the tiered valuation input levels, as of December 31, 2024. The level assigned to the valuations may not be an indication of the risk or liquidity associated with those assets and liabilities. Because of the inherent uncertainty of valuation, the values reflected in the financial statements may materially differ from the values that would be received or paid upon the actual sale of assets or the transfer of liabilities.

Fair Value Measurements

The following is a summary of the tiered valuation input levels, as of December 31, 2024. The level assigned to the valuations may not be an indication of the risk or liquidity associated with those assets and liabilities. Because of the inherent uncertainty of valuation, the values reflected in the financial statements may materially differ from the values that would be received or paid upon the actual sale of assets or the transfer of liabilities.

Notes to Schedule of Investments:

The classification of a security as "U.S." or "Foreign" has been made based upon the geography of the issuer and not the currency in which the investment security is denominated. All investment securities are denominated in U.S. Dollars.

- \* See the Financial Statements and Schedule of Investments for this investment vehicle found elsewhere in this report.
- a) Interest or dividend rate is determined periodically. Rate shown is the rate in effect on December 31, 2024.
- b) Security exempt from registration 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.
- c) Security purchased on a forward commitment basis.
- d) Zero coupon bond issued at a discount.
- e) The security and the Fund are advised and/or managed by wholly-owned subsidiaries of Invesco, Ltd. and are therefore considered to be affiliated.

Fair Value Measurements

The following is a summary of the tiered valuation input levels, as of December 31, 2024. The level assigned to the valuations may not be an indication of the risk or liquidity associated with those assets and liabilities. Because of the inherent uncertainty of valuation, the values reflected in the financial statements may materially differ from the values that would be received or paid upon the actual sale of assets or the transfer of liabilities.

Fair Value Measurements

The following is a summary of the tiered valuation input levels, as of December 31, 2024. The level assigned to the valuations may not be an indication of the risk or liquidity associated with those assets and liabilities. Because of the inherent uncertainty of valuation, the values reflected in the financial statements may materially differ from the values that would be received or paid upon the actual sale of assets or the transfer of liabilities.

Fair Value Measurements

The following is a summary of the tiered valuation input levels, as of December 31, 2024. The level assigned to the valuations may not be an indication of the risk or liquidity associated with those assets and liabilities. Because of the inherent uncertainty of valuation, the values reflected in the financial statements may materially differ from the values that would be received or paid upon the actual sale of assets or the transfer of liabilities.

Notes to Schedule of Investments:

The classification of a security as "U.S." or "Foreign" has been made based upon the geography of the issuer and not the currency in which the investment security is denominated. All investment securities are denominated in U.S. Dollars.

- a) Security exempt from registration 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.
- b) Interest or dividend rate is determined periodically. Rate shown is the rate in effect on December 31, 2024.
- c) Zero coupon bond issued at a discount.
- d) The security and the Fund are advised and/or managed by wholly-owned subsidiaries of Invesco, Ltd. and are therefore considered to be affiliated.

Fair Value Measurements

The following is a summary of the tiered valuation input levels, as of December 31, 2024. The level assigned to the valuations may not be an indication of the risk or liquidity associated with those assets and liabilities. Because of the inherent uncertainty of valuation, the values reflected in the financial statements may materially differ from the values that would be received or paid upon the actual sale of assets or the transfer of liabilities.

Notes to Schedule of Investments:

The classification of a security as "U.S." or "Foreign" has been made based upon the geography of the issuer and not the currency in which the investment security is denominated. All investment securities are denominated in U.S. Dollars.

- a) Security exempt from registration 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.
- b) Interest or dividend rate is determined periodically. Rate shown is the rate in effect on December 31, 2024.
- c) Security purchased on a forward commitment basis.
- d) Principal amount of security and interest are adjusted for inflation.
- e) The security and the Fund are advised and/or managed by wholly-owned subsidiaries of Invesco, Ltd. and are therefore considered to be affiliated.

