Independent Auditor's Report

The Plan Administrator, Nutrien North American Pension Committee, and Management of the
PCS U.S. Employees' Pension Plan
Loveland, Colorado

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of PCS U.S. Employees' Pension Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits and of accumulated plan benefits as of December 31, 2024 and December 31, 2023, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of PCS U.S. Employees' Pension Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2024 and December 31, 2023, and for the year ended December 31, 2024, stating that the certified investment information, as described in Note 5 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of PCS U.S. Employees' Pension Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about PCS U.S. Employees' Pension Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of PCS U.S. Employees' Pension Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about PCS U.S. Employees' Pension Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

1. PLAN DESCRIPTION

General

The following description of the PCS U.S. Employees' Pension Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

PCS Administration (USA), Inc. (the "Company" and "Plan Sponsor") is a wholly owned subsidiary of Nutrien Ltd. ("Nutrien"). The Plan is a defined benefit pension plan covering all eligible employees of the Company; PCS Phosphate Company, Inc.; PCS Sales (USA), Inc.; non-bargaining employees of White Springs Agricultural Chemicals, Inc.; non-bargaining employees of PCS Nitrogen, Inc.; and PCS Sales (Iowa), Inc. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

The Trustee of the Plan at December 31, 2024 and 2023 was Bank of New York Mellon (the "Trustee"). The Plan is administered by a committee of three or more persons (the "Plan Committee") appointed by Nutrien's board of directors. The Plan Committee determines the appropriateness of the Plan's investment offerings and monitors investment performance.

All of the Plan's investment assets are held in a trust account at the Trustee and consist of an undivided interest in an investment account of the PCS Administration (USA), Inc., Master Trust (the "Master Trust"), a master trust established by the Company and administered by the Trustee. The Trustee, together with Towers Watson Investment Services, Inc. (the "Investment Manager") manages the Plan's investments.

Pension benefits

As defined by the Plan document, participants are eligible to receive normal retirement benefits, based on years of service and compensation, after becoming fully vested. The Plan permits participants who meet the service requirements to receive a reduced early retirement benefit as early as age 55, as defined by the Plan.

Participants may elect a monthly benefit in either the normal form of payment or an optional form of payment annuity option. A lump-sum payment option is only allowed in the event of vested termination or retirement when the present value is less than \$5,000. If a vested participant dies before starting to receive a pension, the participant's spouse may be eligible to receive a qualified spouse's annuity, as outlined in the Plan document.

In 2019, the Plan was amended for certain employee groups based on their age and service to limit the duration of future service pension accruals effective December 31, 2019, or December 31, 2024, and to eliminate new entrants to the plan. See Amendment Number 4 to the Plan for more information.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of accounting

These financial statements have been prepared using the accrual basis of accounting.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("US GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Fair value measurements and (loss) income recognition

The Plan's investment in the Master Trust is presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

A three-level hierarchy is used to disclose assets and liabilities measured at fair value. Assets and liabilities are classified in their entirety based on the lowest level of input significant to the fair value measurement.

The three levels are defined as follows:

- Level 1 – Observable inputs based on quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 – Observable inputs based on quoted prices for similar assets and liabilities in active markets, quoted prices for identical assets and liabilities in inactive markets, inputs other than quoted prices that are observable for the asset or liability, or inputs derived from or corroborated by observable market data by correlation or other means.
- Level 3 – Unobservable inputs that reflect an entity's own assumptions about what inputs a market participant would use in pricing the asset or liability based on the best information available in the circumstances.

The following is a description of the valuation methodologies used for assets measured at fair value.

Cash and Cash Equivalents: Valued at cost, which approximates fair value for deposit accounts (level 1 inputs) and at cost, plus reinvested interest, which approximates fair value, for short-term money market commingled funds (level 2 inputs).

Equity Securities—International and US Companies: Valued at their last closing price reported on nationally recognized securities exchanges (level 1 inputs).

