INDEPENDENT AUDITOR'S REPORT

To the Participants and Plan Administrator of the Allstate Retirement Plan
Northbrook, Illinois

Opinion on the 2024 Financial Statements

We have audited the financial statements of the Allstate Retirement Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statement of net assets available for benefits as of December 31, 2024, and the related statement of changes in net assets available for benefits for the year then ended and the statement of accumulated plan benefits as of December 31, 2023, and the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements (2024 financial statements).

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2024, and the changes in its net assets available for benefits for the year then ended, and the accumulated plan benefits as of December 31, 2023, and the changes in its accumulated plan benefits for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion on the 2024 Financial Statements

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the 2024 Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the 2024 Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year from the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

(Continued)

Auditor's Responsibilities for the Audit of the 2024 Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

2024 Supplemental Schedules Required by ERISA

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of Schedule H, Line 4i - Schedule of Assets (Held at End of Year) as of December 31, 2024, Schedule H, Line 4i - Schedule of Assets (Acquired and Disposed of Within Year) for the year ended December 31, 2024, and Schedule H, Line 4j - Schedule of Reportable Transactions for the year ended December 31, 2024, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

(Continued)

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Other Matter

Auditor's Report on the 2023 Financial Statements

The 2023 financial statements of the Allstate Retirement Plan were audited by predecessor auditors whose report dated September 13, 2024, expressed an unmodified opinion on those financial statements and included an other-matter paragraph that provided an opinion that the information in the 2023 supplemental schedules were fairly stated in all material respects in relation to the financial statements as a whole.

Notes to Financial Statements

As of and for the Years Ended December 31, 2024 and 2023

1. Plan Description

The following description of the Allstate Retirement Plan (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General — The Plan is a noncontributory defined benefit pension plan, established January 1, 1946, sponsored by The Allstate Corporation (the “Company”). The Company sponsors the Plan for the benefit of employees and employee-agents of Allstate Insurance Company. All regular full-time and regular part-time employees of Allstate Insurance Company and participating affiliated companies automatically become participants in the Plan after completing one year of employment, provided they are at least 21 years old. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”), as amended.

Effective for the plan year beginning January 1, 2023, the Company elected to utilize the full yield curve method for funding purposes. The change in interest rate methodology did not change the cash funding requirement, which remained at \$0, but it did allow the Plan to adopt an alternative approach for calculating the interest rate used in determining the Pension Benefit Guaranty Corporation (“PBGC”) premiums. PBGC premiums are paid annually and calculated using a prescribed methodology that incorporates interest rates to discount a plan’s vested benefit. As a result of the election, the Company received a premium refund of \$38 million in 2024 for premiums previously paid for the 2023 plan year. This refund is shown as Premium refund receivable in the Statement of Net Assets Available for Benefits as of December 31, 2023. Additional information is available in Note 6, Priorities Upon Termination of the Plan.

Administration — The Plan is administered by an Administrative Committee. The investment of Plan assets is the responsibility of the Plan’s Investment Committee. The Investment Committee has named Allstate Investment Management Company as the Plan’s investment manager. Members of the Administrative and Investment Committees are appointed by the Pension Committee. The Pension Committee is comprised of various Allstate Insurance Company officers as described in the Plan.

Trustee of the Plan — The Trustee of the Plan is The Bank of New York Mellon (the “Trustee”). The Trustee holds the Plan’s investment assets.

Pension Benefits — Benefits vest for Plan participants upon the earlier of attaining three years of credited service or reaching normal retirement age and are earned in the form of pay credits and interest credits. The amount of retirement benefits is based on length of service and compensation level. Retirement benefits are paid in various annuity forms, including straight life and joint and survivor annuities. The lump sum is also an optional form of payment.

The Plan’s normal retirement date is age 65 (with certain transitions for Plan members on December 31, 1988). For participants with Final Average Pay Benefits, early retirement is permitted after age 55 and 20 years of continuous service. In the case of an early retirement, the normal retirement date benefit is reduced by a formula based on the number of months between actual and normal retirement dates. Vested benefits are payable following termination of employment.

The Plan provides a death benefit equivalent to the present value of the deceased active participant’s accumulated retirement benefit (in lieu of retirement benefits).

2. Summary of Significant Accounting Policies

Basis of Accounting — The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP").