FHLMC - Federal Home Loan Mortgage Corporation

FNMA - Federal National Mortgage Association

GNMA - Government National Mortgage Association

MBS - Mortgage-Backed Security

Fair Value Measurements

The following is a summary of the tiered valuation input levels, as of December 31, 2024. The level assigned to the valuations may not be an indication of the risk or liquidity associated with those assets and liabilities. Because of the inherent uncertainty of valuation, the values reflected in the financial statements may materially differ from the values that would be received or paid upon the actual sale of assets or the transfer of liabilities.

### NOTE 1 - ORGANIZATION AND DESCRIPTION OF THE FUNDS

Invesco Fixed Income Trust (the "Trust") is comprised of distinct investment funds (each, a "Fund" and, collectively, the "Funds"), which invest principally in Treasury, agency and corporate securities, various short-term instruments, as well as other financial instruments. As of December 31, 2024, the Trust consisted of 8 Collective Trust Funds. The Trust was established by the Declaration of Trust dated December 19, 2002, respectively. The Funds comprising the Trust were authorized by the Declaration of Trust and amendments and restatements to those declaration (collectively, the "Trust Agreement"). The Funds are administered pursuant to the Amended and Restated Agreement and Declaration of Trust for Invesco Fixed Income Trust, effective January 1, 2016 and subsequently amended on April 1, 2017, September 1, 2017 and June 19, 2020. This annual report covers each of the Funds within the Trust listed below. The Bank of New York Mellon ("BNY Mellon") is the service provider to the Trust, providing fund accounting, transfer agency, financial reporting and custodial services. BNY Mellon Trust of Delaware ("Trustee") is the Trustee for the Trust. Invesco Trust Company is both the "Investment Manager" and the "Company" and Invesco Advisers, Inc. is a Sub-Adviser to the Trust. Invesco Trust Company and Invesco Advisers, Inc. are indirectly wholly-owned subsidiaries of Invesco Ltd. Each Fund has determined that it meets the definition of an investment company for financial reporting purposes and has prepared the financial statements in conformity with accounting and reporting guidance of the Financial Accounting Standards Board Accounting Standards Codification Topic 946, Financial Services – Investment Companies.

### NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements.

#### A. Security Valuation

Securities, including restricted securities, are valued according to the following policy.

Fixed income securities (including convertible debt securities) normally are valued on the basis of prices provided by independent pricing services. Prices provided by the pricing service may be determined without exclusive reliance on quoted prices, and may reflect appropriate factors such as institution-size trading in similar groups of securities, developments related to specific securities, dividend rate (for unlisted equities), yield (for debt obligations), quality, type of issue, coupon rate (for debt obligations), maturity (for debt obligations), individual trading characteristics and other market data. Pricing services generally value debt obligations assuming orderly transactions of institutional round lot sizes, but the Funds may hold or transact in the same securities in smaller, odd lot sizes. Odd lots often trade at lower prices than institutional round lots, and their value may be adjusted accordingly. Debt obligations are subject to interest rate and credit risks. In addition, all debt obligations involve some risk of default with respect to interest and/or principal payments.

A security listed or traded on an exchange is generally valued at its trade price or official closing price that day as of the close of on the exchange where the security is principally traded, or lacking any sales or official closing price on a particular day, the security may be valued at the closing bid or ask price on that day. Securities traded in the over-the-counter market are valued based on prices furnished by independent pricing services or market makers. When such securities are valued using prices provided by an independent pricing service they may be considered fair valued. Futures contracts are valued at the daily settlement price set by an exchange on which they are principally traded.

---

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**A. Security Valuation (continued)**

Where a final settlement price exists, exchange-traded options are valued at the final settlement price from the exchange where the option principally trades. Where a final settlement price does not exist, exchange-traded options are valued at the mean between the last bid and ask price generally from the exchange where the option principally trades.

Securities of investment companies that are not exchange-traded (e.g. open-end mutual funds) are valued using such company's end-of-business day net asset value per share, whereas securities of investment companies that are exchange-traded will be valued at the last trade sales price or official closing price as of the close on the exchange where they primarily trade.

Deposits, other obligations of U.S. and non-U.S banks and financial institutions, and cash equivalents are valued at their daily account value.

Swap agreements are fair valued using an evaluated quote, if available, provided by an independent pricing service. Evaluated quotes provided by the pricing service are valued based on a model which may include end of day net present values, spreads, ratings, industry, company performance and returns of referenced assets.

