Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Plan Administrator
Arconic Corp. Pension Plan A

Scope and nature of the ERISA Section 103(a)(3)(C) audit

We have performed audits of the financial statements of Arconic Corp. Pension Plan A (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statement of changes in net assets available for benefits for the year ended December 31, 2024, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2024 and 2023, and for the year ended December 31, 2024, stating that the certified investment information, as described in Note 8 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's responsibilities for the audit of the financial statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Arconic Corp. Pension Plans
NOTES TO FINANCIAL STATEMENTS
December 31, 2024 and 2023

NOTE 1 - DESCRIPTION OF PLANS

General

The Arconic Corp. Pension Plan A (the “Salary Plan”) and the Arconic Corp. Pension Plan B (the “Hourly Plan”) (each individually, the “Plan” and collectively, the “Arconic Corp. Pension Plans” or “Plans”) are defined benefit pension plans maintained pursuant to a master trust agreement (the “Master Trust”) between Arconic Corporation (“Arconic,” the “Company,” or the “Plan Sponsor”) and the trustee, The Bank of New York Mellon (the “Trustee”). Arconic is the administrator of the Plans and has placed complete authority to control and manage the operation and administration of the Plans in a committee comprised of certain of the Company’s senior management (the “Benefits Management Committee” or “Management”). These individuals were appointed by the Company’s Board of Directors.

In general, the Plans provide for monthly pension benefits to eligible U.S. employees upon retirement at or after age 65, or earlier upon disability, incapacity, special circumstances or with certain minimum age and service requirements. Pension benefits generally depend upon length of service, job grade or remuneration, and certain social security and other benefits. The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”). Participants should refer to the respective plan document for a complete description of each Plans’ provisions.

Eligibility and Vesting

Effective March 1, 2006 and January 8, 2018, the Salary Plan and the non-bargaining portion of the Hourly Plan, respectively, were closed to new participants. At different points between 2000 and 2020, the bargaining portion of the Hourly Plan was closed to new participants at all but one of Arconic’s operating locations. Bargaining employees at the one remaining location are eligible to participate in the Hourly Plan after they have attained age 21 with one year of service. Effective December 31, 2024, the last operating location of the Hourly Plan was closed to new participants. All existing participants in the Salary Plan are fully vested. All participants in the Hourly Plan fully vest after a five-year period.

Benefit Provisions

For the Salary Plan, retirement benefits are determined by a compensation-based formula. For the Hourly Plan, retirement benefits are determined by the product of a specified factor and years of service. Normal retirement for the Plans is age 65 with five years of service.

Effective April 1, 2018, benefit accruals for future service and compensation increases for active employees that participate in the Salary Plan and non-bargaining portion of the Hourly Plan ceased.

Effective June 1, 2022, the United Steelworkers ratified a new four-year labor agreement covering approximately 3,300 employees at four of Arconic’s U.S. locations which include employees who participate in the Hourly Plan. This agreement provides for higher multipliers used to calculate the union employees’ future pension retirement benefits.

Effective June 1, 2024, a labor agreement covering the remaining operating location of the Hourly Plan open to new participants was ratified. This agreement provides for higher multipliers used to calculate the union employees future pension retirement benefits.

Risks and Uncertainties

The Plans invest in investment securities, which are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and such changes

Arconic Corp. Pension Plans

NOTES TO FINANCIAL STATEMENTS - CONTINUED

December 31, 2024 and 2023

could materially affect the amounts reported in the statements of net assets available for benefits and the statement of changes in net assets available for benefits.

Contributions to the Plans and the actuarial present value of accumulated plan benefits of the Plans are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the actuarial process, it is at least reasonably possible that changes in these assumptions in the near-term could be material to the Plans' financial statements.

Plan Termination

Benefits under the Plans are insured by the Pension Benefit Guaranty Corporation ("PBGC"). Should the Plans terminate in a future period, the net assets of the Plans generally will not be available on a pro rata basis to provide benefits to participants. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty, while other benefits may not be provided for at all. A full description of each Plans' termination priorities is available in the respective plan documents.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plans are prepared under the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("US GAAP").

Use of Estimates

The preparation of the Plans' financial statements in conformity with US GAAP may require Management to make estimates based on judgments and assumptions, which may affect the reported amounts of assets, liabilities, and changes therein, and the disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are stated at fair value, which is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is accrued when earned.