Debt Securities: Valued based on a compilation of primarily observable market information, including traded securities with similar attributes or a broker's quote in an inactive market (level 2 inputs). Where no valid market information is available, the issuing company's financial information or other market information is used to estimate fair value (level 3 inputs). This methodology incorporates such factors as the issuer's industry, the security's rating and tenor, its coupon rate, its position in the capital structure of the issuer, yield curves, credit curves, prepayment rates, and other relevant factors.

Real Estate Securities, and Other: Valued at their last closing price reported on nationally recognized securities exchanges (level 1 inputs) or valued based on a compilation of primarily observable market information, including traded securities with similar attributes or a broker's quote in an inactive market (level 2 inputs). Where no valid market information is available, the issuing company's financial information or other market information is used to estimate fair value (level 3 inputs). This methodology incorporates such factors as the issuer's industry, the security's rating and tenor, its coupon rate, its position in the capital structure of the issuer, yield curves, credit curves, prepayment rates, and other relevant factors.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although Plan management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Purchases and sales of securities are recorded on a trade date basis. Interest income is recorded on an accrual basis. Dividends are recorded on the ex-dividend date. Investment (loss) income includes the Plan's gains and losses on investments bought and sold, as well as held during the year.

The classification of investment earnings (loss) reported in the statement of changes in net assets available for benefits may differ from the classification of earnings on Form 5500 due to different reporting requirements on Form 5500.

Actuarial present value of accumulated plan benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service rendered by employees as at the valuation date. Accumulated plan benefits include benefits expected to be paid to (i) retired or terminated employees or their beneficiaries, (ii) beneficiaries of employees who have died, and (iii) present employees or their beneficiaries. Benefits payable as a result of retirement, death, disability, or termination of employment are included, to the extent they are deemed attributable to employee service rendered to the valuation date. The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The effect of Plan amendments on the actuarial present value of accumulated plan benefits is recognized during the year in which such amendments become effective.

The actuarial present value of accumulated plan benefits as at January 1, 2024 is as follows:

	January 1, 2024
Vested benefits:	
Inactive participants receiving benefits	430,455,359
Active participants	201,951,587
Inactive participants with deferred benefits	57,952,521
	690,359,467
Non-vested benefits	12,635,183
Actuarial present value of accumulated plan benefits	702,994,650

The changes in the actuarial present value of accumulated plan benefits for the year ended January 1, 2024 are summarized as follows:

Actuarial present value of accumulated plan benefits at January 1, 2023	689,828,519
Changes due to:	
Benefits accumulated and actuarial (gains) losses	12,925,529
Increase for interest due to decrease in discount period	39,333,748
Benefits paid	(39,093,146)
Assumption changes	-
Actuarial present value of accumulated plan benefits at January 1, 2024	702,994,650

The more significant actuarial assumptions used in the January 1, 2024, valuation were:

- Mortality: PRI-2012 mortality table, projected generationally with Scale MP-2021, with no collar adjustments
- Retirement age for active participants: Ages ranging from 55 to 70; weighted-average retirement age of 62 (no change from prior year)
- Retirement age for terminated vested participants: retirement age of 61 (no change from prior year)
- Investment return: 5.75%, compounded annually (no change from prior year)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Payment of benefits

Benefit payments to participants are recorded upon distribution.

Administrative expenses

Administrative expenses of the Plan are paid by the Plan, as provided in the Plan document. Investment management fees for certain investments held in the Master Trust, including mutual/commingled funds, are included as a reduction of the Plan's interest in Master Trust investment income and are not reflected separately in the statements of changes in net assets available for benefits.

3. FUNDING POLICY

Contributions to provide benefits under the Plan are made solely by the Plan Sponsor. Prior to January 1, 1999, participants were required to contribute to the Plan. The Plan Sponsor's funding policy is to make contributions to the Plan in amounts equal to or greater than the minimum amounts determined by the Plan's independent actuary, subject to tax limitations. The minimum funding requirements of ERISA were met, and no contributions were made, for the years ended December 31, 2024 and 2023.