Foreign securities' (including foreign exchange contracts) prices are converted into U.S. dollar amounts using the applicable exchange rates as of the close of the New York Stock Exchange ("NYSE"). If market quotations are available and reliable for foreign exchange-traded equity securities, the securities will be valued at the market quotations. The Company may use various pricing services to obtain market quotations as well as fair value prices. Because trading hours for certain foreign securities end before the close of the NYSE, closing market quotations may become unreliable. If between the time trading ends on a particular security and the close of the customary trading session on the NYSE, a significant event occurs that makes the closing price of the security unreliable in the Company's judgement, the Company may fair value the security. If the event is likely to have affected the closing price of the security, the security will be valued at fair value in good faith in accordance with Board-approved policies and related Company procedures ("Valuation Procedures"). Adjustments to closing prices to reflect fair value may also be based on a screening process of an independent pricing service to indicate the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current value as of the close of the NYSE. Foreign securities' prices meeting the agreed upon degree of certainty that the price is not reflective of current value will be priced at the indication of fair value from the independent pricing service. Multiple factors may be considered by the independent pricing service in determining adjustments to reflect fair value and may include information relating to sector indices, American Depositary Receipts and domestic and foreign index futures. Foreign securities may have additional risks including exchange rate changes, potential for sharply devalued currencies and high inflation, political and economic upheaval, the relative lack of issuer information, relatively low market liquidity and the potential lack of strict financial and accounting controls and standards.

Unlisted securities will be valued using prices provided by independent pricing services or by another method that the Company, in its judgment, believes better reflects the security's fair value in accordance with the Valuation Procedures.

Securities for which market prices are not provided by any of the above methods may be valued based upon quotes furnished by independent sources. The mean between the last bid and asked prices is used to value debt obligations, including corporate loans.

Securities for which market quotations are not readily available are fair valued by the Company in accordance with the Valuation Procedures. If a fair value price provided by a pricing service is unreliable in the Company's judgment, the Company will fair value the security using the Valuation Procedures. Issuer specific events, market trends, bid/ask quotes of brokers and information providers and other market data may be reviewed in the course of making a good faith determination of a security's fair value.

Each Fund may invest in securities that are subject to interest rate risk, meaning that the risk of the prices will generally fall as interest rates rise and, conversely, the prices will generally rise as interest rates fall. Specific securities differ in their sensitivity to change in interest rates depending on their individual characteristics. Change in interest rates may result in increased market volatility, which may affect the value and/or liquidity of certain of each Fund's investments.

Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general market conditions which are not specifically related to the particular issuer, such as real or perceived economic conditions, changes in the general outlook for revenues or corporate earnings, changes in interest or currency rates, regional or global instability, natural or environmental disasters, widespread disease or other public health issues, war, acts of terrorism, significant governmental actions or adverse investor sentiment generally and market liquidity. Because of the inherent uncertainties of valuation, the values reflected in the financial statements may materially differ from the value received upon actual sale of those investments.

**B. Securities Transactions and Investment Income**

Securities transactions are accounted for on a trade date basis. Realized gains or losses on sales are computed on the basis of average cost of the securities sold. Distributions from ordinary income from underlying funds, if any, are recorded as dividend income on ex-dividend date. Interest income (net of withholding tax, if any) is recorded on the accrual basis from settlement date. Pay downs gains and losses on mortgage and asset-backed securities are recorded as adjustments to interest income. Dividend income (net of withholding tax, if any) is recorded on the ex-dividend date. Bond premiums and discounts are amortized and/or accreted over the lives of the respective securities.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**B. Securities Transactions and Investment Income (continued)**

Each Fund may periodically participate in litigation related to each Fund's investments. As such, each Fund may receive proceeds from litigation settlements. Any proceeds received are included in the Statements of Operations as realized gain (loss) for investments no longer held and as unrealized appreciation (depreciation) for investments still held.

**C. Distributions**

Net investment income and net gains realized on investments are not distributed to Unitholders but are accumulated and retained in the Funds and included in the determination of the net asset value per unit for each Fund.

