## **Schedule SB, line 22 - Description of Weighted Average Retirement Age**

The age reported is the weighted average of the Normal Retirement Ages for all active employees as of the valuation date, rounded to the nearest whole age. The weighting is based on the total IRC 430 funding liability for the employee compared to the total liability for all active employees. For an active late retiree, the assumed retirement age may be later than the Plan's Normal Retirement Age. Each participant's rate of retirement is assumed to be 100% at his or her assumed retirement age.

## **Schedule SB, line 25 – Change in Method**

The following method change occurred:

- There is a change in the funding method for the plan year that qualifies for automatic approval under Revenue Procedure 2017-56, Section 4.01 (“Approval for change in funding method for takeover plans”). Both the enrolled actuary for the plan and the business organization providing actuarial services to the plan have changed since the prior plan year. The funding target, target normal cost (without regard to any adjustments for employee contributions and plan-related expenses) and actuarial value of assets, as determined by the new valuation software and actuary as of the valuation date for the prior plan year, are within 3% and 2% of those values as determined by the prior valuation software. The other requirements of Section 4.01 are also satisfied.