4. PLAN TERMINATION

Although it has not expressed any intent to do so, the Plan Sponsor has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder, and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty while other benefits may not be provided for at all.

5. INFORMATION CERTIFIED BY THE TRUSTEE AND A CUSTODIAN

The following is a summary of the unaudited information regarding the Plan as at and for the years ended December 31, 2024 and 2023, included in the Plan's financial statements. This was prepared by or derived from information prepared by the Trustee of the Plan and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the Trustee and the Custodian that such information is complete and accurate.

6. PLAN INTEREST IN MASTER TRUST

All of the Plan's investments are held in the Master Trust, which was established for the investment of assets of the Plan and one other retirement plan sponsored by the Plan Sponsor. Each participating retirement plan has an undivided interest in the Master Trust. Use of the Master Trust permits the commingling of Plan assets with the assets of the participating plans for investment and administrative purposes. Although assets of the plans are commingled in the Master Trust, the Trustees maintain supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income or loss of the investment assets is allocated by the Trustees to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

The net assets and investments of the Master Trust at December 31, 2024 and 2023, are summarized as follows:

	2024		2023	
	Master Trust	Plan's Proportionate Share	Master Trust	Plan's Proportionate Share

Plan's percent interest in the Master Trust		87.3%		87.2%

The net investment (loss) income of the Master Trust for the years ended December 31, 2024 and 2023, are summarized as follows:

	2024	2023
Net change in fair value of investments	(2,723,358)	49,812,151
Interest and dividends	873,958	2,580,064

Plan's interest in Master Trust investment (loss) income	(1,609,582)	45,698,062

7. INVESTMENTS

The Master Trust investment assets at fair value at December 31, 2024 and 2023, set forth by level within the fair value hierarchy, are shown below. Investments whose fair value is estimated using the net asset value ("NAV") practical expedient are not assigned a level.

The availability of observable market data is monitored to assess the appropriate classifications of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the end of the reporting period.

Management has evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the years ended December 31, 2024 and 2023, there were no significant transfers in or out of levels 1, 2 or 3.

The following table presents the fair value and redemption frequency for the Master Trust's assets whose fair value is estimated as a practical expedient using the NAV per share as at December 31, 2024 and 2023.

1 - The Master Trust has a significant concentration in the following investments either at December 31, 2024 and 2023.

Category	Fund	Strategy
Equities	Willis Towers Watson Group Trust Diversified Equity Fund	This fund seeks to generate total returns above the return of the MSCI All Country World Index on a medium to long-term basis. The assets are invested and reinvested primarily in common stocks and other equity-type securities issued by U.S. and non-US domiciled companies, including convertible securities, preferred stocks, real estate investment trusts, rights and warrants.
Debt securities	IR&M Intermediate Corporate Bond Fund	This fund seeks a risk-adjusted total return on a medium and long-term basis by primarily investing in a portfolio of corporate credit instruments.
Debt securities	Willis Towers Watson Group Trust Long Credit Fund	This fund seeks to achieve, over an extended period, total returns comparable or superior to broad measures of the domestic investment grade credit bond market as reflected by the Bloomberg Long Corporate Index.
Debt securities	Willis Towers Watson Group Trust Diversified Credit Fund	This fund seeks a risk-adjusted total return on a medium and long-term basis by primarily investing in a portfolio of alternative credit-oriented investments funds and/or managed accounts.
Government and agency securities	Blackrock Treasury Key Rate Duration Funds	This fund seeks investment return that approximates as closely as practicable to the total rate of return of the fund's corresponding Bank of America Merrill Lynch Treasury US Key Rate Duration Index by investing primarily in a portfolio of obligations issued or guaranteed by the US government, its agencies or instrumentalities.
Government and agency securities	State Street Long/Intermediate US Government Bond Index Non-Lending Fund	This fund seeks investment return that approximates as closely as practicable, before expenses, the performance of the Bloomberg Barclays US Long Government Bond or US Intermediate Government Bond Index Non-Lending Fund over the long term. It may invest directly or indirectly in securities and other instruments, including in other pooled investment vehicles.
Real estate securities	Willis Towers Watson Group Trust Real Asset Fund	This fund is a multi-asset, multi-manager fund that invests in public and private debt and equity investments in a range of real asset strategies, including but not limited to real estate, infrastructure, timberland and agriculture/farmland. The assets of the fund will be invested and reinvested in a variety of real asset strategies in both the listed and unlisted segments of the market.