**D. Income Taxes**

The Funds are partnerships for federal income tax purposes. The participants are required to report their respective portion of the Fund's U.S. taxable income or loss in their own income tax returns and are liable for any related taxes thereon. The Funds have analyzed their uncertain tax positions for all open tax years (generally the last three years) and have concluded that no provision for income taxes is required in their financial statements.

Each Fund files tax returns in the U.S. Federal jurisdiction and certain other jurisdictions. Generally, the Funds are subject to examinations by such taxing authorities for up to three years after the filing of the return for the tax period.

**E. Unit Classes and Expenses**

The Funds all have two classes of units, except for Core Fixed Income Fund, Invesco Intermediate Fund, and Invesco High Quality Mortgage Backed Securities Fund, which have a single class of units.

For Core Fixed Income Fund, the Company may charge reasonable expenses incurred in operating the Trust, to the extent not prohibited by applicable law in the state in which the Company maintains the Trust. However, the Company shall absorb any expenses of establishing or reorganizing the Trust. Expenses incurred by the Company in the performance of its duties which are charged to the Trust, include but are not limited to fees for legal services, custody, portfolio accounting, transfer agency, annual report preparation, and auditing services rendered to the Company, and all other proper charges and disbursements of the Company in connection with the administration of the Trust. The amount of expenses borne by the Company are reflected in the Statement of Operations as Expense Reimbursement.

For Invesco Constrained Core Fixed Income Fund, Invesco High Quality Short Term Bond Fund, Invesco Intermediate Fund, Jennison Intermediate Fund, Loomis Sayles Core Fixed Income Fund, and PIMCO Intermediate Fund, the Company is responsible for paying organizational and tax services expenses for Class K Unitholders. The amount of expenses borne by the Company are reflected in the Statements of Operations as Expense Reimbursement. All other operating costs and expenses are charged to the Funds. The operating expenses chargeable to the Funds will be limited to no more than 0.02% of average net assets, excluding investment-related expenses and extraordinary items, including litigation expenses.

For Invesco High Quality Mortgage Backed Securities Fund, the Company is responsible for paying organizational and tax services expenses. The operating expenses chargeable to the Fund will be limited to no more than 0.02% of average net assets, excluding investment-related expenses and extraordinary items, including litigation expenses. The amount of expenses borne by the Company are reflected in the Statement of Operations as Expense Reimbursement.

**F. Unit Transactions**

Issuances and redemptions of participant units are made on each business day ("Valuation Date"). As permitted under the Funds' Trust Agreement, participant units are issued and redeemed based upon the net asset value per unit of each Fund, determined in accordance with the terms of the Trust Agreement, as of each Fund's Valuation Date on which such orders to subscribe or redeem participant units are received.

**G. Accounting Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period including estimates and assumptions related to taxation. Actual results could differ from those estimates by a significant amount. In addition, the Funds monitor for material events or transactions that may occur or become known after the period-end date and before the date the financial statements are made available.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**H. Indemnifications**

Under the Trust Agreement, the Company is indemnified against certain liabilities arising out of the performance of its duties to the Trust. Additionally, in the normal course of business, the Trust enters into contracts with its vendors and others that contain a variety of indemnification clauses. Each Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds. The risk of material loss as a result of such indemnification claims is considered remote.