Dividends are recorded on the ex-dividend date. Net investment income includes interest income, dividends, unrealized and realized gains and losses on investments, and investment management or trustee fees.

Each Plan participates in the Master Trust through the purchase and sale of units. Cash inflows and outflows between the Plans and the Master Trust are accounted for at the beginning-of-the-month unit value. Units are revalued monthly to reflect changes in the investment values. Investment gains and losses of the Master Trust are allocated to the Plans based on each Plan's units held.

Arconic Corp. Pension Plans

NOTES TO FINANCIAL STATEMENTS - CONTINUED

December 31, 2024 and 2023

Each Plan's interest in the net assets of the Master Trust is based on the beginning-of-year value plus actual contributions and allocated investment income less actual benefit payments, allocated investment loss, and expenses.

Benefit Payments to Participants

Benefit payments to participants are recorded when paid.

Administrative Expenses

Audit, legal, actuarial, recordkeeping, and other administrative expenses are paid by the Plans. Expenses for services provided for the Master Trust are allocated to the Plans ratably, as applicable. Expenses for services provided directly to a specific plan are attributed to only that plan.

Employer Contributions Receivable

Employer contributions receivable represents the remaining funding amounts the Plan Sponsor is required to contribute to meet the minimum contribution levels established by law or a formal commitment by Arconic to make a contribution into either of the Plans.

Funding Policy

Participants are not permitted to make contributions to the Plans. The Plan Sponsor contributes amounts deemed necessary on an actuarial basis to provide each of the Plans with assets sufficient to meet the benefits to be paid to current and future retirees or their beneficiaries. The minimum required contributions, if any, for the Plans are designed to fund the Target Normal Cost and an amortization installment towards any funding shortfall, which occurs when there is an excess of Funding Target liability over the Actuarial Value of Plan Assets. The amortization installment is designed to fully fund this shortfall for a specific year over a fifteen-year period (effective January 1, 2022 in accordance with the provisions of the American Rescue Plan Act of 2021). Arconic may also voluntarily contribute amounts in excess of the minimum required contributions to meet certain funding thresholds or company objectives.

The actuarial-determined minimum required contribution is calculated using the Unit Credit Cost Method. The Funding Target liability is the present value of accrued benefits and based on compensation and service to date (unless frozen at a prior date). The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting both the effect of expected compensation increases during the year and expected expenses to be paid from plan assets during the year.

In 2024 and 2023, the Plans met ERISA's minimum funding requirements.

Investment Policy and Strategy

The principal objectives underlying the investment of the Plans' assets are to ensure that Arconic can properly fund benefit obligations as they become due under a broad range of potential economic and financial scenarios, maximize the long-term investment return with an acceptable level of risk based on such obligations, and broadly diversify investments across and within various asset classes to protect asset values against adverse movements. The use of derivative instruments is permitted where appropriate and necessary for achieving diversification across the balance of the asset portfolio.

NOTE 4 - FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. A fair value hierarchy is used to distinguish between (i) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (ii) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques are required to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of the fair value hierarchy are described below:

Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical unrestricted assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are both significant to the fair value measurement and unobservable.

Net asset value ("NAV") is used as a practical expedient for all the underlying investments that (a) do not have a readily determinable fair value and (b) either have the attributes of an investment company or prepare their financial statements consistent with the measurement principles of an investment company.

Below is a description of the valuation methodologies used to measure the fair value of assets held by the Master Trust. The methods described may produce a fair value measurement that may not be indicative of net realizable value or reflective of future fair value. Furthermore, while Management believes the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain assets could result in a different fair value measurement at the respective financial statement date.

Cash

Cash held within collective trust funds are valued at the closing NAV of the investment on a per share basis as a practical expedient. Other cash (U.S. Treasury bills) are valued at the closing price reported on an active market on the last business day of the period presented (Level 1).

Equity Securities

Equity securities held within collective trust funds, which are comprised of the stock of publicly traded companies, are valued at the closing NAV of the investment on a per share basis as a practical expedient. Other equity securities, which are comprised of direct investments in the stock of publicly traded companies, including real estate investment trusts, are valued at the closing price reported on an active market on the last business day of the period presented (Level 1).

Fixed Income Securities

U.S. and non-U.S. fixed interest obligations (corporate bonds and debentures) are valued through consultation and evaluation with brokers in the institutional market using quoted prices and other observable market data (Level 2). U.S. government debt is valued at the closing price reported on an active market on the last business day of the period presented (Level 1). Fixed income securities held within collective trust funds, which are comprised of both corporate debt and U.S. government debt, are valued at the closing NAV of the investment on a per share basis as a practical expedient.