8. TAX STATUS

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated April 18, 2018, that the Plan is designed in accordance with the applicable sections of the Internal Revenue Code ("IRC"). The Plan has been amended since receiving the determination letter. However, Plan management believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements. Continued qualification of the Plan will depend on the operation of the Plan in compliance with IRS regulations.

US GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain tax position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions. However, there are currently no audits for any tax periods in progress.

9. RISKS AND UNCERTAINTIES

The Master Trust utilizes various investment securities. Investment securities, in general, are exposed to various risks such as interest rate, credit and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts presented in the statements of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

10. RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

Certain Plan investments in the Master Trust are shares of funds managed by the Trustee and the Investment Manager, and therefore, these transactions qualify as exempt related party and party-in-interest transactions.

11. SUBSEQUENT EVENTS

The Plan's management has evaluated subsequent events through October 1, 2025, the date the financial statements were available to be issued, to ensure that the financial statements include appropriate disclosure or recognition of events that occurred subsequent to December 31, 2024. No items requiring disclosure or recognition were noted.

Demographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee is hired.

New or rehired employees It was assumed there will be no new or rehired employees.

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55
- Deferred vested benefit Age 61
- Disability benefit Upon disablement
- Retirement benefit Upon termination of employment

Form of payment 15% of participants are assumed to elect a single life annuity, 35% are assumed to elect a 50% J&S with 10 year certain, 35% are assumed to elect a 100% J&S with 10 year certain, and 15% are assumed to take a 10 year certain & single life.

Percent married 80% of males; 40% of females. These assumptions are used to value pre-retirement surviving spouse benefits and in determining the optional form expected to be elected at commencement.

Spouse age Wife 3 years younger than husband.

Covered pay

- Nitrogen all Service and Post 1998 Phosphate and Sales 2023 base pay plus 3-year average of overtime pay plus larger of bonus pay rate multiplied by bonus percentage and 3-year average of bonuses. No projection with salary scale to 2024 is applied.
- Pre 1999 Phosphate and Sales 2023 base pay projected to 2024 with salary scale.

At-risk assumptions For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next

Mortality

■ Healthy

Separate rates for non-annuitants (based on PRI-2012 “Employees” table without collar or amount adjustments, projected forward with generational projection using the IRS adjusted Scale MP-2021) and annuitants (based on PRI-2012 “Healthy Annuitants” table (participants and beneficiaries combined) without collar or amount adjustments, projected forward with generational projection using the IRS adjusted Scale MP-2021). The rate of future mortality improvement at any age for the year beginning on or after the valuation date is capped at 0.78%.

Not applicable.

Methods

Valuation date

First day of the plan year.

Funding target

Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost

Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Decrement Timing

The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant

Information was extracted from the administration system as of 1/1/2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	Prescribed by the IRS.
Plan-related expenses	The expenses included in the target normal cost are based on expected PBGC premium payment for the 2024 plan year plus an estimate of non-PBGC administrative expenses, which included consideration of administrative expenses paid in the prior year, excluding costs related to the management of plan assets, rounded to the nearest \$1,000.
Rates of increase in compensation, Social Security wage base, Inflation, IRC section 415, and 401(a)(17)	Assumed increases were chosen by the plan sponsor based on a previous experience study. Social Security wage base increases reflect a long-term view of inflation and the average real wage increases for the US economy and a whole. Inflation is within a reasonable range based on WTW's capital market assumption models. For IRC section 415, and 401(a)(17) reflects a long-term view of inflation and the average real wage increases for the US economy and a whole.
Rate of increase in assumed return for asset smoothing	The assumed return of 5.75% used for asset smoothing, is the expected return on assets assumption chosen by the client for the 2023 plan year. We concurred with that assumption.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).