**I. Securities Lending**

BNY Mellon serves as the securities lending agent for Invesco Fixed Income Trust Core Fixed Income Fund's securities lending program. Under this program, the Fund may lend portfolio securities having a market value up to one-third of the Fund's total assets. Such loans are secured by collateral equal to no less than the market value of the loaned securities determined daily by the securities lending provider. Such collateral will be cash or debt securities issued or guaranteed by the U.S. Government or any of its sponsored agencies. Cash collateral received in connection with these loans is invested in short-term money market instruments or affiliated, unregistered investment companies that comply with Rule 2a-7 under the Investment Company Act and money market funds (collectively, "affiliated money market funds") and is shown as such on the Schedule of Investments. The Fund bears the risk of loss with respect to the investment of collateral. It is the Fund's policy to obtain additional collateral from or return excess collateral to the borrower by the end of the next business day, following the valuation date of the securities loaned. Therefore, the value of the collateral held may be temporarily less than the value of the securities on loan. When loaning securities, the Fund retains certain benefits of owning the securities, including the economic equivalent of dividends or interest generated by the security. Lending securities entails a risk of loss to the Fund if, and to the extent that, the market value of the securities loaned were to increase and the borrower did not increase the collateral accordingly, and the borrower failed to return the securities. The securities loaned are subject to termination at the option of the borrower or the Fund. Upon termination, the borrower will return to the Fund the securities loaned and the Fund will return the collateral. Upon the failure of the borrower to return the securities, collateral may be liquidated, and the securities may be purchased on the open market to replace the loaned securities. The Fund could experience delays and costs in gaining access to the collateral and the securities may lose value during the delay which could result in potential losses to the Fund. Some of these losses may be indemnified by the lending agent. The Fund bears the risk of any deficiency in the amount of the collateral available for return to the borrower due to any loss on the collateral invested. Dividends received on cash collateral investments for securities lending transactions, which are net of compensation to counterparties, are included in *Income from securities lending* on the Statements of Operations. The aggregate value of securities out on loan, if any, is shown as a footnote on the Statements of Assets and Liabilities.

**J. Repurchase Agreements**

The Funds may enter into repurchase agreements. Collateral on repurchase agreements, including a Fund's pro-rata interest in joint repurchase agreements, is taken into possession by a Fund upon entering into the repurchase agreement. Collateral consisting of U.S. Government Securities and U.S. Government Sponsored Agency Securities is marked to market daily to ensure its market value is typically at least 100% of the sales price of the repurchase agreement. Collateral consisting of nongovernment securities is marked to market daily to ensure its market value is at typically least 105% of the sales price of the repurchase agreement. The investments in some repurchase agreements are through participation with other mutual funds, private accounts and certain non-registered investment companies managed by the investment adviser or its affiliates ("Joint repurchase agreements"). The principal amount of the repurchase agreement is equal to the value at period-end. If the seller of a repurchase agreement fails to repurchase the security in accordance with the terms of the agreement, a Fund might incur expenses in enforcing its rights, and could experience losses, including a decline in the value of the collateral and loss of income.

**K. Dollar Rolls and Forward Commitment Transactions**

The Funds may enter into dollar roll transactions to enhance the Fund's performance. The Funds execute their dollar roll transactions in the to be announced ("TBA") market whereby the Funds make a forward commitment to purchase a security and, instead of accepting delivery, the position is offset by the sale of the security with a simultaneous agreement to repurchase at a future date.

The Funds account for dollar roll transactions as purchases and sales and realizes gains and losses on these transactions. Dollar roll transactions involve the risk that a Counterparty to the transaction may fail to complete the transaction. If this occurs, the Funds may lose the opportunity to purchase or sell the security at the agreed upon price. Dollar roll transactions also involve the risk that the value of the securities retained by the Funds may decline below the price of the securities that the Funds have sold but is obligated to purchase under the agreement.

**L. Futures Contracts**

Certain Funds may enter into futures contracts to manage exposure to interest rate, equity, commodity and market price movements and/or currency risks. A futures contract is an agreement between two parties ("Counterparties") to purchase or sell a specified underlying security, currency or commodity (or delivery of a cash settlement price, in the case of an index future) for a fixed price at a future date. The Funds currently invest only in exchange-traded futures and they are standardized as to maturity date and underlying financial instrument. Initial margin deposits required upon entering into futures contracts are satisfied by the segregation of specific securities or cash as collateral at the futures commission merchant ("FCM"). During the period the futures contracts are open, changes in the value of the contracts are recognized as unrealized gains or losses by recalculating the value of the contracts on a daily basis. Subsequent or variation margin payments are received or made depending upon whether unrealized gains or losses are incurred. These amounts are reflected as receivables or payables on the Statements of Assets and Liabilities.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**L. Futures Contracts (continued)**

When the contracts are closed or expire, a Fund recognizes a realized gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the Fund's basis in the contract. The net realized gain (loss) and the change in unrealized appreciation (depreciation) on futures contracts held during the period is included on the Statements of Operations. The primary risks associated with futures contracts are market risk and the absence of a liquid secondary market. If a Fund were unable to liquidate a futures contract and/or enter into an offsetting closing transaction, the Fund would continue to be subject to market risk with respect to the value of the contracts and continue to be required to maintain the margin deposits on the futures contracts. Futures contracts have minimal Counterparty risk since the exchange's clearinghouse, as Counterparty to all exchange-traded futures, guarantees the futures against default. Risks may exceed amounts recognized in the Statements of Assets and Liabilities.