Derivative Instruments

Futures contracts are valued at the closing price reported on an active market on the last business day of the period presented (Level 1).

Alternative Investments

Valued at the closing NAV of the investment on a per share basis as a practical expedient as reported in the investment's audited financial statements. In the event that audited financial statements for these investments are not available in time to prepare the Plans' financial statements or Management believes the value reported by the investment manager does not accurately reflect fair value due to an event in the marketplace, Management will adjust the reported NAV based upon information provided by the investment manager and independent valuation experts.

The following tables set forth the fair value of the Master Trust's investments by level within the fair value hierarchy or net asset value as of December 31, 2024 and 2023:

NOTE 5 - DERIVATIVE INSTRUMENTS

The Master Trust may enter into contractual arrangements classified as derivatives in carrying out the Plan Sponsor's investment strategy, principally to (1) manage interest rate risk within the portfolio, (2) manage exposure to a market more efficiently than could be accomplished through the use of cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or by capturing value disparities between financial instruments. The Master Trust may utilize exchange traded instruments such as interest rate futures, options on futures, interest rate swaps, interest rate collars, put and call option contracts, and foreign currency forward contracts. The Master Trust is subject to enforceable master netting arrangements, or netting arrangements, with certain counterparties. Master netting agreements may not be specific to each different asset type; in such instances, they would allow Master Trust to close out and net its total exposure to a specified counterparty in the event of a default.

NOTES TO FINANCIAL STATEMENTS - CONTINUED

December 31, 2024 and 2023

As of December 31, 2024 and 2023, the Master Trust held open positions in several long and short futures contracts. The aggregate notional amount and aggregate fair value as of December 31, 2024 and 2023 was \$661,129,667 and \$(9,660,142), respectively, and \$654,930,041 and \$30,321,514, respectively, for long contracts and \$(107,227) and \$921, respectively, and \$3,603,732 and \$(121,659), respectively, for short contracts. The unrealized change on these positions in 2024 was not material to the financial statements. For the year ended December 31, 2024, the average notional amount of open positions for long contracts and short contracts held by the Master Trust was \$656,770,431 and \$(859,338), respectively.

A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated future exchange. The Master Trust may use treasury, Eurodollar, and other fixed income futures contracts to manage exposure to interest rate risk and exposure in the market. Generally, the Master Trust's exposure to the underlying instrument held increases when futures are purchased and decreases when futures are sold.

NOTE 6 - ACCUMULATED PLAN BENEFITS

Accumulated plan benefits represent future benefit payments that are attributable, under each Plan's provisions, to service rendered by eligible employees to the Company through the benefit information date. Such benefits are expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) active employees or their beneficiaries.

The actuarial present value of accumulated plan benefits reflects the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The Plans' actuary performs these calculations in accordance with standards of practice developed by the actuarial science profession.

The following table reflects the actuarial present value of accumulated plan benefits for each of the Plans as of December 31, 2024:

	Vested Benefits of Participants Currently Receiving Benefits			Other Vested Benefits	Nonvested Benefits*	Total Present Value of Accumulated Plan Benefits
Salary Plan	\$ 659,933,447	\$ 173,548,706	\$ 4,889,495	\$ 838,371,648

The significant assumptions underlying the actuarial computations for the Plans at December 31, 2024 and 2023 were as follows:

Discount Rate

As of December 31, 2024 and 2023, the discount rate used for the Salary Plan was 5.65% and 5.22%, respectively, and the Hourly Plan was 5.77% and 5.29%, respectively.

Retirement

As of both December 31, 2024 and 2023, the assumed weighted average retirement age for the Salary Plan was 63 and the Hourly Plan was 64.

NOTE 7 - TAX STATUS

The Internal Revenue Service ("IRS") has determined and informed the Company by letters dated October 1, 2020 that the Plans are qualified, and the trust established under the Plans is tax exempt under the appropriate sections of the Internal Revenue Code ("IRC"). These Plans have been amended since receiving the determination letters. However, Management and the Plans' tax counsel believe that the Plans are currently designed and being operated in compliance with the applicable requirements of the IRC. Therefore, they believe the Plans were qualified and the related trust was tax-exempt as of December 31, 2024 and 2023.

