Summary of Actuarial Assumptions and Method

Plan Year: 1/1/2024 to 12/31/2024

Valuation Date: 12/31/2024

Rationale for Selection of Actuarial Assumptions

1

While preparing this valuation, we used economic assumptions. These assumptions may include inflation, investment return, discount rate, compensation scales, social security benefits, cost-of-living adjustments, growth of individual account balances, and variable conversion factors for forms of payment. Some of these may have been prescribed by Law or limited by Law. For example, qualified retirement plans may not consider compensation above an annually adjusted limit. Economic assumptions are listed in the Summary of Actuarial Assumptions section of the valuation report if an assumption was determined to be material for the valuation results.

Whereas each economic assumption used that was not prescribed by Law represents an estimate of future experience or the estimates inherent in financial market data, they were chosen as the best reasonable estimate to represent the anticipated experience of the Plan for this valuation. These assumptions may be different than prior valuations and may change for future valuations for this Plan. If there was a change in an assumption from the preceding valuation, it was to improve the assumptions to reflect better the expectations of the Plan, given more information is available since the prior valuation. Events after each valuation date do not impact the economic assumptions considered for that valuation.

In addition to economic assumptions, demographic and noneconomic assumptions were used in preparing this valuation. These assumptions may include the timing of participants' retirement, termination of employment, the chance of becoming disabled, and their possible elected form of benefit payments. These may be tables with many factors or single points of estimation. In addition, mortality tables (improved by either fixed amounts for the year or 2D projected improvements for individual adjustments), plan expenses, employees' service hours (for future employment), marriage, and estimates to complete missing participant data, like incomplete service history, were considered. Some of these may have been prescribed by Law or limited by Law. For example, small-qualified plans are required to use a specific set of mortality tables for the Internal Revenue Code's and ERISA's Minimum Funding Requirements. Noneconomic assumptions are listed in the Summary of Actuarial Assumptions section of the valuation report if the assumption was determined to be material for the valuation results.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