**M. Swap Agreements**

Certain Funds may enter into various swap transactions, including interest rate, total return, index, currency, credit default swap and commodity-linked swap agreements for investment purposes or to manage interest rate, currency or credit risk. Such transactions are agreements between Counterparties. A Swap agreement may be negotiated bilaterally and traded over-the-counter ("OTC") between two parties ("uncleared/OTC") or, in some instances, must be transacted through a FCM and cleared through a clearinghouse that serves as a central Counterparty ("centrally cleared swap"). These agreements may contain among other conditions, events of default and termination events, and various covenants and representations such as provisions that require the Fund to maintain a pre-determined level of net assets, and/or provide limits regarding the decline of the Fund's net asset value over specific periods of time. If the Fund were to trigger such provisions and have open derivative positions at that time, the Counterparty may be able to terminate such agreement and request immediate payment in an amount equal to the net liability positions, if any.

Interest rate, total return, index, and currency swap agreements are two-party contracts entered into primarily to exchange the returns (or differentials in rates of returns) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are calculated with respect to a notional amount, i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate or return of an underlying asset, in a particular foreign currency, or in a "basket" of securities representing a particular index.

In a centrally cleared swap, the Fund's ultimate Counterparty is a central clearinghouse. The Fund initially will enter into centrally cleared swaps through an executing broker. When a Fund enters into a centrally cleared swap, it must deliver to the central counterparty (via the FCM) an amount referred to as "initial margin". Initial margin requirements are determined by the central Counterparty, but an FCM may require additional initial margin above the amount required by the central Counterparty. Initial margin deposits required upon entering into centrally cleared swaps are satisfied by cash or securities as collateral at the FCM. Securities deposited as initial margin are designated on the Schedules of Investments and cash deposited is recorded on the Statements of Assets and Liabilities. During the term of a cleared swap agreement, a "variation margin" amount may be required to be paid by the Fund or may be received by the Fund, based on the daily change in price of the underlying reference instrument subject to the swap agreements and is recorded as a receivable or payable for variation margin on the Statements of Assets and Liabilities until the centrally cleared swap is terminated, at which time a realized gain or loss is recorded on the Statements of Operations.

A Fund accrues for the fixed payment stream and amortizes upfront payments, if any, on swap agreements on a daily basis with the net amount recorded as a component of net realized gain (loss) on the Statements of Operations. A liquidation payment received or made at the termination of a swap agreement is recorded as net realized gain (loss) on the Statements of Operations.

Cash held as collateral, if any, is recorded as deposits with brokers on the Statements of Assets and Liabilities. Entering into these agreements involves, to varying degrees, lack of liquidity and elements of credit, market, and counterparty risk in excess of amounts recognized on the Statements of Assets and Liabilities. Such risks involve the possibility that a swap is difficult to sell or liquidate, the Counterparty does not honor its obligations under the agreement and unfavorable interest rates and market fluctuations, which could result in the Fund accruing additional expenses. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements. A short position in a security poses more risk than holding the same security long. As there is no limit on how much the price of the security can increase, the Fund's exposure is unlimited.

**N. Treasury Inflation-Protected Securities**

The Funds may invest in treasury inflation-protected securities ("TIPS"). TIPS are fixed income securities whose principal value is periodically adjusted to the rate of inflation. The principal value of TIPS will be adjusted upward or downward, and any increase or decrease in the principal amount of TIPS will be shown as a component of interest income in the Statements of Operations, even though investors do not receive their principal until maturity.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**O. Collateral**

To the extent a Fund has designated or segregated a security as collateral and that security is subsequently sold, it is the Fund's practice to replace such collateral no later than the next business day.

