## Retirement

Rates varying by age, average age 62.

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire by age are shown below. All employees are assumed to retire no later than age 70 or immediately if older. For those under 70, rates vary by age and service:

Attained Age	Percentage retiring during the year		
	Years of Service		
	10	20	30
55	0.00%	0.00%	70.00%
62	8.00%	8.00%	70.00%
65	20.40%	20.40%	70.00%

## Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the earliest date that the participant would have been eligible to commence a benefit.
- Deferred vested benefit The later of age 65 or termination of employment
- Disability benefit Upon disablement
- Retirement benefit Upon termination of employment

## Form of payment

60% Joint and survivor annuity with pop-up if married; life annuity if single.

## Percent married

85% of males; 85% of females. Used to value pre-retirement surviving spouse benefits and in determining the optional forms expected to be elected at commencement.

## Spouse age

Wife 3 years younger than husband.

## At-risk assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

**Timing of benefit payments**      Benefit payments are assumed to be made uniformly throughout the year and, on average, at mid-year.

## Methods

**Valuation date**      First day of plan year

**Funding target**      Present value of accrued benefits as required by regulations under IRC §430.

**Target normal cost**      Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

**Decrement timing**      The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

**Actuarial value of assets for determining minimum required contributions**      The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.

**Benefits not valued**      All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions with Cummins Inc. and, based on that review, is not aware of any other significant benefits required to be valued that were not.

<b>Discount rate</b>	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
<b>Plan-related expenses</b>	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

## Assumptions Rationale - Significant Demographic Assumptions

<b>Healthy Mortality</b>	Assumptions used for funding purposes are as prescribed by IRC §430(h).
<b>Disabled Mortality</b>	Assumptions used for funding purposes are as prescribed by IRC §430(h).

The deferred vested early commencement factors are not subsidized to the extent that the difference between this approach and using assumed commencement rates at multiple ages would be expected to be significant.
<b>Form of payment</b>	The percentage of retiring participants assumed to take joint and survivor annuities is based on observed experience in other similar businesses in the same industry.