For the forthcoming demographic assumptions, because we do not have enough credible experience to analyse, the assumptions are based on the results of the prior actuary's experience study which we understand reflects experience during 2010-2012. We also understand that these assumptions were reviewed annually since the last experience study for reasonableness. Although we did not conduct our own analysis, these assumptions appear reasonable based upon our experience with many plans. We will monitor gains and losses in future valuations to confirm reasonability.

Termination	Termination rates were based on prior experience studies conducted, with annual consideration of whether any conditions

Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC §430.

The assumed plan-related expenses to add to the target normal cost were changed from \$933,000 for 2023 to \$693,000 for 2024 to reflect the updated expectations of 2024 expenses and 2024 PBGC premiums.

Demographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee is hired.

New or rehired employees It was assumed there will be no new or rehired employees.

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55
- Deferred vested benefit Age 61
- Disability benefit Upon disablement
- Retirement benefit Upon termination of employment

Form of payment 15% of participants are assumed to elect a single life annuity, 35% are assumed to elect a 50% J&S with 10 year certain, 35% are assumed to elect a 100% J&S with 10 year certain, and 15% are assumed to take a 10 year certain & single life.

Percent married 80% of males; 40% of females. These assumptions are used to value pre-retirement surviving spouse benefits and in determining the optional form expected to be elected at commencement.

Spouse age Wife 3 years younger than husband.

Covered pay

- Nitrogen all Service and Post 1998 Phosphate and Sales 2023 base pay plus 3-year average of overtime pay plus larger of bonus pay rate multiplied by bonus percentage and 3-year average of bonuses. No projection with salary scale to 2024 is applied.
- Pre 1999 Phosphate and Sales 2023 base pay projected to 2024 with salary scale.

At-risk assumptions For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next

Mortality

■ Healthy

Separate rates for non-annuitants (based on PRI-2012 “Employees” table without collar or amount adjustments, projected forward with generational projection using the IRS adjusted Scale MP-2021) and annuitants (based on PRI-2012 “Healthy Annuitants” table (participants and beneficiaries combined) without collar or amount adjustments, projected forward with generational projection using the IRS adjusted Scale MP-2021). The rate of future mortality improvement at any age for the year beginning on or after the valuation date is capped at 0.78%.

assumptions**

Not applicable.

Methods

Valuation date

First day of the plan year.

Funding target

Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost

Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Decrement Timing

The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant

Assumptions Rationale - Significant Economic Assumptions

Discount rate	Prescribed by the IRS.
Plan-related expenses	The expenses included in the target normal cost are based on expected PBGC premium payment for the 2024 plan year plus an estimate of non-PBGC administrative expenses, which included consideration of administrative expenses paid in the prior year, excluding costs related to the management of plan assets, rounded to the nearest \$1,000.
Rates of increase in compensation, Social Security wage base, Inflation, IRC section 415, and 401(a)(17)	Assumed increases were chosen by the plan sponsor based on a previous experience study. Social Security wage base increases reflect a long-term view of inflation and the average real wage increases for the US economy and a whole. Inflation is within a reasonable range based on WTW's capital market assumption models. For IRC section 415, and 401(a)(17) reflects a long-term view of inflation and the average real wage increases for the US economy and a whole.
Rate of increase in assumed return for asset smoothing	The assumed return of 5.75% used for asset smoothing, is the expected return on assets assumption chosen by the client for the 2023 plan year. We concurred with that assumption.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).

For the forthcoming demographic assumptions, because we do not have enough credible experience to analyse, the assumptions are based on the results of the prior actuary's experience study which we understand reflects experience during 2010-2012. We also understand that these assumptions were reviewed annually since the last experience study for reasonableness. Although we did not conduct our own analysis, these assumptions appear reasonable based upon our experience with many plans. We will monitor gains and losses in future valuations to confirm reasonability.

