Asset return	<p>7.75% for the current plan year.</p> <p>The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.</p>										
Expected expense	<p>The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.</p>										
Retirement	<p>All participants are assumed to retire at the following rates:</p> <table border="1" data-bbox="597 1276 896 1516"> <thead> <tr> <th>Age</th> <th>Probability of retirement</th> </tr> </thead> <tbody> <tr> <td>62</td> <td>25%</td> </tr> <tr> <td>63</td> <td>15%</td> </tr> <tr> <td>64</td> <td>15%</td> </tr> <tr> <td>65</td> <td>100%</td> </tr> </tbody> </table> <p>This assumption is based on the results of recent experience analysis and anticipated future experience.</p>	Age	Probability of retirement	62	25%	63	15%	64	15%	65	100%
Age	Probability of retirement										
62	25%										
63	15%										
64	15%										
65	100%										
Upcoming year salary increase	<p>The preceding year's salary is increased by 3.00% at each age. Note: not used for Plan accounting calculations.</p> <p>Expected salary increase is composed of salary inflation, a real wage growth and a merit increase. This reflects company salary increase philosophies along with more recent experience of the plan participants.</p>										

Disability	None. This plan does not offer a subsidized disability benefit therefore the disability assumption is built into the withdrawal assumption.
Marriage	75% married; husbands are 3 years older than wives. This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.
Withdrawal	None. Due to the size of the plan and limited experience, we're not recognizing a withdrawal assumption prior to retirement.
Compensation limit increase	2.40% increase per year used in the calculation of the IRC 404 maximum deduction cushion. See Calculated deduction in Rules and regulations. Compensation limit increase is consistent with the inflation assumption.
Employee Contributions	2.00% of the expected salary over \$550 per month for active participants. The percentage of an employee's contribution is defined by the plan.
Form of benefit and basis	75% of participants will elect a benefit paid in a lump sum at the assumed retirement ages. The remaining participants will elect a monthly annuity on the normal form at the assumed retirement ages. This assumption is based on the results of recent experience analysis and anticipated future experience. The single sum benefit is based on the Applicable Mortality and the plan's funding target interest rates, as prescribed.
Methods prescribed by law	
Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
Lump sum payments	Lump sum payments are valued using the plan's funding target interest rates as required, per IRS guidance. These rates are currently higher than the actual rates used to determine lump sum distributions. Therefore, plan liabilities do not currently recognize this additional cost and this may result in the plan not accumulating adequate assets. You may wish to consider additional contributions.

Methods selected by plan sponsor

Asset method	<p>The asset valuation method is prescribed by law for plans that elect to use a value other than market value.</p> <p>For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.</p> <p>The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.</p> <p>When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.</p>
Segment rates	<p>24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.</p>
PBGC premium basis	<p>Your plan is a small plan as defined by PBGC. Variable rate premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2021 plan year and this method must be used for five years before a change can be made.</p>

Methods elected by actuary

Retirees	<p>Assets and liabilities for current and future retirees are included.</p>
Vested benefits	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p>

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan’s regular funding target and target normal cost.

Mortality Based on Pri-2012 Total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2023).

Mortality base rates **Before benefit payment period**
 Employee amount-weighted, male and female

During benefit payment period
 Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe “Approach 1” is reasonable for this plan.

Mortality improvement Principal 2023 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

Parameter	Principal 2023
Historical dataset	SSA
Whittaker-Henderson Graduation	Order 3
Interpolation Structure	Basic
Graduated MI data last year (“jumping off” point)	2017
H/D transition ultimate year by age/cohort	2029/2029
Weight placed on interpolation by cohort	50%
Initial Slope periods (constraint)	2016-2017 (0.000)
LTR	SSA LTR 2023
COVID-19 or Excess load	None ¹

¹Based on the sponsor’s input, plan experience does not show a need for long-term excess death or Covid death load adjustments.

See [Mortality documentation](#) for rationale and additional information.

Interest rate used to value liabilities

6.75%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Basis for lump sums

Interest rate

Based on the three segment yield curve: 3.55%/3.95%/4.95%

The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high quality corporate bond yields. According to our most recent study, the long-term expected yields for short/intermediate/long corporate bonds are 3.55%/3.95%/4.95%. For details, see Corporate AA yield in Table 3 of Long-Term Capital Market Assumptions link.

Mortality

We have selected the same [mortality](#) assumption for lump sum payments, but with a 50/50 blend of male and female total dataset base rates and mortality improvement scales. This reflects the IRS practice of defining lump sum mortality on a unisex basis.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age
 Retirement Plan for Employees of Diamond Fruit Growers, Inc.
 EIN 93-0113905 Plan No. 001

The weighted average retirement age is weighted by the expected percentage of active participants retiring at each age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

(1) Age	(2) Expected Active Headcount	(3) Retirement Rate	(4) Expected Retirements (2)*(3)	(5) Weighted Age (1)*(4)

Schedule SB, Part V - Summary of Plan Provisions
 Retirement Plan for Employees of Diamond Fruit Growers, Inc.
 EIN 93-0113905 Plan No. 001

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. This report reflects the provisions of the plan signed November 20, 2015.