**P. Leverage Risk**

Leverage exists when a Fund can lose more than it originally invests because it purchases or sells an instrument or enters into a transaction without investing an amount equal to the full economic exposure of the instrument or transaction.

**Q. Mortgage-Backed and Asset-Backed Securities Risks**

The Funds may invest in mortgage and asset-backed securities that are subject to prepayment or call risk, which is the risk that the borrower's payments may be received earlier or later than expected due to changes in prepayment rates on underlying loans. Faster prepayments often happen when interest rates are falling. As a result, a Fund may reinvest these early payments at lower interest rates, thereby reducing a Fund's income. Conversely, when interest rates rise, prepayments may happen more slowly, causing the security to lengthen in duration. Longer duration securities tend to be more volatile. Securities may be prepaid at a price less than the original purchase value. An unexpected high rate of defaults on the mortgages held by a mortgage pool may adversely affect the value of mortgage-backed securities and could result in losses to a Fund.

**R. LIBOR Transition Risk**

Certain Funds may have investments in financial instruments that utilize LIBOR as the reference or benchmark rate for variable interest rate calculations. LIBOR was intended to measure the rate at which banks can lend and borrow from one another in the relevant currency on an unsecured basis. The UK Financial Conduct Authority ("FCA"), the regulator that oversees LIBOR, announced that the majority of LIBOR rates would cease to be published or would no longer be representative on January 1, 2022. The publication of most LIBOR rates ceased at the end of 2021 and the remaining USD LIBOR rates ceased to be published after June 2024. The FCA will permit the use of synthetic USD LIBOR rates for non-U.S. contracts for a limited period of time after June 30, 2024, but any such rates would be considered non-representative of the underlying market.

There remains uncertainty and risks relating to the continuing LIBOR transition and its effects on the Fund and the instruments in which the Fund invests. There can be no assurance that the composition or characteristics of any alternative reference rate ("ARR") or financial instruments in which the Fund invests that utilize ARRs will be similar to or produce the same value or economic equivalence as LIBOR or that instruments using an alternative rate will have the same volume or liquidity. Additionally, there remains uncertainty and risks related to certain "legacy" USD LIBOR instruments that were issued or entered into before December 31, 2021 and the process by which a replacement interest rate will be identified and implemented into these instruments when USD LIBOR is ultimately discontinued. On December 16, 2022, the Federal Reserve Board adopted regulations implementing the Adjustable Interest Rate Act. The regulations provided a statutory fallback mechanism to replace LIBOR, by identifying benchmark rates based on the Secured Overnight Financing Rate ("SOFR") that replaced LIBOR in certain financial contracts after June 30, 2024. These regulations apply only to contracts governed by U.S. law, among other limitations. The Funds may have instruments linked to other interbank offered rates that may also cease to be published in the future. The effects of such uncertainty and risks in "legacy" USD LIBOR instruments held by the Fund could result in losses to the Fund.

**S. Other Risks**

The Funds may invest in obligations issued by agencies and instrumentalities of the U.S. Government. Obligations of U.S. government agencies and authorities receive varying levels of support and may not be backed by the full faith and credit of the U.S. government, which could affect the Funds' ability to recover should they default. No assurance can be given that the U.S. Government will provide financial support to its agencies and authorities if it is not obligated to do so.

**NOTE 3 – INVESTMENT ADVISER/SUB-ADVISERS**

The Company serves as the investment manager to each Fund but may designate another investment management firm to act as the investment sub-adviser for a Fund. During the year ended December 31, 2024, investment sub-advisory services were provided to the Funds as follows:

<b>Fund Name</b>	<b>Investment Sub-Adviser</b>
Core Fixed Income Fund	Invesco Advisers, Inc.*
Invesco Constrained Core Fixed Income Fund	Invesco Advisers, Inc.*
Invesco High Quality Mortgage Backed Securities Fund	Invesco Advisers, Inc.*
Invesco High Quality Short Term Bond Fund	Invesco Advisers, Inc.*
Invesco Intermediate Fund	Invesco Advisers, Inc.*
Jennison Intermediate Fund	Jennison Associates, LLC
Loomis Sayles Core Fixed Income Fund	Loomis, Sayles & Company, L.P.
PIMCO Intermediate Fund	Pacific Investment Management Co.