Use of Estimates — The preparation of financial statements in conformity with GAAP requires estimates and assumptions to be made that affect the reported amounts of assets, liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties — The Plan utilizes various investment securities including equity securities, government bonds, corporate bonds, derivatives, limited partnership interests, bank loans and short-term investments. These investments are subject to market risk, the risk that losses will be incurred due to adverse changes in equity prices, credit spreads and interest rates, and macroeconomic factors, including fiscal and monetary policy, and risks associated with global events. It is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Actuarial Present Value of Accumulated Plan Benefits — Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions, based on the service employees have rendered as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) active employees or their beneficiaries. Benefits payable under all circumstances including retirement, death and termination of employment are included to the extent they are deemed attributable to employee service rendered as of the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The effect of Plan amendments on accumulated plan benefits is recognized during the year in which such amendments are adopted.

The significant assumptions underlying the actuarial computations were as follows:

December 31,	2023	2022
Expected long-term rate of return	7.50%	7.50%
Mortality rates	Pri-2012 White Collar mortality table including incorporation of the contingent annuitant tables and projected generationally using Scale MP-2021.	Pri-2012 White Collar mortality table including incorporation of the contingent annuitant tables and projected generationally using Scale MP-2021.
Lump sum mortality rates	417(e) year-specific static mortality table used for 2024; for 2025 and after, PPA 2025 optional combined table with a static projection to each commencement age using MP-2021.	417(e) year-specific static mortality table used for 2023; for 2024 and after, PPA 2023 optional combined table with a static projection to each commencement age using MP-2021.
Cash balance interest crediting rate	Interest crediting rate applicable for the current plan year (4.28% - August 2023 30-year treasury rate) and 4.03% for future years, based on the 30-year treasury rate at January 1, 2024.	Interest crediting rate applicable for the current plan year (3.13% - August 2022 30-year treasury rate) and 3.97% for future years, based on the 30-year treasury rate at January 1, 2023.
Retirement rates	Rates of retirement from ages 55 through 71 and above	Rates of retirement from ages 55 through 71 and above
Form of payment	70% lump sum and 30% annuity for Final Average Pay Deferred Vested benefits, 80% lump sum and 20% annuity for Final Average Pay Actives benefits and 100% lump sum for Cash Balance benefits	70% lump sum and 30% annuity for Final Average Pay Deferred Vested benefits, 80% lump sum and 20% annuity for Final Average Pay Actives benefits and 100% lump sum for Cash Balance benefits
Segment rates used for lump sum benefits	417(e) segment rates applicable for the current plan year (August 2023 - 5.45% / 5.52% / 5.43%) and the ASC 715 discount rate as of December 31, 2023 for future years (5.40%)	417(e) segment rates applicable for the current plan year (August 2022 - 3.79% / 4.62% / 4.69%) and the ASC 715 discount rate as of December 31, 2022 for future years (5.69%)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Investments — Gains or losses on sales of investments are determined on a specific identification basis. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recognized on the accrual basis and dividends are recorded on the ex-dividend date. Net appreciation (depreciation) in fair value of investments includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Government bonds and corporate bonds are carried at fair value.

Short-term investments, including commercial paper, money market funds, and U.S. Treasury bills are carried at fair value.

Equity securities are carried at fair value and comprise investments made either directly in securities or through equity fund investments. Equity fund investments comprise index-based funds, actively managed funds, and other funds carried at fair value utilizing the net asset value ("NAV") as practical expedient to determine fair value.

Investments in limited partnership interests, including interests in private equity funds, real estate funds, actively managed funds, and hedge funds, are carried at fair value, utilizing NAV to determine fair value. The limited partnerships allocate gains, losses and expenses based on each partner's ownership percentage, as described in the partnership agreements. As of December 31, 2024 and 2023, the Plan had future commitments for additional contributions to limited partnership interests totaling \$301 million and \$287 million, respectively.

Derivatives are carried at fair value, which is based on quoted prices or widely accepted pricing valuation models. Changes in the fair value and periodic accrual and settlement activities are accounted for as net appreciation (depreciation) in fair value of investments (see Note 8).

Bank loans are carried at fair value.

Securities Lending — The Plan records the obligation to return collateral received in connection with its securities lending activities at the amount of collateral received. The carrying value of the obligation approximates fair value because of its relatively short term nature. Income on the arrangements is recorded net of expenses as dividend and interest income (see Note 4).