Plan eligibility

Age	Attained age 21.
Service	Six months of employment.
Class	Any employee of the employer excluding the following: Bargaining employee unless agreement provides for coverage Nonresident alien with no U.S. source income Independent contractor

Plan participation is frozen effective December 31, 2006.

Normal retirement benefit

Age	The later of attained age 65 or the age on the date 5 years after the first day of the plan year in which entry date occurred. Those in the plan prior to January 1, 1998 do not have a service requirement.
Form	Monthly annuity payable for 5 years certain and life thereafter (optional forms may be elected in advance of retirement).
Amount (accrued benefit)	For each plan year in which a participant is credited with a years of accrual service, a percentage multiple by the participants compensation as indicated in the table below.

Plan year	Monthly compensation not in excess of \$550	Monthly compensation in excess of \$550
Before 1970	0.75%	1.50%
1970 – 1983	1.00%	1.75%
1984 - 1989	1.50%	2.50%
1990 – 1993	2.00%	2.50%
1994 - 2004	1.25%	1.75%
On and after 2005	1.00%	1.00%

Early retirement benefit

Age	Attained age 55.
Service	Completed 7 years of vesting service. Those in the plan prior to January 1, 1998 do not have a service requirement.
Form	Same as normal retirement benefit.
Amount	Accrued benefit on early retirement date reduced by 6 2/3% for each year up to five and 3 1/3% for each year between five and ten that the early retirement date precedes normal retirement date.

Late retirement benefit

Age	No maximum age.
Form	Same as normal retirement benefit.
Amount	Participants who continue to work past normal retirement date are required to receive notification that retirement benefits are suspended and the benefit payable is the accrued benefit on late retirement date. For employees who terminate employment prior to normal retirement date or after normal retirement date and elect to defer their benefit, the benefit payable on his late retirement date shall be the actuarial equivalent of the benefit that would have been payable on normal retirement date.

Termination benefit

Vesting percentage	20% after three years of vesting service plus 20% per year for each of the next four years of vesting service thereafter up to 100%.
Form	Same as normal retirement benefit with income deferred until normal retirement date.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage.

Death benefit

Survivor annuity death benefit (a vested benefit)

Eligibility	Qualified married participant fully or partially vested in an accrued benefit.
Form	Monthly annuity payable immediately to spouse after the date of death.
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day. The participant's mandatory contributions with interest will be returned under other circumstances.

Lump sum death benefit (a nonvested benefit)

Eligibility	Qualified participant fully or partially vested in an accrued benefit.
Form	Lump sum.
Amount	Active participant at time of death: Present value of the vested accrued benefit at participant's age 65. Inactive participant at time of death: An amount equal to the participant's required contribution account.

Employee contributions

Mandatory participant contributions	Each active participant is required to contribute 2.00% of their monthly compensation in excess of \$550.
Voluntary participant contributions	Prior to July 1, 1998, this plan accepted nondeductible, voluntary contributions from any active participant. No voluntary participant contributions are accepted after June 30, 1998. Voluntary participant contributions with interest are refunded separately and go towards the purchase of benefits in addition to the other benefits in the plan.

Definitions

Monthly compensation	An employee's compensation for such year divided by the number of months which he is credited with at least one hour or service.
Accrual service	The sum of (a) and (b) below: (a) Before January 1, 1976: Period of service expressed as whole years and fractional parts of a year on or after date of entry on the basis of hours worked divided by 2,280 in the plan year. (b) On or after January 1, 1976: One year of accrual service is earned for each plan year on or after date of entry during which the employee works 1,000 or more hours. A partial year of accrual service is earned based on hours worked divided by 1,000 in year of in which participant is hired or terminated.
Vesting service	One year of vesting service is earned for each plan year on or after date of hire during which the employee works 1,000 or more hours.

Optional forms of benefit payments

The optional forms of benefit payments are:

- Monthly annuity payable for life.
- Monthly annuity payable for 5, 10, or 15 years certain and life.
- Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75, or 100.
- Monthly annuity payable as modified cash refund.
- Monthly annuity payable as 5, 10, or 15 years certain.
- Single sum payment equal to the present value of the retirement benefit.

The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is the plan year.

Lump sum provisions

Small amounts force out (SAFO) – allowed up to \$5,000.

Lump sums in excess of SAFO – are allowed at termination of employment and retirement.

Conversion – greater of the deferred or immediate rate with the optional form conversion basis based on the applicable interest rate and applicable mortality table as set forth in Code Section 417. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is the plan year.

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.

Schedule SB, Line 24 – Change in Actuarial Assumptions
Retirement Plan for Employees of Diamond Fruit Growers, Inc.
EIN 93-0113905 Plan No. 001

Certain non-prescribed assumptions have been changed since last year. These assumptions were changed to better reflect the anticipated experience of your plan. See the attachment, Part V – Statement of Actuarial Assumptions/Methods, for the rationale for each assumption.

The assumed asset return for the current year has increased from 7.25% to 7.75%. This rate is used in the calculation of the actuarial value of plan assets.