Termination	Termination rates were based on prior experience studies conducted, with annual consideration of whether any conditions

Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC §430.

The assumed plan-related expenses to add to the target normal cost were changed from \$933,000 for 2023 to \$693,000 for 2024 to reflect the updated expectations of 2024 expenses and 2024 PBGC premiums.

The sum of years of benefit service (pre-1999 and post-1998) can't exceed 35 years. A participant with more than 35 years is entitled to the better of the benefit based on the first 35 years or the last 35 years.

Eligibility for Benefits

Normal retirement	Retirement on NRD
Early retirement	Retirement before NRD and on or after both attaining age 55 and completing five years of vesting service
Postponed retirement	Retirement after NRD
Deferred vested termination	Termination for reasons other than death or retirement after completing five years of vesting service. Under Amendment 1 to the Plan executed December 18, 2017, a Supplement K participant (eligible for special provisions under the 2018 PCS Administration (USA) Inc. Involuntary Separation Plan) will become 100% vested upon termination of employment regardless of service.
Disability	Permanent and total disability prior to NRD, and participant is receiving a Social Security disability benefit and five years of vesting service
Preretirement death benefit	Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse

Benefits Paid Upon the Following Events

Normal retirement	The monthly pension benefit determined as of NRD
Early retirement	The monthly pension benefit determined as of the early retirement date. If a participant is at least age 62 and has 20 years of vesting service there is no early retirement reduction. Otherwise, the early retirement benefit for post -1998 service is reduced 6% for each of the first five years and 4% for each of the next five years that payment precedes the participant's NRD For employees hired before 1997, the benefit based on pre-1999 service is unreduced if a participant is at least age 60 and has 20 years of vesting service. See additional detail regarding the early retirement reductions for pre-1999 service provided in the early retirement description for pre-1999 service in the "Nitrogen" provisions section below.

Postponed retirement	The monthly pension benefit determined as of the actual retirement date
Deferred vested termination	The monthly pension benefit determined as of the termination date with the same reductions as described for early retirement
Disablement	The disability benefit, payable at the participant's normal retirement date, is computed using the same formula as normal retirement. The participant shall continue to receive benefit service during the period of disability while he is eligible to receive benefits under a long-term disability plan maintained by the Employer until the earlier of (a) the date his accruals under the Plan are frozen if he is not a permanently grandfathered employee, or (b) his normal retirement date. Also, his annual compensation during the period of disability shall be deemed to equal his rate of annual compensation as of the date of disability.
Preretirement death	For participants eligible for early retirement, the surviving spouse benefit is equal to the annuity which would have been payable had the participant retired the day prior to death and elected the joint and 50% survivor option. For vested participants the benefit is equal to the annuity which would have been payable had the participant separated from service on the date of death, survived to the earliest retirement age, retired under the joint and 50% survivor option.
Return of participant contributions	If a participant terminates employment prior to becoming vested, his contributions, if any, plus credited interest will be returned in one lump sum. If the amount is greater than \$5,000, the participant will receive a deferred vested benefit as described above. If a participant dies prior to becoming vested, his contributions, if any, plus credited interest will be paid to his beneficiary in one lump sum. If the amount is greater than \$5,000, and the participant was married on the date of his death, the participant's spouse will receive a preretirement surviving spouse benefit as described as above.

Effective December 31, 1998, the PCS Nitrogen employees were merged into the PCS US Employees' Pension Plan. The existing PCS Nitrogen formula continues to apply to service prior to 1999 while the new consolidated plan design applies to service after 1998. Certain grandfathering provisions apply towards service up to March 31, 2000.

Continued employee:

An employee designated as such under Section 10.02 of the Subscription Agreement dated May 31, 1984 between AAC Holding's, Inc. and Allied Corporation.

Effective December 31, 2019, the plan was closed to new entrants.

Participation date

An employee becomes a participant in the plan on the first day of employment. Nitrogen salaried employees become participants on the later of January 1, 1999 or the first day of employment.