Payment of Benefits — Benefit payments to participants are recorded upon distribution.

Administrative Expenses — Certain administrative expenses are borne by the Plan, while others are borne by the Plan sponsor and/or participating employers. Expense amounts borne by the Plan sponsor and/or participating employers have not been included in these financial statements. Certain investment-related expenses are included in dividend and interest income presented on the accompanying statements of changes in net assets available for benefits.

Subsequent Events — Subsequent events were evaluated through September 24, 2025, the date the financial statements were available to be issued. On January 30, 2025, Allstate entered into an agreement with Nationwide Life Insurance Company (“Buyer”) to sell Direct General Life Insurance Company, NSM Sales Corporation and The Association Benefits Solution, LLC, comprising Allstate’s group health business. The transaction closed on July 1, 2025. On June 13, 2025, the Plan’s Pension Committee approved an amendment to the Plan to provide employees who transfer their employment to the Buyer in conjunction with the sale full vesting in their Cash Balance Account as of the date of transfer.

3. Funding Policy

Contributions to the Plan are made solely by the Plan sponsor and/or participating employers. The funding policy of the Plan sponsor and/or participating employers is to make the minimum required contribution and determine from time to time whether to make additional contributions. The Plan sponsor may deviate from this policy based on cash, tax or other considerations. The minimum funding requirements of ERISA have been met for the 2024 and 2023 Plan years.

4. Investments

Investments reported at NAV — The following table provides information regarding equity securities and limited partnership interests held by the Plan as of December 31, 2024 and 2023 where fair value is estimated based on NAV:

- ⁽¹⁾ Index based funds consist of collective trust funds that seek an investment return that approximates as closely as possible, before expenses, the performance of the stock market index that they are based on. The funds may invest directly or indirectly in securities and other instruments, including other pooled investment vehicles sponsored or managed by their respective trustees. Deposits into and withdrawals from the funds can be requested at least monthly. The trustee of each fund reserves the right to delay the processing of a Participant's requested deposit to or withdrawal from the fund in order to ensure that securities transactions will be carried out in an orderly manner. As of December 31, 2024, the Plan had no unfunded future commitments for additional contributions to these funds.
- ⁽²⁾ Actively managed funds consist primarily of funds that seek an investment return in excess, before expenses, of the performance of their benchmark index. Deposits into and withdrawals from the funds can be requested at least monthly. The trustee of each fund reserves the right to delay the processing of a Participant's requested deposit to or withdrawal from the fund in order to ensure that securities transactions will be carried out in an orderly manner. As of December 31, 2024, the Plan had no unfunded future commitments for additional contributions to these funds.
- ⁽³⁾ Private equity funds primarily pursue buyout and growth strategies. These investments are generally not redeemable by the investees and generally cannot be sold without approval of the general partner. The Plan receives distributions of income and proceeds from the liquidation of the underlying assets of the investees, which usually takes place in years 4-9 of the typical contractual life of 10-12 years. As of December 31, 2024, the Plan had future commitments for additional contributions to these funds totaling \$208 million.
- ⁽⁴⁾ Real estate funds invest primarily in commercial real estate. These investments are generally not redeemable by the investees and generally cannot be sold without approval of the general partner. The Plan receives distributions of income and proceeds from the liquidation of the underlying assets of the investees, which usually takes place in years 4-9 of the typical contractual life of 10-12 years. As of December 31, 2024, the Plan had future commitments for additional contributions to these funds totaling \$93 million.
- ⁽⁵⁾ Hedge funds consist primarily of funds that seek to achieve superior risk-adjusted returns by investing in securities or obligations of financially distressed or over-leveraged companies. As of December 31, 2024, the Plan had no unfunded future commitments for additional contributions to these funds.

Securities Lending — The Plan participates in securities lending programs with third parties, mostly large banks. The Plan receives cash collateral for securities loaned in an amount generally equal to 102% and 105% of the fair value of domestic and foreign securities, respectively, and records the related obligations to return the collateral as liabilities. The Plan monitors the market value of securities loaned on a daily basis and obtains additional collateral as necessary under the terms of the agreements to mitigate counterparty credit risk. The Plan maintains the right and ability to repossess the securities loaned on short notice.