US GAAP requires Management to evaluate tax positions taken by the Plans and recognize a tax liability (or asset) if the organization has taken an uncertain position that would not be sustained upon examination by the IRS. Management and the Plans' tax counsel have analyzed the tax positions taken by the Plans and have concluded that as of December 31, 2024 and 2023, there were no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. As such, no reserve was required under US GAAP. The Plans are subject to audit by the IRS, including the periods presented in these financial statements; however, there are no current IRS audits for any tax periods in progress.

NOTE 8 - INFORMATION CERTIFIED BY THE TRUSTEE

Management has elected to have the audit of each of the Plans' financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Management determined that the certification for each of the Plans received from the Trustee meets the requirements of ERISA Section 103(a)(3)(C).

NOTE 10 - SUBSEQUENT EVENTS

The Plans have evaluated subsequent events through October 2, 2025, the date the financial statements were available to be issued.

Effective September 1, 2025, the Hourly Plan was amended pursuant to a collective bargaining agreement with IBEW local at the Company's Davenport, Iowa location ratified on May 21, 2025. This agreement provides for higher multipliers used to calculate the union employee's future pension retirement benefits.

Effective September 30, 2025, the Salary Plan was amended pursuant to the Company entering an equity purchase agreement, dated July 15, 2025, to sell one hundred percent of the issued and outstanding membership interest of Arconic Architectural Products LLC to Hoover Treated Wood Products, Inc., a subsidiary of Graham Holdings Company ("Graham Holdings"). As part of the consideration of this purchase, Graham Holdings agreed to accept a transfer of approximately \$105,000,000 in accrued benefit liabilities from the Salary Plan to The Retirement Plan for Graham Holdings Company. The transfer was completed as of the close of business on September 30, 2025.

The Plans are not aware of any other subsequent events which would require recognition or disclosure in the financial statements.

SCHEDULE SB ATTACHMENTS

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates and may be inconsistent with other economic assumptions used in the valuation.

Demographic Assumptions

Inclusion date	Not applicable. New hires are not eligible to participate.
New or rehired employees	It was assumed there will be no new or rehired employees.
Mortality:	Separate rates for non-annuitants and annuitants based on Pri-2012 “Employees” and “Healthy Annuitants” (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as specified in the regulations under §1.430(h)(3)-1 using the IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).
• Lump sum	2024 IRS 417(e) Applicable Mortality table
Termination rates	The rates at which participants are assumed to terminate employment by age are shown below:

Benefit

commencement dates

- Preretirement death benefit Rules IC, IJ and IN: Date of death
Rule IM: The later of the death of the active participant or the date the participant would have attained age 55
Rule IP: The later of the death or the early retirement age of the active participant
- Deferred vested benefit Normal retirement age or earliest age for unreduced benefits
- Disability benefit Upon disablement
- Retirement benefit Upon termination of employment

Form of payment

Rules IC and IN: 7.5% of participants are assumed to elect a life annuity, 22.5% are assumed to elect a 50% joint and survivor pop-up annuity and 70% are assumed to elect a lump sum.

Rules IP: 100% of participants are assumed to elect a lump sum for the Rule IP portion of their benefit

Rule IM: 15% of participants are assumed to elect a life annuity, 15% are assumed to elect a 50% joint and survivor annuity and 70% are assumed to elect a lump sum.

Percent married

80% of participants are assumed to be married at death

Spouse age

Wife 3 years younger than husband

At-risk assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the [lump sum] form of payment.

SCHEDULE SB ATTACHMENTS

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation Date First day of plan year

Funding Target Present value of accrued benefits as required by regulations under IRC §430

Target Normal Cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Decrement timing The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Plan-related expenses As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal,

administration and trustee fees to be paid from the trust). The expense assumption is based on the prior year's actual expenses (excluding PBGC premiums) and further adjusted to include actual PBGC premiums due in the current plan year, rounded to the nearest \$10,000.

Benefits not valued All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor through its third-party administrator furnished participant data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale – Significant Economic Assumptions

WTW believes the assumptions selected do not significantly conflict with what would be reasonable for the reasons outlined below.

Discount rate The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Lump sum conversion rate As required by IRC §430, lump sum benefits are valued using “annuity substitution”, so that the interest rates assumed are effectively the same as described above for the discount rate.