\*The Investment Sub-Adviser and the Company are indirectly wholly-owned subsidiaries of Invesco Ltd.

Investment manager fees are not considered expenses of the Funds and are not charged to the Funds. Instead, investment manager fees are charged directly to Unitholders based on the investment strategy, total investor assets under management, and other factors. Sub-advisory fees are accrued based on a fee schedule with breakpoints based upon the total assets sub-advised by the respective sub-adviser across all Funds and then allocated to each applicable Fund based on each Fund's relative daily net assets. Such sub-advisory fees are reflected in the Statements of Operations as Sub-advisory fee. In general, sub-advisory fee rates are as follows:

- Core fixed income and related investment strategies are approximately 0.09% of average daily net assets.
- Short/intermediate duration and government related investment strategies range from 0.09% to 0.12% of average daily net assets.

**NOTE 4 – ADDITIONAL VALUATION INFORMATION**

GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, under current market conditions. GAAP establishes a hierarchy that prioritizes the inputs to valuation methods, giving the highest priority to readily available unadjusted quoted prices in an active market for identical assets (Level 1) and the lowest priority to significant unobservable inputs (Level 3), generally when market prices are not readily available. Based on the valuation inputs, the securities or other investments are tiered into one of three levels. Changes in valuation methods may result in transfers in or out of an investment's assigned level:

Level 1 – Prices are determined using quoted prices in an active market for identical assets.

Level 2 – Prices are determined using other significant observable inputs. Observable inputs are inputs that other market participants may use in pricing a security. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk, yield curves, loss severities, default rates, discount rates, volatilities and others.

Level 3 – Prices are determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Company's assumptions about the factors market participants would use in determining fair value of the securities or instruments and would be based on the best available information.

A summary of the valuation inputs can be found at the end of each Fund's Schedule of Investments.

**NOTE 5 – DERIVATIVE INVESTMENTS**

The Funds may enter into an International Swaps and Derivatives Association Master Agreements (individually, "ISDA Master Agreement") under which a Fund may trade OTC derivatives. An OTC transaction entered into under an ISDA Master Agreement typically involves a collateral posting arrangement, payment netting provisions and close-out netting provisions. These netting provisions allow for reduction of credit risk through netting of contractual obligations. The enforceability of the netting provisions of the ISDA Master Agreement depends on the governing law of the ISDA Master Agreement, among other factors.

For financial reporting purposes, the Funds do not offset OTC derivative assets or liabilities that are subject to ISDA Master Agreements on the Statement of Assets and Liabilities.

## **Report of Independent Auditors**

To the Board of Directors of Invesco Trust Company

### ***Opinion***

We have audited the accompanying financial statements of Core Fixed Income Fund, Invesco Constrained Core Fixed Income Fund, Invesco High Quality Mortgage Backed Securities Fund, Invesco High Quality Short Term Bond Fund, Invesco Intermediate Fund, Jennison Intermediate Fund, Loomis Sayles Core Fixed Income Fund and PIMCO Intermediate Fund (each a fund of the Invesco Fixed Income Trust, referred to hereafter as the "Funds"), which comprise the statements of assets and liabilities, including the schedules of investments, as of December 31, 2024 and the related statements of operations, of changes in net assets, including the related notes, and the financial highlights for the year then ended (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2024, and the results of each of their operations, changes in each of their net assets, and each of their financial highlights for the year then ended in accordance with accounting principles generally accepted in the United States of America.

### ***Basis for Opinion***

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Funds and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### ***Responsibilities of Management for the Financial Statements***

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Funds' ability to continue as a going concern for one year after the date the financial statements are available to be issued.

December 31, 2024

---

### ***Auditors' Responsibilities for the Audit of the Financial Statements***

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Funds' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audits.

### ***Supplemental Information***

Our audits were conducted for the purpose of forming an opinion on the financial statements taken as a whole. The Supplemental Schedules of Securities Purchased, Sold or Matured are presented for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements taken as a whole.