Government bonds and corporate bonds with an aggregate carrying value of \$151 million and \$172 million as of December 31, 2024 and 2023, respectively, were on loan under these agreements. In return, the Plan receives cash collateral that it invests in short-term investments. Interest income on collateral, net of fees, was \$481 thousand and \$346 thousand in 2024 and 2023, respectively.

5. Fair Value of Assets and Liabilities

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Assets and liabilities recorded on the Statements of Net Assets

Available for Benefits at fair value are categorized in the fair value hierarchy based on the observability of inputs to the valuation techniques as follows:

Level 1: Assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Plan can access.

Level 2: Assets and liabilities whose values are based on the following:

- a. Quoted prices for similar assets or liabilities in active markets;
- b. Quoted prices for identical or similar assets or liabilities in markets that are not active; or
- c. Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Plan's estimates of the assumptions that market participants would use in valuing the assets and liabilities.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. The degree of judgment exercised by the Plan in determining fair value is typically greatest for instruments categorized in Level 3. In many instances, valuation inputs used to measure fair value fall into different levels of the fair value hierarchy. The category level in the fair value hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Plan uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments.

The Plan is responsible for the determination of fair value and the supporting assumptions and methodologies. The Plan gains assurance that assets and liabilities are appropriately valued through the execution of various processes and controls designed to ensure the overall reasonableness and consistent application of valuation methodologies, including inputs and assumptions, and compliance with accounting standards. For fair values received from third parties or internally estimated, the Plan's processes and controls are designed to ensure that the valuation methodologies are appropriate and consistently applied, the inputs and assumptions are reasonable and consistent with the objective of determining fair value, and the fair values are accurately recorded. For example, on a continuing basis, the Plan assesses the reasonableness of individual fair values that have stale security prices or that exceed certain thresholds as compared to previous fair values received from valuation service providers or brokers or derived from internal models. The Plan performs procedures to understand and assess the methodologies, processes and controls of valuation service providers. In addition, the Plan may validate the reasonableness of fair values by comparing information obtained from valuation service providers or brokers to other third party valuation sources for selected securities. The Plan performs ongoing price validation procedures such as back-testing of actual sales, which corroborate the various inputs used in internal models to market observable data. When fair value determinations are expected to be more variable, the Plan validates them through reviews by its investment manager who has relevant expertise.

There are two types of situations where Plan investments are classified as Level 3 in the fair value hierarchy. The first situation, where specific inputs significant to the fair value estimation models are not market observable, primarily occurs in the Plan's use of valuation models using significant non-market observable inputs. The second situation, where the Plan classifies securities in Level 3, is when quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

In determining fair value, the Plan principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Plan uses the income approach which involves determining fair values from discounted cash flow methodologies and reported net asset values. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Summary of significant valuation techniques for assets and liabilities measured at fair value on a recurring basis

Level 1 measurements

- *Government bonds* — Comprise certain U.S. Treasury fixed income securities that are valued based on unadjusted quoted prices for identical assets in active markets that the Plan can access.

- *Short-term investments* — Comprise U.S. Treasury bills valued based on unadjusted quoted prices for identical assets in active markets that the Plan can access and actively traded money market funds that have daily quoted net asset values for identical assets that the Plan can access.
- *Equity securities* — Comprise actively traded, exchange-listed equity securities. Valuation is based on unadjusted quoted prices for identical assets in active markets that the Plan can access.
- *Investment sales receivable and investment purchases payable* — Comprise free-standing exchange-listed derivatives that are valued based on unadjusted quoted prices for identical assets in active markets.

Level 2 measurements

- *Government bonds* — Comprise primarily U.S. government and agency bonds and foreign government bonds. The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.
- *Corporate bonds, including privately placed* — The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.
- *Free-standing derivatives* — Exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active.

Over-the-counter ("OTC") derivatives, including interest rate swaps, foreign exchange forward contracts, certain options and certain default swaps, are valued using models that rely on inputs such as interest rate yield curves, implied volatilities, index price levels, currency rates, and credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

- *Short-term investments* — Comprise primarily commercial paper where the primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. For certain short-term investments, amortized cost is used as the best estimate of fair value.

Level 3 measurements

- *Bank loans* — Syndicated corporate loans originated by banks, which are then transferred to the Plan via assignment. The primary inputs to the valuation are based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

Investments excluded from the fair value hierarchy

- *Assets where fair value is estimated based on NAV* — Limited partnership interests and equity fund investments carried at fair value, which do not have readily determinable fair values, use NAV provided by the investees.