For the following groups, participation begins upon the later of date of hire or the date listed below.

LaPlatte, Nebraska – May 31, 1989

Memphis, Tennessee – July 21, 1989

Wilmington, North Carolina – July 21, 1989

Lake Charles, Louisiana – August 17, 1989

Clinton, Iowa – September 15, 1989

Augusta, Georgia – November 7, 1989

Savannah, Georgia – November 7, 1989

SCHEDULE SB ATTACHMENTS

The sum of years of benefit service (pre-1999 and post-1998) can't exceed 35 years. A participant with more than 35 years is entitled to the better of the benefit based on the first 35 years or the last 35 years.

Eligibility for Benefits

Normal retirement	Retirement on NRD
Early retirement	Retirement before NRD and on or after both attaining age 55 and completing five years of vesting service
Postponed retirement	Retirement after NRD
Deferred vested termination	Termination for reasons other than death or retirement after completing five years of vesting service. Under Amendment 1 to the Plan executed December 18, 2017, a Supplement K participant (eligible for special provisions under the 2018 PCS Administration (USA) Inc. Involuntary Separation Plan) will become 100% vested upon termination of employment regardless of service.
Disability	Permanent and total disability prior to NRD, and participant is receiving a Social Security disability benefit and five years of vesting service
Preretirement death benefit	Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse

Benefits Paid Upon the Following Events

Normal retirement	The monthly pension benefit determined as of NRD
Early retirement	The monthly pension benefit determined as of the early retirement date. If a participant is at least age 62 and has 20 years of vesting service there is no early retirement reduction. Otherwise, the early retirement benefit for post -1998 service is reduced 6% for each of the first five years and 4% for each of the next five years that payment precedes the participant's NRD For employees hired before 1997, the benefit based on pre-1999 service is unreduced if a participant is at least age 60 and has 20 years of vesting service. See additional detail regarding the early retirement reductions for pre-1999 service provided in the early retirement description for pre-1999 service in the "Nitrogen" provisions section below.

SCHEDULE SB ATTACHMENTS

Postponed retirement	The monthly pension benefit determined as of the actual retirement date
Deferred vested termination	The monthly pension benefit determined as of the termination date with the same reductions as described for early retirement
Disablement	The disability benefit, payable at the participant's normal retirement date, is computed using the same formula as normal retirement. The participant shall continue to receive benefit service during the period of disability while he is eligible to receive benefits under a long-term disability plan maintained by the Employer until the earlier of (a) the date his accruals under the Plan are frozen if he is not a permanently grandfathered employee, or (b) his normal retirement date. Also, his annual compensation during the period of disability shall be deemed to equal his rate of annual compensation as of the date of disability.
Preretirement death	For participants eligible for early retirement, the surviving spouse benefit is equal to the annuity which would have been payable had the participant retired the day prior to death and elected the joint and 50% survivor option. For vested participants the benefit is equal to the annuity which would have been payable had the participant separated from service on the date of death, survived to the earliest retirement age, retired under the joint and 50% survivor option.
Return of participant contributions	If a participant terminates employment prior to becoming vested, his contributions, if any, plus credited interest will be returned in one lump sum. If the amount is greater than \$5,000, the participant will receive a deferred vested benefit as described above. If a participant dies prior to becoming vested, his contributions, if any, plus credited interest will be paid to his beneficiary in one lump sum. If the amount is greater than \$5,000, and the participant was married on the date of his death, the participant's spouse will receive a preretirement surviving spouse benefit as described as above.

Disablement

Pre-1999

A benefit commencing at age 65 calculated as at normal retirement, based on the credited service the participant would have had at age 65 had he remained in active employment and compensation for the year immediately preceding disability.

A participant who becomes disabled but is not entitled to long-term disability benefits will receive a benefit under the plan provided the participant had at least ten years of credited service at the date of disability.

Such benefit equals the benefit calculated as for deferred vested retirement, based on the participant's credited service and compensation at the month of disability.