Assumed return for asset smoothing The assumed return used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, based on an analysis of the plan sponsor's investment policy we believe the rate to be above the third segment rate. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client's best estimate and we

determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Assumptions Rationale – Significant Demographic Assumptions

PPA mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on an experience study conducted in 2019, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Retirement	Retirement rates were based on an experience study conducted in 2019, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Benefit commencement date for deferred benefits:	
<ul style="list-style-type: none">• Preretirement death benefit	Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available.
<ul style="list-style-type: none">• Deferred vested benefit	Commencement ages for deferred vested participants were based on an experience study conducted in 2019.
Form of payment	The percentage of retiring participants assumed to take the various optional forms of payment available are based on observed experience during a study performed in 2019.
Marital assumptions:	
<ul style="list-style-type: none">• Percent married	The assumed percentage married is based on the marital status of plan participants.

Prescribed Methods

Funding methods The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.

The mortality tables used to calculate the funding target and target normal cost were updated as required by IRC §430, including the change from using a static projection of mortality improvement to a generational projection.

The assumed plan-related expenses added to the target normal cost were updated to reflect current experience.

Change in methods since prior valuation None.

 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 4 Additional Information for Plans in At-risk Status as of January 1, 2024

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the lump sum form of payment.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions

Covered employees	Every regular employee of a Company authorized by the Board of Directors to participate who is not (1) accruing service countable for pension benefit accrual purposes under another retirement plan of Arconic or a Subsidiary, (2) in a collective bargaining unit, (3) in temporary or special employment or (4) in receipt of a pension (with certain limited exceptions), commissions, severance pay, retainer or fee under contract is generally covered under the Plan upon reaching age 21 with 1 year of service.
Participation date	Date of becoming a covered employee

Definitions

Service	Based on years, months, and days of continuous regular employment with the Company. Certain locations included do not recognize benefit service for all periods of service with the Company. These limitations are specified in the Plan document. Service was frozen for salaried and non-bargained hourly participants effective April 1, 2018.
Other pension	Any pension, other than Social Security or Railroad Retirement benefit that a participant is entitled to from a governmental plan, foreign or domestic, or a benefit from a nongovernmental plan to which Arconic or a subsidiary has contributed.
Compensation	Total payments made by the Company other than payments made for specific purposes not in the category of wages or salary. Compensation includes profit sharing amounts paid. Compensation excludes SPP pay and for Rule IM, compensation excludes overtime pay. Compensation was frozen for all Plan participants effective April 1, 2018.

Average Earnings

The average of the five highest calendar years of compensation within the preceding ten years for all but Rule IM and IP. For Rule IM, Average Earnings is the average of the five highest consecutive calendar years of compensation within the preceding ten years. For Rule IP, Average Earnings is the average of the three highest years of compensation within the preceding ten years. In the case of a participant who has been employed for less than five years (three years for Rule IP), Average Earnings shall be based on the Compensation received during the participant's employment.

Social Security Covered Compensation

The average of the taxable wage bases for the 35 calendar years ending with the year an individual terminates service

Rule IP

Plan Provisions

Accrued Benefit Consists of 1.875% of Average Earnings multiplied by service up to 10 years, plus 1.75% of Average Earnings multiplied by service in excess of 10 years, less Social Security offset when first payable of 1.25% of Social Security benefit multiplied by years of service up to 40 years. Minimum annual benefit is \$252 multiplied by years of service.

All benefits accrued through December 31, 2003 and December 31, 2004, depending on location, are frozen. Those participants with Rule IP accrued amounts are generally currently covered by Rule IN.

Normal Retirement Eligibility: Age 65, except age 60 for flight crew employees
Benefit: Accrued Benefit payable immediately

Early Retirement Eligibility: Within 10 years of Normal Retirement with 1 year of service and age plus service equals 60 or greater
Benefit: Accrued Benefit reduced 1/4 of 1% for each of the first 24 months and 5/12 of 1% for each additional month commencement date precedes 3 years prior to the participant's Normal Retirement Date.

The Social Security offset will not apply until the participant is first entitled to Social Security benefits. The Social Security offset is determined as the Social Security benefit as if the participant had remained in service to his Normal Retirement Date at his rate of compensation at the time of retirement, multiplied by the ratio of his years of service at retirement to the years of service he would have had at Normal Retirement reduced by 5/9 of 1% for each of the first 36 months and 5/12 of 1% for each additional month by which the participant is younger than the Social Security Retirement Date.