The following tables summarize the Plan's assets measured at fair value on a recurring basis. There were no assets measured at fair value on a non-recurring basis as of December 31, 2024 or 2023.

For the year ended December 31, 2024, there were purchases of \$95 million and settlements of \$14 million related to bank loans. There were no transfers into or out of Level 3 assets during 2024 or 2023.

6. Priorities Upon Termination of the Plan

The Pension Committee reserves the right to change the benefit formula, and the Company reserves the right to terminate the Plan and to discontinue contributions. In the event of termination, the assets of the Plan are to be distributed in an order of priority determined in accordance with ERISA and its applicable regulations and with the Plan document.

Pension Benefit Guaranty Corporation — Annual premiums are paid to the PBGC, an agency of the federal government, which protects certain Plan benefits in the event of Plan termination. Generally, the PBGC guarantees most vested, normal-age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit and certain other limitations.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency of the Plan's net assets to provide these benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

7. Income Tax Status

The Plan obtained its latest determination letter dated August 27, 2021, in which the IRS states that the Plan, as then designed, and related trust (the Allstate Retirement Plan Trust) were in compliance with the applicable requirements of the Internal Revenue Code ("IRC"). The Plan has been amended since receiving the August 27, 2021 determination letter. The Plan's management believes that the Plan is currently designed and is being operated in compliance with the applicable requirements of the IRC. The plan and related trust continue to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

8. Derivative Financial Instruments

In accordance with the Plan's investment policy, the Plan may use derivatives to manage risks with certain assets arising from the potential adverse impacts from changes in risk-free interest rates, changes in equity market valuations, and for asset replication.

The Plan uses interest rate futures to manage the interest rate risks of existing investments, to reduce exposure to changing interest rates and to create synthetic exposure of treasury securities in lieu of purchasing the treasury securities. Equity index futures and options are used to reduce exposure to equity markets and to create synthetic exposure in lieu of purchasing equity securities. Daily changes in the fair value of the futures contracts are settled in cash, with the associated payment or receipt occurring on the next business day. The Plan enters into total return swaps to create synthetic exposure to fixed income or equity markets. The swaps typically have a one month term and the daily changes in the fair value of the swaps are cash settled upon maturity. The Plan uses forward contracts to hedge foreign currency risk associated with holding foreign currency denominated investments. The Plan does not use hedge accounting for its derivatives and therefore changes in the market values of derivative instruments are recognized as net appreciation (depreciation) in fair value of investments in the Statements of Changes in Net Assets Available for Benefits.

Fair value, which is equal to the carrying value, is the estimated amount that the Plan would receive or pay to terminate the derivative contracts at the reporting date. The carrying value amounts for OTC derivatives are further adjusted for the effects, if any, of legally enforceable master netting agreements ("MNAs") and are presented on a net basis, by counterparty agreement, in the Statements of Net Assets Available for Benefits.

The following tables provide a summary of the volume and fair value positions of derivative instruments as well as their reporting location in the Statements of Net Assets Available for Benefits.

The Plan manages its exposure to credit risk by utilizing highly rated counterparties, establishing risk control limits, executing MNAs and obtaining collateral where appropriate. The Plan uses MNAs for OTC derivative transactions that permit either party to net payments due for transactions and collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. As of December 31, 2024, counterparties pledged \$8 million cash collateral to the Plan and the Plan pledged \$6 million in securities collateral to counterparties. As of December 31, 2023, counterparties did not pledge cash collateral to the Plan and the Plan pledged \$8 million of securities collateral to counterparties. The Plan has not incurred any losses on derivative financial instruments due to counterparty nonperformance. Other derivatives, including futures and certain option contracts, are traded on organized exchanges which require margin deposits and guarantee the execution of trades, thereby mitigating any potential credit risk.

Counterparty credit exposure represents the Plan's potential loss if all of the counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the fair value of OTC derivative contracts with a positive fair value at the reporting date reduced by the effect, if any, of MNAs.

The following table summarizes the counterparty credit exposure by counterparty credit rating as it relates to the Plan's OTC derivatives.

(\$ in millions)	December 31, 2024				December 31, 2023			
	Number of counterparties	Notional amount ⁽²⁾	Credit exposure ⁽²⁾	Exposure, net of collateral ⁽²⁾	Number of counterparties	Notional amount ⁽²⁾	Credit exposure ⁽²⁾	Exposure, net of collateral ⁽²⁾
Rating ⁽¹⁾								
AA-	1	\$ 31	\$ 1	\$ —	—	\$ —	\$ —	\$ —
A+	2	229	8	1	—	—	—	—

⁽¹⁾ Rating is the lower of S&P or Moody's ratings.

⁽²⁾ Only OTC derivatives with a net positive fair value are included for each counterparty.

For certain exchange traded derivatives, the exchange requires margin deposits as well as daily cash settlements of margin accounts. As of December 31, 2024 and 2023, the Plan pledged \$49 million and \$34 million, respectively, of cash and securities in the form of margin deposits.

9. Related-Party Transactions and Party-In-Interest Transactions

Any fees paid by the Plan to any Plan service providers (e.g., trustee, recordkeepers, actuary, auditors, investment managers, investment advisors) are considered exempt party-in-interest transactions. Certain investments held by the Plan were also issued (or managed) by several of the Plan's investment managers and therefore, these are considered parties in interest investments.

Economic Assumptions

Interest rate basis

- Applicable month December
- Interest rate basis Full Yield Curve

Interest rates

- 10-year rate 5.07%
- 20-year rate 5.22%
- 30-year rate 5.17%
- Effective interest rate 5.14%

As permitted by law, a yield curve reflecting returns on high quality corporate bonds (A, AA and AAA) is used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are prescribed by law and reflect current market conditions (specifically, the average market conditions for the month preceding the valuation date) they may from time to time be inconsistent with other economic assumptions used in the valuation, which may reflect both current economic conditions and assumed future conditions.

assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date

First day of plan year

Funding target

Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost

Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets for determining minimum required contributions

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 7.50% for 2023 and 7.25% for 2022 (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year). The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued.

Willis Towers Watson has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any other significant benefits required to be valued that were not.

The plan pays small benefits (with a present value up to \$5,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

The minimum cash balance benefit is assumed not to apply.

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of 1/1/2024. Information on assets, contributions and plan provisions was supplied directly by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Cash Balance Interest crediting rate

The plan credits interest to cash balance accounts using the 30-year Treasury rate as of August preceding the plan year.

The long-term estimate of the cash balance interest crediting rate is equal to the spot rate applicable on the last day of the prior plan year.

Lump sum conversion rate

As required by IRC §430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate.

Annuity conversion rate for hybrid plans

As required by IRC §430, annuity benefits are valued by converting accounts to annuities using the current IRC §430 interest rates, so that the interest rates assumed are effectively the same as described above for the discount rate.

SCHEDULE SB ATTACHMENTS

Compensation increases	Assumed compensation increases (where applicable) are based on long-term compensation policy and plan sponsor expectations based on an experience study conducted in 2019.
Assumed return for asset smoothing	The assumed return used for asset smoothing is the expected return on assets assumption chosen by the client for U.S. GAAP.
Administrative expenses	The amount is determined each year based on the current year estimated PBGC premium plus an estimate of non-PBGC administrative expenses (which included consideration of administrative expenses paid in the prior year).

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on an experience study conducted in 2019 and future expectations. Assumed termination rates differ by age and benefit formula because of observed differences in termination rates. Termination rates for at-risk funding calculations are as required by IRC §430.
Retirement	Retirement rates were based on an experience study conducted in 2019 and future expectations. Retirement rates for at-risk funding calculations are as required by IRC §430. Retirement rates differ by benefit formula because of observed differences in retirement rates.
Form of payment/benefit commencement date	The percentage of participants assumed to commence their benefit and the form of payment chosen is a long-term assumption based on an experience study conducted in 2019 and future expectations.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

**Change in assumptions
since prior valuation**

The full corporate bond yield curve used to calculate the funding target and target normal cost was updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target and target normal cost was changed from using a static projection of mortality improvement to a generational projection as required by guidance issued by IRS under IRC §430.

The cash balance interest crediting rate was updated to the rate applicable for the current plan year and long-term rate based on 30-year treasury spot rate as of the last day of prior plan year.

**Change in methods
since prior valuation**

None.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions

The plan was most recently amended effective January 1, 2022. The Agents Pension Plan (APP) was merged into the Allstate Retirement Plan on March 31, 2019. The APP provisions are shown in a separate Appendix later in this report.

Covered employees	The following employees of Participating Employers are covered: 1) Regular Full-Time Employees 2) Regular Part-Time Employees 3) Employee Agents (Beginning January 1, 2014)
Participating Employers	Allstate Insurance Company and the Allstate New Jersey Insurance Company
Participation date	Date of becoming a covered employee and attaining Age 21 with one year of Vesting Service (with 1,000 hours of employment for Part-Time Employees)

Plan Provisions: Cash Balance Formula

The cash balance formula applies to the following participants:

- 1) Active participants as of December 31, 2002 who elected the cash balance formula
- 2) New active participants after January 1, 2003
- 3) Effective January 1, 2014 participants who elected the final average pay formula as of December 31, 2002.

Definitions: Cash Balance Formula

Vesting service	All periods of employment as an Employee with the Employer or Controlled Group member
Pensionable pay	Salary, overtime pay, bonuses, pay for Paid Time Off, holiday pay, Employer payments for short-term disability, and pre-tax Employee contributions to an Employer sponsored benefit plan.
Normal retirement date (NRD)	Last day of the month coinciding with or next following the attainment of age 65.

Cash balance account Sum of Opening Account Balance plus Pay Credits and Interest Credits.

Opening account balance For participants as of December 31, 2002 who opted for the Cash Balance provisions, the Opening Account Balance is equal to the present value of their accrued benefit as of that date using a 6.25% interest rate and the 1994 GAR mortality table. Otherwise the opening account balance is zero.

Pay credits Pay credits are added to the Cash Balance Account on a quarterly basis.

Effective January 1, 2014

Vesting Service	Pay Credit
Less than 5 Years ¹	3.0%
5 Years but less than 15 Years	4.0%
15 or more Years	5.0%

¹ A minimum pay credit applies when the Interest Crediting Rate is less than 2.05%. The minimum pay credit is 3.75% divided by the quantity (one plus the Annual Interest Crediting Rate) to the power of 15 less the truncated number of Years of Vesting Service.

A different schedule applied for years prior to January 1, 2014.

Interest credits Interest credits are added on a daily basis based on the average annual 30-year Treasury Bond yield as of August preceding the plan year.

Actuarial Equivalence The basis used to convert the Cash Balance account to a life annuity is the applicable interest rate and mortality table under Section 417(e) of the Code for the month of August preceding the year of distribution.

The life annuity is converted into other optional forms of payment using the applicable mortality table under Section 417(e) of the Code and 7.00% interest.

Eligibility for Benefits: Cash Balance Formula

Termination benefits	Completion of 3 years of Vesting Service
Preretirement death benefit	Death while active or from deferred vested status

Benefits Paid Upon the Following Events: Cash Balance Formula

Termination / Death	Cash balance account or actuarially equivalent annuity. For active participants as of December 31, 2002 with an Opening Account Balance, the Cash Balance payable will never be less than the December 31, 2002 Final Average Pay accrued benefit.
----------------------------	---

Other Plan Provisions: Cash Balance Formula

Forms of payment	The normal form of payment is a monthly life annuity for single participants or a 50% joint and survivor annuity for married participants or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan. Optional forms are a lump sum of the cash balance account, a 100% or 75% joint and survivor annuity, a 50% contingent annuity, a ten-year certain and 50% joint and survivor annuity, a ten-year certain and life annuity, or (for married participants) a life annuity.
-------------------------	--

Plan Provisions: Final Average Pay Benefits

The final average pay provisions apply to participants as of December 31, 2002 who elected to remain under the final average pay formula rather than changing to the cash balance formula.

Effective December 31, 2013 the final average pay formula was frozen and all future benefit accruals will be earned under the cash balance formula.

Plan Provisions: Final Average Pay Benefits

Vesting service	All periods of employment as an Employee with the Employer or Controlled Group member
Credited service	Period of employment as a Regular Full-Time Employee, or when you qualify as a Regular Part-Time employee. A maximum of up to 28 Years of Credited Service is used to determine the Final Average Pay Benefit. Credited Service was frozen effective December 31, 2013.

The Post-1988 Additional benefit is reduced 8.0% for each year of early payment from age 65 to 62 and 4.0% prior to age 62.

The 1978-1988 Benefit, Pre-1978 Benefit, and Past Service Element are unreduced at age 60. They are reduced 4.8% for each year of early payment prior to age 60.

Postponed retirement

Normal Retirement Benefit. The plan provides for suspension of benefits notices to active participants upon attaining age 65, so no late retirement increases apply. Deferred vested participants past NRD receive late retirement increases.

Deferred vested termination

Normal Retirement Benefit. The benefit is payable at NRD or a reduced amount as early as age 55 with early retirement reductions for participants with over 20 Years of Credited Service or age 60 for participants prior to January 1, 1989.

Disability

Normal Retirement Benefit reduced for early payment. The disability benefit may commence as early as age 50 with early retirement reductions.

Preretirement death benefit

Deferred vested death: A lump sum equal to the actuarial equivalent value of 50% of the Normal Retirement Benefit.

Active death or plan participant prior to January 1, 1989: A lump sum equal to the actuarial equivalent value of 100% of the Normal Retirement Benefit. If eligible for retirement the death benefit will not be less than the actuarial equivalent value of the retirement benefit on your date of death.

If the lump sum value exceeds \$3,500 the spouse may elect an actuarial equivalent annuity rather than the lump sum.

Other Plan Provisions: Final Average Pay Benefits

Forms of payment

The normal form of payment is a monthly life annuity for single participants or a 50% joint and survivor annuity for married participants or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan.

Optional forms are a lump sum of the final average pay benefit, a 100% or 75% joint and survivor annuity, a 50% contingent annuity, a ten-year certain and 50% joint and survivor annuity, a

Allstate Retirement Plan: Former Agents Pension Plan Benefits

Plan Provisions

The most recent amendment reflected in the following plan provisions was adopted and effective on May 11, 2015. The Agents Pension Plan was merged into the Allstate Retirement Plan on March 31, 2019.

Covered employees An agent will become a participant in the plan as of the January 1 of the year in which he has both attained age 21 and completed one year of service. Individuals who were participants under prior provisions of the plan remain participants under the plan as amended.

The plan is closed to new entrants effective January 1, 2014.

Participation date Date of becoming a covered employee.

Definitions

Vesting service Vesting Service is measured by the years and months of service prior to severance from service date. A leave of absence granted by the employer will qualify as vesting service.

Pension service Credited Service is measured by the years and months of service prior to severance from service date. A leave of absence granted by the employer will qualify as credited service.

Credited Service is frozen as of December 31, 2013.

Pensionable pay Annual compensation is the total cash compensation paid to an agent during a calendar year. Compensation considered for plan years after 1988 shall not exceed \$200,000 (adjusted for each plan year as allowed); compensation for plan years after 1993 shall not exceed \$150,000 (as adjusted).

Social Security benefit Social Security Benefit is the estimated Social Security amount payable at age 65, calculated based on the plan provisions in effect on December 31, 1988.

Normal retirement date (NRD) The last day of the month in which the participant attains age 65.

Preretirement death

Upon the death of an active participant, with the spouse's consent, a lump sum benefit equal to the present value of the employee's accrued benefit as of the date of death will be paid to the designated beneficiary. If the lump sum exceeds \$5,000, the beneficiary is offered an optional annuity of equivalent actuarial value.

If a former employee who first became a participant in the plan before January 1, 1989 terminated employment with vested rights to a deferred benefit dies before his pension payments have commenced, the present value of his deferred benefit, with the spouse's consent, will be paid to his designated beneficiary in the form of a lump sum. If such employee became a participant on or after January 1, 1989, his designated beneficiary shall receive an amount equal to 50% of the present value of his deferred benefit.

Other Plan Provisions

Forms of payment

The normal form of payment is a monthly life annuity for single participants or a 50% joint and survivor annuity for married participants.

The participant may elect, with spousal consent, another actuarially equivalent optional form offered by the plan. Optional forms are a lump sum, a 100% or 75% joint and survivor annuity, a 50% contingent annuity, a 50% joint and survivor annuity with a ten-year certain period, a ten-year certain and life annuity, or (for married participants) a life annuity.

Maximum Limits on Benefits and Pay

Compensation for any calendar year may not exceed the maximum limitation for that year as defined in the Internal Revenue Code. Accrued benefits may not exceed the maximum limitation as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes take effect, however, increases in the dollar limits are not assumed for funding or AFTAP purposes.

Future Plan Changes

No future plan changes were recognized. Willis Towers Watson is not aware of any future plan changes that are required to be reflected.
